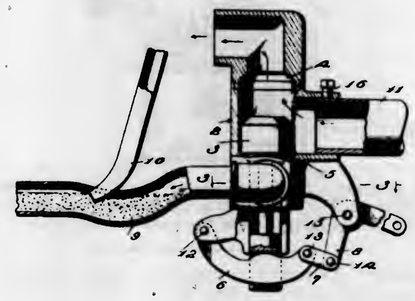
1. A hoisting apparatus of the character specified, including a frame comprising a slanting beam, oblique members of unequal height supporting the ends of said beam from the ground, a pulley secured to the lower end of said beam, a second pulley secured to the upper end of the higher oblique member, a carriage movable on said beam and provided with a pair of pulleys, a cable trained around

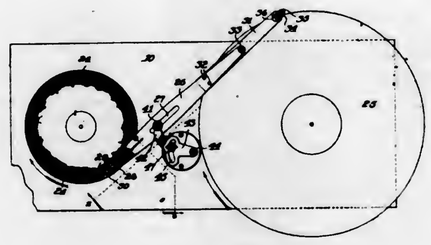
said pair of pulleys to form a loop, a running block arranged in said loop and having one end of said cable secured thereto, a winding drum from which said cable originates, said cable being trained around said second pulley

and around said first named pulley to provide thereby successively raising or lowering of the running block and lateral movement of said carriage on said beam upon proper rotation of said drum.



1,391,412. AUXILIARY TREAD FOR PNEUMATIC TIRES. GEORGE F. ROTH, Des Moines, Iowa. Filed July 9, 1920. Serial No. 394,909. 1 Claim. (Cl. 152—17.)

In a device of the class described, the combination of a pneumatic tire casing, having in its exterior tread surface an annular groove of substantial width extending circumferentially entirely around the casing, an annular protective tread member for said casing, having a central, substantially thick portion provided with an inwardly extending rib received in said groove, said groove and rib being provided with lugs and recesses adapted to co-act with each other, said thick portion being slightly wider than said groove, said tread member having relatively thin portions extending partly around the casing on each side thereof, a resilient substantially flat band received in said thicker portion of said tread member radially outwardly from said lugs and recesses, and resilient annular bands received in the thinner portions of said tread members.

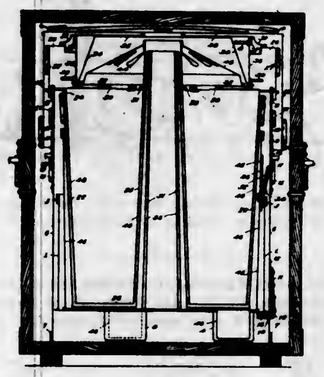


1,391,413. NON-SKID SAFETY DEVICE. NORVAL RUNSTETLER, Seattle, Wash. Filed Aug. 25, 1920. Serial No. 405,892. 1 Claim. (Cl. 291—3.)

In a sanding device for automobiles, a sand trap and means for delivering sand thereto, a valve casing adapted to be connected to the engine exhaust, and having two outlets, one being connected to said trap, said casing having two opposed seats, a plunger reciprocable in the

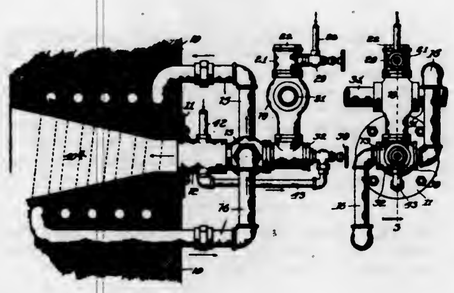
casing and having valves at its opposite ends adapted to seat selectively upon said valve seats, to permit normal exhaust or to admit air behind the sand in said trap to expel it.

1,391,414. ART OF REPRODUCING SOUND VIBRATIONS. HENRY K. SANDELL, Chicago, Ill., assignor to Herbert S. Mills, Chicago, Ill. Filed Apr. 4, 1919. Serial No. 287,420. 2 Claims. (Cl. 33—23.)



1. In apparatus for reproducing sound record grooves, means for rotatably supporting a blank and a master record, means for forming an impression in the moving blank, a resilient lever supporting said forming means and adapted to hold it in engagement with said blank, said lever having a variable pivot point, means for supporting said pivot point, guiding means attached to said lever and adapted to be held by it in engagement with the moving master record, and means for varying the resilient thrust of said lever upon said forming and guiding means.

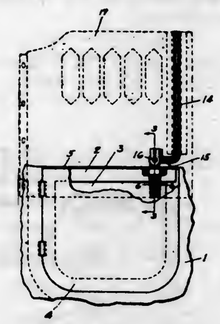
1,391,415. FIELD-STOVE. RUDOLPH I. SCHONITZER, Detroit, Mich., assignor of one-third to J. K. Williams, Springfield, Ohio. Filed Oct. 19, 1918. Serial No. 258,847. 15 Claims. (Cl. 126—9.)



1. A field stove comprising a fire box having an open top, a grate bottom, legs to support the fire box in an elevated position, a heating drum communicating with and rising from the open top of the fire box, said drum being provided near its top with an annular series of inlet draft

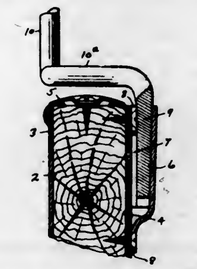
openings forming a communication between the atmosphere and the combustion space within the drum, a cooking

receptacle associated with the heating drum, and an offtake conduit for the products of combustion.



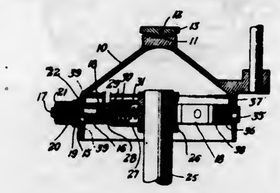
1,391,416. BURNER. EDWARD H. SCHWARTZ, Chicago, Ill., assignor to Edward H. Schwartz, Inc., Chicago, Ill., a Corporation of Illinois. Filed Oct. 9, 1920. Serial No. 415,835. 4 Claims. (Cl. 158—1.)

1. A fuel burner having an air chamber and a mixing chamber separated by a partition, means for supplying air to said air chamber, a hollow heating element surrounding said mixing chamber, piping leading from the air chamber to said heating element, piping leading from said heating element to said mixing chamber, and a fuel nozzle adapted to spray fuel into the stream of preheated air.



1,391,417. CURTAIN-SUPPORT FOR AUTOMOBILES. GEORGE W. SCOTT, Cleveland, Ohio. Filed Feb. 20, 1920. Serial No. 360,087. 1 Claim. (Cl. 296—139.)

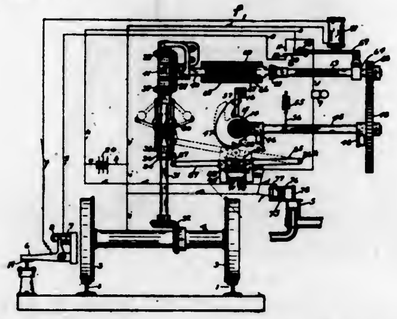
In a support of the character described, the combination with a hinged door, and a curtain, of a curtain support consisting of a socket member secured to said door, a polygonal-shaped rod having corners, the said support and rod being interchangeable as right and left hand members for the door, said rod having a part projecting laterally over the top edge of said door and a vertical part with an offset part between said first-mentioned parts, said rod being bendable for adapting same as a right or left hand rod, a shank projecting within said socket member, an engaging member on the shank, and means



for clamping said engaging member against the corners of said rod in the various positions assumed by said rod for the purpose specified.

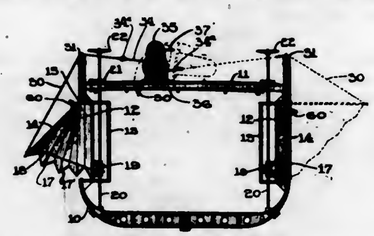
1,391,418. CURTAIN-SUPPORT. GEORGE W. SCOTT, Cleveland, Ohio. Filed Feb. 3, 1921. Serial No. 442,252. 2 Claims. (Cl. 296—139.)

1. In a structure of the character described, the combination, with a hinged door, of a sheet metal socket member secured to the inner side of said door, the body of said member being bent to form clamping portions comprising wings which lie against the surface of the door to prevent spreading.



1,391,419. TIMER. WILLIAM FFORD SERVICE, Poughkeepsie, N. Y., assignor, by mesne assignments, to Charles Hardy and Charles H. Potter, New York, N. Y. Filed Dec. 15, 1917. Serial No. 207,247. Renewed Feb. 19, 1920. Serial No. 359,849. 5 Claims. (Cl. 200—26.)

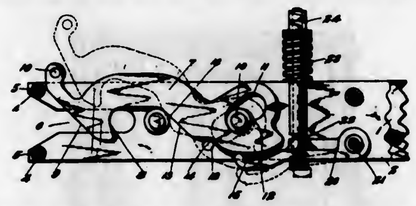
1. A timer comprising a housing, a ring of insulating material carried thereby, a plurality of contacts carried by said ring; a rotor operable for successively engaging said contacts, the rotor comprising a tubular part and a plunger part slidable within the tubular part, a coil spring urging the plunger part outwardly into surface engagement with said ring and contacts, said tubular part being adapted to contain a lubricant, and a wick arranged



within said coil spring and extending through said plunger part to the outer surface thereof adapted to feed lubricant from said tubular part to the rubbing surface of said ring and plunger.

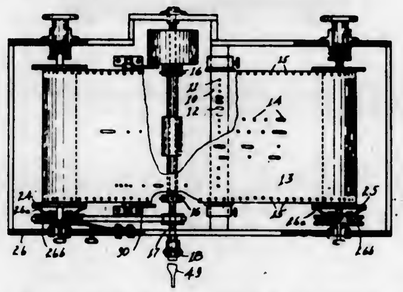
1,391,420. SPEED-CONTROL DEVICE FOR MOVING VEHICLES. PAUL J. SIMMEN, Buffalo, N. Y. Filed May 1, 1917. Serial No. 165,663. 5 Claims. (Cl. 246—182.)

3. In a railway automatic train speed control, in combination; a trackway; a device on the vehicle moved in accordance with the actual speed thereof; another device on the vehicle having an initial maximum condition and an ultimate minimum condition and moved after release by the movement of the vehicle in accordance with the permissible speed thereof; means governed by the conjoint action of the said devices whereby the speed of the vehicle is governed; means along the trackway for releasing the second device and being normally active to release; means along the trackway for restoring the second device to maximum condition, the last two mentioned means being positioned a distance apart longitudinally of the trackway such that any desired movement of the second mentioned device from maximum to minimum will be caused before restoration of the second mentioned device to maximum.



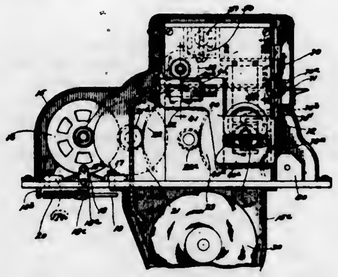
1,391,421. NON-SINKABLE SHIP. STANLEY SOKOLOWSKI and JAKOB FORGIEL, Taunton, Mass.. Filed Apr. 8, 1921. Serial No. 459,676. 5 Claims. (Cl. 114—68.)

1. A ship having a pocket in each side of the hull thereof, hinged doors flush with the hull closing said pockets, air tight bags in said pockets, ropes attached to the inner sides of said doors to hold the same closed, ropes attached to the outer sides of said doors to open the same, and means mounted on the deck of the ship for releasing said first ropes and pulling on said second ropes.



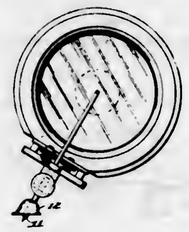
1,391,422. AUTOMATIC RELEASING-COUPLING. EDGAR J. SOLOMON, Peoria, Ill., assignor to Avery Company, Peoria, Ill., a Corporation of Illinois. Filed Jan. 25, 1919. Serial No. 273,103. 7 Claims. (Cl. 213—67.)

5. In a coupler of the character described, in combination, a draw-bar having a longitudinal recess in one end thereof, a coupler bar movable bodily longitudinally and laterally and having a hooked-end normally lying across the recess in said bar, means to hold the coupler bar in



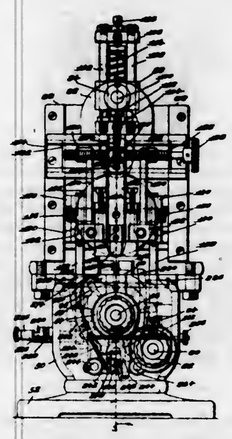
predetermined paths during movement including a yielding device normally pressing laterally upon said coupler bar.

1,391,423. SYNCHRONIZING MECHANISM. FRANK R. SOMMERMEYER, Spring Lake, Mich. Filed May 2, 1918. Serial No. 232,003. 4 Claims. (Cl. 74—34.)



1. In combination with a driven shaft, a member rotatable on the shaft, a member rotatable with the shaft, the two members being in geared relation, a friction wheel carried by the second member through rotation of which the two members are caused to rotate at different speeds, means for causing the friction wheel to turn in one direction or the other during rotation of the driven shaft to advance or retard the speed of rotation of the first member relative to the second member.

1,391,424. TICKET-MACHINE. EDWARD E. SPENGLER, Chicago, Ill. Filed July 6, 1917. Serial No. 178,893. 16 Claims. (Cl. 101—227.)



1. In a machine of the class described, a ticket printing member, a ticket punching member, means to supply paper to said members, actuating means for said members and said means, said actuating means comprising a motor element, and means to slide said motor element, bodily into and out of operation with respect to said members and feeding means.

1,391,425. PHONOGRAPH-NEEDLE AND RESONATOR THEREFOR. RUDOLPH STEINERT, New Haven, Conn. Filed Oct. 25, 1919. Serial No. 333,286. 7 Claims. (Cl. 274—38.)

1. In a device of the class described, the combination of a hollow, substantially dome-shaped member; and a needle passing through the top of and traversing said member in a direction inclined to the perpendicular.

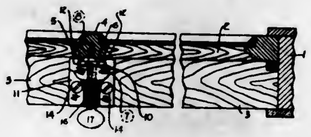
1,391,426. MACHINE FOR PREPARING SOLES. WILLIAM C. STEWART, Swampscott, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed July 3, 1916. Serial No. 107,290. 13 Claims. (Cl. 33—4.)

1. A machine for preparing insoles, having, in combination, a sole marking device, a sole end gage for positioning the sole with relation to the marking device mechanism to move the end gage for positioning different sizes of soles, and means to adjust said mechanism to cause the marking device to mark the sole for different styles of sole heels.

1,391,427. CIGARETTE. NATHAN SULZBERGER, New York, N. Y. Filed Sept. 21, 1920. Serial No. 411,850. 5 Claims. (Cl. 131—52.)

1. A cigarette having a wrapper of asbestos which retains its shape during smoking, and which can be smoked without discoloration of the wrapper, said asbestos wrapper being substantially free from carbonaceous material.

5. A cigarette having a wrapper of asbestos paper which retains its shape during smoking and which can be smoked without discoloration of the wrapper, said asbestos wrapper being made of paper containing organic matter and having the organic matter removed therefrom by a glowing operation in the presence of an oxidizing

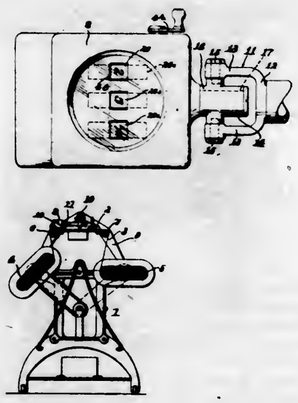


agent, the said wrapper being porous, due to the removal of the organic matter therefrom, and containing a small amount of an oxidizing agent.

1,391,428. ARTICLE OF MANUFACTURE. GEORGE SYKES, Penryn, Calif. Filed Oct. 16, 1918. Serial No. 258,330. 2 Claims. (Cl. 46—37.)

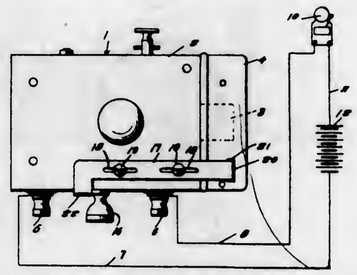
1. An article of manufacture, comprising a system of groups of spherical objects attached to form a combined article, each object being so disposed that it has a contactual relation with at least four others in a group of which it forms a part.

1,391,429. SASH-FASTENER. WILLIAM M. TAPLIN, St. Louis, Mo., assignor of one-half to Charles Schroeder, St. Louis, Mo. Filed Feb. 7, 1921. Serial No. 443,205. 1 Claim. (Cl. 292—251.)



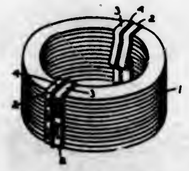
The improved sash-fastener, comprising a clamping-bracket having integral opposite jaws with a spacing-lug-passage between themselves, and there being a locking-plate space between said jaws and the adjacent inner end of said bracket; means for securing said bracket to the meeting-rail of a sash; a vertical sliding locking-plate provided on its back with a series of spacing lugs, there being tapered perforations through the latter and through said plate, the said lugs being arranged to act as spacers to hold said plate a distance from the vertical sash-bar to which it is attached, and thereby permit said lugs to pass up and down in the said spacing-lug-passage between said opposite jaws of said clamping-bracket; screws for securing the said plate to the sash; and a thumb-screw threaded horizontally through the body of said clamping-bracket, the inner end of said thumb-screw being attenuated, to engage said locking-plate and force the same into contact with said opposite jaws of said clamping-bracket, and lock said plate in the space between said jaws and the body of the clamping-bracket.

1,391,430. FOUNTAIN-PEN. MILTON C. TAYLOR, Chicago, Ill., assignor, by mesne assignments, to The Wahl Company, Wilmington, Del., a Corporation of Delaware. Filed June 25, 1917. Serial No. 176,793. 5 Claims. (Cl. 120—46.)



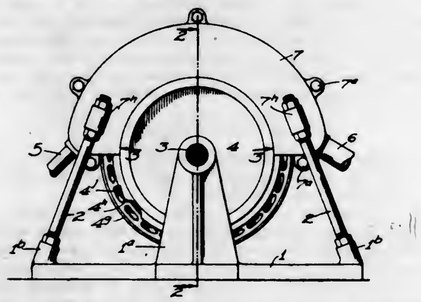
3. In a fountain pen, the combination of a casing having a hole therein, a plate having a hole therein, a lever pivoted to said plate, and a straight pin seperate from the pivot of the lever and plate inserted through the hole in said casing and said plate to thereby locate said plate in said casing.

1,391,431. MEASURING-MACHINE ATTACHMENT FOR CLOTH-WINDING MACHINES. DOUGLAS TURNER, St. Louis, Mo., assignor to The Measuregraph Company, St. Louis, Mo., a Corporation of Missouri. Filed Aug. 11, 1919. Serial No. 316,542. 4 Claims. (Cl. 33—129.)



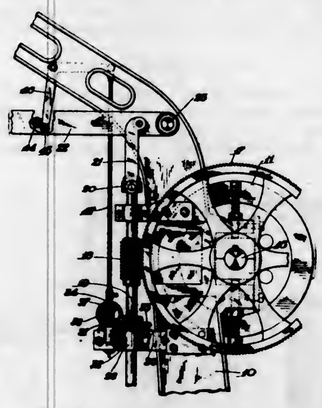
1. In a cloth winding machine, the combination of a frame, a roller supported by said frame, means for drawing the cloth past the said roller, a measuring machine having indicating mechanism and having a measuring roller lying adjacent to the face of the first named roller and transmitting a part of the weight of the machine to said first named roller, said driving roller operating to actuate the indicating mechanism when the cloth is pulled between the said rollers, a head having two forks supported on said frame, a knuckle pivotally supported between said forks, and a swivel connection between said knuckle and said machine.

1,391,432. CIRCUIT-CLOSER FOR LOCKS. AUGUST F. W. VIEHWEGER, Hoboken, N. J., assignor of one-half to Pauline Kronstein, Jersey City, N. J. Filed Sept. 10, 1919. Serial No. 322,848. 3 Claims. (Cl. 200—54.)



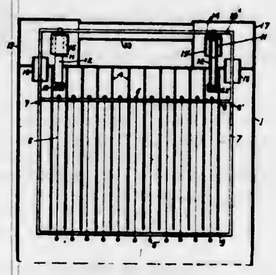
1. A circuit closer comprising a lock casing having a circuit closing member and a keeper provided with a slot, a plate slidably mounted on the casing, means formed on one end of the plate for engagement with the circuit closing member and means formed on the other end of said plate and adapted to extend into the slot of the keeper.

1,391,433. UNIT PACKAGE. GUSTAF A. WALLIN, Scotch Plains, N. J., assignor to A. Kimball Company, New York, N. Y., a Corporation of New York. Filed Jan. 6, 1919. Serial No. 269,739. 1 Claim. (Cl. 206—46.)



A unit package comprising a plurality of superimposed flat rings secured together by a plurality of flat binding strips bent transversely therearound, comprising plies of paper presenting a surface to receive identifying indicia and having a flexible non-resilient member therebetween, capable of a permanent set and of sufficient rigidity to retain said rings firmly in superimposed position and having hooked interengaging end portions lying closely adjacent the inner walls of said superimposed rings whereby lateral displacement thereof is prevented.

1,391,434. TURBINE. JOHN T. WAUGH, East San Diego, Calif. Filed June 15, 1920. Serial No. 389,200. 5 Claims. (Cl. 253—48.)

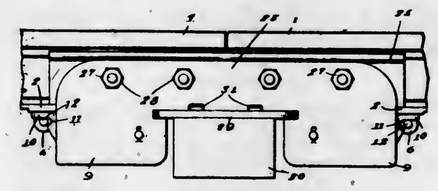


1. A turbine including, a revoluble member provided with a face in the middle of its periphery concentric with the axis of said revoluble member and with oppositely disposed faces at an angle thereto and provided with extended seal portions at opposite sides of each of said faces forming three independent grooves, each groove providing with a series of pockets therein and a housing provided with faces adapted to fill the grooves in said revoluble member and with notches to receive the seal portions and a plurality of ports connecting with a fluid pressure tank and communicating with the separate series of pockets in said revoluble member consecutively.

1,391,435. LET-OFF MECHANISM. ALBERT BERNARD WEISSENBORN, Appleton, Wis., assignor of one-half to Appleton Wire Works, Appleton, Wis. Filed July 16, 1918. Serial No. 245,170. 13 Claims. (Cl. 139—59.)

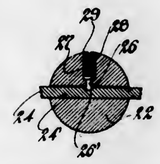
1. In a loom, a warp beam, a tension lever having connection therewith for turning same backwardly, and means actuated by the play of the tension lever for varying the connection between the tension lever and the warp beam to produce a let off.

1,391,436. MEANS FOR SUPPORTING AND INSULATING HIGH-TENSION ELECTRODES IN ELECTRICAL PRECIPITATION APPARATUS. HARRY V. WELCH, Los Angeles, Calif., assignor to International Precipitation Company, Los Angeles, Calif., a Corporation of California. Filed Jan. 27, 1919. Serial No. 273,829. 8 Claims. (Cl. 183—7.)



1. An insulator comprising a hollow body of insulating material provided at its lower end with means for admitting clean gas thereto and with outlet means at its upper end and a hood surrounding the insulator and spaced therefrom, said outlet means opening into the space within said hood for passing clean gas into said space.

1,391,437. KETTLE-DRUM. ADOLPH F. WIEDOEFT, Los Angeles, Calif. Filed Jan. 20, 1920. Serial No. 352,786. 6 Claims. (Cl. 84—419.)

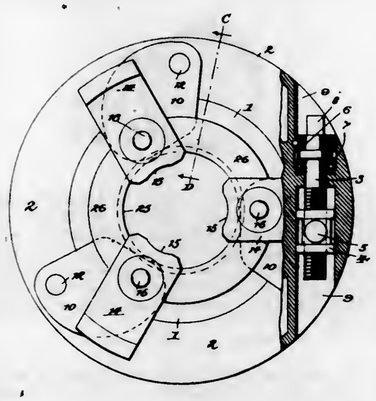


1. The combination with a drum, of tensioning devices arranged around the drum body and engaging the tensioning head ring; and means for simultaneously actuating all of the tensioning devices to control the tension of the drum head, which means includes worm wheels associated with the tension devices, a worm shaft engaging each worm wheel and flexible connections between each worm shaft.

1,391,438. RAIL-JOINT. ARTHUR J. WILKINS, Bristow, Va. Filed Mar. 5, 1920. Serial No. 363,476. 7 Claims. (Cl. 238—200.

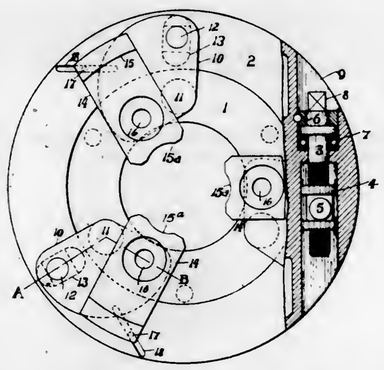
1. Two rail ends having depending lugs, a rocking cradle below each lug composed of members pivotally supported beyond the ends of the lug and having portions that have a contacting engagement with the opposite ends of the lugs.

1,391,439. MIXER. NORA WILLIAMS, Spokane, Wash. Filed Aug. 23, 1920. Serial No. 405,377. 1 Claim. (Cl. 259—99.)



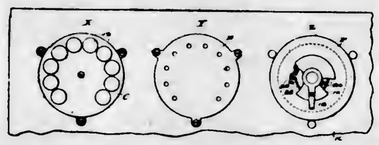
The combination with a rotatable spindle and its shank having fixed dasher blades, of removable blades engaged in sockets in said shank and provided with notches, studs in said shank engaging said notches, springs for said studs, and screw plugs for retaining said springs in sockets in the shank.

1,391,440. CHUCK. GEORGE WILLIAMSON, Oldham, England. Filed Jan. 13, 1917. Serial No. 142,210. 2 Claims. (Cl. 279—34.)



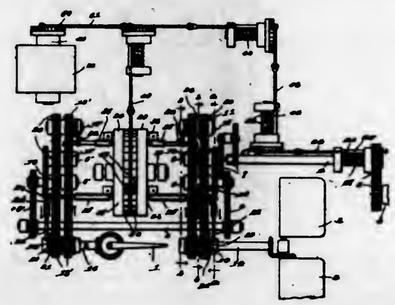
1. In a device for the purposes mentioned, the combination of a chuck body, a revoluble ring mounted thereon; carrier members pivoted to the front of the ring, work (or tool) engaging or work centering jaws mounted on the carriers, a central tubular member provided with an outside flange and freely mounted in the bore of the chuck

body, and recesses in the outside flange of the said tubular member, in which the said jaws are mounted, whereby



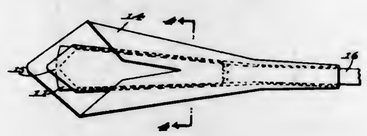
the turning of the ring will adjust the jaws with relation to the axis of the chuck, and also turn the tubular member so as to keep the jaws in the radial position.

1,391,441. CHUCK. GEORGE WILLIAMSON, Oldham, England. Original application filed Jan. 13, 1917, Serial No. 142,210. Divided and this application filed Mar. 6, 1920. Serial No. 363,793. 2 Claims. (Cl. 279—34.)



1. In a device for the purposes mentioned, the combination of a chuck body, a revoluble ring mounted thereon, carrier members mounted on pivot pins secured to the front of the chuck body, work or tool engaging or work centering jaws mounted on the carriers, means for so coupling the carriers to the ring that the turning of the ring will oscillate the carriers and adjust the jaws with relation to each other, and to the axis of the chuck body, and means for keeping the jaws radial, such means comprising projecting pins engaging slots so arranged in connection with the ring that the outer end of the slots advance toward the pins when the ring is turned one way and retreat from the pins when the ring is turned the other way.

1,391,442. CALL-SENDING DEVICE. ALBERT ANDERSEN, Chicago, Ill., assignor to Automatic Electric Company, Chicago, Ill., a Corporation of Illinois. Filed Aug. 8, 1914. Serial No. 855,826. 38 Claims. (Cl. 179—90.)

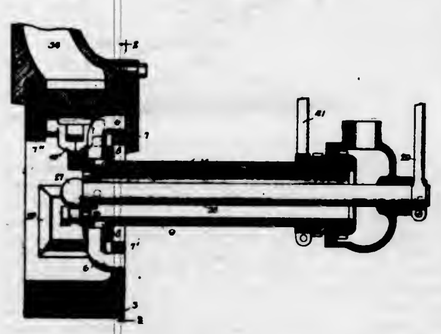


1. A call-sending device comprising a plurality of impulse transmitters, a single controlling mechanism for successively controlling the operation of said trasnmitters, said transmitters operating thereafter to transmit impulses.

1,391,443. AEROPLANE. CHARLOTTE ARNESEN, Portland, Oreg., assignor of one-fifth to Carl L. Oberg and Ingeborg A. Oberg, Portland, Oreg. Filed June 26, 1919. Serial No. 306,881. 7 Claims. (Cl. 244—1.)

1. The combination with a steering mechanism of a movable body, of power driven means adapted to be connected with said mechanism but normally disconnected therefrom, said means including wheels and chains, said chains having spaces at intervals for disconnecting them from the wheels, means for moving the chains to move them into engagement with the wheels again and adjustable setting means for controlling the actuation of the last mentioned means.

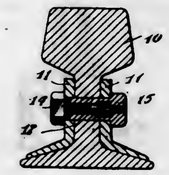
1,391,444. NECKTIE-PRESSING BOARD. JUOZAPAS ATKOCAITIS, Chicago, Ill. Filed May 7, 1920. Serial No. 379,641. 3 Claims. (Cl. 223—19.)



1. A tie stretching and pressing device comprising a pair of wings, one larger than the other, prongs on each of said wings, the larger wing adapted to support the larger end of a tie and its prongs adapted to engage the lining of said larger end, the shorter wing adapted to support the smaller end of the tie and its prongs to engage the lining of said smaller end and clamping means for clamping the tie to said wings.

1,391,445. RESILIENT TRACTION-WHEEL. JOHN BADUMLE, Milwaukee, Wis. Filed Aug. 8, 1919. Serial No. 316,265. 3 Claims. (Cl. 152—29.)

3. A wheel for vehicles comprising two spaced resilient disks provided with notches in their peripheries, conical rings supported by the disks, and provided with pins which engage the notches in the disks, a cushion tire resting between the said rings, and means for holding the disks against lateral displacement, other than as road pressure upon the tire may flex the disks about such holding means.



1,391,446. FLUID-PRESSURE ENGINE. WILLIAM E. BAKER, Rock Island, Ill. Filed Mar. 5, 1920. Serial No. 363,537. 30 Claims. (Cl. 121—59.)

1. A distributing valve for fluid pressure engines comprising a valve body in the general form of a divided ring and adapted to receive fluid under pressure therein and having outlet ports, and means engaged with the ends of said body and adapted to be operated by the fluid within the body for automatically adjusting said body to compensate for wear and to prevent tendency of the body to expand under pressure of the fluid within the body.

1,391,447. BOLT-LOCK. GEORGE BARON, Montreal, Quebec, Canada. Filed Dec. 4, 1920. Serial No. 428,321. 1 Claim. (Cl. 151—31.)

The combination with a bolt including a head and a threaded shank, said shank being split at the end thereof, said bolt being reduced to weaken the same at the inner end of said split portion, and to form oppositely disposed shoulders, a sleeve threaded upon said bolt, a head provided upon said sleeve, said sleeve being enlarged adjacent the head forming shoulders, and means for spreading the end of the bolt at the weakened portion when the latter is threaded within the sleeve for forcing the shoulders of the bolt behind the shoulders of the sleeve, as and for the purposes set forth.

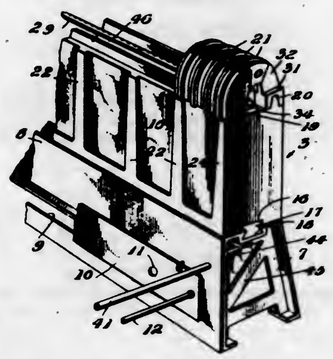
1,391,448. BEDSTEAD. JOSEPH BASILE, New York, N. Y., assignor, by direct and mesne assignments, of one-half to Greenpoint Metallic Bed Company, Brooklyn, N. Y., a Firm composed of David Frank, John Trounstine, and William Lies, and one-half to Joseph Turk Manufacturing Co., Bradley, Ill., a Corporation of Illinois. Filed Mar. 21, 1921. Serial No. 453,947. 4 Claims. (Cl. 5—4.)

4. A bedstead comprising head and foot frames and a main mattress supporting frame consisting of side rails and end rails having at their ends downwardly extending members secured to said side rails, said head and foot frames having corner posts and upper and lower members secured to said posts, the lower members being recessed to receive the lower ends of said downwardly extending members of said end rails and the upper members being offset from the sides of the posts and recessed to receive the end portions of said end rails adjacent to the inner edges of said downwardly extending members thereof.

1,391,449. WHITE GOLD. DAVID BELAIS and ALFRED R. BONDY, New York, N. Y., said Bondy assignor to said Belais. Filed Oct. 24, 1919. Serial No. 333,067. 4 Claims. (Cl. 75—1.)

1. As a composition of matter, a white gold alloy composed of a major part of gold, lesser proportions of nickel and zinc, and a minute quantity of platinum adapted to make the alloy sufficiently ductile to be drawn into seamless tubing.

1,391,450. VALVE AND VALVE-SEAT. JOSEPH C. BEVELLE and JOSEPH J. SMITH, El Paso, Tex. Filed Jan. 30, 1920. Serial No. 355,233. 3 Claims. (Cl. 251—158.)



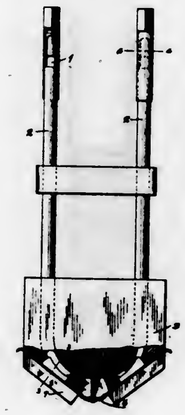
2. A valve and seat therefor, each constructed of a composition metal consisting of 86.055 parts iron, .30

parts carbon, .20 parts silicon, .40 parts manganese, .020 parts sulfur, .025 parts phosphorus, and 13.00 parts

chrome properly mixed and formed into a homogeneous mass.

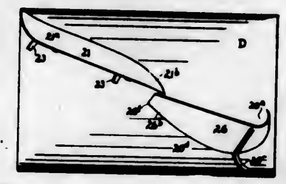
1,391,451. HEATING-GENERATING PLANT. WILLIAM THOMAS BIDWELL, Atlanta, Ga. Filed Mar. 15, 1920. Serial No. 365,916. 5 Claims. (Cl. 110—59.)

2. A furnace bridge including supporting means provided with upwardly opening dove-tailed channels, a hollow bridge body carried by the supporting means and having downwardly opening dove-tailed channels, and double dove-tailed blocks fitted in said channels and functioning to lock the bridge body to the supporting means while permitting expansion and contraction of the bridge body relative to the supporting means.



1,391,452. SUPPLEMENTARY HANDLE FOR TOOLS. WILLIAM W. BOOTH, Toledo, Ohio. Filed June 1, 1920. Serial No. 385,560. 5 Claims. (Cl. 145—61.)

1. A supplementary handle for a tool provided with a coaxial terminally bulged grip, said handle embodying a transverse bar, and a grip engaging ferrule to mount the bar on the grip.



1,391,453. MAGAZINE-LOADER. BRUCE F. BOWLSBY, Brampton, N. D. Filed Dec. 6, 1920. Serial No. 428,845. 2 Claims. (Cl. 42—87.)

1. A magazine loader comprising a frame, parallel feed cylinders having curved lower ends provided with apertures and supported by said frame, said cylinders adapted to deliver cartridges in a substantially horizontal position,

and control slides having openings for registry with the apertures.

1,391,454. MIXING-MACHINE. JOHN W. BRABANT, La Crosse, Wis. Filed July 3, 1917. Serial No. 178,498. 7 Claims. (Cl. 83—73.)

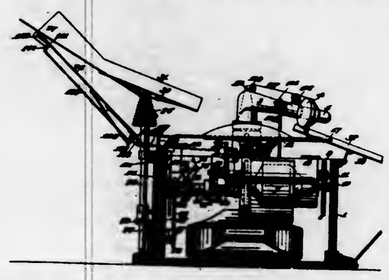
1. In a mixing machine, the combination of a supporting frame, a horizontal mixing drum rotatively mounted thereon and having centrally placed apertures in the respective ends for receiving and discharging material, means for rotating the drum, and means within the drum for mixing material therein, comprising a plurality of blades secured to the horizontal wall of the drum, each having a forward longitudinally curved portion adjacent the receiving aperture adapted to give quick impetus to the material which it contacts, in a longitudinal direction, a succeeding portion of less curve adapted to relatively restrict the movement of the material, and an inner longitudinally depending discharge portion adapted to permit of quickened delivery therefrom, and means for discharging material from the drum.

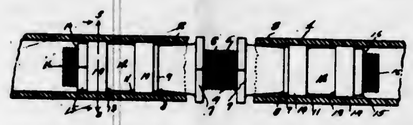
1,391,455. TALKING-MACHINE. JOHN FREDERICK BROMMER, New York, N. Y. Filed May 24, 1920. Serial No. 383,711. 52 Claims. (Cl. 274—10.)

3. In a talking machine, a lower turn table member, an upper turn table member hinged thereto, and means for tilting the upper turn table member to discharge a record laterally by gravity therefrom.

14. In a talking machine, a turn table, a record supply and intermittently acting elevating means for bringing successive records into position to be fed laterally by gravity onto the turn table.

48. In a talking machine, a turn table, a source of record supply, means for feeding records therefrom to the turn





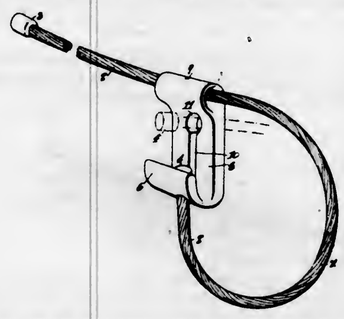


table and means operable by the exhaustion of the records from the record supply to stop the turn table.

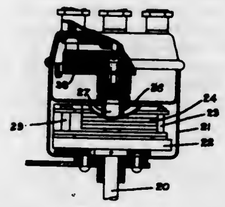
1,391,456. PIPE-COUPLING. JACOB LEWIS BROSCHART, Trenton, Mo. Filed July 25, 1919, Serial No. 313,267. Renewed Mar. 22, 1921. Serial No. 454,416. 3 Claims. (Cl. 285—162.)

1. In an emergency coupling, the combination with the adjacent ends of a broken pipe, of a tubular pipe section exteriorly threaded and telescoping the adjacent ends in spaced relation to their interiors, a holding member on each end of the pipe section, gaskets on the ends of the tubular pipe section inside of the holding members, jamming sleeves threaded on the tubular member and substantially centrally of said member and forming means for compressing and expanding the gaskets into engagement with the interior wall of the pipe ends and apertures in the ends of the tubular members and adjacent the gaskets, whereby the interior pressure within the pipe line may additionally expand the gaskets.

1,391,457. WIRE-ROPE CHOKER-SLING. JOHN A. BUCKLEY and JOSEPH NADEAU, Port Alberni, British Columbia, Canada; said Nadeau assignor of one-half of his right to Reginald Mullally, Vancouver, British Columbia, Canada. Filed Apr. 20, 1921. Serial No. 462,911. 5 Claims. (Cl. 24—129.)

4. A means for connecting the end of a wire rope to the intermediate portion thereof to form a choker or sling, said means comprising the combination with a length of wire rope having an enlargement at one end, a member having an eye at one end through which the wire rope may freely pass and at the other end a hook the axis of the bend of which is substantially parallel to that of the eye, said member having a keyhole aperture extending from adjacent the eye to the bend of the hook, the smaller dimension of which aperture is adapted to receive the rope but will retain the enlargement at the end thereof, and the end adjacent the eye is enlarged to receive the enlargement.

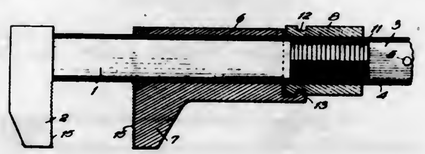
1,391,458. FILE PROTECTOR AND SHEATH. AARON T. BUTLER, Linton, Ind. Filed Nov. 4, 1920. Serial No. 421,613. 2 Claims. (Cl. 29—78.)



1. In a device of the character described, the combination with a file having a shank, a protector comprising a body portion having its longitudinal edges upturned to form flanges, one end of said body portion being upturned and bent inwardly to form a socket, the other end of said body being provided with upstanding lips in spaced relation to each other, said body portion being adapted to receive said file, said shank projecting between said lips, a handle portion having an opening to receive said shank, and means on said handle portion engageable with said body portion to maintain said body portion in position about said file.

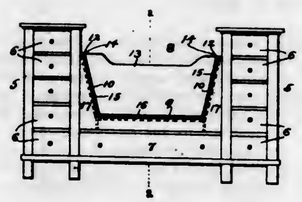
1,391,459. TOOTHBRUSH. HYMAN F. CHAIKEN, Reading, Pa. Filed Jan. 21, 1921. Serial No. 438,839. 4 Claims. (Cl. 132—84.)

1. A tooth brush comprising a screw-threaded handle member, a screw-threaded brush head, both substantially as described, in combination with a container formed in two compartments, one of which is adapted to receive the handle member and the other the brush head, said handle member forming a closure for the compartment into which it enters, a receptacle containing a sterilizing agent for housing the brush head while in the compartment and a closure for both the receptacle and the compartment.



1,391,460. IGNITION SYSTEM. WILLIAM A. CHRYST, Dayton, Ohio, assignor to The Dayton Engineering Laboratories Company, a Corporation of Ohio. Filed September 7, 1917. Serial No. 190,150. 8 Claims. (Cl. 200—19.)

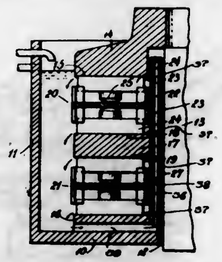
1. In a device of the character described, the combination with a rotatable cam carrying element having an expansible shank; of a cam supported on said shank;



a member for expanding said shank; and means for forcing said expanding member into said shank, said means being capable of movement independently of said expanding member.

1,391,461. WRENCH. THOMAS F. CONNOR, Decorah, Iowa. Filed Feb. 3, 1919. Serial No. 274,768. 1 Claim. (Cl. 81—161.)

A device of the kind described, comprising a substantially flat shank having a cog rack formed upon one edge thereof and carrying upon one end a transversely extending jaw, in combination with a part slidably mounted upon said shank and extended on one side thereof, said last mentioned part having an open slot therein, an oscillating coöperating jaw mounted in said slot in the extended portion of the slidable member, a rotatable screw-threaded nut to control the movement of the slidable member upon the shank, said slidable member being provided with a rearward extension adapted to loosely engage in said rotatable nut, filler blocks arranged within the rotatable nut on the flat sides of the shank, said nut having formed therein a threadless part adapted to be brought into registry with said cog racks, whereby the nut, filler blocks and slidable member may be slid on said shank, and a stop limiting said sliding movement away from said fixed jaw.

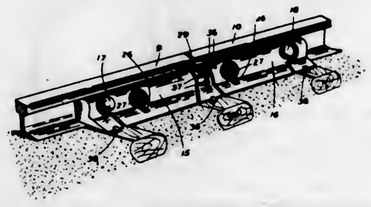


1,391,462. CABINET. HELEN ROBINSON CORNELISON, East Cleveland, Ohio. Filed May 17, 1919. Serial No. 297,872. 1 Claim. (Cl. 5—56.)

A cabinet comprising two laterally spaced end sections and being contoured between said sections to form an uncovered recess having a seat-forming bottom and upwardly diverging side walls, and a crib arranged in said recess and endwise between said end sections and having projecting members arranged at opposite ends respectively of the crib, the aforesaid walls terminating at their upper extremities in seats which are substantially in the same horizontal plane and form the tops of said walls, the crib having arms arranged wholly above said walls and resting on and removable from said seats, and said crib and its said arms being arranged wholly between the aforesaid end sections of the cabinet.

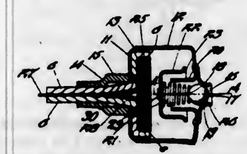
1,391,463. BEARING. RICHARD J. DEARBORN, Plandome, N. Y., assignor to Albert Kingsbury, Pittsburgh, Pa. Filed Nov. 13, 1917. Serial No. 201,761. 37 Claims. (Cl. 64—25.)

1. A thrust bearing comprising opposed bearing surfaces, and an interposed bearing structure including a rotatable carrier and bearing shoes engaging said opposed bearing surfaces and mounted on said carrier to



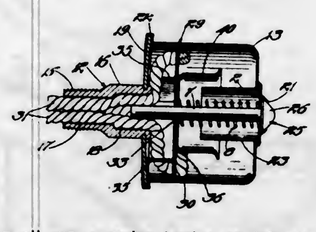
tilt both radially and circumferentially with respect to the axis of the bearing.

1,391,464. DRAINAGE-TUBE. GEORGE J. DEGENHART, Springfield, Ohio. Filed Nov. 8, 1920. Serial No. 422,564. 7 Claims. (Cl. 27—24.)



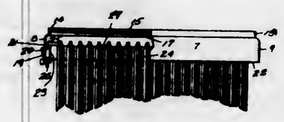
1. A drainage device comprising a tube for insertion in a blood vessel, the outer end of said tube having a closure and a discharge neck spaced inwardly from said closure, a vessel extender slidable in and beyond said tube and having an operating rod extending through said closure, and a valve slidable in said tube around said rod for closing said neck, said valve having an operating stem also passing slidably through said closure.

1,391,465. RAILWAY-RAIL JOINT. JOHN DEMETER, Stratton, Ontario, Canada. Filed June 11, 1921. Serial No. 476,849. 3 Claims. (Cl. 238—260.)



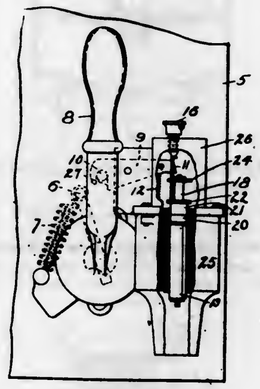
1. A means for connecting rails, said means comprising fish plates positioned oppositely on each side of the said rails, pins through the said fish plates and said rails, an enlarged head on each of the said pins, a lug projecting from the said head and engaging with an opening configurated in one of the fish plates, the said enlarged head and projecting lug adapted to prevent displacement of the said pins, portions removed from the opposite sides of the said pins, the said hingedly mounted members adapted to engage with the said pins and to secure the said pins in position.

1,391,466. OIL-CUP. STEPHEN I. FEKETE, Detroit, Mich., assignor to Essex Motors, Detroit, Mich., a Corporation of Michigan. Filed Jan. 20, 1920. Serial No. 352,809. 12 Claims. (Cl. 184—89.)



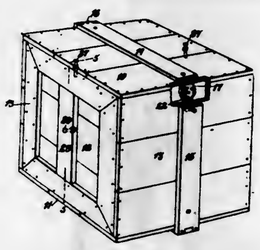
9. In an oil cup, a casing having closed ends except for opposite and centrally disposed inlet and outlet openings in opposite ends, a dish-shaped screen, wicking between the screen and the casing and a wire secured to the screen and passing in to the oil passage of the part to be lubricated.

1,391,467. OIL-CUP. STEPHEN I. FEKETE, Detroit, Mich., assignor to Essex Motors, Detroit, Mich., a Corporation of Michigan. Filed July 7, 1920. Serial No. 394,448. 9 Claims. (Cl. 184—64.)



5. In an oil cup, a casing having an inlet and outlet opening, an inwardly extending oil introduction tube surrounding the inlet opening, a valve adapted to close the inlet opening, wicking in the casing extending into the outlet opening, a loose wicking retaining member, a baffle, and a valve spring, one end of which acts on the valve and the other end on the wicking retaining member and the baffle to hold said members in position.

1,391,468. RADIATOR-HOOD. ELISHA C. FREEZE, St. Louis, Mo. Filed Sept. 29, 1920. Serial No. 413,601. 3 Claims. (Cl. 237—79.)

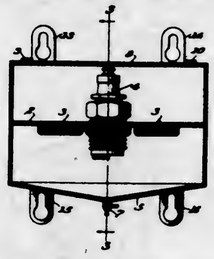


1. A radiator hood having four upwardly converging walls, a removable top provided with flanges embracing the upper edges of said converging walls, an air straining and dust collecting member carried by said removable top and a water reservoir located on the inside of said walls and extending completely around the interior of the hood at its bottom edge.

1,391,469. ELECTROMAGNETIC TRIP MECHANISM. BENJAMIN E. GETCHELL, Plainville, Conn., assignor to The Trumbull Electric Manufacturing Co., Plainville, Conn., a Corporation of Connecticut. Filed Dec. 6, 1919. Serial No. 343,066. 4 Claims. (Cl. 200—109.)

1. In an electro-magnetic trip device, a coil, a vertically movable core consisting of a main body, a plunger rod, an auxiliary core slidable on said rod, means for limiting the vertical descent of the auxiliary core and a trip member operated by said plunger rod when the voltage falls below a predetermined point.

1,391,470. WOODEN SHIPPING-CASE. ABRAHAM H. GODKEVITCH, New York, N. Y. Filed Mar. 31, 1921. Serial No. 457,202. 5 Claims. (Cl. 217—56.)

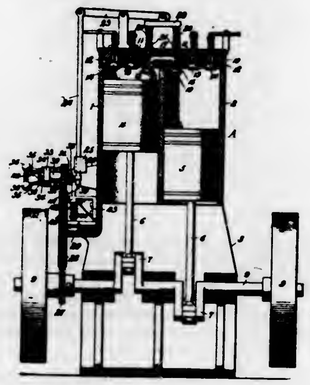


1. A shipping case having bars extending transversely of the top, bottom and two opposite vertical walls upon the exterior thereof, a fastening device upon the interior of the case and connecting said bars together and including interengaging parts automatically locking to prevent removal of any one of said walls after the closing of the case.

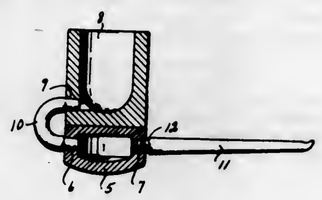
1,391,471. SPARK-PLUG CLEANER. JOSEPH T. GOMEZ, Goldfield, Nev. Filed July 27, 1920. Serial No. 399,350. 7 Claims. (Cl. 206—16.)

1. A spark-plug cleaner comprising a receptacle provided with a plurality of apertures adapted to receive

spark plugs, means for maintaining the lower surface of the cleaning medium at an angle to the horizontal to facilitate the draining of the cleaning medium and means for draining the receptacle.

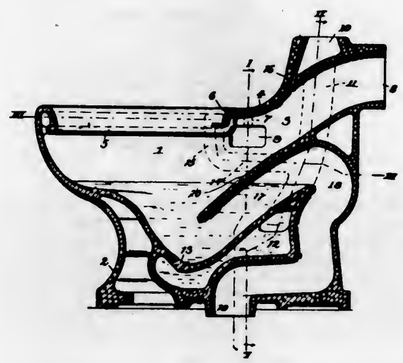


1,391,472. VEHICLE-WHEEL RIM. MARION WILLIAM GRIGSBY, East Peoria, Ill. Filed May 18, 1918. Serial No. 235,371. 3 Claims. (Cl. 152—21.)



1. The combination with a wheel felly, of a two-part rim of which one part has a tire engaging flange, and also a portion extending partly across the outer surface of the felly as a felly band and terminating in a contact face, said contact face and felly edge being beveled and providing a first broad inclined surface extending from an intermediate point in the side face of the felly to the peripheral face of said felly band, the other rim part having a second tire engaging flange and a second inward beveled surface complementary to said first broad inclined surface, and means for removably securing said second rim part in position.

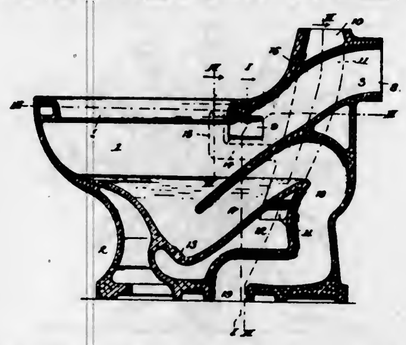
1,391,473. MULTICYLINDER FOUR-CYCLE EXPLOSION-ENGINE. CLINTON ADOLPH SUEL HANSON, Barron, Wis. Filed May 2, 1919. Serial No. 294,184. 8 Claims. (Cl. 123—52.)



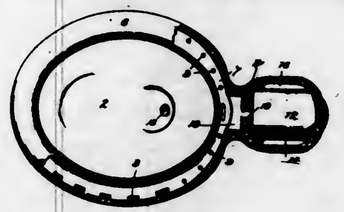
1. A multi-cylinder explosion engine having means for establishing communication between the interiors of the cylinders, and a hit-and-miss governor for opening said means of communication during the governing period.

1,391,474. SMOKING-PIPE. HARRY HESS, Sparks, Nev. Filed May 19, 1920. Serial No. 382,557. 2 Claims. (Cl. 131—12.)

2. An attachment for a conventional form of smoking pipe comprising a receptacle adapted to engage the bottom of a bowl of a smoking pipe, a goose-neck conduit adapted to connect the bowl to the receptacle, said goose-neck being disposed exteriorly of the bowl and the receptacle, and a pipe stem carried by and communicating with the receptacle.



1,391,475. WATER-CLOSET. WINFIELD E. HINSDALE, Trenton, N. J., assignor to Trenton Potteries Company, Trenton, N. J., a Corporation of New Jersey. Filed July 17, 1917. Serial No. 181,069. 11 Claims. (Cl. 4—21.)

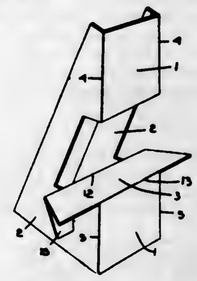


2. In a water-closet, the combination of a bowl; and a vent duct extending rearwardly therefrom, said duct having a pocket opening toward the vent passage and accessible from the interior of the bowl formed in each of the side walls thereof for the reception of the inner ends of the seat hinge posts and the nuts employed in securing the same in place.

1,391,476. WATER-CLOSET. WINFIELD E. HINSDALE, Trenton, N. J. Filed June 4, 1920. Serial No. 386,505. 8 Claims. (Cl. 4—21.)

1. In a water closet, the combination of a bowl; a flushing rim therefor; a vent duct opening into the bowl underneath the rim; and a pocket opening toward the vent passage and reached from the interior of the bowl through the duct, formed in each of the side walls of the duct; the upper walls of each pocket having an opening therein for the reception of the seat hinge post.

1,391,477. WATER-CLOSET. WINFIELD E. HINSDALE and WILLIAM H. HALL, Trenton, N. J. Filed June 4, 1920. Serial No. 386,506. 14 Claims. (Cl. 4—22.)

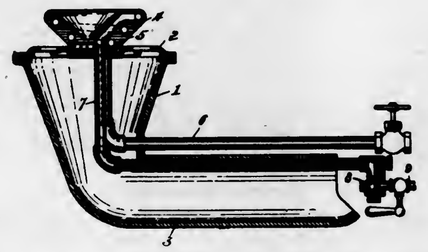


1. In a water closet, the combination of a bowl having a flushing rim, the channel wherein is of small cross area at the rear portion thereof as compared to the forward portion, said rear portion opening into a chamber formed in the closet body, the front wall of which is coincident with the front wall of a portion of the rim at the rear of the bowl and the rear wall of which chamber has a control opening formed therein which is in communication with the water supply of the closet.

1,391,478. SAFETY-RAZOR. OTTO KAMPFE, Bellmore, N. Y., assignor of one-half to Henry C. Walker, New York, N. Y. Filed Mar. 26, 1920. Serial No. 368,878. 14 Claims. (Cl. 30—12.)

1. In a safety razor, a frame, a handle therefor, a guard mounted in the frame, a tension device connected to the guard and extending from one edge of the guard and beneath the same toward the opposite edge, and means operated through the handle for engaging the tension device to yieldingly hold the guard in position in the frame for use.

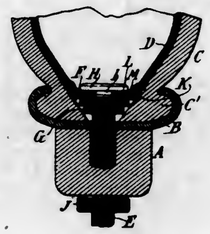
1,391,479. EASEL. MANOOG KAZANJIAN, Charlestown, Mass. Filed May 24, 1921. Serial No. 472,097. 2 Claims. (Cl. 45—57.)



1. An easel made from a single piece of sheet material folded along parallel lines to form a central body and a supporting wing at each side of the body, a portion being cut from the body and each wing, said portion being divided transversely one part thereof constituting a rest which is folded against the edges of the cuts made in the wings, said portion projecting beyond each wing, and the other part thereof being bent downwardly and having slots to receive the wings.

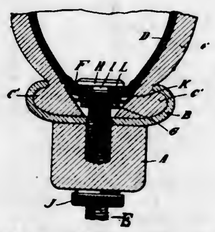
1,391,480. PIN-FASTENER. NILS KILDAHL, Horton, Mont. Filed Sept. 10, 1918. Serial No. 253,443. 1 Claim. (Cl. 24—153.)

In a paper fastener, a pin having a disk-shaped head the flat side of the disk being substantially coplanar with the side of the pin but of lesser thickness than the diameter of the pin.



1,391,481. OIL-BURNER. ANDREW J. KNIGHT, Toledo, Ohio. Filed Nov. 11, 1920. Serial No. 423,218. 1 Claim. (Cl. 158—65.)

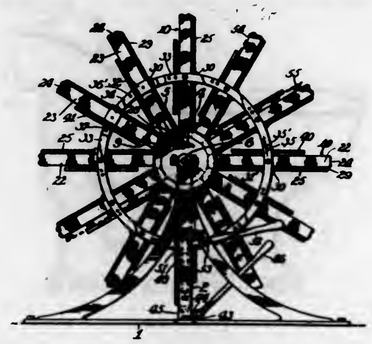
A burner of the class described, comprising a burner body having gas discharge openings in its top and having a hollow laterally extending neck portion open at its



outer end, a conical deflector mounted on the burner top and having a gas generating passage therein in communication at one end with a source of hydrocarbon oil supply, a pipe leading from the other end of the generating passage through the burner and neck thereof adjacent to its outer end, an ejector nozzle connected to the outer end of the pipe in position to discharge gas therefrom into the burner neck, and a valve controlled pipe opening communication between the nozzle and a source of gas supply.

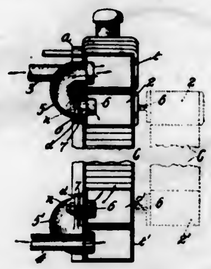
1,391,482. SPREADER FOR PNEUMATIC TIRES. HENRY P. KRAFT, Ridgewood, N. J. Filed June 15, 1917, Serial No. 174,865. Renewed Sept. 7, 1920. Serial No. 408,772. 5 Claims. (Cl. 152—20.)

5. A tire spreader of sheet metal having a flattened central opening for the valve and formed around said opening with an annular projection forming a boss on one side and a recess on the other, and provided with an internal flange surrounding said opening with flat faces on opposite sides, and a reinforcing ring formed with flat faces on opposite sides of its opening and with bevel curved faces, and said inner flange turned outwardly at its curved portions to engage said bevel faces and hold the ring in said recess.



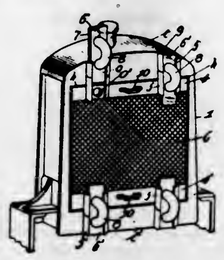
1,391,483. SPREADER FOR PNEUMATIC TIRES. HENRY P. KRAFT, Ridgewood, N. J. Original application filed June 15, 1917, Serial No. 174,865. Renewed Sept. 7, 1920, Serial No. 408,772. Divided and this application filed Nov. 15, 1920. Serial No. 424,094. 3 Claims. (Cl. 152—20.)

3. A tire spreader of sheet metal having a flattened central opening for the valve and formed around said opening with an annular projection forming a boss on one side and a recess on the other, and having an integral internal flange surrounding said opening with flat faces on opposite sides, and a reinforcing ring formed with flat faces on opposite sides of its opening and with bevel curved faces, and said inner flange turned outwardly at its curved portions to engage said bevel faces and hold the ring in said recess.



1,391,484. DISPLAY-RACK FOR BED MATTRESSES AND SPRINGS. OTTO R. LINDSTAEDT, Indianapolis, Ind. Filed Jan. 26, 1920. Serial No. 354,121. 4 Claims. (Cl. 211—20.)

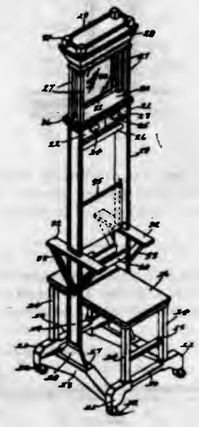
1. A display rack including two standards, a shell rotatively supported by the standards, bed frames rigidly secured to the shell and provided with clamps arranged opposite to and beyond the front of the frame, two annu-



lar braces secured to all the bed frames, and means for securing the clamps to the two annular braces.

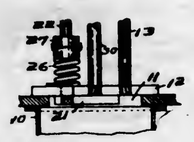
1,391,485. AUTOMOBILE - RADIATOR. CHARLES A. MARIEN, St. Louis, Mo. Filed Dec. 8, 1919. Serial No. 343,289. 1 Claim. (Cl. 257—125.)

In a radiator, an outer frame provided with water-circulating compartments or tanks, a demountable core inserted into the frame from one side of said frame, water circulating pipes carried by the tanks on the opposite side and extending opposite the opening of the frame for arresting the inward movement of the core into the frame, and means for securing the free terminals of said pipes to the core.



1,391,486. AUTOMOBILE - RADIATOR. CHARLES A. MARIEN, St. Louis, Mo. Filed Dec. 8, 1919. Serial No. 343,290. 8 Claims. (Cl. 257—125.)

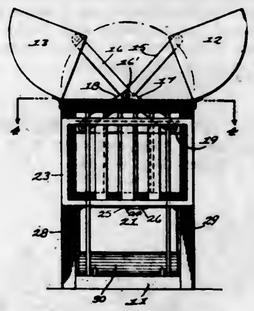
1. In a radiator, an outer frame provided with suitable compartments or tanks for the circulation of a cooling medium, a detachable core inserted in said frame, and



means detachable from said frame and core and spanning the joint between the same for fastening the core to the frame and simultaneously establishing communication between the core and circulating tanks of the frame.

1,391,487. COMBINATION-CABINET. JOSEPH MATLEVICH, Washington Park, Ill. Filed Feb. 26, 1921. Serial No. 447,979. 1 Claim. (Cl. 155—43.)

A stand of the character described, comprising a base on rollers, a plurality of vertical standards supported on said base, arm rests on two of said standards, a platform constituting two seats on the other of said standards, a platform constituting a plate normally held between the above mentioned two of the standards to constitute a back rest for persons occupying said seats and adapted to rest in its horizontal position on said arm rests to form a table, and means supported by and between said two standards to form a holder for various articles of personal wear and toilet articles.

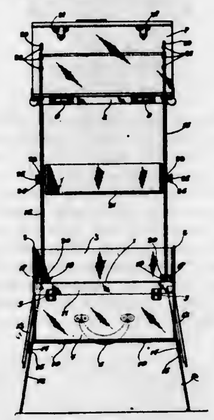


1,391,488. PAINT MEASURING AND FILLING MACHINE. HOWARD C. MILLER, Toledo, Ohio. Filed May 29, 1920. Serial No. 385,166. 3 Claims. (Cl. 226—96.)

1. In a paint filling machine, a vat having a plurality of openings extending through the bottom of the vat, a plurality of measuring nozzles located beneath the openings, plates for covering the openings, each of the plates having an opening, a second plate for opening and closing the last named opening to permit a small amount of paint to pass through the first named plate, means for lifting the first named plate to allow paint to pass into the nozzle.

1,391,489. ANIMAL AND BIRD TRAP. WOJCIECH NAWRACAJ and WAWZENIEC JAROSZ, Hamtramck, Mich. Filed Feb. 19, 1921. Serial No. 446,407. 1 Claim. (Cl. 43—58.)

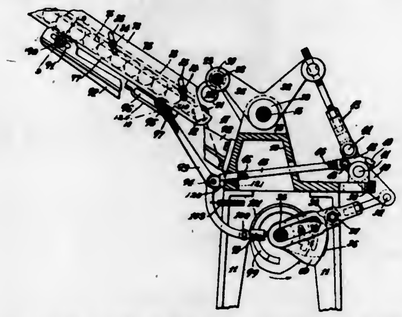
In a combined bird and quadruped animal trap, a compartmented cage, a bi-partite cover for said cage, a movable bottom plate for the upper compartment, means connecting said bottom plate with the parts of said cover,



adapted to close the cover over a bird alighting on said plate, and means in the lower compartment for entrapping quadruped animals.

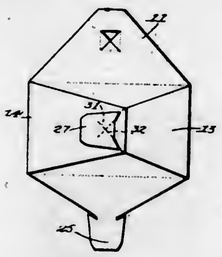
1,391,490. HORSESHOE-CALK. JOHAN OLSEN NYGAARD, Christiania, Norway. Filed Mar. 23, 1920. Serial No. 368,183. 1 Claim. (Cl. 168—43.)

A horseshoe having a cavity formed therein, a calk formed of two parts each having a dovetailed tenon to conform to the walls of the cavity, the adjacent opposing surfaces of the two parts being perpendicular to the direction of movement, and a wedge interposed between said surfaces, the force of said wedge acting in the longitudinal direction and parallel to the direction of movement, said wedge having lateral projections extending beyond the sides of the calk to facilitate extraction of the wedge.



1,391,491. MUSIC-CASE. EDWARD L. O'DONNELL, St. Louis, Mo. Filed Apr. 18, 1921. Serial No. 462,232. 1 Claim. (Cl. 45—121.)

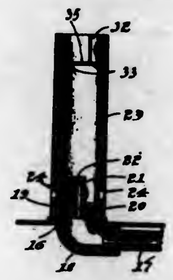
In a device of the character described, a support, a pair of lazy tongs constituting extendible supports piv-



otally connected with the first-named support, means for holding the extendible supports in extended position, a hook in connection with the upper end of each of said supports, and a music rest having a series of holes near each end thereof for receiving said hooks whereby the music rest may be supported in different selected positions at the upper ends of said supports.

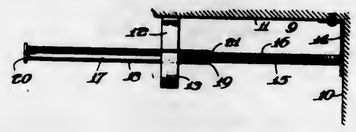
1,391,492. AUTOMATIC THREADING-MACHINE. HERMAN OSSWALD, Richmond Hill, N. Y. Filed Nov. 29, 1919. Serial No. 341,421. 17 Claims. (Cl. 153—72.)

1. In a cap threading machine in combination a pair of coöperating dies, a pivoted receptacle adapted to receive a plurality of caps to be threaded, means for operating said receptacle on its pivot to position a cap upon one of the said dies and means for operating the latter.



1,391,493. SAFETY-ENVELOP. GREGORY PACHKO, Detroit, Mich. Filed June 16, 1920. Serial No. 389,316. 2 Claims. (Cl. 229—84.)

1. In an envelop of the character described, the combination with a single blank of paper having a body portion, of a top, lower and side flaps, tabs on one of said side flaps and the lower flap, the material of the top and one of the side flaps being slitted along diagonal lines to form sets of 4 triangles each, one of said triangles of each set being open by removal of the material and adapted to allow the passing of the respective tab of the side and lower flaps, and slits separating the tabs from the body portion and adapted to be engaged by the bases of the open triangles, after the passage of the tabs through said triangular openings.

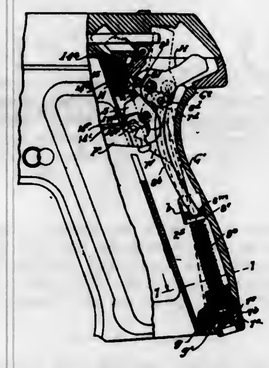


1,391,494. BURNER. HERMAN A. PAQUETTE, Chicago, Ill. Original application filed June 10, 1920, Serial No. 387,821. Divided and this application filed Aug. 5, 1920. Serial No. 401,409. 2 Claims. (Cl. 158—111.)

1. A gas burner comprising a gas discharge nipple, a tube surrounding and spaced from the orifice of said nipple and having air inlet ports in its lower portion, and a flame control device consisting of a split tube frictionally

mounted within and longitudinally adjustable of said first-mentioned tube and having lateral elements extending radially thereof to partially interrupt the bore.

1,391,495. BRACKET. EARL PARSONS, Philadelphia, Pa. Filed Sept. 18, 1919, Serial No. 324,410. Renewed Aug. 20, 1921. Serial No. 493,918. 3 Claims. (Cl. 211—15.)

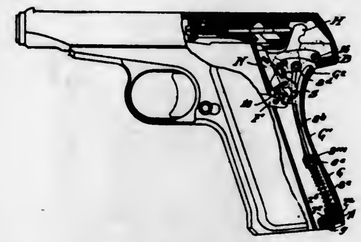


1. A device of the character described including two supporting members, one slidable within the other, the inner member having a longitudinal channel, the outer member having a lip at its end depending into said channel, said lip having its upper surface inclined from a position above the top to a position below the top of said channel.

1,391,496. FIREARM. JOHN D. PEDERSEN, Jackson, Wyo. Original application filed July 30, 1915, Serial No. 42,774. Renewed July 17, 1919, Serial No. 311,689. Divided and this application filed Dec. 17, 1919. Serial No. 345,550. 22 Claims. (Cl. 42—3.)

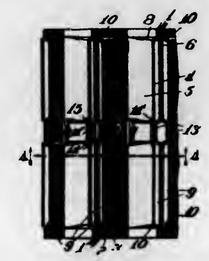
1. In a firearm, in combination, a frame of said firearm, a slide movable rearwardly on said frame, a breechblock movable with the slide and movable rearwardly prior to rearward movement of the slide and engaging the slide for transmitting rearward movement thereto, means coöperative between the breechblock and said frame for retarding rearward movement of the breechblock after transmission of rearward movement to the slide by said engagement therewith, and means for connecting the breechblock and slide and coacting therewith for providing retardation of the breechblock relative to the slide while the slide is moved rearwardly.

1,391,497. FIREARM. JOHN D. PEDERSEN, Jackson, Wyo. Filed Dec. 13, 1919. Serial No. 344,676. 15 Claims. (Cl. 42—3.)



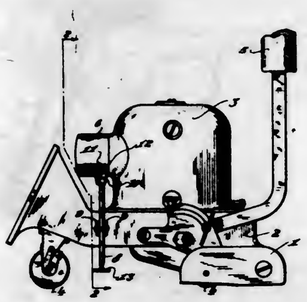
1. In a firearm, in combination, a frame comprising a grip-stock, a firing member, a grip-operable member engageable at the upper end thereof with said frame, a spring, a plug insertible in the grip-stock from the butt end thereof through the butt end and providing a seat for said spring, a rod pivotally attached at one end to the firing member, a member movable in the longitudinal line of the grip-stock by said spring and providing a seat for the other end of said rod, and a pin insertible in the grip-stock and engaging transversely the grip-operable member and said plug for providing pivotal attachment of the lower end of the grip-operable member to the grip-stock.

1,391,498. FIREARM. JOHN D. PEDERSEN, Jackson, Wyo. Filed Dec. 13, 1919. Serial No. 344,677. 15 Claims. (Cl. 42—3.)



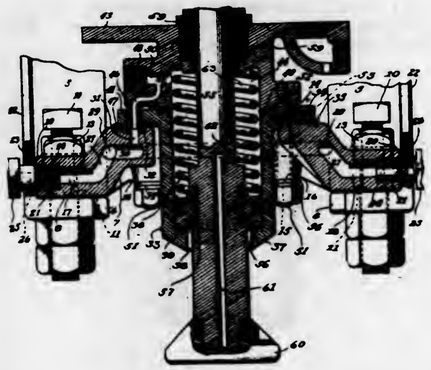
1. In a firearm, in combination, a sliding breech-action of said firearm, a frame of said firearm; a firing member movable to firing position and to fired position, sear means engageable with said firing member, slidable means engageable with said sliding breechaction, and provided with disconnecting means, means for moving said slidable means and disconnecting means to position for locking said sliding breechaction, and locking said sear means and firing member in firing position, a grip-compressible member engageable, when in position of safety, with said frame and engageable with said slidable means to block said slidable means and disconnecting means in said locking position, and releasable by grip-compression from both said engagements, spring means for moving said firing member to fired position, and trigger-means engageable with disconnecting means for moving said sear means, when said grip-compressible member is grip-compressed, to release said firing member for movement to fired position and thereby to move said sear means for moving said slidable means and disconnecting means from said locking position.

1,391,499. FIREARM. JOHN D. PEDERSEN, Jackson, Wyo. Original application filed July 30, 1915, Serial No. 42,774. Renewed July 17, 1919, Serial No. 311,689. Divided and this application filed Dec. 26, 1919. Serial No. 347,436. 23 Claims. (Cl. 42—3.)



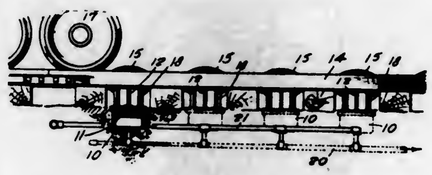
1. In a firearm, in combination, a frame of said firearm, a firing member movable to firing position and to fired position, sear means engageable with said firing member, rockable means, means for moving said rockable means in direction to lock said sear means and firing member in firing position, means for moving said rockable means in direction reverse to the first mentioned direction when said firing member is moved to fired position, grip-compressible means engageable with said frame and with said rockable means when in position of safety, to block said rockable means in said locking position, and releasable from both said engagements by grip-compression, means for moving said firing member to fired position, trigger means normally in forward position and by pull thereon movable rearwardly, when said grip-compressible means is grip-compressed, to move said sear means for releasing said firing member for movement to fired position, and means for preventing, after a first pull on said trigger means, movement of said sear means by a second pull on said trigger means before movement of said trigger means to said normal forward position.

1,391,500. AUTOMOBILE-RADIATOR. WILLIAM PHILLIPS, Chicago, Ill. Filed Oct. 2, 1918. Serial No. 256,506. 2 Claims. (Cl. 257—130.)



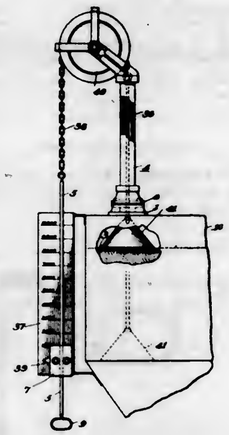
1. An automobile radiator comprising a plurality of units adapted for nesting arrangement to form hexagonal air inlet tubes and vertical water cooling passages, and including in said units angular projections of similar configuration in each unit, said projections also being adapted for nesting in each other and adapted to form obstructions in the vertical water cooling passages thereby separating said water cooling passages into a plurality of vertical compartments, the projections being equipped with recesses supplementing each other to form circular passageways leading from one of said compartments to another.

1,391,501. SWITCH-ACTUATING DEVICE FOR ELECTRIC CARPET-SWEEPERS. JOHN R. VANDER PUTTEN, New Philadelphia, Ohio, assignor to The Wise-McClung Manufacturing Company, New Philadelphia, Ohio, a Corporation of Ohio. Filed Sept. 14, 1917. Serial No. 191,486. 4 Claims. (Cl. 15—60.)



1. In an electric carpet sweeper of the character described, a switch controlling the motor of said sweeper, a chain operatively connected to said switch to open or close the switch and a foot lever pivotally mounted upon the casing of the sweeper and comprising a substantially vertical long arm provided with an upper bifurcated end to receive the end of the chain and a substantially horizontal short foot treadle located in proximity to the floor.

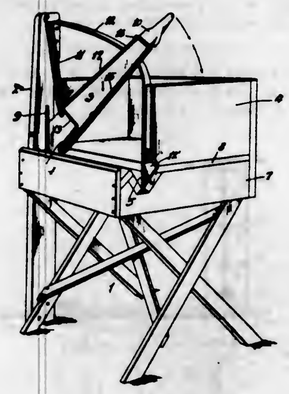
1,391,502. SUPPORT FOR CONTACT-SHOES. CHARLES H. QUARLES, Charlottesville, Va., assignor, by mesne assignments, to American Automatic Train Control Corporation, a Corporation of Maryland. Filed Nov. 17, 1919. Serial No. 338,645. 5 Claims. (Cl. 246—190.)



2. In a contact shoe for railway vehicles the combination with a cylinder, of a contact plunger extending through the cylinder and having a passage therein which opens into the cylinder; a base for supporting the cylinder said base having air passages that extend therein around the cylinder which passages are closed against atmospheric communication but are in communication with the cylinder and a connection for supplying air from the train line of an aire-brake system on the vehicle to said passages and cylinder.

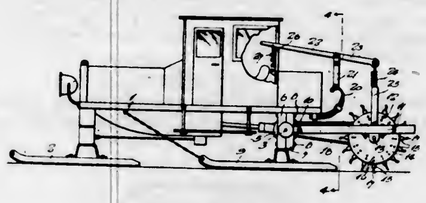
1,391,503. PUMP. JAMES W. REGISTER, Jasper, Fla. Filed Nov. 2, 1920. Serial No. 421,387. 2 Claims. (Cl. 103—51.)

1. The combination with an apertured railroad rail of a cylinder mounted beneath the rail, a piston mounted within the cylinder, a piston rod extending above the cylinder and within the aperture of the rail, and a spring ramp secured to the piston rod and located within the aperture.



1,391,504. TELLTALE DEVICE FOR CLOSED BINS. WILLIAM ORAN RENKIN, Oradell, N. J., assignor to Quigley Furnace Specialties Co. Inc., a Corporation of New York. Filed Apr. 23, 1920. Serial No. 375,979. 2 Claims. (Cl. 33—125.)

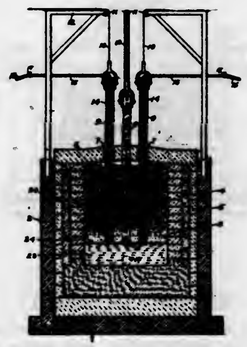
1. In combination with a closed bin for holding pulverized material or the like, a block movable vertically in said bin, an exterior vertical scale graduated to indicate the units of bin contents which may have been removed to lower the level of said bin to any given point, and a pointer movable over said scale and connected to the before mentioned block, the parts being so proportioned, suspended and weighted that the pointer and its connections overbalance the block and its connections, whereby the block is normally held in its uppermost position on the level of the bin contents and the pointer at zero on the scale, when the bin is filled to the proper extent, but the block will fall to the level of the material in the partially emptied bin when the pointer is moved over the scale by an exterior force.



1,391,505. SEED-POTATO CUTTER. WILLIAM C. REYNOLDS, Remus, Mich. Filed Apr. 21, 1921. Serial No. 463,107. 5 Claims. (Cl. 146—7.)

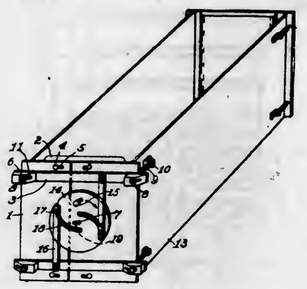
1. A seed-potato cutter comprising a hopper having an open side, a trough extending along said open side to receive potatoes therefrom and having an opening through its bottom, a knife pivotally mounted at one end

of the trough and adapted to extend into the opening of the bottom of the same, and means for yieldably holding the knife in a raised position.



1,391,506. ICE-TRACTOR. JOHN H. RILEY, Menominee, Mich. Filed Aug. 16, 1920. Serial No. 403,885. 3 Claims. (Cl. 180—6.)

1. In an ice tractor, a portable main frame, a pair of vertically swinging frames extending rearwardly from said main frame, driving wheels mounted on said vertically swinging frames, driving means for said wheels, a pair of springs mounted on said main frame and a transverse member extending between said springs, a longitudinal lever fulcrumed on said transverse member and having lateral arms at its rear end, and lifting connections between said lateral arms and said vertically swinging frames.

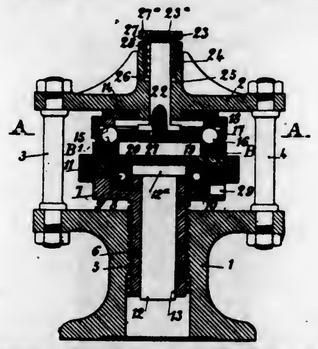


1,391,507. METHOD FOR THE PRODUCTION OF IRON AND STEEL. ELFEGO RIVEROLL, Los Angeles, Calif. Filed May 11, 1920. Serial No. 380,552. 4 Claims. (Cl. 204—63.)

1. The process which consists in subjecting iron sponge containing partially reduced iron compound to the heating action of an electrical current in such manner as to produce and maintain a body of melted metal and a body of slag above such metal, the electric current being maintained between said body of metal, and an electrode extending through said body of slag and directly over said body of metal and supplying reducing gas to the material below the surface of said body of slag and in the zone between said electrode and the body of metal

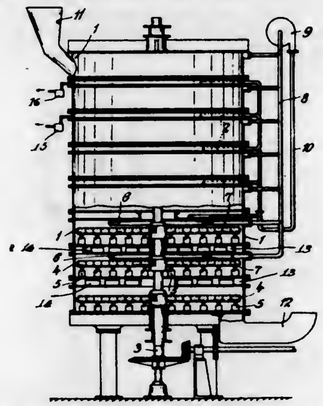
while so heated so as to cause reduction of the iron to metallic state, and melting of the reduced metal.

1,391,508. MOLD FOR CONCRETE BLOCKS. FRANK A. ROOSA, Orange township, Blackhawk county, Iowa, assignor of one-half to John T. Zeidler, St. Joseph, Mo. Filed Mar. 18, 1920. Serial No. 366,844. 3 Claims. (Cl. 25—121.)



1. A mold, comprising spaced side-plates, end-plates positioned across the ends of and projecting laterally beyond the side-plates, longitudinally-slotted wedge-blocks movable laterally across the projecting parts of the end-plates, these projecting parts having orifices positioned in communication with said slots, headed pins traversing said slots and orifices with their heads riding on the outer slopes of said wedges, and tension springs connected to said side-plates and pins.

1,391,509. GAGING APPARATUS FOR THRUST-BEARING RINGS. LOUIS ROUANET, Ivry Port, France, assignor to Compagnie d'Applications Mecaniques, Paris, France. Filed Dec. 17, 1919. Serial No. 345,516. 5 Claims. (Cl. 33—178.)

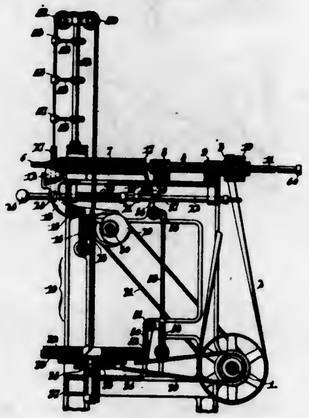


1. An apparatus for gaging the axial diameter of the raceways of thrut ball or roller bearings comprising in combination a stand upon which the ring to be inspected is adapted to be placed, a support adapted to be removably secured to the stand, a thrust member having a contacting surface secured on said support, tactile bodies, means for freely supporting said tactile bodies, means on the stand adapted to force the ring to be inspected toward the said thrust member whereby the tactile bodies are

pressed between the wall of the ring raceway and the said contacting surface, a conical member secured to said

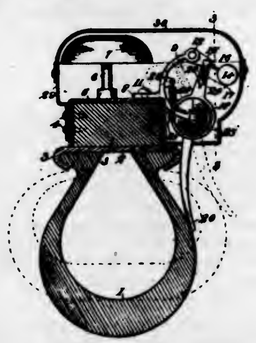
thrust member and adapted to be pressed axially into contact with the tactile bodies, and means on the support for gaging the axial movement of said conical member.

1,391,510. APPARATUS FOR DRYING MATERIAL CONTAINING LIQUID. GUNNAR SCHJELDERUP, Christiansand, Norway. Filed Mar. 1, 1920. Serial No. 362,584. 3 Claims. (Cl. 34—23.)



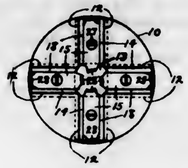
2. A drying apparatus comprising superposed drying chambers communicating alternately at the center and sides, a central shaft, scrapers thereon in the drying chambers, heating chambers interposed between the drying chambers, means to withdraw the vapors from the drying chambers, to compress them and to discharge them into the heating chambers connected in series.

1,391,511. AUTOMOBILE-HEADLIGHT GLASS. WILLIAM G. SCHNEIDER, St. Louis, Mo. Filed July 19, 1920. Serial No. 397,267. 2 Claims. (Cl. 240—48.4.)



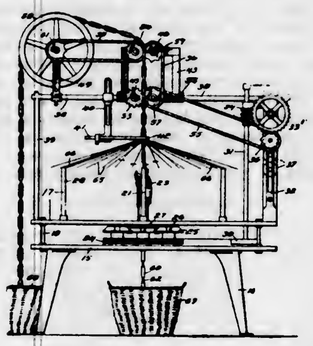
1. A headlight glass of the character described, comprising a glass plate having series of undulations over the entire surface of one side thereof, and having outwardly rounded, raised portions forming a spotted arrangement over the entire surface of the opposite side, the cross sectional width of the undulations being greater than the cross sectional width of the rounded raised portions, and the border of the glass being of less translucent character than the central portion of the glass.

1,391,512. TWISTING-MACHINE. WILLIAM SCHOLES, Philadelphia, Pa. Filed Nov. 8, 1916. Serial No. 130,129. 3 Claims. (Cl. 118—35.)



1. In a machine for forming flat ribbon into twine, the combination of stationary crushing eyelets, and means comprising a rotary winding spindle for drawing the ribbon from a supply roll with a twist and through the eyelets against their crushing resistance, so as to wind it in the form of compact twine.

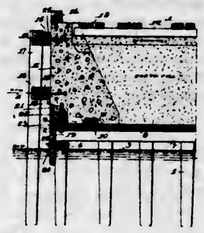
1,391,513. TIRE-ALARM. OTTO FRED SCHROEDER, Santa Ana, Calif. Filed May 16, 1921. Serial No. 470,125. 5 Claims. (Cl. 116—34.)



1. A tire alarm device comprising a base for attachment to a wheel, a bell, a bell clapper associated with the bell and fulcrumed for swinging movement to and from the bell, an oscillating shaft, a lever associated therewith and disposed to extend adjacent to the side wall of a vehicle tire, a part movable with the shaft transversely across the fulcrum of the clapper, and a spring affording the sole operating connection between said part and the bell clapper.

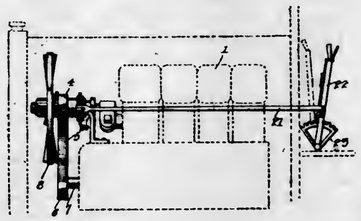
1,391,514. SCREW-THREAD-CUTTING DEVICE. THOMAS SHEHAN, Cleveland, Ohio. Filed Aug. 25, 1919. Serial No. 319,711. 2 Claims. (Cl. 10—121.)

2. In a device for cutting screw-threads, a cutter-head having a radially arranged slideway, a slide which engages said slideway and is provided at its rear side with a slideway extending transversely of the slide substantially at a right angle to the first-mentioned slideway and has a recess extending longitudinally of the slide forward of the second-mentioned slideway, a cutter engaging said recess, a screw securing the cutter to the slide, a block slidable endwise of the said second-mentioned slideway, and a shaft having bearing in the cutter-head at the rear side of the cutter-carrying slide and provided with a crank operatively connected with said block, the cutter having a recess which is spaced from the ends and formed at the rear side and extends longitudinally of the cutter and has its end walls overlapped by the slide, said slide having a screw-threaded hole extending rearwardly from the first-mentioned recess to the aforesaid second-mentioned slideway, and the aforesaid screw having its shank extending rearwardly from within the cutter and threaded into the slide at said threaded hole.



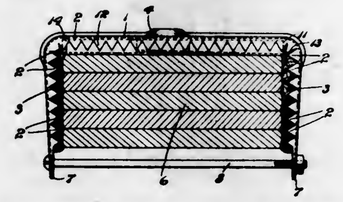
1,391,515. MACHINE FOR MAKING MANTLES. PAUL SINCLAIR, South Williamsport, Pa. Filed July 26, 1920. Serial No. 398,989. 2 Claims. (Cl. 28—4.)

1. In a machine of the class described, a base, a frame carried by said base and overlying the same, a series of separably connected forms, interchangeable take-up mechanisms adapted to be supported on said frame medially of said base for drawing said forms vertically of the latter, and means carried by said frame for drawing said forms laterally of the base after the operation of the take-up mechanism.



1,391,516. PIER CONSTRUCTION. JOSEPH E. SNELL, Newark, N. J., assignor to Henry Steers, Inc., New York, N. Y., a Corporation of New York. Filed Apr. 19, 1920. Serial No. 374,990. 7 Claims. (Cl. 61—48.)

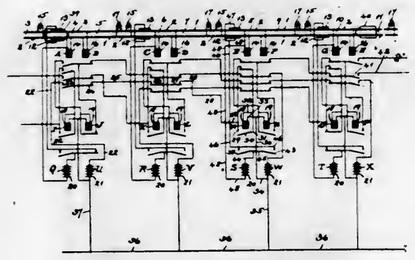
1. A pier comprising a deck of inflammable material, inflammable supports for supporting the deck above water, and a pre-cast reinforced concrete curtain carried by and depending below the deck and below the water line,



and means between the levels of high and low water for securing the curtain to the support.

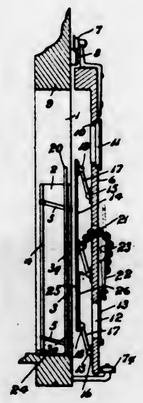
1,391,517. FAN. LOUIS HERMAN SOHN, Huron, S. D. Filed June 16, 1920. Serial No. 389,448. 2 Claims. (Cl. 170—163.)

1. A fan including a rim and a hub of elongated formation, spokes rigidly connected to the rim and to the forward portion of the hub, blades having pivot elements connected to the rim and the hub, a collar slidably and rotatably mounted on said hub rearwardly of said blades, and having racks slidable on said hub, pinions mounted on said pivot elements and engaged by said racks, whereby the movement of the rack results in the rotation of said blade, a pulley surrounding the said hub and racks, and having radial pins connected to said hub, said collar being provided with a groove, and a lever having branches extending into said groove for moving said collar longitudinally on said hub, said radial pins constituting a stop element for limiting the forward movement of the racks and the turning of the blades.



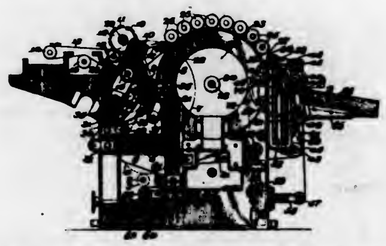
1,391,518. SPRING-OILER. ROY B. SOMERS, Zeeland, and THOMAS OLINGER, Holland, Mich., assignors to Federal Stamping Company, Holland, Mich., a Corporation of Michigan. Filed Oct. 27, 1919. Serial No. 333,673. 2 Claims. (Cl. 184—1.)

2. In combination with a leaf spring, two telescoping trough members of sheet metal located against the upper side of the leaf spring, each of said members having a downturned outer end to limit the telescoping movement



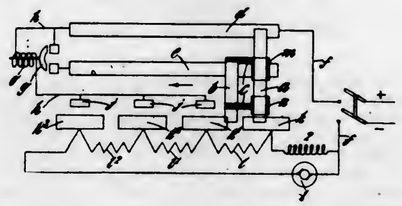
of the trough member when applied to the spring, a pad located in the trough member and turned downwardly at its ends to lie against the front and rear sides of the spring, and a sheet metal retaining member lying over and against the pad and serving to secure it in position on the spring, said retaining member having triangular shaped projections turned at right angles at each side edge thereof and bearing against the side edges of the pad, substantially as described.

1,391,519. SYSTEM FOR AUTOMATICALLY CONTROLLING THE MOVEMENT OF TRAINS. CHARLES Z. STEPHENS, Richmond, Va., assignor, by mesne assignments, to American Automatic Train Control Corporation, a Corporation of Maryland. Filed Dec. 20, 1918. Serial No. 267,684. 4 Claims. (Cl. 246—49.)



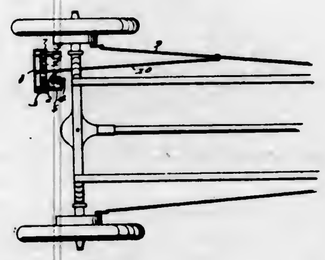
1. In a train control system the combination with the track rails provided at intervals with insulated joints and forming long and short insulated blocks, of a track relay for each block, means along the shorter blocks only for transmitting electrical energy to a control mechanism on a vehicle and means for supplying electrical energy to the transmitting means along the said shorter blocks said supplying means including two movable devices one of which is controlled by the approach of traffic in one direction and the other controlled by traffic in an opposite direction.

1,391,520. CAR-DOOR. GEORGE THOMPSON, Grand Rapids, Mich. Filed July 16, 1919. Serial No. 311,356. 4 Claims. (Cl. 20—27.)



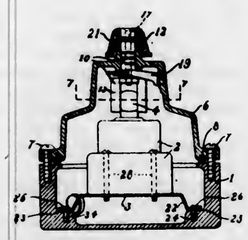
4. In combination, a car having a side opening therein, a door slidably mounted thereon for opening or closing the door opening, a vertically positioned plate attached to the rear side of the door and connected thereto so that it may be elevated against the rear side of the door or lowered and moved backward a distance into the opening in the car, means for moving the plate against the rear side of the door from without the door, and means automatically operable as the plate is lowered and moved backward for engaging the same and locking it against forward movement from direct horizontal pressure applied to its rear side, substantially as described.

1,391,521. IRONING-MACHINE. ISAAC F. WILLEY, Philadelphia, Pa. Filed June 10, 1918. Serial No. 239,126. 9 Claims. (Cl. 68—9.)



1. An ironing machine, which comprises in combination, a revoluble ironing drum, a plurality of ironing rolls of relatively small diameter opposed to the periphery of said drum at the upper portion of the machine, said juxtaposed small diameter ironing rolls being collocated in such close relationship to each other and to the upper periphery of said drum as to effect the feeding forwardly and continuous progression of a collar presented laterally to said rolls with its longitudinal axis in substantial parallelism to said rolls, a plurality of upper and lower continuous conveyer aprons which coöperate with each other and one of which is opposed to the periphery of said drum near the lower portion of the machine, means for driving said aprons in unison with said revoluble drum and said ironing rolls, means for the continuous delivery of the ironed collars to the conveyer apron opposed to said ironing drum, means for transferring the collars to and upon the lower coöperating conveyer apron, means for forming a loop in the upper rear portion of said upper apron, a gravity tension roll supported in said loop, means for adjusting said roll, means for forming a loop in the lower front portion of said lower apron, a lower front tension roll in said latter loop, and means for adjusting the tension of said lower front tension roll.

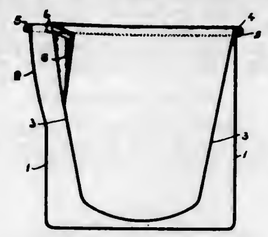
1,391,522. ELECTRIC CONTROLLER. RICHARD AMBERTON, London, England. Filed Mar. 3, 1920. Serial No. 362,947. 11 Claims. (Cl. 219—20.)



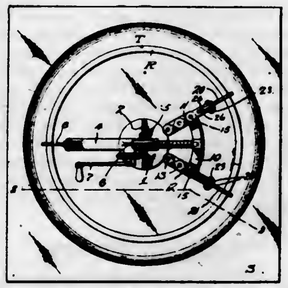
1. An electric controller comprising a plurality of contact plates, a plurality of contact studs, a plurality of resistance studs, resistances connected to said studs, a main contact arm, said contact arm being adapted to form electrical connection between one contact plate and the resistance studs, an auxiliary contact arm, said auxiliary contact arm forming electrical connection between a second contact plate, the resistance studs and the contact studs, a contactor adapted when operated to form electrical connection between the contact plates, and electrical means for operating said contactor, said electrical means being controlled by the auxiliary contact arm in such a manner that the contactor operates repeatedly and substantially performs each successive operation of cutting resistance in and out, and of varying the electrical connections.

1,391,523. AUTOMOBILE-SIGNAL. HUGH CHRISTOPHER ANDERSON, Detroit, Mich. Filed July 14, 1920. Serial No. 396,095. 1 Claim. (Cl. 116—49.)

A rear end signal for automobiles and the like comprising spaced brackets for attachment to a vehicle body, a pair of disks, a light penetrable indicator plate or shutter spanning said disks and secured to the periphery thereof, a shaft on which the disks are carried, the shaft being rotatably mounted in the brackets, a yoke connected with the shaft and spanning the brackets, and a link pivotally connected with the yoke and adapted for pivotal connection with the brake rod of the vehicle.



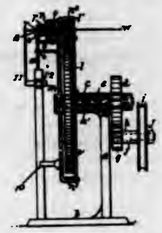
1,391,524. CAP FOR CONDUIT OUTLET-BOXES. CARL H. BISSELL, Syracuse, N. Y., assignor to Crouse-Hinds Company, Syracuse, N. Y., a Corporation of New York. Filed Sept. 3, 1919. Serial No. 321,302. 14 Claims. (Cl. 200—172.)



12. A switch operating member comprising a handle and a rotary motion transmitting element on which the handle is mounted, a rotary switch button engaging element, one of said elements being shiftable about its axis relatively to the other and the handle being shiftable relatively to the motion transmitting element, and means for holding the motion transmitting element and the button engaging element in their adjusted position, substantially as and for the purpose described.

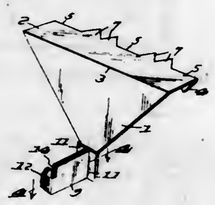
1,391,525. SAUCEPAN AND LIKE COOKING AND HEATING APPLIANCES. THOMAS GUY BLOOD, Birmingham, England. Filed June 23, 1920. Serial No. 391,209. 2 Claims. (Cl. 53—1.)

1. A saucepan and like cooking and heating appliance comprising an outer vessel with an outwardly projecting vertical lip, and an inner vessel with an inwardly projecting lip situated opposite to the lip of the said outer vessel.



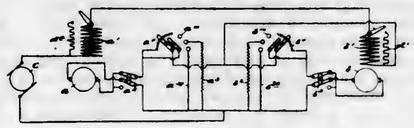
1,391,526. RIM EXPANDING AND CONTRACTING TOOL. LEONORE L. PARK and WILSON W. BYLES, St. Louis, Mo. Filed July 1, 1920. Serial No. 393,414. 3 Claims. (Cl. 157—1.)

1. A rim tool comprising a base, an arm extending radially from said base and provided with rim engaging means, said arm being fixed relative to said base, a screw shaft mounted in said base in the same plane as said arm and in alinement therewith, an arcuate-head mounted midway its ends on said shaft, two pivoted arms carried by said head and mounted to swing toward and away from each other, and rim gripping fingers pivoted on said pivoted arms to swing in a direction at right angles to that in which said arms swing.



1,391,527. MACHINE FOR MAKING GLASS BEADS. WILLIAM F. CHASE, Peekskill, N. Y. Filed Apr. 19, 1920. Serial No. 374,846. 4 Claims. (Cl. 49—14.)

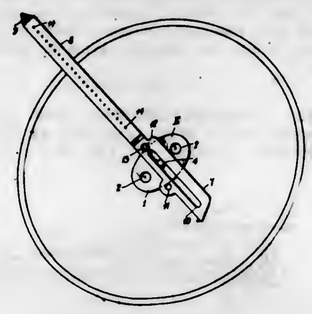
1. A machine for forming glass beads comprising a shaft bearing supported on a standard with a base, a hollow shaft in the bearing and a solid shaft to run in the hollow shaft, means to drive the hollow shaft, a spur gear wheel on the outer end of the hollow shaft, a disk frame on the solid shaft adjacent to the said spur gear wheel, a hollow spindle in the frame and a gear pinion on said



spindle engaging with the said spur wheel, a handle on the frame adjacent to said spindle comprising a die and cutting off lever, a post adjacent to the frame, fast to the base, for tripping the cutting off lever, a stop on the frame, fast to the base, for tripping the cutting off lever, a stop on the frame to contact with said post, and an adjustable gage in the top of said post.

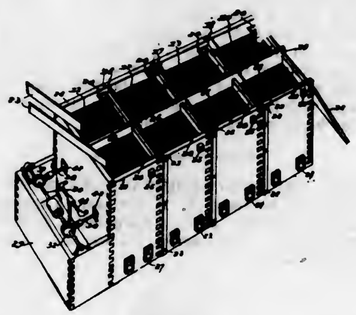
1,391,528. WINDOW-SHADE BRACKET. RUFUS C. CRANFORD, De Land, Fla. Filed Feb. 11, 1919. Serial No. 276,257. 1 Claim. (Cl. 156—24.)

A device for the purpose indicated formed from a single blank of metal and consisting of a triangular body having a right-angularly disposed supporting flange at its upper edge, the said flange being formed with anchoring spurs at its edge, the body being formed with a depending extension at its vertex, the said extension having oppositely disposed laterally extending wings bent back on themselves with those portions adjacent their extremities lying against each other and formed with shade roller stud receiving sockets the connecting portions of the wings forming shade roller supports and being disposed in planes at right angles to the body.



1,391,529. ELECTRICAL DRIVING. HENRY CROCHAT, Paris, France. Filed Aug. 17, 1916. Serial No. 115,479. 1 Claim. (Cl. 172—239.)

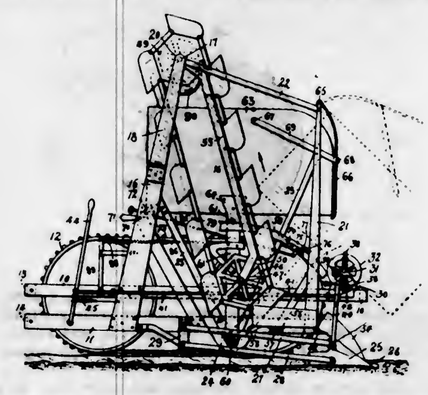
In a system for propelling a vehicle, an electric generator, driving means therefor, a pair of mechanically independent electric motors connected to driven means at the sides of the vehicle, the armatures of said motors being connected in parallel and the field windings of said motors being connected in series with each other and with their armatures, and a controller for the motors comprising means for independently shunting the field windings of the respective motors, means for introducing a resistance in the armature circuit of each motor and for increasing such resistance until the respective armature is cut out of the circuit, means for shunting the brushes of the armature thus cut out of the circuit by a resistance, means for diminishing the amount of such resistance, and means for reversing the current in the armature of the motor thus cut out.



1,391,530. DRAFTING APPLIANCE OR EQUIPMENT. RAMÓN J. BUSTILLO Y DIEGO, Habana, Cuba. Filed July 1, 1919. Serial No. 308,031. 3 Claims. (Cl. 33—27.)

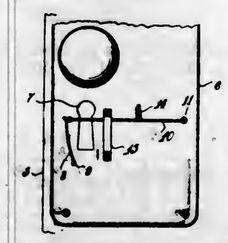
1. An educational device including, a plurality of templets having pattern edges of different configuration and each templet having a pin projecting from the upper surface thereof, a scriber arm adapted to be used separately and selectively with any one of said templets and having a longitudinal slot therein for engaging said pin,

and a pin fixed to said arm adapted to coöperate with said pattern edges for tracing the contour thereof on an amplified scale.



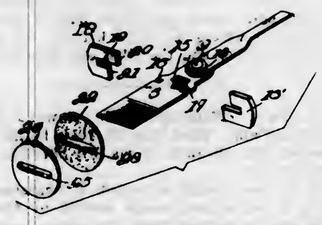
1,391,531. JIG. WILLIAM DORTON, Leadwood, Mo. Filed Aug. 19, 1919. Serial No. 318,458. 2 Claims. (Cl. 83—79.)

1. An apparatus for the purpose described having a series of consecutively available concentrate and middlings compartments provided with separating screens disposed adjacent the tops of said compartments and separated by transverse barriers of graduated heights, concentrate cups disposed at the upper edges of the barriers and above the planes of the screens, a feed launder and a tailing apron operatively disposed with reference to the concentrate and terminal middlings compartments, a bottom outlet hutch in each compartment, and agitating means arranged between pairs of adjacent compartments in a plane substantially intermediate between the planes of the concentrate cups and the outlet hutches.



1,391,532. EXCAVATING-MACHINE. CHARLES A. DOUD, Underwood, Wyo. Filed Oct. 3, 1919. Serial No. 328,108. 6 Claims. (Cl. 37—24.)

1. In an apparatus of the class described, a frame adapted to support excavating and elevating devices, standards swinging upon said frame, a receptacle open at one end and attached to said standards in position to receive the material from said elevating device, the major portion of the receptacle being disposed between its support and open end, a closure for the open end of the receptacle and swingingly mounted upon said frame, means for swinging said closure into open position when the receptacle moves into discharging position, means applied to said standards for automatically returning the

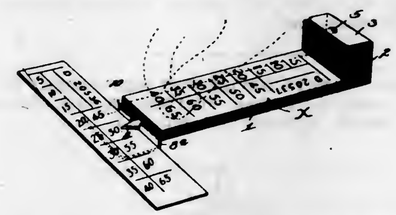


receptacles to receiving position when discharged, and a catch device operating to hold said receptacle in load receiving position.

1,391,533. KEY-HOLDER. REUBEN JOSEPH ECKSTEIN, Kitchener, Ontario, Canada. Filed Mar. 31, 1920, Serial No. 370,151. Renewed Aug. 1, 1921. Serial No. 489,356. 2 Claims. (Cl. 70—7.)

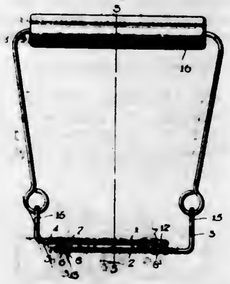
1. In combination with a door plate having a key opening of a latch pivotally connected at one end thereto to traverse the key opening, a keeper member limiting the motion of said latch, a tension means holding said latch so as to prevent a key from being taken out of a key opening in said plate and a means for holding said latch in inoperative position.

1,391,534. ELECTRIC FUSE. EDWARD H. ELLISON, Jamestown, N. Y., assignor to Monarch Refillable Fuse Co., Jamestown, N. Y., a Corporation of New York. Filed Jan. 2, 1919. Serial No. 269,187. 6 Claims. (Cl. 200—132.)



1. A fuse of the character described comprising an insulating casing, two knife blades, a removable fusible link connecting said blades, said knife blades having notches in the opposing edges thereof and separate, integral lugs projecting from the opposite faces thereof, a two part bridge straddling said knife blades, each part adapted to abut each of said lugs and to engage one of the notches in said blades, and means for closing the ends of the casing.

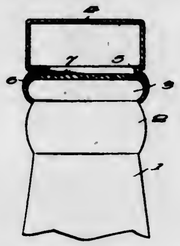
1,391,535. DENTAL IMPRESSION-TRAY. ALBERT MARCUS EPSTEIN, Elmira, N. Y. Filed Jan. 17, 1921. Serial No. 437,827. 1 Claim. (Cl. 32—6.)



A dental tray formed of pulp material which becomes relatively rigid when dried and molded to shape with a rigid reinforcing member embedded within the pulp material, and a handle connected to the reinforcing member and projecting through the material of the tray and in advance of the same.

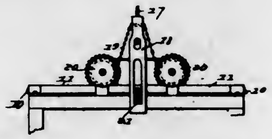
1,391,536. TICKET OR CHECK NOTCHING DEVICE. JAMES A. FELLOWS, Philadelphia, Pa., assignor to Globe Ticket Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed July 30, 1920. Serial No. 400,050. 5 Claims. (Cl. 211—37.)

1. In a device of the character described, a plate having an offset therein forming a support for a check and an abutment for the edge of a check on said support, and a tongue attached to said plate and extending through said offset and provided with a notch-forming point arranged opposite to said support.



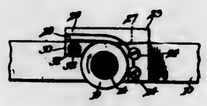
1,391,537. BOTTLE CARRIER AND SUPPORT. OSBORNE FITZSIMMONS, Chicago, Ill. Filed Oct. 2, 1920. Serial No. 414,184. 3 Claims. (Cl. 215—100.)

1. In a device of the class described, a split ring having a laterally extending arm at one end, a coöperating similarly shaped ring having its arm located diametrically opposite the first mentioned arm, a pair of spaced



sleeves fixed to each of said rings one ring being slidably mounted in the sleeves of the other ring, and means whereby said arms are retained always at diametrically opposite points.

1,391,538. CAP-CLOSURE. WALTER C. FOELL, Waterbury, Conn. Filed Mar. 21, 1918. Serial No. 223,752. 1 Claim. (Cl. 215—46.)

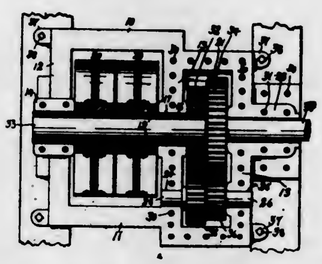


The combination with a bottle having an outwardly directed annular bead at its mouth and an annular enlargement next the bead, of a cap comprising a cylindrical body closed at the outer end and with an inwardly directed rib intermediate the ends, the portion of said cap between the rib and its open end adapted to be crimped into the space between the bead and the enlargement to lock the cap in position, the cap being detachable by pressure applied to the cap longitudinally of the bottle to force the rib over the bead and the crimped portion over the enlargement.

1,391,539. SAFETY DEVICE FOR MINE-CAGES. OSCAR GLENN, Butte, Mont. Filed Sept. 25, 1919. Serial No. 326,198. 2 Claims. (Cl. 187—82.)

1. A safety device for mine cars or cages having car carried bolts for engagement with stationary racks, spring actuated spindles having gears engaged with teeth on said bolts to impart rack engaging movement to the latter, drums carried by the spindles, a retaining chain reeled upon the drums and adapted when strained to impart bolt retracting movement to the spindles, and a cable and a movable head connected with the car supporting cable and engaged with said retaining chain for normally maintaining the latter under tension.

1,391,540. YARN-CLEANING DEVICE. WILLIAM E. GOYETTE, Philadelphia, Pa., assignor to John E. Garey, Elmira Heights, N. Y. Filed June 26, 1917, Serial No. 177,007. Renewed Feb. 14, 1921. Serial No. 445,012. 35 Claims. (Cl. 28—20.)

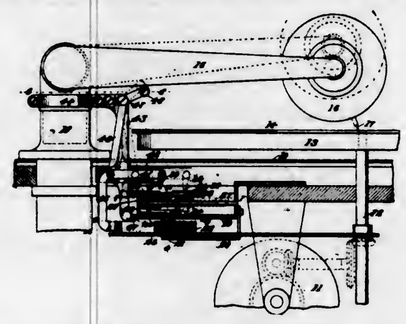


1. In a device of the class described, the combination of a moving yarn-cleaning element, and means for moving said element actuated by the yarn.

1,391,541. AUTOMOBILE-TIRE. JOHN AUDLEY GRANT, Atlanta, Ga. Filed Jan. 15, 1920. Serial No. 351,725. 1 Claim. (Cl. 152—10.)

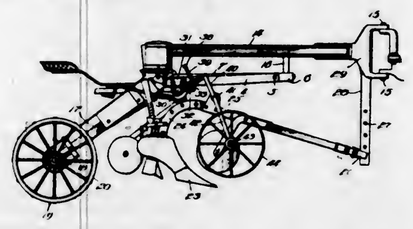
In a tire, the combination of an outer casing, a pneumatic inner tube of substantially smaller cross sectional area than said casing arranged adjacent the bead thereof and in spaced relation to the inner walls of said casing, said inner tube having a sustaining filling of cotton, a removable envelop entirely inclosing said inner tube, said envelop including inner and outer canvas linings adapted to snugly fit the inner and outer circumferential walls of the tube and casing and provided with a sustaining and protecting cotton filling to yieldably sustain the casing and to provide a protecting guard for the inner tube, said lining members and filling being provided with a circumferential slit for the removal of the inner tibe, the ends of said slit abutting between the inner tube and the wall of the bead to provide an unbroken surface therebetween.

1,391,542. GEARING. OSCAR C. HAMEL, Peabody, Mass. Filed Aug. 4, 1920. Serial No. 401,122. 2 Claims. (Cl. 74—7.)



1. In an apparatus of the class described a supporting frame oblong in outline and including end members and an intermediate transverse member, said end members and intermediate members having shaft bearings in alinement longitudinally of the frame, an oil holding casing depending from the frame between the intermediate cross member and one of the end members, said bearings adapted to support shaft elements and gearing elements with the gearing elements operating constantly in the oil in the half casing, and drive pulleys carried by the shaft elements within the frame between the intermediate transverse member and the other end member.

1,391,543. PHONOGRAPH. EDWARD L. HOLMES, Berkeley, Calif. Filed July 26, 1915, Serial No. 41,900. Renewed Mar. 29, 1919. Serial No. 287,660. 38 Claims. (Cl. 274—15.)

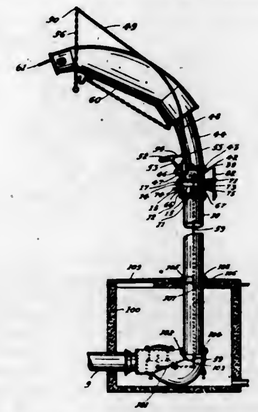


1. In a phonograph, a record, a swinging tone arm carrying a reproducer, means carried by the tone arm to raise said reproducer from the record, means for controlling the raising of said reproducer at any point in the angular movement of the tone arm, means to retain

the reproducer in raised position, means to shift the tone arm when the reproducer is raised, means to stop

the return movement of the tone arm at any point and release the locking means to permit the reproducer to reëngage the record.

1,391,544. TILLAGE IMPLEMENT. JOHN L. IRVING, Moline, Ill., assignor to Moline Plow Company, Moline, Ill., a Corporation of Illinois. Filed Dec. 9, 1919. Serial No. 343,664. 10 Claims. (Cl. 97—30.)



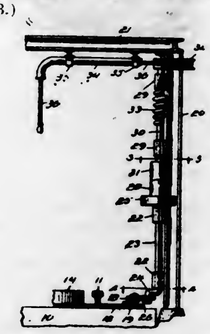
1. In an implement of the class described, the combination of a main frame adapted for connection with an elevated portion of a tractor, tillage elements located beneath the main frame and adjustable with respect thereto, a tillage beam adapted for connection with a lowdown portion of the tractor, and main supporting wheels carried by the main frame to the rear of the tillage elements and in tracking relation therewith, substantially as described.

1,391,545. WATER-COLUMN. EDWARD E. JOHNSON, St. Paul, Minn. Filed Apr. 20, 1917. Serial No. 163,432. 32 Claims. (Cl. 137—21.)

1. A water column comprising a fixed standpipe, a laterally-extended discharge pipe carried upon and revoluble about the vertical axis of said standpipe, means for positively locking said discharge pipe in a position parallel with the tracks, and a cam member pivoted to said discharge pipe operable from the tender for unlocking said discharge pipe.

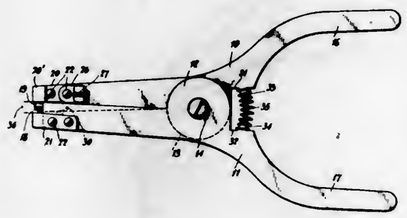
7. A water column comprising a rigid vertical standpipe, a ring support connected with the standpipe and spaced from the outer cylindrical surface thereof, a second ring support revolubly connected with the first ring support and having a portion extending into said space with an inner cylindrical face surrounding and spaced from said outer cylindrical face, packing rings in the annular space between said faces, means for adjustably applying pressure to the packing rings to make a water-tight joint, and a laterally extended discharge pipe rigidly connected with the revoluble ring support.

12. A water column comprising a rigid vertical standpipe, a laterally extended discharge pipe and a support therefor revolubly mounted on the standpipe, a pair of dogs pivotally connected with the standpipe, a lug on said support engageable with the dogs to hold the discharge pipe locked in parallel-track position, means op-



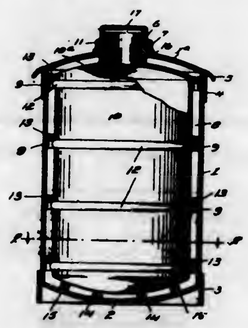
erable from the locomotive tender to withdraw the dogs from engagement with the lug, and means on said disengaging means for holding the dogs disengaged until the support and lug have been revolved.

1,391,546. FILLED BANGKOK HAT AND PROCESS FOR MAKING SAME. CHARLES S. KATZ, St. Louis, Mo. Filed June 2, 1920. Serial No. 386,050. 3 Claims. (Cl. 2—108.)



1. As an article of manufacture a bleached filled Bangkok hat.

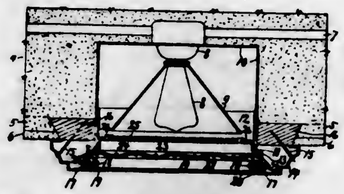
1,391,547. RAILWAY SWITCH-THROW AND MINE SWITCH-THROW. DUGALD J. KELLY, Johnston City, Ill. Filed Mar. 8, 1921. Serial No. 450,653. 2 Claims. (Cl. 246—393.)



1. A switch operating mechanism comprising a lever member adapted to be coupled at one end to a switch bar and pivoted at the other end adjacent to one of the rails of a railway track, a crank rod mounted for rotation and coupled to the lever member intermediate its ends, a ratchet member connected to said crank rod, a stop pawl associated with said ratchet member, and means operative from a car for rotating the crank rod.

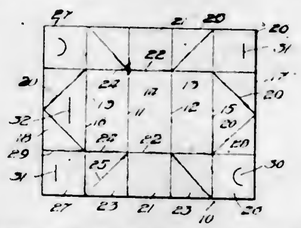
1,391,548. PISTON-RING REMOVER. ALVIN L. KLECKLEY, Charlotte, N. C. Filed Aug. 14, 1920. Serial No. 403,559. 5 Claims. (Cl. 29—86.4.)

1. A piston ring remover, comprising a pair of pivoted jaw members each provided at one end with an operating handle and provided at its opposite end with a lug for insertion in the gap between the ends of a piston ring, each of said jaws having a pair of side plates secured thereto, one on each side thereof and projecting beyond the lug of said member, one of each pair of said plates adapted to engage the opposite jaw to limit the closing movement of said jaws and form a space between the outer end of said plate and the end of the complemental plate of the other jaw.



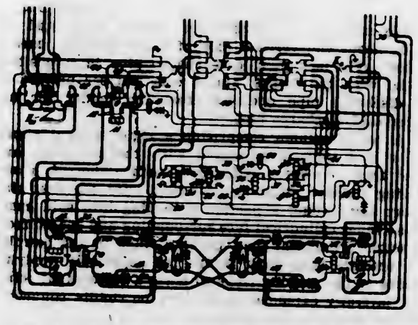
1,391,549. VACUUM-CAN. STELLA C. LARSEN, Washington, D. C., assignor of one-half to John W. Rust, Fairfax, Va. Filed Sept. 16, 1920. Serial No. 410,699. 1 Claim. (Cl. 220—15.)

A can of the class described comprising inner and outer casings connected to form a vacuum space around the inner casing *a* with combined packing and spacing rings arranged at intervals between them and encircling the inner casing, said casings having oppositely disposed reinforcing peripherally arranged annular ribs on the upper faces of which said rings are seated, said rings being of uniform width throughout and corresponding in width to the distance between the casings to adapt them to operate as spacers and form vacuum chambers between them.



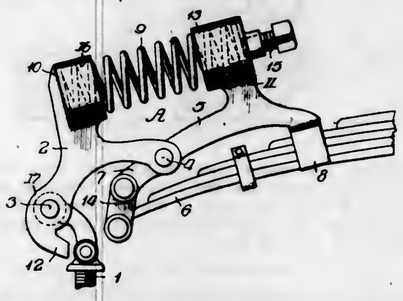
1,391,550. GYMNASIUM LIGHT. GEORGE L. LOCKHART, St. Paul, Minn., assignor to L. P. T. Specialty Company, Minneapolis, Minn., a Corporation of Minnesota. Filed July 24, 1919, Serial No. 313,131. Renewed Aug. 3, 1921. Serial No. 489,591. 6 Claims. (Cl. 240—3.)

1. The combination with a wall, ceiling, or other part of a room, having a cavity in its inward side, of a sheet metal box secured in the cavity, an electric lamp mounted in said box, an open frame inserted upwardly partly into the box and having a molding projecting outwardly upon the face of the wall or ceiling about the cavity, and means for securing said molding in place; said molding having an internal recess, stops detachably secured in said recess,



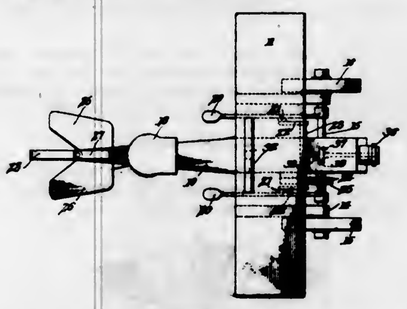
a wire netting retained by the stops, a skeleton frame retained by the wire netting, and a glass lens held by the skeleton frame intermediate the netting and the lamp.

1,391,551. BUTTER-WRAPPER. JOHN W. LOW, Joliet, Ill., assignor to National Carton Company, Joliet, Ill., a Corporation of Illinois. Filed Apr. 19, 1918. Serial No. 229,504. 4 Claims. (Cl. 229—40.)



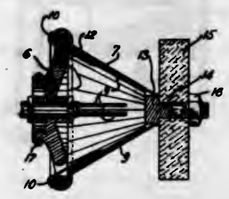
1. A wrapper for the purpose set forth comprising a sheet of scored material, including bottom and side walls and end walls of multi-thickness formed in part of terminal flaps of the bottom wall of a depth equal to the depth of the side walls and in part of triangular sections formed by diagonally folding adjacent side wall terminal flaps, and a top wall comprising members including inwardly turned terminal flaps of said side walls and inwardly turned underlying end extensions of the latter flaps, said end extensions at each end of the wrapper lying one over the other and one provided with a locking tongue to enter a locking slit of the other.

1,391,552. REPEATER-CORD-CIRCUITS. OWEN H. LOYNES, Woodridge, N. J., and Arthur F. Rose, New Brighton, N. Y., assignors to American Telephone and Telegraph Company, a Corporation of New York. Filed Sept. 23, 1919. Serial No. 325,761. 3 Claims. (Cl. 179—50.)



3. In a telephone system, a toll switching trunk terminating at a central office, a cord circuit at said central office including repeater apparatus and adapted for establishing connections with said trunk, means responsive to the connection of said cord with said trunk for completing a bridge across the talking conductors of said cord and for completing a bridge across the network conductors of said cord, supervisory signaling apparatus controlled by said first mentioned bridge, and an impedance element included in said second mentioned bridge having an impedance approximately equal to the impedance of said first mentioned bridge.

1,391,553. SHOCK-ABSORBER FOR AUTOMOBILES. EDWARD F. MCCARTHY, Chicago, Ill., assignor to The Ramo Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 25, 1919. Serial No. 340,678. 5 Claims. (Cl. 267—17.)



5. In a vehicle, the combination with a body member and a frame member, of means for resiliently supporting said body member on said frame member comprising a leaf spring secured to one of said members, a lever connected to said spring, and a second lever pivotally mounted on the other of said members and having a single connection with the first lever at an interval from the point of connection of said first lever and said springs, so that a downward thrust causes said levers to collapse, and a spring interposed between said levers to oppose the collapse of said levers.

1,391,554. CHILD'S VEHICLE. ROLLIN MCDOWELL, Portland, Oreg. Filed Dec. 14, 1920. Serial No. 430,704. 2 Claims. (Cl. 208—42.)

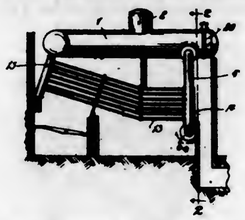
1. A device of the character described comprising a body, a hinged member at the rear end thereof carrying a ground engaging roller, means for swinging said member, an axle journaled below the forward end of the body and carrying ground engaging wheels, a pinion on said axle, a gear journaled below said body and meshing with said pinion, a crank shaft upon which said gear is mounted and provided with crank portions, and treadles pivoted upon the axle and connected by links with said crank portions.

1,391,555. GRINDING ATTACHMENT FOR SEWING-MACHINES. LOOMIS N. MCFALL, Denver, Colo. Filed Jan. 20, 1919. Serial No. 271,967. 1 Claim. (Cl. 51—257.)

A sewing machine attachment, comprising a hollow frusto conical frame whose larger extremity is adapted to fit snugly against the side of the fly wheel of a sewing machine, means on the inner face of said hollow frame at said larger extremity to project between the spokes of said fly wheel and engage said wheel to retain said frame thereon, said means comprising a plurality of elongated U-shaped resilient members having their inner ends secured to the inner side of said frame and their outer ends extending beyond said frame, one of said U-shaped members having an outwardly projecting portion (12) whereby the member may be readily operated for the purpose of attaching and releasing the frame from the wheel, an opening in said frame for receiving said projection and a grinding member mounted on the smaller end of said frame.

1,391,556. FINGER-PENCIL. HERMOGENES MANUEL, Cebu Cebu, Philippine Islands. Filed Nov. 8, 1920. Serial No. 422,650. 2 Claims. (Cl. 120—102.)

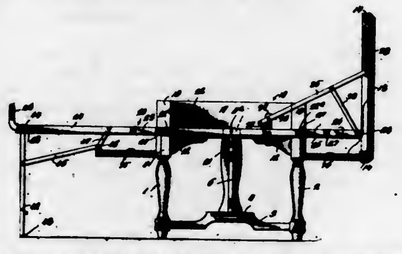
1. A finger pencil including a casing having a slit side at one of its ends and its opposite end tapered, clamping means between the edges provided by the slit, a barrel in the opposite end of the casing, an abutment between the barrel and casing, said barrel designed to receive therein a writing stick, and adjustable means for retaining the stick in the barrel.



1,391,557. BEVERAGE-MAKING MATERIAL AND PROCESS OF PRODUCING THE SAME. GUSTAV KARL MAYER, WILLIAM G. ANDREWS, and ALEX VICTOR COLDBY, Chicago, Ill. Filed July 14, 1920. Serial No. 396,130. 5 Claims. (Cl. 99—11.)

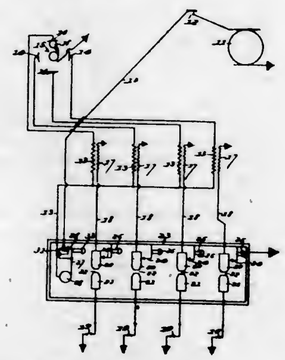
1. A cereal for brewing purposes having its fermentable content converted into a non-fermentable state.

1,391,558. WATER-TUBE BOILER. FRANS MARINUS MEYER, Amsterdam, Netherlands. Filed Apr. 19, 1919. Serial No. 291,279. 1 Claim. (Cl. 122—291.)



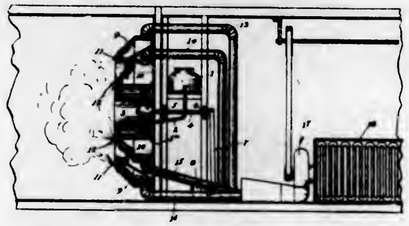
In a watertube-boiler consisting of a steam drum, front and backheaders and muddrum, and the headers connected to each other by means of bent watertubes welded to said headers, said steamdrum being of T-configuration, the

front headers being separately and movably connected to the cross-leg of the T-shaped steamdrum, the said back-



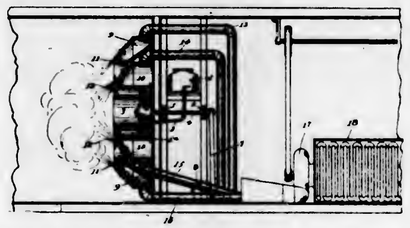
headers being each connected to the muddrum, the latter being movably connected to the other leg of said T-shaped steamdrum.

1,391,559. COMBINATION TABLE AND BED. MARTIN D. MIESNER, Portland, Oreg. Filed Dec. 27, 1919. Serial No. 347,727. 1 Claim. (Cl. 5—17.)



In a knockdown table and bed, a table body, removable legs supporting said body, the front and rear walls of said body being hinged at their lower edges to open outwardly, a top fixed to the upper edge of said rear wall and adapted to be disposed upright when said wall is opened, a foldable sectional bed spring carried by said body and adapted to be incased therein, legs carried by one section of said spring and connected to fold automatically on the opening and closing of said bed spring, a connection between said spring and front wall, standards carried inside said body, and catches on said legs for engagement with said standards when the bed is closed whereby the front wall is held closed.

1,391,560. INDICATOR FOR IGNITION AND LIGHTING SYSTEMS. VENCESLAUS F. MIKOLASEK, Lankin, N. D. Filed Dec. 9, 1919. Serial No. 343,633. 4 Claims. (Cl. 175—183.)



1. In an ignition system, a testing device for the primary circuit consisting of a shunt including an indicating element, stationary terminals included respectively in the main and shunt circuits, and a movable terminal included in the main circuit and adapted for engagement with either of said stationary terminals.

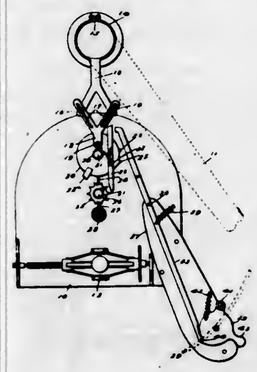
1,391,561. FOOD PRODUCT OBTAINED FROM BREWERS' YEAST. JOHN C. MILLER, Covington, Ky., assignor to The Evaporating and Drying Machinery Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Mar. 19, 1918. Serial No. 223,260. 2 Claims. (Cl. 99—5.)

2. A new food product made from brewers' yeast, comprising an unground flour free from grit, containing substantially fifty-four per cent. of protein, twenty-five per cent. nitrogen free extract, two per cent. crude fat and ten per cent. ash and fiber.

1,391,562. FOOD PRODUCT OBTAINTD FROM BREWERS' YEAST. JOHN C. MILLER, Covington, Ky., assignor to The Evaporating and Drying Machinery Company, Cincinnati, Ohio, a Corporation of Ohio. Filed Mar. 19, 1918. Serial No. 223,261. 2 Claims. (Cl. 99—5.)

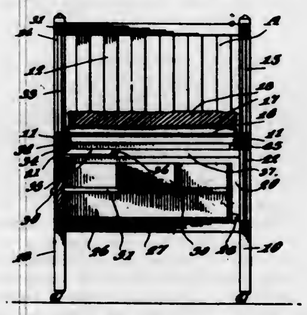
2. A new food product consisting of brewers' yeast the form of an impalpable powder, with the yeast cells in sound condition and the particles of powder not ground, and the active ferments present as in the original wet material.

1,391,563. ABDOMINAL BELT. HENRI ALFRED MONIN, St. Denis, France. Filed Aug. 19, 1919. Serial No. 318,515. 2 Claims. (Cl. 2—188.)



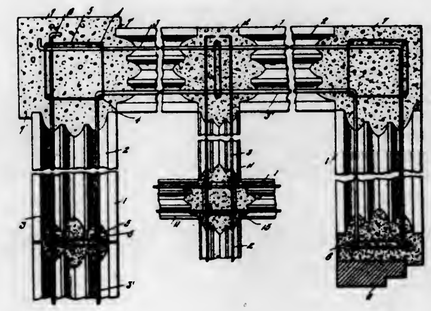
1. A therapeutic appliance of the type described, comprising an abdomen-supporting belt having a series of elastic supporting straps extending from its opposite front edges and crossing each other at an angle, a holding belt arranged below the supporting belt, and means for detachably engaging the straps of one side with the straps of the other side, but of a lower ring, and means for detachably engaging the straps of the lowermost rank with the holding belt.

1,391,564. ADJUSTABLE TOOL AND HEAD. ARTHUR H. MORRIS, Newark, N. J. Filed Nov. 1, 1920. Serial No. 421,058. 3 Claims. (Cl. 29—96.)



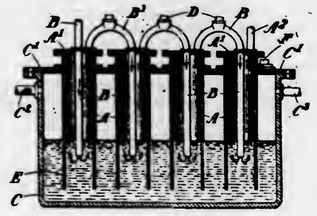
1. The combination of a tool holder, a tool slidably mounted therein and provided with a gear rack, a worm gear for coacting with said rack to effect movement of said tool, and means engaging said worm gear and operable for effecting adjusting movements thereof.

1,391,565. STOP FOR TALKING-MACHINES. WILLIAM J. MURDOCK, Clinton, Ind. Filed May 29, 1920. Serial No. 385,229. 3 Claims. (Cl. 192—116.)



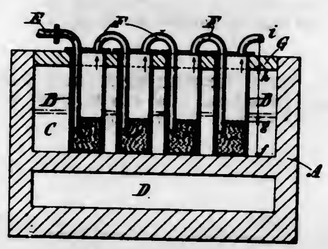
1. The combination with a phonograph, of a brake, a rotatable element, a pivotally mounted spring pressed brake actuating lever carried by the rotatable element and adapted for engagement with the brake, means operated by the movement of the tone arm over the record for moving the brake actuating lever away from the brake and means operated by the motor when the tone arm movement ceases to engage the brake actuating lever and apply the brake.

1,391,566. COMBINED CRIB AND WARDROBE. FRANK W. MUSSELMAN, Kansas City, Mo. Filed Nov. 26, 1920. Serial No. 426,538. 3 Claims. (Cl. 5—58.)



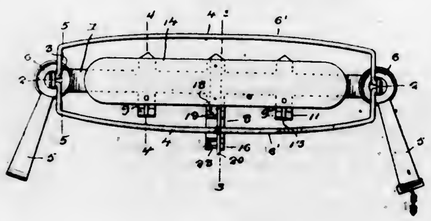
3. A combination piece of furniture comprising a wardrobe and a bed formed thereabove, side and end panels for the bed, one of the panels being movable in relation to the other panels and arranged for sliding movement above the wardrobe, guides slidable above the wardrobe, means pivotally connecting the lower end of the movable panel with the guides, a bayonet slot and pin connection for the movable panel, and means for permitting a limited lateral movement of the sliding guides to permit the actuation of the bayonet slot and pin connection.

1,391,567. WALL CONSTRUCTION. JOSÉ MAS NADAL, Humacao, Porto Rico. Filed July 16, 1920. Serial No. 396,641. 3 Claims. (Cl. 72—30.)



3. In a building construction, a pair of intersecting walls comprising superposed tiers of horizontal alined blocks, all of the blocks having a plurality of grooves in all four of their edges, vertical and horizontal reinforcing rods in the grooves of the blocks, said rods arranged in pairs and the rods of the respective pairs coupled together, a column intersecting tiers of said blocks, and cementitious material in the grooves of the blocks and integral with the column.

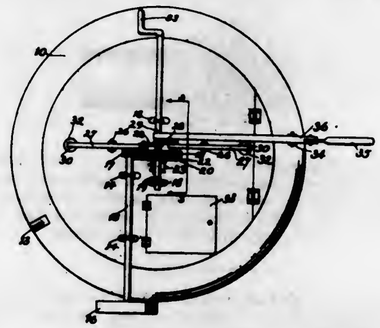
1,391,568. PROCESS FOR THE CRACKING OF HYDROCARBON OILS AND THE LIKE. JOHN NELSON, Glasgow, Scotland. Original application filed Mar. 2, 1918, Serial No. 219,950. Divided and this application filed Oct. 27, 1919. Serial No. 333,733. 6 Claims. (Cl. 196—69.)



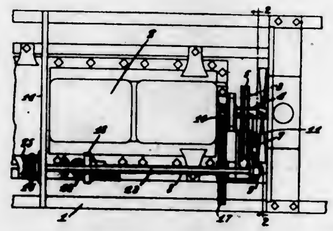
1. The herein described process for cracking hydrocarbon oils and the like, which comprises introducing the hydrocarbon into a liquid contact substance in successive steps of brief contact period.

1,391,569. PROCESS FOR THE CRACKING OF HYDROCARBON OILS AND THE LIKE. JOHN NELSON, Glasgow, Scotland. Filed Dec. 23, 1919. Serial No. 346,990. 9 Claims. (Cl. 196—25.)

1. The herein described process for cracking hydrocarbon oils and the like which comprises introducing the hydrocarbon into a liquid contact substance in a series of steps and between two successive steps cooling the vapors to a point just above that at which they condense.



1,391,570. TRAP. NELS S. NELSON and AXEL BOODE, Detroit, Mich. Filed July 6, 1920. Serial No. 394,160. 2 Claims. (Cl. 43—92.)

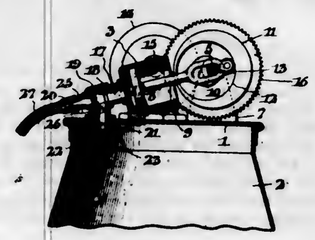


1. A trap of the character described comprising a base having upturned ends, jaws having offset ends pivoted within said upturned ends of the base, U-springs between the base and the ends of the jaws for normally swinging the jaws closed, a plurality of cross pieces on the base extending laterally with respect thereto and beyond the edge thereof, a trip pan, arms carried by said trip pan and hingedly connected with the outer cross pieces, the intermediate cross piece extending outwardly beyond the outer cross pieces and having its free end upturned and slotted, an arm carried by said trip pan above said intermediate cross piece and cut away to provide a plurality of shoulders disposed at different distances from the edge of the pan, and a dog disposed within said notch and longitudinally adjustable and laterally movable whereby its free end will be engaged with a selected one of said shoulders.

1,391,571. WASHING-MACHINE. CECIL JOSEPH NEWHOUSE, Mounds, Okla. Filed July 28, 1920. Serial No. 399,531. 1 Claim. (Cl. 74—14.)

The combination with a receptacle, supports mounted on the receptacle, a horizontal shaft carried by the supports, said shaft having an intermediate crank, a second horizontal shaft adjacent the first shaft, intermeshing gears on the shafts, a pair of uprights on the receptacle, a rock lever mounted on each upright, a vertical plunger rod through the top of the receptacle, a spring carried by the rod and connected with one end of a rock lever, the other end of each rock lever being pivotally connected to said crank, a vertical rotatable shaft operatively engaged with the first horizontal shaft, a rock lever mounted on one side of the receptacle, and a pitman connected with the said rock lever and the said crank.

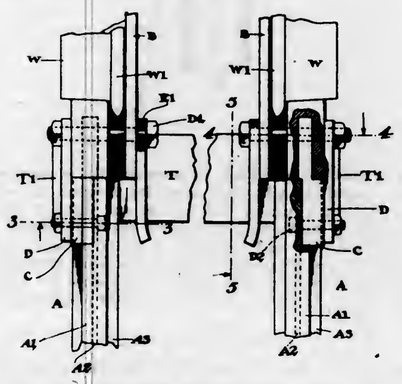
1,391,572. PUMP-OPERATING MECHANISM. THOMAS B. NICKEL, McCracken, Kans. Filed Jan. 24, 1919. Serial No. 272,878. 1 Claim. (Cl. 74—26.)



The combination with a motor vehicle including an engine shaft and a friction drive wheel revoluble with said shaft, of a standard, a driven shaft journaled in the standard, a gear secured to said driven shaft, an arm mounted to swing upon the driven shaft, a controlling rod mounted for rotation in the standard and extending through the dash of the vehicle, means for rotating said rod, an arm movable with the rod, a link connection between the arms, a friction wheel carried by one of the arms, yielding means for holding the friction wheel normally in contact with the drive wheel, and a gear revoluble with said friction wheel and constantly in mesh with the gear upon the driven shaft.

1,391,573. MILKING APPARATUS. LEROY NIXON, Murray Hill, N. J. Filed Sept. 19, 1919. Serial No. 324,843. 4 Claims. (Cl. 31—98.)

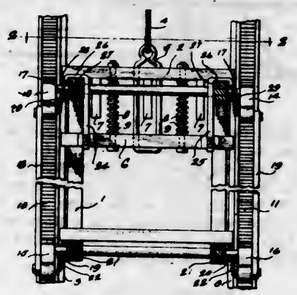
1. A milking apparatus, including in combination, a motion pump and adjunctive appurtenances whereby the same is connected to the animal to be milked; a piston for said pump; and a rotary cam for reciprocating said piston, said cam being so shaped as to cause the piston to dwell at the end of its suction stroke.



2. A milking apparatus, including in combination, a suction pump and adjunctive appurtenances whereby the same is connected to the animal to be milked; a piston for said pump; a driving shaft; a connecting rod for said piston having a yoked extension embracing said shaft and adapted to maintain the piston and cylinder in alinement; and means for translating the rotation of said shaft to effect reciprocation of the piston rod.

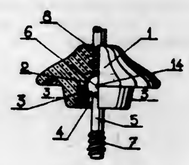
3. A milking apparatus, including in combination, a suction pump and adjunctive appurtenances whereby the same is connected to the animal to be milked; a piston for said pump; a driving shaft; a connecting rod for said piston having a yoked extension embracing said shaft and adapted to maintain the piston and cylinder in alinement; a roller attached to said connecting rod; and a disk cam fixed to said shaft and coöperative with the roller in causing reciprocation of said rod.

4. A milking apparatus comprising, in a complete unit with its parts mounted on a receptacle cover, a suction pump having a cylinder and a reciprocating piston therein; a three-way suction and delivery fitting connected to said cylinder, discharging through said cover, and having a suction connection for milking; a rotary cam for reciprocating said piston with a dwell at the end of its suction stroke; and an electric motor driving said cam through a reduction gearing.



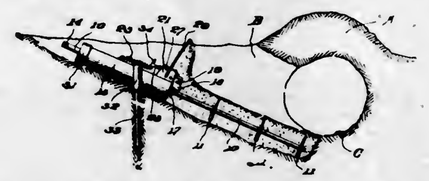
1,391,574. RAILWAY-TRACK AND RAIL FOR THE SAME. CYRUS S. OLDROYD, Cincinnati, Ohio. Filed Jan. 19, 1921. Serial No. 438,412. 17 Claims. (Cl. 238—10.)

1. A reversible railway track rail having at each side a single tread and a single web forming a wheel flange guard, said web being separated from said tread by a wheel flange channel, said channels being at opposite sides of the middle upright-longitudinal plane of the rail, whereby either side of the rail may serve as base or top of the rail, substantially as described.



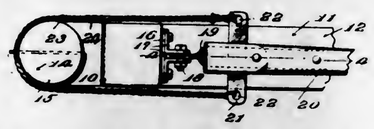
1,391,575. SAFETY-STOP FOR ELEVATORS. ANDREW OPAISAK and JOHN PROKOPOWICZ, Detroit, Mich. Filed Feb. 26, 1919. Serial No. 279,469. 3 Claims. (Cl. 187—83.)

1. In a safety stop for elevators, the combination, with an elevator cage, and the supporting means therefor, of a bar movably carried by the elevator cage and normally held in upward position by said supporting means, spring means for forcing said bar downwardly with respect to the cage, yokes carried by the bar adapted for engagement



with the cage to limit the action of the spring means upon release of the supporting means, racks, pawls pivotally carried by the elevator cage, and means connecting said yokes and pawls to force the pawls into engagement with the racks upon release of the supporting means.

1,391,576. INSULATING UNIT FOR ELECTRIC SUSPENSION-CHAINS. LUCIEN EMILE THÉODORE PERRIN, Paris, France. Filed Oct. 22, 1920. Serial No. 418,864. 3 Claims. (Cl. 173—318.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



3. An insulator unit for electrical suspension chains on high tension lines comprising a porcelain part having a cavity in its lower end, a sleeve of non-conducting material secured in said cavity, and a stem of non-conducting material having a threaded lower end and a spherical ball at its upper end, the ball being located in the cavity and resting on said sleeve and the stem passing through said sleeve, the upper end of the porcelain part being provided with a cavity having a threaded wall designed to engage the threaded stem of another unit.

1,391,577. TRAP. FRANK PHILLIPS, Fort Crook, Nebr. Filed Aug. 28, 1919. Serial No. 320,385. 7 Claims. (Cl. 43—81.)

1. In a trap, the combination, of a rod, a plurality of animal piercing tines carried by said rod, a spring for rotating said rod, a latch pin extending diametrically from said rod, a pawl engaging said latch means for normally holding said spring under tension, and trip means for rocking said pawl to release said spring for rotating said rod.

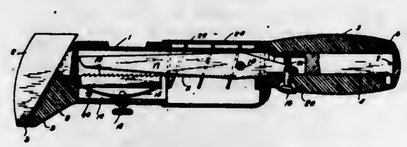
1,391,578. GATE-FASTENER. JOHN R. POWELL, Cleveland, Mont. Filed Apr. 4, 1919. Serial No. 287,495. 1 Claim. (Cl. 292—247.)

A wire gate fastener comprising a lever, a cruciform plate secured to one of the wider faces of one end of the lever with two of its opposite arms projecting from opposite sides of the lever and with one of its remaining arms projecting beyond the end of the lever, said last-named arm of the plate being provided with a hinge member, and a flexible loop having its ends secured to the outer ends of the first-named opposite arms.

1,391,579. ARTIFICIAL CULTIVATION OF BRONCHIO-PNEUMONIA VIRUS FOR USE IN THE TREATMENT OF SWINE. FREDERICK PROESCHER, Sioux City, Iowa. Filed July 15, 1920. Serial No. 396,476. 8 Claims. (Cl. 167—10.)

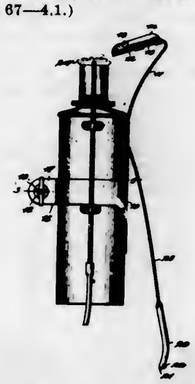
1. As a new product, an artificial pure culture of bronchio-pneumonia virus for the treatment of swine.

5. As a new product, an artificial pure culture of the virus or infective organisms causative of bronchio-pneumonia of swine in a nutrient medium containing a mixture of animal tissue broths containing a dissolved hemoglobin.



8. The method of cultivating bronchio-pneumonia virus of swine, which consists in growing the same in a nutrient medium containing a bouillon made from animal tissue and containing hemolized blood.

1,391,580. AUXILIARY WINDSHIELD. ASBURY REED, Los Angeles, Calif. Filed Dec. 23, 1919. Serial No. 346,963. 1 Claim. (Cl. 296—84.)

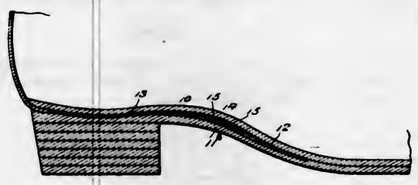


A windshield comprising a glass plate having notches in its upper and lower edges, upper and lower bearing members having channels for the reception of the upper and lower edges of the glass plate, transverse stop parts located in the base of the channels adapted to enter the notches of the plate for holding it against endwise movement, said members each having a socket and the socket of the upper member being tapered, a rod received in the socket of the lower member, and having an end thereof tapered adapted to be received in the tapered socket of the upper member, and means for drawing the rod into the tapered socket and causing the bearing members to clamp the glass plate therebetween.

1,391,581. AUTOMATIC WRENCH. GEORGE E. ROBERTS, Schenectady, N. Y. Filed Mar. 1, 1921. Serial No. 448,789. 6 Claims. (Cl. 81—129.)

3. A wrench comprising a shank having a groove, stationary and movable jaws carried by said shank, means for normally urging the movable jaw toward the stationary jaw, a spring pressed locking element carried by the movable jaw and adapted to engage the shank, an adjusting means for the locking element, an actuating lever pivoted in said groove, and an operating means connected to said actuating lever for moving the same into engagement with the locking element to free the same from the shank.

1,391,582. IGNITION ATTACHMENT FOR TORCHES OR THE LIKE. ALEXANDER H. ROLLERSON, Plainfield, N. J. Filed Oct. 30, 1920. Serial No. 420,795. 1 Claim. (Cl. 67—4.1.)

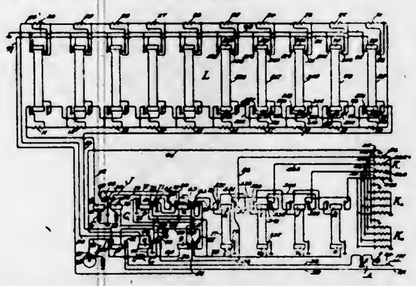


The combination with a torch or the like of an attachment comprising a bracket embodying a clamp, an extension forming a part of said bracket and inclined toward the wick of said torch, a piece of spark producing material carried by said extension, a freely movable holder connected to said bracket, a replaceable spark striking element in the end of said holder, and means for holding said element in place with an end thereof projecting from said holder.

1,391,583. DISPLAY DEVICE. SOLOMON SACHS, Washington, D. C. Filed Apr. 20, 1921. Serial No. 462,966. 2 Claims. (Cl. 211—20.)

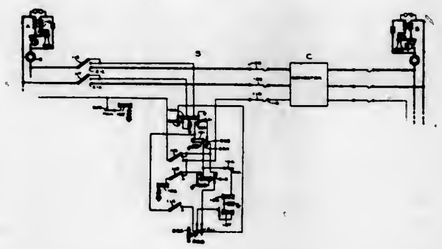
1. A display device comprising a shaft, a plurality of plates supported under the shaft, means for securing adjustably the plates to the shaft, each plate having upwardly extending ears, rollers supported on the ears, a table supported above each plate and means for imparting rotary movement of the shafts to the tables.

1,391,584. ARCH-SUPPORT. WILLIAM N. SECHLER, Fort Scott, Kans. Filed Feb. 5, 1921. Serial No. 442,770. 2 Claims. (Cl. 36—76.)



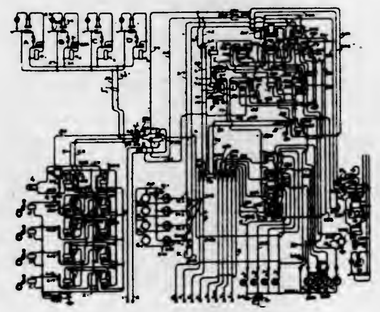
1. An arch support formed of separate sections and spaced tongues extending from the adjacent edges of the sections, the tongues of one section fitting within the spaces between the tongues of the other section and overlying said adjacent edges, to connect the sections in a manner to permit of relative pivotal and longitudinal movement.

1,391,585. ARTIFICIAL ILLUMINATION. GEORGE HENRY SHERINGHAM, London, England. Filed Jan. 31, 1920. Serial No. 355,489. 3 Claims. (Cl. 240—1.)



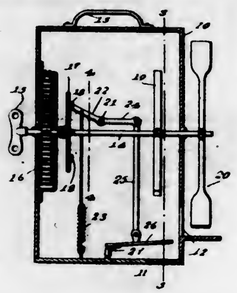
1. An artificial lighting unit comprising in combination an artificial source of light and an opaque reflector having on its reflecting surface a plurality of colors in small areas and uniformly disposed on the entire surface, the colors being such as selectively to absorb energy of light rays in the artificial light which possess excessive intensity, and the total areas occupied by said colors being such as to absorb the energy of said rays in such proportion as to produce in the spectrum of the resultant light a distribution of intensity substantially corresponding to that in the spectrum of daylight.

1,391,586. ELECTRIC TRANSLATOR. FRANK M. SLOUGH, Rochester, N. Y., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y., a Corporation of New York. Filed June 23, 1917. Serial No. 176,502. 24 Claims. (Cl. 179—18.)



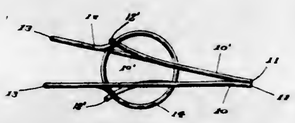
22. In an electrical system, a progressively operable switch arranged to occupy a plurality of selective positions, and circuits and resistance units arranged as a Wheatstone bridge to directively control the setting of said switch.

1,391,587. SUBSCRIBER-OPERATED TELEPHONE SYSTEM. FRANK M. SLOUGH, Rochester, N. Y., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y., a Corporation of New York. Filed Jan. 28, 1918. Serial No. 214,057. 15 Claims. (Cl. 179—18.)



14. In an automatic telephone system, an incoming circuit, a plurality of outgoing circuits, an automatic step-by-step switch for inter-connecting said incoming circuit with any of said outgoing circuits, said automatic switch having off-normal contacts arranged to be closed only after a pre-determined number of steps, means for advancing said switch, an impulse relay provided with contacts and operated over said incoming circuit to control said advancing means, a release magnet for said switch and a circuit for said release magnet completed through said off-normal contacts and front contacts of said impulse relay.

1,391,588. TELEPHONE-SERVICE SYSTEM. FRANK M. SLOUGH, Rochester, N. Y., assignor to The Stromberg-Carlson Telephone Manufacturing Company, Rochester, N. Y., a Corporation of New York. Original application filed June 11, 1917, Serial No. 174,154. Divided and this application filed Nov. 1, 1918. Serial No. 260,628. 21 Claims. (Cl. 179—27.)

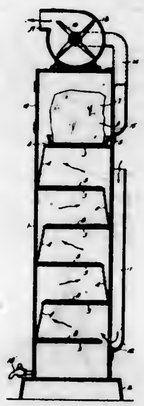


1. In a telephone system, the combination with a telephone line provided with a plurality of sub-stantions, a main station, said telephone line extending by its limbs from a plurality of the substations to a main station, a plurality of signals at the main station, one for each of the said substations, a plurality of resistances, one at each of the substations, each resistance being of different value from the other substation resistances, each of the said signals corresponding to a particular substation on the line, and apparatus at the main station under the control of one of the said resistances included in circuit with the line to operate the particular signal to identify the substation whereat said resistance is located.

1,391,589. MOUSETRAP. THOMAS E. SPENCER, Wetaskiwin, Alberta, Canada. Filed Feb. 9, 1920. Serial No. 357,395. 3 Claims. (Cl. 43—75.)

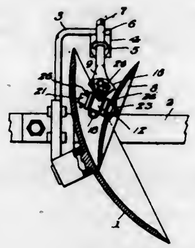
1. A trap of the character described comprising a casing provided with an entrance opening, a rotary shaft journaled through said casing, spring tension on said shaft tending to rotate the same in one direction, a platform pivoted within said casing, a trigger member having operative connection with said shaft and normally preventing rotation thereof, and striker arms carried by said shaft, depression of said platform resulting in partial rotation of said shaft whereby to cause said striker arms to pass, one above and across said platform and the other across said entrance opening exteriorly of the casing.

1,391,590. CLOTHESPIN. HARRMANN STAMMER, Bartlesville, Okla. Filed Feb. 5, 1921. Serial No. 442,771. 1 Claim. (Cl. 24—139.)



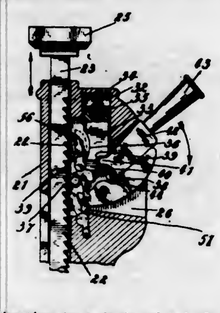
A clothes pin formed from a single length of wire and comprising a central coil spring portion, fingerpieces at one side of the coil spring portion and gripping jaws at the other side of said coil spring portion, both strands of each of the fingerpiece and gripping jaw portions extending transversely of the coil spring portion, one strand of each of the fingerpiece portions being connected to an end of the coil spring portion, and one strand of each of the gripping jaw portions being extended between the coil spring portion and the said connection of the fingerpiece strand with the coil spring portion and disposed in embracing relation to said connection.

1,391,591. ELECTRIC INDICATOR AND ALARM. JOSEPH B. STEVENS, Six Mile Run, Pa., assignor of one-half to James G. Foster, Six Mile Run, Pa. Filed Oct. 21, 1918. Serial No. 258,974. 1 Claim. (Cl. 200—86.)



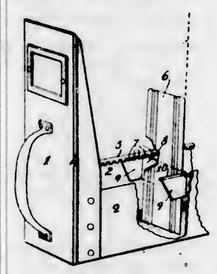
A contact making device for use in front of a door, comprising a pair of spaced stationary contacts, a resiliently mounted element, a contact making element carried thereby, and positioned to bridge the contacts first named, and a second resiliently mounted element opposite that first named and positioned to be brought into engagement with the bridging contact element and render the latter operative.

1,391,592. AIR-COOLER. WILLIAM HENERY STONE, Port Angeles, Wash. Filed June 8, 1920. Serial No. 387,353. 1 Claim. (Cl. 62—133.)



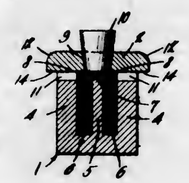
An air cooler, comprising a casing, a series of superimposed partitions in the casing having staggered relation to each other, moisture holding screens connecting the partitions and through which the air is compelled to pass, and moisture holding pads on the partitions.

1,391,593. PLOW. CLAUDE CLARENCE SWEETING, Chadwell Heath, England. Filed Oct. 23, 1920. Serial No. 419,032. 4 Claims. (Cl. 97—79.)



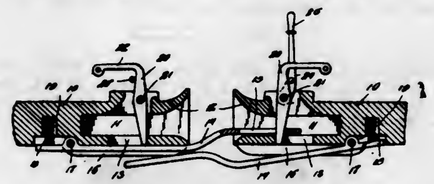
1. In combination with a disk plow, a bracket thereon, a shank vertically adjustable on said bracket, a clamping member connected with the lower end of said shank and adjustable about a horizontal axis, a bushing carried by said clamping member, a shank rotatably supported by said bushing and a scraper disk carried by said shaft

1,391,594. JACK. JOB TATTON, North Bay, Ontario, Canada. Filed Dec. 16, 1920. Serial No. 431,280. 10 Claims. (Cl. 254—110.)



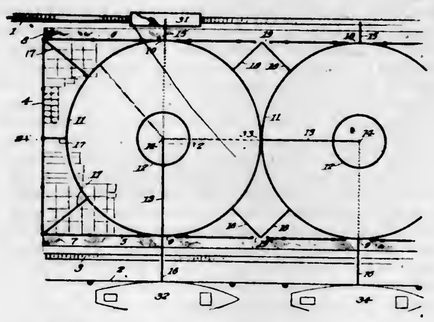
1. The combination in a jack, of a body portion, a lifting bar mounted therein, a lever operatively connected to said lifting bar for raising the latter, and additional means actuated by the lever for raising said lifting bar.

1,391,595. FILE-CABINET FOLLOWER. ARVINE N. THOMAS, Canton, Ohio. Filed Dec. 9, 1920. Serial No. 429,344. 7 Claims. (Cl. 129—28.)



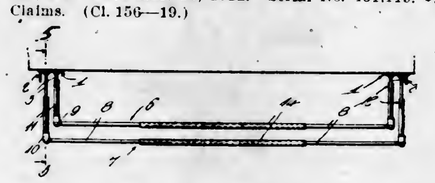
1. In a filing receptacle, longitudinal tubular guides, a follower within said receptacle, extensions upon said follower extending into said tubular guides, and means adjacent to the tubular guides arranged to be automatically engaged by the follower when the same is moved into engagement with papers in the filing receptacle.

1,391,596. POULTRY ROOST. FRED C. WEGNER, Archer, Nebr. Filed Apr. 27, 1921. Serial No. 464,919. 4 Claims. (Cl. 119—25.)



1. A poultry perch comprising a body and a lid secured to the body, the body having walls defining a compartment for the reception of a liquid insecticide, the body and the lid being of wood, whereby the insecticide will ascend the walls by capillary attraction and spread by capillary attraction upon the lid, the body including an inner wall, separating the compartment into parts and acting as a wick, facilitating the distribution of the insecticide by capillary attraction.

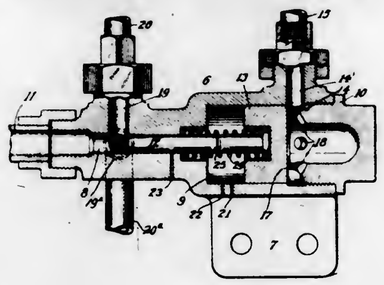
1,391,597. COUPLING. JOSEPH C. WELLS, Sr., Esserville, Va., assignor of one-half to W. D. Hatfield, Esserville, Va. Filed June 4, 1920. Serial No. 386,421. 1 Claim. (Cl. 213—56.)



A coupling of the character described comprising similar members carried by the adjacent ends of cars, each member including a head having a longitudinal recess with a flaring entrance, a swing pin within each recess, a coupling link pivoted intermediate its ends upon the lower side of the head and having one end extending beyond the head and upwardly offset whereby the coupling link of either head may be positioned to enter the recess of the other head, the head being formed in its underside with a recess spaced from the first named recess, and a spring within the second named recess engaging the coupling link whereby to hold the latter normally against the underside of the head.

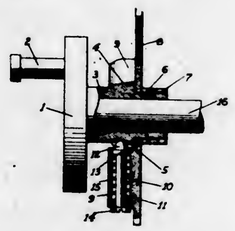
1,391,598. OVERHEAD RADIAL CONVEYER SYSTEM. FREDERICK WOHN, San Antonio, Tex. Filed Dec. 6, 1920. Serial No. 428,535. 10 Claims. (Cl. 212—18.)

1. An overhead radial conveyer system, comprising a framework, a circular track suspended from the upper part of said framework, and a radially extending swinging hoist-supporting crane suspended from said track.



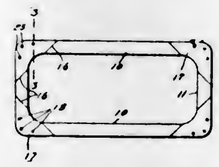
1,391,599. WINDOW-FIXTURE. LOUIS E. WOOD, Farrell, Pa. Filed Mar. 10, 1921. Serial No. 451,119. 2 Claims. (Cl. 156—19.)

1. A fixture of the type set forth comprising a bracket for attachment to a window frame, including an attaching plate and a fixed forwardly extending horizontal bracket arm beveled at its outer end and provided near this end with a lateral stop-pin, and a curtain supporting member including a right-angularly disposed tubular slotted sleeve



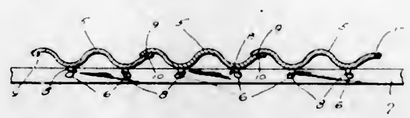
adapted to slide on said arm and having a portion thereof cut away at its inner end to permit it to be detachably engaged with said arm, said stop-pin to extend through the slot in the sleeve and limit the sliding thereof and also prevent rotation thereof on said arm.

1,391,600. VACUUM-BREAKER. ROBERT WOOD, New York, N. Y. Filed June 2, 1915. Serial No. 31,641. Renewed Feb. 12, 1921. Serial No. 444,535. 1 Claim. (Cl. 121—137.)



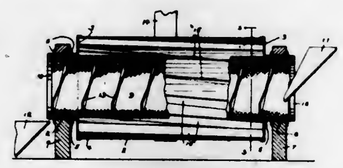
In a device of the class described, a casing provided with a bore extending therethrough from end to end and substantially closed from the external atmosphere, one end of said bore being enlarged to form the same into a large chamber and a relatively small chamber, the end of the bore at the small chamber constituting an opening from a source of relatively high pressure, said casing provided with an outlet port leading from the small chamber and adapted to communicate with a space designed normally to have a high working pressure therein, a relatively small piston having a sliding fit in the small chamber and projecting therefrom into the large chamber, said outlet port controlled by said small piston, a relatively large piston having a sliding fit in the large chamber, said pistons coacting to constitute a two-part differential piston, a spring acting on the small piston for maintaining the same in bearing engagement with the large piston and for moving said small valve into position uncovering said outlet port, said large chamber provided with a port for placing the large end of the differential position continuously in open communication with said high pressure space and a stop cap for the large end of the bore.

1,391,601. AUTOMATIC SAFETY-CLUTCH. REMO C. ZANON, Modesto, Calif., assignor of one-half to John J. Ferlin, Modesto, Calif. Filed Dec. 8, 1920. Serial No. 429,264. 2 Claims. (Cl. 64—99.)



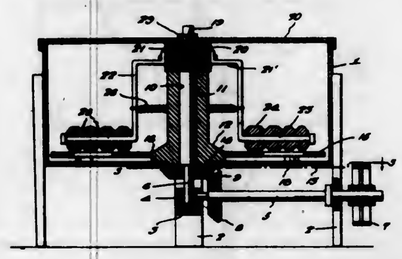
1. An automatic safety clutch comprising a driven member, a hub thereon, a driving member mounted on the hub, the latter being provided with longitudinal grooves beyond the plane of the driving member, pins mounted to the driving member radially thereof and having heads normally seated in the grooves and means for regulating the force of engagement of such heads with the grooves and said hub and grooves tapering outwardly away from the driven member, whereby the driving and driven members are automatically held in their proper spaced relation.

1,391,602. WINDOW-FRAME. SAMUEL A. ABRAMSON, Newark, N. J. Filed Jan. 25, 1921. Serial No. 439,891. 3 Claims. (Cl. 20—56.)



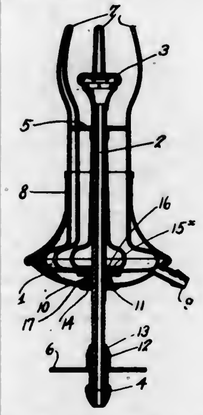
1. A frame of the character described comprising side and end members, dowel pins connecting said members at the corners of the frame, corner blocks arranged at one side of the frame, each corner being cut away to provide beveled edges, corner pieces arranged in said cut away portion with their ends contacting said beveled edges, said corner pieces being arranged opposite the corner blocks, and means for holding said corner pieces in position on the frame.

1,391,603. ROOFING-TILE. BYRON L. BACOT, McComb, Miss. Filed Nov. 24, 1920. Serial No. 426,281. 2 Claims. (Cl. 108—10.)



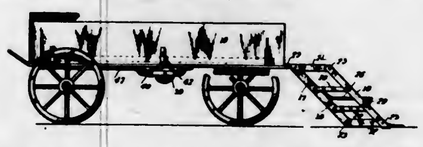
1. A roofing tile having depending lugs on its under side, said lugs having the shape of laterally presented hooks to provide nail seats at their side edges.

1,391,604. CANDY-SUGARING MACHINE. FRANK H. BAUMGARD, Columbus, Ohio. Filed Sept. 14, 1920. Serial No. 410,128. 3 Claims. (Cl. 91—7.)



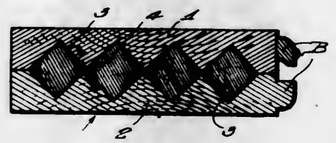
1. In a sugaring apparatus of the class described, an outer cylindrical casing, end walls connected with said casing and having reduced longitudinally extending journaling extremities, an open ended inner shell of foraminated material arranged to pass axially through said casing and to be connected with the journaling extremities thereof, a conveyer structure situated within said shell for causing materials positioned therein to be advanced longitudinally through the machine and discharged from the opposite end of the shell, said shell and casing being substantially spaced to provide a sugar receiving chamber therebetween, whereby upon the rotation of said casing sugar will be sifted through said shell into engagement with the materials contained in the latter, and means for effecting the rotation of said casing.

1,391,605. WASHING-MACHINE. ROBERT BELDEN, Belden, Calif. Filed Mar. 14, 1921. Serial No. 451,992. 3 Claims. (Cl. 259—107.)



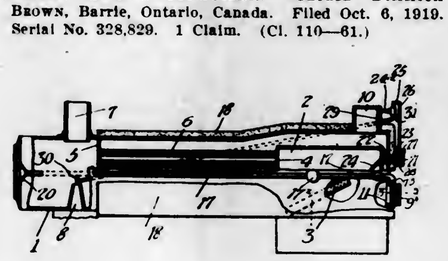
1. In a washing machine, a tub, a central column therein, a shaft extending through the column, a dasher including a removable head, disposed on the shaft, resting on the upper end of the column, revoluble with the shaft and susceptible to a limited longitudinal movement thereon outward of the column, rods having oppositely disposed angle ends, one end of each rod being pivoted to the head, a grooved roller journaled on the opposite end of each rod, and means for revolving the shaft.

1,391,606. SYRINGE. TALBERT W. BLAKESLEE, Erie, Pa. Filed Mar. 26, 1920. Serial No. 368,055. 7 Claims. (Cl. 128—244.)



5. In a syringe, the combination of a hollow stem, a drain cup loosely surrounding the stem, and a nut connected to and adjustable on the stem and detachably connected to the cup and adapted when detached to be moved rectilinearly with the stem.

1,391,607. LOADING AND UNLOADING APPARATUS FOR VEHICLES. VICTOR L. J. BOURGEOIS, Montreal, Quebec, Canada, assignor of one-half to Joseph Nazaire Dubois, Montreal, Canada. Filed Nov. 29, 1919. Serial No. 341,456. 3 Claims. (Cl. 214—85.)

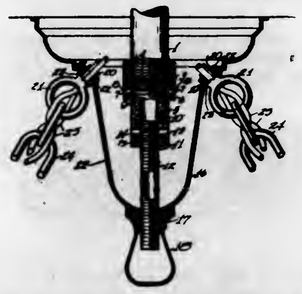


1. The combination with a vehicle, a frame including spaced side members attached to the rear end of said vehicle, said frame comprising a plurality of hinged sections, inclined tracks attached to the side members of the frame, and a carriage mounted on the tracks to ride upwardly thereon and upon the side members of the frame into said vehicle.

1,391,608. DOOR AND WINDOW CONSTRUCTION. JOHN G. BROSIUS, Tulsa, Okla. Filed Aug. 9, 1920. Serial No. 402,233. 3 Claims. (Cl. 20—35.)

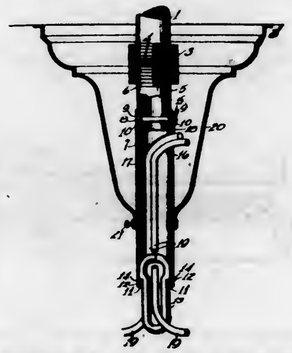
1. A stile for sash, door, and like structures comprising a piece of timber having a plurality of parallel longitudinal grooves formed in its inner face and covering substantially the entire area of said face, said grooves being straight throughout their length and the adjacent walls of the adjacent grooves converging into one another, a plurality of reinforcing strips of a shape to snugly fit the grooves, being secured in the latter so that approximately one-half thereof projects beyond the aforesaid inner face, and a second piece of timber like said first piece, the projecting portions of said strips being received in and secured in the grooves in said second piece of timber.

1,391,609. SMOKE-CONSUMER. GEORGE DIMMICK BROWN, Barrie, Ontario, Canada. Filed Oct. 6, 1919. Serial No. 328,829. 1 Claim. (Cl. 110—61.)



In a locomotive, the combination with the locomotive boiler provided with a steam dome, an insulated cover, a fire box located therein provided with the usual fire door opening and fire doors, of a tube extending longitudinally of the locomotive boiler and embedded in the insulated cover next to the heated boiler wall and having an open forward directed mouth at its front end and extending at its rear end to the fire door opening, a nozzled pipe connected to the inner end of the aforesaid tube the nozzles of which are directed into the fire door opening, a pipe leading from the steam dome, a manifold located above the fire door, a series of pipes extending from the manifold through the wall of the fire box and having downwardly directed inner ends adapted to direct the steam over the fire bed, a covering for the manifold, and a controlling valve for the steam dome pipe.

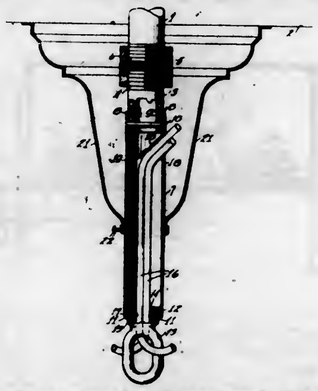
1,391,610. ELECTRIC FIXTURE. FRANK LOWELL BUTLER, Chicago, Ill. Filed Nov. 12, 1920. Serial No. 423,636. 2 Claims. (Cl. 240—85.)



1. In an electric fixture of the character described, the combination of a fixed support, a cylindrical insulating member provided with a bore and having diametrically opposed openings extending through its walls adjacent the lower end of the insulating member, means for connecting said fixed support and said insulating member, a tubular member threaded exteriorly and having its upper end in-

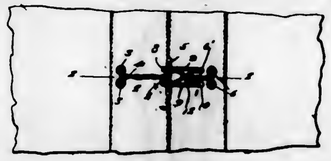
serted a predetermined distance into the bore of said insulating member, said second named tubular member having diametrically opposed openings extending therethrough adjacent the upper end thereof, a pin projected

through the openings in the walls of the insulating member and the openings through said second named tubular member to determine the position of the latter in said bore, and means carried by said second named tubular member for supporting a lighting fixture element.



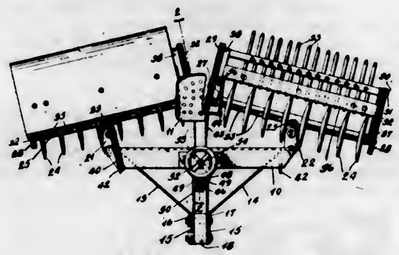
1,391,611. ELECTRIC FIXTURE. FRANK LOWELL BUTLER, Chicago, Ill. Filed Nov. 12, 1920. Serial No. 423,638. 4 Claims. (Cl. 240—85.)

3. In an electric fixture, a fixed support, a tubular insulating member having diametrically opposed openings through its wall, a second tubular member arranged to incase the lower portion of said tubular insulating member and to depend therebelow, said second named tubular member having diametrically opposed openings through its walls adjacent to the upper end thereof arranged to register with the first named openings and having an aperture through its side wall at a spaced distance below said registering openings, a guiding clip disposed within the bore of said second named tubular member for guiding a flexible member through the lower aperture, said clip being provided with a portion extending through said lower aperture and arranged to lie along the outer wall of the second named tubular member, said extending portion having an opening therethrough adapted to register with the said registering openings, and means projected through the registering openings for maintaining the said elements in assembled position.



1,391,612. ELECTRIC FIXTURE. FRANK LOWELL BUTLER, Chicago, Ill. Filed Nov. 26, 1920. Serial No. 426,496. 3 Claims. (Cl. 240—85.)

3. In an electric fixture, a stem comprising a tubular member having a portion of its side wall displaced inwardly at a spaced distance from one end thereof to provide a lateral aperture in said wall and a relatively

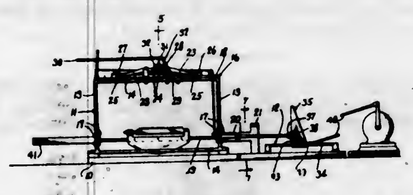


arranged guide member adapted to guide a flexible member from its bore through the lateral aperture, and means for connecting the tubular member to a fixed support.

1,391,613. HOOK AND EYE. CHARLES CHISHOLM, St. Cloud, Minn. Filed Aug. 24, 1920. Serial No. 405,566. 2 Claims. (Cl. 24—228.)

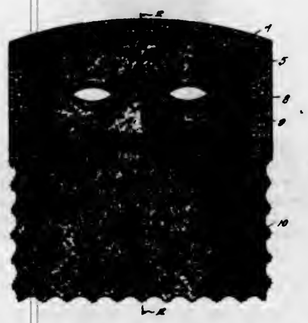
1. In a garment fastener, a hook including a shank having one of its ends looped and its other end provided with a lateral head, and an eye including a base which has one of its ends looped and formed with a jaw that overlies the base, said jaw having spring contacting members at approximately the center thereof and having an outer depressed portion to receive the shank of the hook when the same has been canted and brought over the base between the contacting portions of the jaw and arranged in parallelism with the eye.

1,391,614. EARTH-PULVERIZING MACHINE. HANS CHRISTENSEN, Chicago, Ill. Filed Nov. 16, 1920. Serial No. 424,529. 10 Claims. (Cl. 55—85.)



1. In a machine of the class described, a main frame, frames pivotally connected with each end of the main frame, a plurality of shafts mounted in each pivoted frame, means for imparting movement from one shaft to the adjacent shaft in the same frame, earth working devices mounted on said shafts, and means for changing the relative position of the pivoted frames.

1,391,615. SAFETY DEVICE FOR LOCKS. ATTILIO CONTE, Buenos Aires, Argentina. Filed July 16, 1920. Serial No. 396,740. 4 Claims. (Cl. 70—29.)

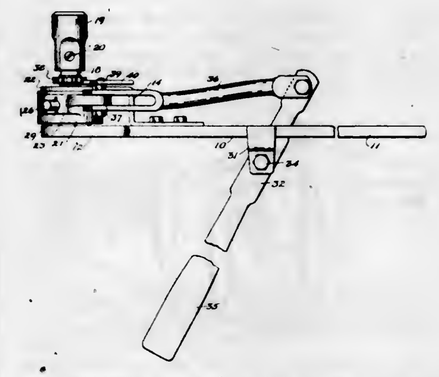


1. In a key-operated, spring latch lock, a safety device consisting of a helical cam caused to rotate by the action of the key, a pin adapted to block the latch bolt of the lock by penetrating into a hole formed in said bolt, said pin being provided with a finger adapted to engage with the cam, so that on the rotation of said cam the pin will be raised, a handle for operating the latch bolt when released, a boss provided with three grooves, and a projection formed integral with said pin for interchangeable engagement in said grooves whereby said pin may be caused to assume an operative position wherein its finger will be engageable by said cam, a second operative position in which its finger is out of the path of the cam, or a third position in which the pin will be held raised in inoperative position, substantially as above described and for the purposes set forth.

1,391,616. MEAT-CUTTING MACHINE. WILLIAM T. CREED, Irving, Tex. Filed Jan. 28, 1921. Serial No. 440,681. 5 Claims. (Cl. 17—24.)

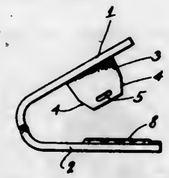
1. A machine of the class described comprising a guide frame capable of vertical sliding movement; a cutting element mounted for reciprocatory movement therein, and means including a pair of pivoted fingers having a sliding engagement with the frame for adjusting the vertical position of the cutting element.

1,391,617. MASK. FRANKLIN MASON DESSART, Brooklyn, N. Y. Filed September 25, 1920. Serial No. 412,673. 1 Claim. (Cl. 2—119.)



As an article of manufacture, a mask including a body portion adapted to overlie the eyes and nose of a wearer, a sheet of material forming a part of said body portion, and a liner affixed to the rear face of said material, said material being extended beyond the lower edge of said liner and the body portion, whereby to provide an integral apron.

1,391,618. UNDERGARMENT. LILLIAN FRANCES DOTY, La Grange, Ill. Filed Nov. 14, 1918. Serial No. 262,572. 3 Claims. (Cl. 2—144.)

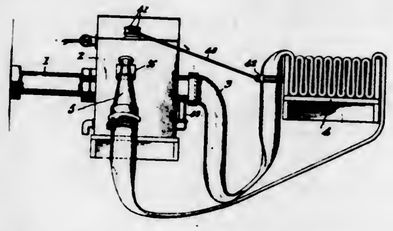


1. A nether garment made of knitted transversely elastic fabric and in which the fabric is so disposed as to be expansible transversely or laterally to provide increment in girth at the bust and around the abdomen, the garment being formed of symmetrical side gores each formed of a single piece and having a body and a leg area and a central gore substantially cruciform in outline extended from the thigh up the front and the back to the neck, said central gore being extended down to form the inside portions of the legs of the side gores.

1,391,619. RATCHET-WRENCH. LOUIS A. EDWINSON, Topeka, Kans. Filed May 28, 1921. Serial No. 473,519. 3 Claims. (Cl. 81—60.)

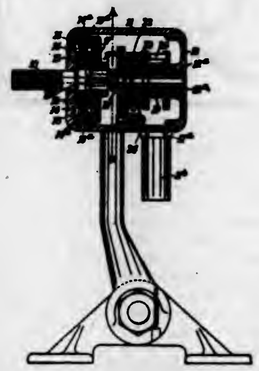
1. A ratchet wrench having a body provided at one end with a handle, a socket revolubly mounted at the other end of the body, an operating lever pivoted to the body, a main ratchet mechanism associated with the socket and operable by said lever, and an auxiliary ratchet mechanism also associated with the socket and operable through oscillations of said handle.

1,391,620. CUFF-BUTTON. CHARLES L. FAULK, Cleveland, Ohio. Filed May 17, 1920. Serial No. 381,952. 1 Claim. (Cl. 24—102.)



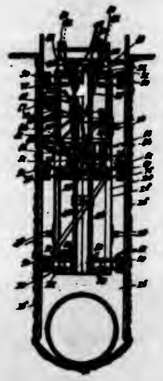
A cuff button comprising two plates having offset ends which are hingedly connected together, a shank on one of the plates, the other plate having a socket to receive the shank, spring influenced means disposed in the socket adjacent to the sides thereof, interengaging means between said spring means and the shank when the latter is received in the socket, whereby to lock the shank in the socket, and means arranged for movement between the locking means for spreading the latter and releasing the shank.

1,391,621. EXTENSION-RULE. FREDERICK HENRY FENWIRTH, New York, N. Y. Filed Jan. 26, 1920. Serial No. 354,029. 3 Claims. (Cl. 33—161.)



1. In an extension rule, a plurality of palallel members slidably secured, one to the other, and capable of independent axial movement, said members being provided with a plurality of recesses which register when adjacent members are in any one of a plurality of adjusted positions, and a plurality of tumblers slidably mounted in said recesses adapted to interlock the members when the rule is in one position and to drop to an unlocked position when the rule is inverted to a second position, said members being provided with graduations adapted to indicate the distance between points.

1,391,622. COMBINED FIRE-ALARM BOX AND HYDRANT. EDWARD E. FERGUSON, Portsmouth, Va., assignor of one-half to C. Van Fleming, Norfolk, Va. Filed Nov. 18, 1919. Serial No. 338,902. 8 Claims. (Cl. 177—382.)



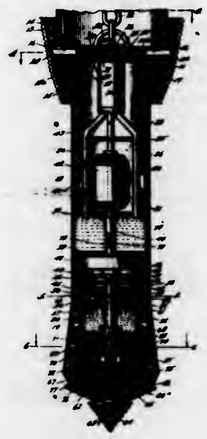
1. In combination, a service pipe, a valve therein, actuating means for the valve, a hose connected to the service pipe, a connection between the hose and actuating means for acting to open the valve, a fire alarm apparatus adjacent said actuating means, a nozzle for the hose normally acting to hold the alarm apparatus in an initial potential position, and means held in place by the alarm apparatus for preventing the movement of the actuating means, substantially as described.

1,391,623. SIGNALING APPARATUS FOR VEHICLES. HARRY FRYMAN, Grimsby, Lincoln, England. Filed Nov. 10, 1920. Serial No. 423,135. 4 Claims. (Cl. 116—35.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

1. Signaling apparatus for vehicles comprising indicators mounted on spindles at the front and rear of the vehicle, and operated from the control handle or wheel within reach of the driver, so that on turning the control handle the indicators will be correspondingly moved to the desired signaling position and a locking device for the indicator spindle to prevent movement of the indicator from one signaling position to another except by operation of the control device.

1,391,624. TRENCH-WALL-SUPPORTING MACHINE. SYDNEY BURT GARDNER, Benson, Minn. Filed June 14, 1920. Serial No. 389,042. 22 Claims. (Cl. 254—100.)

1. In a trench wall supporting machine, the combination of a pair of relatively movable sections adapted to be placed in a trench, expanding means for the sections to individually bind the same in the trench, and means for effecting the relative movement of the sections to advance the same in the trench upon the alternate anchoring of the sections in the trench by expansion.



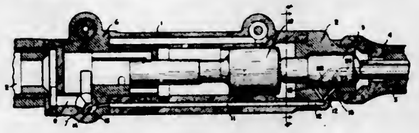
1,391,625. LOCKING HOOK. ALEXANDER L. GEISLER, Bristol, R. I. Filed Jan. 25, 1921. Serial No. 439,780. 3 Claims. (Cl. 24—230.5.)

1. A device of the character stated, comprising a strip of metal bent to form a spring loop, the ends of said strip being held against one another by the resiliency of the loop, an annular locking member adapted to encircle the two ends of the strip, one of said ends adapted

to be sprung laterally to permit the introduction or removal of the locking member, and means preventing the introduction or removal of the locking member when said end is not sprung laterally.

1,391,626. DRILL-HEAD FOR WELL-DRILLING APPARATUS. STANLEY C. GILTHORPE, New Orleans, La., assignor of one-third to Richard J. Bequette and one-third to Hunter C. Leake, New Orleans, La. Filed Apr. 27, 1920. Serial No. 377,039. Renewed Feb. 24, 1921. Serial No. 447,555. 8 Claims. (Cl. 255—19.)

1. In a well drilling apparatus, a drill head comprising a permanent section adapted to be detachably associated with a well casing for rotation therewith, and a rotary section carried by the permanent section for independent relative rotation.



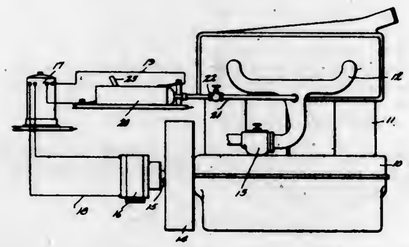
1,391,627. COW-POKE. CLINTON W. GORST, Black Earth, Wis. Filed Feb. 14, 1921. Serial No. 444,748. 1 Claim. (Cl. 119—138.)

A device of the class described comprising a pair of upright members, cross pieces connected with the upright members, bolts carried by each upright member, a strap movably mounted on the bolts, spring means for forcing the strap outwardly, pointed projections carried by each strap and the uppermost bolt on each upright being of

considerable length and projecting beyond the strap for engaging the fence wires if the animal should attempt to crawl under the fence.

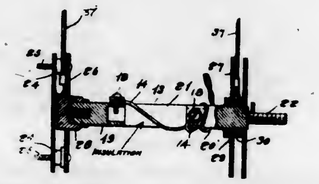
1,391,628. PERCUSSIVE-TOOL. HARRY V. HAIGHT, Sherbrooke, Quebec, Canada, assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed Dec. 17, 1918. Serial No. 267,186. 4 Claims. (Cl. 121—10.)

1. In a percussive tool, a front head construction comprising a front head, an anvil block slidably mounted therein, a water conduit leading through the side of the front head and the side of the anvil block to a point intermediate the length of said anvil block in a central passage extending to the forward end of the anvil block, for conducting water from the water conduit through the anvil block to a hollow drill steel, and means for producing currents of motive fluid under pressure flowing toward the water connection from each side of the water connection between the anvil block and front head, to prevent the water from passing in counter directions.



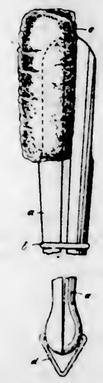
1,391,629. HAMMER-DRILL. HARRY V. HAIGHT, Sherbrooke, Quebec, Canada, assignor to Ingersoll-Rand Company, Jersey City, N. J., a Corporation of New Jersey. Filed May 5, 1919. Serial No. 294,740. 3 Claims. (Cl. 121—10.)

1. In a fluid operated percussive tool, a tool casing having a front head, a piston reciprocating therein, means for holding a drill steel at the front end of the tool, a conduit in the walls of the tool casing and front head leading to a point at the front end of the tool for conducting motive fluid, said conduit being turned at right angles in the front head at its front end in order



to discharge the motive fluid across the face of the tool substantially at right angles thereto, and means for confining and deflecting the stream to form a cross current around the shank of the steel in front of the operative parts of the tool and discharged from the side of the tool outwardly away from the hole being drilled, thereby preventing detritus and water from entering the said parts of the tool.

1,391,630. PROCESS AND APPARATUS FOR IMPROVING COMBUSTION IN EXPLOSIVE-ENGINES. WALTER WILLIAM HALES, New York, and ARTHUR HINE, Cedarhurst, N. Y.; said Hine assignor to said Hales. Filed Mar. 26, 1920. Serial No. 369,148. 1 Claim. (Cl. 123—119.)



In a device of the class described, an explosive engine provided with an intake manifold, a pipe connected to said manifold, means for introducing vaporized fuel and air into said manifold, an ozone machine connected to said pipe, an alternating current generator operated by said engine, a transformer means connecting said generator, to said transformer for supplying an alternating current thereto, and connecting means between said transformer and said ozone machine for supplying a high voltage alternating current to said ozone machine.

1,391,631. EXTENSION ELECTRIC-LIGHT FIXTURE. ALFRED F. HAMMERSMITH, Chicago, Ill. Filed Aug. 6, 1918. Serial No. 248,573. 1 Claim. (Cl. 173—367.)

An extension electric light fixture comprising a stationary casing, a drum within said casing and composed of a central insulating member having reduced ends, and members mounted on said reduced ends, contact members employed to connect the end members with the central insulating member and serve as binding posts, said casing having a longitudinal slot, insulated feed wires connected with said binding posts and extending through said slot to carry a lamp, a cap bearing fitted over the outer extremity of one of said end members, a threaded extension carried by the other end member of the drum and extended outwardly of the end of the casing, an operating crank mounted on the end of said threaded extension, means for locking said drum against rotation, a stationary sleeve bearing for the last mentioned end member, current conducting wires threaded into said casing and connected with the bearings for the end members of the drum, said drum including head members serving to support the bearings for the drum end members, and means for forming a yielding contact between the drum end members and the bearings therefor.

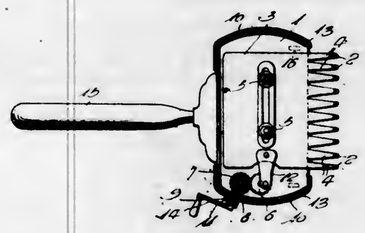
1,391,632. DEVICE FOR HOLDING OR GRIPPING DISHCLOTHS OR THE LIKE. JOHN HANS, London, England, assignor of three-fourths to John Philip Haworth, London, England. Filed Apr. 11, 1921. Serial No. 460,474. 1 Claim. (Cl. 141—10.)

A dishcloth holder of the character described comprising two straight tapering sticks, the extreme narrow end of each stick being enlarged so that both together form a knob when assembled, a staple inserted in apertures in said knob so as to hold the sticks loosely together and serve as a suspending means, and a ring threaded on the sticks so that it can be used for clamping a dishcloth or the like between the thick ends of the sticks, the arrangement being such that the ring is permanently retained on the sticks between the thick end and the staple, substantially as set forth.

1,391,633. SCREWED MECHANISM. GEORGE HAZELTON, Portadown, Ireland. Filed Dec. 15, 1920. Serial No. 431,016. 4 Claims. (Cl. 74—40.)

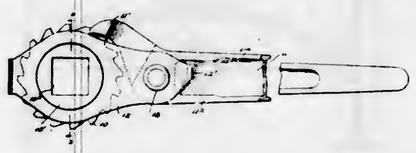
1. Screwed mechanism in which the thread of the first engaging member is interrupted by an axial groove so that the thread is formed on the periphery of a rib, and the second engaging member is formed of two elements both having the engaging thread interrupted by an axial groove corresponding to the rib of the first engaging member, the said elements being capable of rotating relatively to each other along a spiral path of equivalent pitch to the threads of the engaging members so that in one setting the second member can be slidden axially along the first member and in another setting the second member will screw along the first member substantially as described.

1,391,634. LUBRICATING SYSTEM. HARRY J. HENDRICKS, Sterling Station, N. Y. Filed Nov. 15, 1920. Serial No. 424,164. 1 Claim. (Cl. 184—103.)



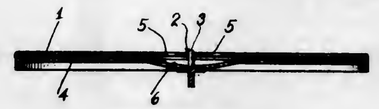
In combination with a vehicle engine having a conventional lubricating base, a supply tank, a lubricant conduit depending from said tank and into said vehicle engine base, and a ventilating pocket including a cylindrical

body one end of which passes through the wall of the engine base and is engaged with the lubricating conduit inside of the base, the opposite end of said cylindrical



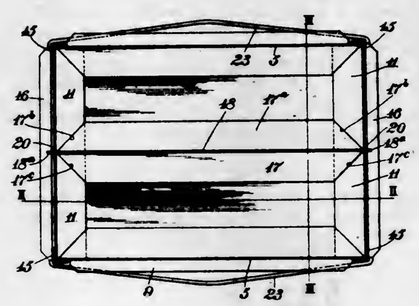
body issuing into a right angular cylindrical member outside of the case, one end of said right angular member extending into said engine base.

1,391,635. HAIR-CUTTER. JOHN W. HENRY, New York, N. Y. Filed Aug. 23, 1920. Serial No. 405,233. 1 Claim. (Cl. 30—1.)



A device of the class described comprising a comparatively long stationary cutter plate provided at one end with a laterally extending flange which is in turn provided with a bearing, laterally extending screw-threaded studs carried by said plate, being disposed near the center thereof, a movable cutter slidable against the first named cutter and provided with a slot through which said studs extend, nuts on the threaded ends of said studs, intermeshing gears arranged on the first named cutter plate adjacent the aforesaid flange, a driving gear meshing with one of the first named gears and being disposed at right angles thereto, a shaft journaled in the aforesaid bearing, a hand crank connected with said shaft for rotating the latter, and a driving connection between said gears and movable cutter.

1,391,636. RATCHET-WRENCH. WILLIAM F. KIESEL, Jr., Altoona, Pa. Filed May 17, 1921. Serial No. 470,381. 1 Claim. (Cl. 81—58.)

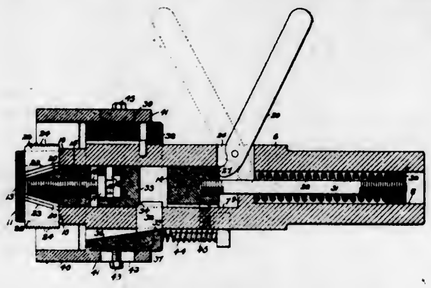


A ratchet wheel of the class described, comprising in combination, a work engaging ratchet member, a handle having an end comprising a pawl for engaging the said ratchet member and having an abutment, and a U-shaped housing pivotally attached to the handle and rotatably supporting the ratchet member, said housing having its ends inturned toward the handle and adapted to strike the abutment on the handle when the handle is moved in one direction to cause the handle and housing to move together, the pawl being disengaged from the ratchet upon movement of the handle in this direction and engaging the ratchet upon movement in the opposite direction.

1,391,637. PHONOGRAPHIC RECORD AND TABLE. BERTRAM J. KIFFE, Mankato, Minn. Filed May 15, 1920. Serial No. 381,604. 3 Claims. (Cl. 274—42.)

3. A phonograph turn table having a recess formed at its upper face adjacent the center thereof and a record for engaging the table, said record having a finger hole formed therein adjacent the center thereof.

1,391,638. MOLD FOR CONCRETE BLOCKS. MORRIS J. KILLITS, Columbus, Ohio, assignor to The S. P. Stone Company, Columbus, Ohio, a Corporation of Ohio. Filed Apr. 2, 1919. Serial No. 286,866. 3 Claims. (Cl. 25—121.)

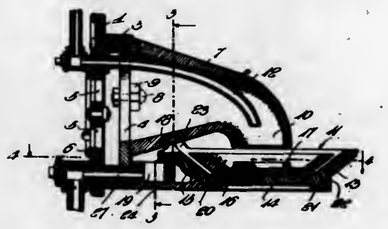


1. A mold for concrete blocks, comprising, in combination, separable sides and ends of sheet metal bent to form hollow cores, the cores of the ends having beveled ends to engage the cores of the sides and an intermediate core member having beveled ends to engage the cores of the sides and bowed spring clamping bars beyond the ends to hold the sides engaged with the ends.

1,391,639. COLLAPSIBLE TAP. VICTOR R. KOONTZ, Waynesboro, Pa., assignor to The Victor Tool Company, Waynesboro, Pa., a Corporation of Pennsylvania. Filed June 3, 1920. Serial No. 386,205. 10 Claims. (Cl. 10—145.)

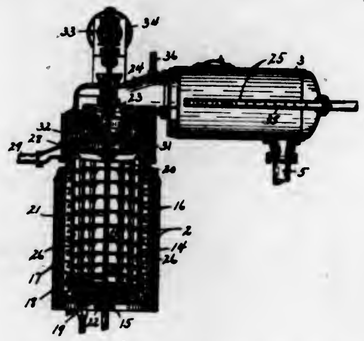
10. In a collapsible tap, the combination with a stock, of a plurality of threading elements slidable transversely therein and having beveled inner ends, a plunger slidable longitudinally in the stock and having a tapered end operating on the beveled ends of the elements, a spring for moving the plunger in one direction, a transverse dog slidably mounted in the stock and having a beveled

inner end engaging the plunger for controlling its movement by the spring, and a sleeve slidable on the plunger



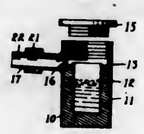
and having a beveled portion against which the outer end of the dog bears to control its movement.

1,391,640. SNAP-FASTENER. HARRY H. KRECHMER and WILLIAM E. COHEN, Philadelphia, Pa. Filed May 28, 1920. Serial No. 385,048. Renewed June 28, 1921. Serial No. 481,167. 2 Claims. (Cl. 24—208.)



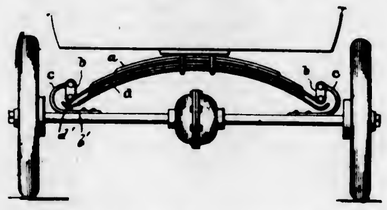
2. A snap fastener comprising a cupped female member having a socket and spring means coöperating therewith and also having an interior head on its edge, and a male member having a head and also having a guard of angular form in cross section arranged to straddle the periphery of the female member and terminating at its end in a bead arranged at the inner side of said end and adapted to spring into and out of engagement with the bead of the first-named member.

1,391,641. OIL-BURNER. CURTIS C. LILLIBRIDGE, Hutchinson, Kans. Filed May 20, 1920. Serial No. 382,964. 3 Claims. (Cl. 158—91.)



1. A device of the class described comprising a horizontal bracket, a substantially horizontal air supply neck fixed at one end and extending over said bracket in close proximity thereto, the other end of said neck being downwardly turned, said bracket having an overflow pan under the fixed end of said neck, and a burner resting on said bracket under said downwardly turned end of said neck, said burner having an overflow spout adapted to extend over the edge of said overflow pan, said burner being additionally provided with spaced lugs adapted to straddle said neck to properly position said spout.

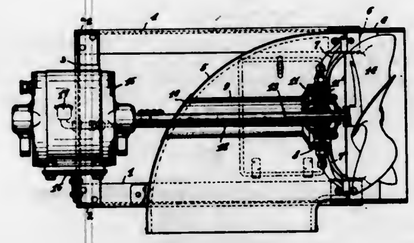
1,391,642. CONCENTRATED BUTTERMILK. IRVING S. MERRELL, Syracuse, N. Y., assignor to Merrell-Soule Company, Syracuse, N. Y., a Corporation of New York. Original application filed Apr. 8, 1916, Serial No. 89,901. Divided and this application filed June 10, 1920. Serial No. 387,938. 3 Claims. (Cl. 99—5.)



3. As a new product, a concentrated buttermilk of smooth and uniform appearance, the dissolution of whose constituents has been arrested.

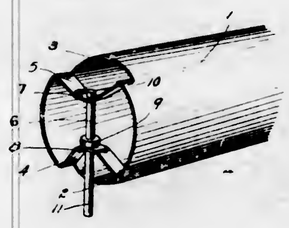
1,391,643. OIL-CUP. RALPH H. ROBINSON, Jamestown, N. Y. Filed Nov. 8, 1920. Serial No. 422,474. 4 Claims. (Cl. 184—69.)

4. An oil cup for bolts and similar parts in automobiles comprising a receptacle having an annular groove around its inner periphery near the upper portion thereof to provide an oil holding receptacle below said groove, said receptacle having a diminutive hole through the side thereof into said groove which enlarges outwardly, a tubular conduit attached to said oil cup around said diminutive hole at an angle of inclination to conduct the oil to the part to be lubricated, a removable cap for said receptacle, said tubular conduit having an angular portion thereon for attaching said oil cup to the part to be lubricated.



1,391,644. VEHICLE-SPRING. STEPHEN ARTHUR THRELKELD, Hutchinson, Kans., assignor of one-half to Rosco S. Threlkeld, Hutchinson, Kans. Filed Feb. 13, 1920. Serial No. 358,385. 5 Claims. (Cl. 267—45.)

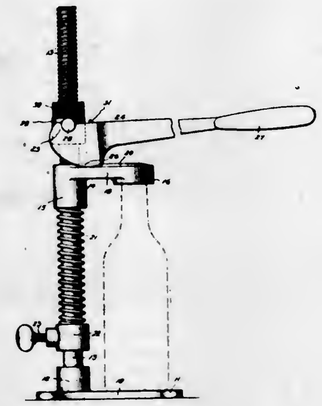
1. A vehicle spring appliance comprising a main bow spring, a supplemental bow spring curved to substantially



correspond with the main spring and fitted against its inner side and rigidly secured to the main spring at the centers of the two springs, the two springs being of approximately the same length, the extremities of the inner, supplemental, spring being shaped to lie under the end eyes of the main spring and disconnected therefrom and be engaged with said end eyes when the main spring is deflected.

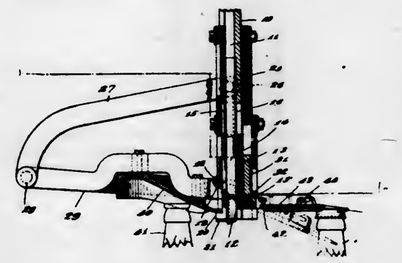
1,391,645. EXHAUSTER. HARRY S. WHELLER, Elizabeth, N. J., assignor to L. J. Wing Mfg. Co., New York, N. Y., a Corporation of New York. Filed May 8, 1920. Serial No. 379,882. 7 Claims. (Cl. 230—11.)

1. An exhauster, comprising a pipe through which the gases to be exhausted are drawn, a fan having a bearing located within said pipe and spaced inwardly from the wall of said pipe, a tube extending from said bearing to and through the wall of said pipe, and means for rotating said fan to cause a suction through said pipe and through said tube.



1,391,646. STOVEPIPE-FASTENER. EDWIN H. WOLFF, El Dorado, Kans., assignor of one-half to Sank Clark, Kingsville, Kans. Filed Aug. 11, 1920. Serial No. 402,770. 4 Claims. (Cl. 126—318.)

1. A stove pipe having inbent webs at one end, and a bolt mounted and slidable in the webs and movable in one direction to extend beyond the perimeter of the pipe and movable in the opposite direction to a position within the perimeter of the pipe.

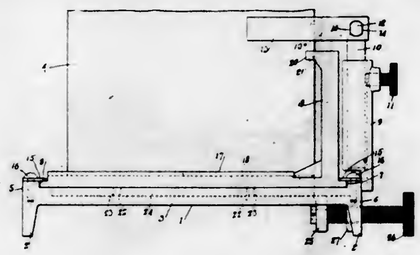


1,391,647. BOTTLE-CAPPING MACHINE. HORACE K. CURTIS and LOUIS T. HUNTER, Chappaqua, N. Y., assignors of one-third to John I. D. Bristol, Chappaqua, N. Y. Filed May 24, 1921. Serial No. 472,126. 9 Claims. (Cl. 226—84.)

1. In a bottle capping machine, the combination of a standard, a follower movable therealong parallel to the axis thereof, an actuator for moving the follower and movable around the axis of the standard as well as being pivoted for movement around an axis perpendicular to said axis of the standard, a fulcrum member coöperating with the actuator for applying power therethrough, and an adjustment member fitted adjustably upon the standard and

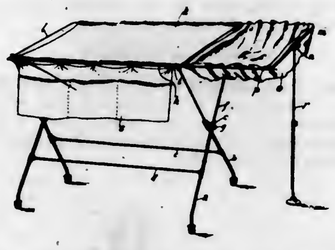
serving as a resistance for the fulcrum member when power is applied to the follower.

1,391,648. CAP-FEEDER FOR BOTTLE-CAPPERS. EDWARD F. EDGECOMBE, Jr., Indianapolis, Ind., assignor to Meier-Gaynor Mfg. Co., Indianapolis, Ind., a Corporation of Indiana. Filed Oct. 20, 1920. Serial No. 418,331. 8 Claims. (Cl. 226—88.1.)



1. Cap-applying mechanism comprising a vertically yieldable support for a cap comprising a fulcrum and means for supporting the cap with a portion extending below the fulcrum, means for driving packages successively beneath the cap fulcrum and into engagement with the supported cap, a shoe arranged in the path of travel of the package preceding the cap for controlling the vertical position of the cap by the height of the cap-receiving portion of the package, a flexible shoe arranged to engage the applied caps, and one-way interengaging members carried by the cap support and the shoe support.

1,391,649. BATTERY-PLATE-BURNING RACK. HARRY A. HAHN, Greenville, Ohio. Filed Feb. 13, 1920. Serial No. 358,520. 11 Claims. (Cl. 113—59.)



1. In a device of the character deacribed the combination with the frame thereof, and an operating member supported in said frame, of a plurality of plate supporting racks operable in said frame and having connections with the operating member, whereby upon the actuation of the

operating member the plate supporting racks will be adjusted relative to each other, and a corresponding plural-

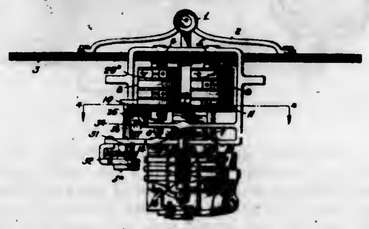
ity of coöperating plate members having connections with the frame member whereby the same may be adjusted relative to the supporting racks.

1,391,650. INFANT'S TABLE. HOBART G. TRUESDELL and MYRON H. VAN WORMER, Suffield, Conn. Filed Dec. 6, 1919. Serial No. 343,124. 2 Claims. (Cl. 45—11.)

1. A folding table comprising pairs of crossed pivoted legs, side bars connecting the corresponding legs of each pair, a webbing attached at its edges to said bars, a U-shaped brace to hold said pairs of legs in extended position and having its arms telescoping on said side bars, and a bath tub of fabric removably carried by said brace.

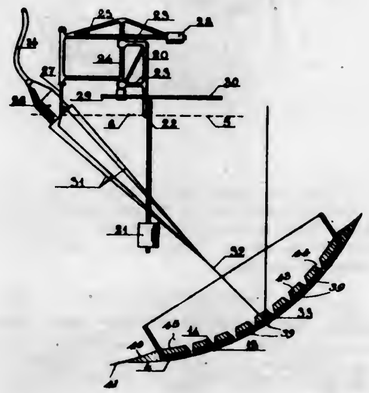
1,391,651. ARTIFICIAL TOOTH. FRANCIS CARLING, Belfast, Ireland. Filed Oct. 28, 1920. Serial No. 420,268. 1 Claim. (Cl. 32—9.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

An artificial tooth having a solid rearward projection which tapers rearwardly from the neck and cutting edge of the tooth to a flat central portion and has an undercut cavity at each side of the projection, and a securing pin secured in said projection.



1,391,652. ELECTRICAL TRANSMISSION SYSTEM. ELEMER MEITNER, Brooklyn, N. Y., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y., a Corporation of New York. Filed Oct. 3, 1917. Serial No. 194,466. 16 Claims. (Cl. 177—351.)

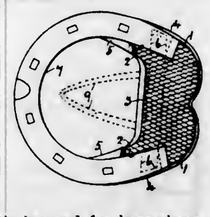
2. In combination, impulse transmitting mechanism, a step-by-step repeating device of a predetermined number of steps per revolution, said repeating device being connected to said mechanism, and means, including another



step-by-step repeating device connected to said first mentioned device, for increasing the number of steps per revolution of said first mentioned device.

1,391,653. SHOCK-ABSORBING TRANSMISSION MECHANISM. ELEMER MEITNER, New York, N. Y., assignor to The Sperry Gyroscope Company, Brooklyn, N. Y., a Corporation of New York. Filed Sept. 14, 1918. Serial No. 254,157. 16 Claims. (Cl. 64—90.)

1. In a shock absorbing device, a driving part, a movable member having a projection thereon, resilient means connecting said member and part for moving said member in response to movement of said part in one direction, a second movable member, a stop thereon normally engaged by said projection, a driven part, and means connecting said driven part and said second movable member.



1,391,654. SUBMARINE LISTENING APPARATUS. GEORGES WALSER, Paris, France. Filed Apr. 11, 1919. Serial No. 289,475. 4 Claims. (Cl. 181—0.5.)

1. A device for transmitting, uniformly refracting and concentrating into a focus sonorous waves from the water into the air comprising, a plurality of small identical diaphragms for transmitting the sonorous vibrations, arranged in contact at one side with the water and at the other side with the air, and also arranged adjacent to, but

insulated from each other, and located tangentially to a geometric surface having a focus of refraction distinct for each direction of propagation of the waves received, an acoustic receiver moving upon the spot of the foci of the said surface; and a support for said diaphragm.

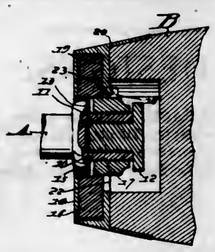
1,391,655. HORSESHOE-PAD. EDWARD SINFIELD and WILLIAM HENRY GOLDFINCH, London, England, assignors of one-third to Alick Wellstead Capener, London, England. Filed May 21, 1918. Serial No. 235,905. 3 Claims. (Cl. 168—28.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

1. An elastic bar-pad for horseshoes, comprising a rubber pad and a backing, designed to cover the rear of the frog and to inclose the heel ends of the shoe, there being lateral extensions on said backing for engagement between the hoof and the shoe, lateral recesses in said pad for receiving the heel ends of the shoe, a wedge-like extension of the pad intermediate of said heel ends, which firmly interlocks therewith, and metal reinforcements in said pad the ends whereof extend into said lateral recesses and form bearings for the shoe heels.

1,391,656. [WITHDRAWN.]

1,391,657. [WITHDRAWN.]

REISSUES.

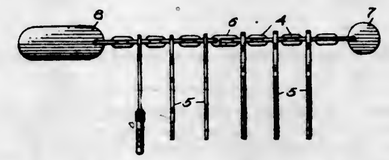


15,197. SHOCK-ABSORBER. HARRY CROSS, Woodstock, Ill. Filed June 23, 1921. Serial No. 479,925. Original No. 1,326,850, dated Dec. 30, 1919, Serial No. 327,877, filed Oct. 2, 1919. 12 Claims. (Cl. 188—130.)

2. In a shock absorber, a casing including a friction track, a hub in said casing, a drum in said casing, a pin in said hub, a coiled spring surrounding said hub, an arm fixed to and extending laterally from said pin and anchored in said casing, a belt secured at one of its ends to said drum, the opposite end thereof extending over the friction track in the casing, and means for anchoring the free end of the belt to an axle, substantially as set forth.

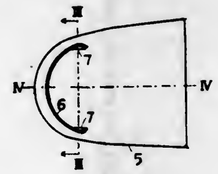
15,198. ARTIFICIAL-LIMB JOINT. DAVID W. DORRANCE, San Jose, Calif. Filed Jan. 8, 1920. Serial No. 350,220. Original No. 1,271,448, dated July 2, 1918, Serial No. 130,739, filed Nov. 11, 1916. 12 Claims. (Cl. 279—93.)

1. A coupling of the character described comprising separable male and female members, said male member having a stud, a resilient gasket loose on the stud, means for supporting the gasket, and a locking member adjustable on the stud, said female member including a web



for locking engagement with the locking member which is movable to effect binding action of itself and the gasket upon the web.

15,199. MOLDING COMPOSITION. JAMES P. A. MCCOY, Milwaukee, Wis., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Nov. 13, 1920. Serial No. 424,338. Original No. 1,300,218, dated Apr. 8, 1919, Serial No. 20,752, filed Apr. 12, 1915. 15 Claims. (Cl. 106—15.)



7. A molded electric insulator containing cumaron resin as an essential constituent.

15,200. KEY-HOLDER. CHARLES L. PEIRCE, Jr., Pittsburgh, Pa. Filed Aug. 4, 1921. Serial No. 489,871. Original No. 1,352,622, dated Sept. 14, 1920, Serial No. 284,319, filed Mar. 22, 1919. 5 Claims. (Cl. 59—97.)

4. A key holder comprising two lengths of chain, a detachable connector for joining said lengths together and key stops for the opposite ends of the joined chain.

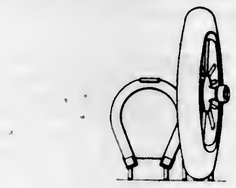
15,201. REPAIR-PATCH FOR RUBBER FOOTWEAR. JAMES ROBERTSON, Jr., Weehawken, N. J. Filed Feb. 10, 1921. Serial No. 444,054. Original No. 1,354,846, dated Oct. 5, 1920, Serial No. 374,519, filed Apr. 17, 1920. 3 Claims. (Cl. 36—59.)

1. A repair patch for footwear comprising a tread portion rounded at one end and having a flexible and elastic flange upstanding from the rounded end of the tread portion and having the bottom margins at its ends joined to the tread portion at a distance from the margin of the tread portion and sufficiently thin and flexible to have a bending line at its juncture with the tread portion whereby the flange can be brought into contact with the sides

of the footwear when it is narrow and may be brought into contact with the projecting margins of the tread portion to accommodate wider footwear, substantially as described.

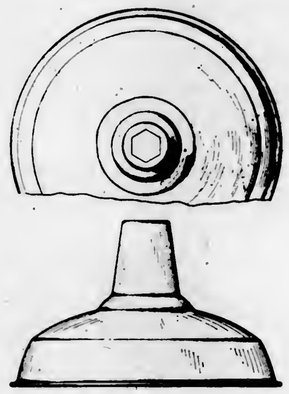
DESIGNS.

59,053. DISPLAY-RACK. ERHARD ALLEN, Dayton, Ohio, assignor to The Dayton Display Fixture Company, Dayton, Ohio, a Corporation of Ohio. Filed Jan. 31, 1921. Serial No. 441,483. Term of patent 14 years.



The ornamental design for a display rack as shown.

59,054. CHAIN PULL FOR ELECTRICAL-LAMP SOCKETS. LOUISE R. ALLEN, New York, N. Y. Filed Feb. 18, 1921. Serial No. 446,193. Term of patent 3½ years.

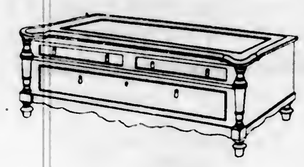


The ornamental design for a chain pull for electrical lamp sockets, as shown.

59,055. ADVERTISING-SIGN. JOSEPH T. AULTMAN, Milwaukee, Wis. Filed Jan. 17, 1921. Serial No. 438,020. Term of patent 7 years.

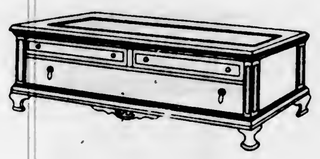
The ornamental design for an advertising sign, as shown.

59,056. REFLECTOR. REUBEN B. BENJAMIN, Chicago, Ill., assignor to Benjamin Electric Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Feb. 2, 1920. Serial No. 355,781. Term of patent 14 years.



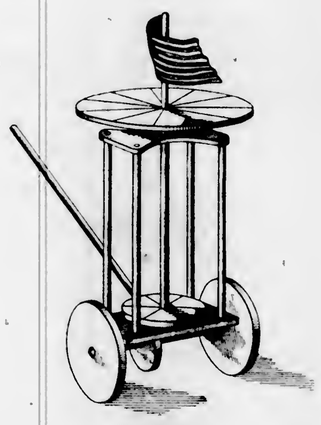
The ornamental design for a reflector, substantially as shown.

59,057. CLOTHES-CHEST. GEORGE E. BERGSTROM, Chicago, Ill. Filed Feb. 28, 1921. Serial No. 448,598. Term of patent 14 years.



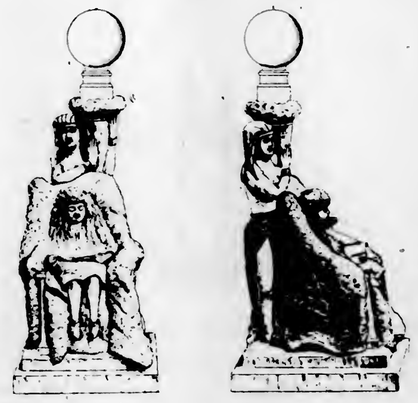
The ornamental design for a clothes chest as shown.

59,058. CLOTHES-CHEST. GEORGE E. BERGSTROM, Chicago, Ill. Filed Feb. 28, 1921. Serial No. 448,590. Term of patent 14 years.



The ornamental design for a clothes chest as shown.

59,059. CLOTHES-CHEST. GEORGE E. BERGSTROM, Chicago, Ill. Filed Feb. 28, 1921. Serial No. 448,600. Term of patent 14 years.



The ornamental design for a clothes chest as shown.

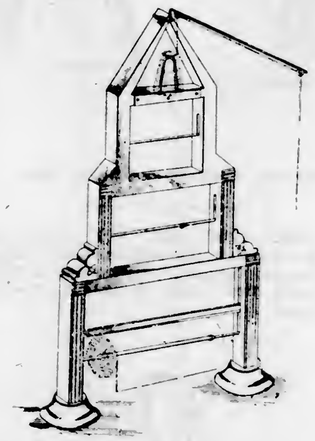
59,060. REVOLVING-DISK DISPLAY TOY. HUGO C. BLOCK, Watertown, Wis. Filed Aug. 9, 1920. Serial No. 402,437. Term of patent 3½ years.

The ornamental design for a revolving disk display toy, as shown.

59,061. LAMP. JOSEPH I. PAPALE and GEORGE CAMPBELL, San Francisco, Calif. Filed Dec. 15, 1920. Serial No. 430,978. Term of patent 3½ years.

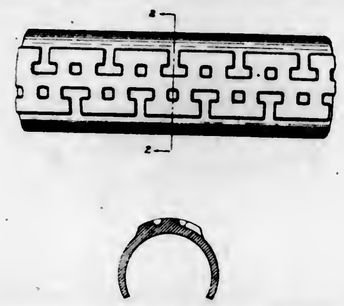
The ornamental design for a lamp, as shown.

59,062. SPARE-TIRE LOCK FOR AUTOMOBILES. EARLE E. CHAPMAN, Los Angeles, Calif., assignor to Miller-Chapman Company, a Corporation of California. Filed Nov. 10, 1920. Serial No. 423,211. Term of patent 14 years.



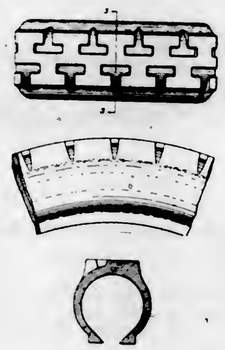
The ornamental design for a spare tire lock for automobiles, as shown.

59,063. **ARM OF A WALL-BRACKET FOR LIGHTING-FIXTURES.** HARRY COHN, Brooklyn, N. Y., assignor to Hygrade Lighting Fixture Corporation, Brooklyn, N. Y., a Corporation of New York. Filed Mar. 14, 1921. Serial No. 452,326. Term of patent 7 years.



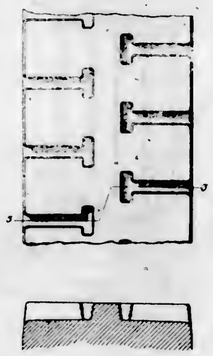
The ornamental design for an arm of a wall bracket for lighting fixtures, as shown.

59,064. **FRAME FOR A PAPER-CUTTER OR SIMILAR ARTICLE.** ARVID G. DANIELSON, Willmar, Minn. Filed Dec. 14, 1920. Serial No. 430,767. Term of patent 7 years.



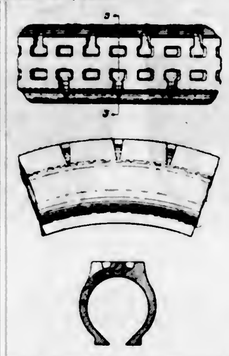
The ornamental design for a frame for a paper cutter or similar article, as shown.

59,065. **TIRE-TREAD.** WILLIAM M. DOUCETTE, Yonkers, N. Y. Filed July 29, 1920. Serial No. 399,899. Term of patent 14 years.



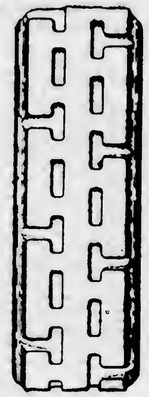
The ornamental design for a tire tread, as shown.

59,066. TIRE-TREAD. WILLIAM M. DOUCETTE, New York, N. Y. Filed Dec. 18, 1920. Serial No. 431,770. Term of patent 14 years.



The ornamental design for a tire-tread as shown.

59,067. TIRE-TREAD. WILLIAM M. DOUCETTE, New York, N. Y. Filed Dec. 18, 1920. Serial No. 431,772. Term of patent 14 years.



The ornamental design for a tire-tread as shown.

59,068. **TIRE-TREAD.** WILLIAM M. DOUCETTE, New York, N. Y. Filed Dec. 18, 1920. Serial No. 431,771. Term of patent 14 years.

The ornamental design for a tire-tread as shown.

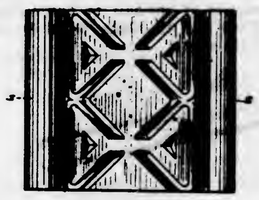
59,069. TIRE-TREAD. WILLIAM M. DOUCETTE. New York, N. Y. Filed Feb. 15, 1921. Serial No. 445,269. Term of patent 14 years.

The ornamental design for a tire-tread as shown.

59,070. **FEED-THROUGH SWITCH.** JOHN B. DOWNING, Newark, N. J., assignor to Beaver Machine & Tool Company, Newark, N. J., a Corporation of New Jersey. Filed Apr. 19, 1921. Serial No 462,711. Term of patent 7 years.

The ornamental design for a feed-through switch, as shown.

59,071. **BOTTLE.** EMILY DUKE, New York, N. Y., assignor to Colgate & Company, New York, N. Y., a Corporation of New Jersey. Filed Feb. 21, 1921. Serial No. 446,963. Term of patent 7 years.

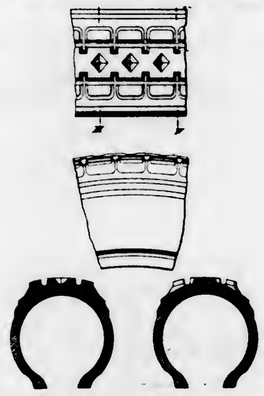


The ornamental design for a bottle substantially as shown.

59,072. **BLADE FOR GRASS-HOOKS.** HORATIO S. EARLE, Detroit, Mich. Filed Sept. 12, 1918. Serial No. 253,833. Term of patent 14 years.

The ornamental design for a blade for grass hooks substantially shown and described.

59,073. **TIRE-TREAD.** SAMUEL T. EHRLICH, Newark, N. J. Filed May 19, 1921. Serial No. 470,908. Term of patent 14 years.

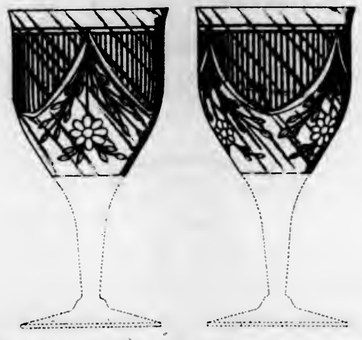


The ornamental design for a tire tread, as shown.

59,074. STAFF-HEAD. HARRY J. GALLAGHER, Kokomo, Ind., assignor to Kokomo Brass Works, Kokomo, Ind., a Corporation of Indiana. Filed May 16, 1921. Serial No. 470,007. Term of patent 14 years.

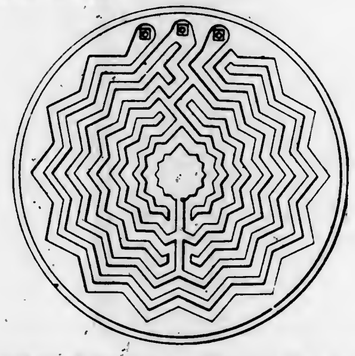
The ornamental design for a staff head as shown.

59,075. TIRE-TREAD. CHARLES T. GARDNER, New York, N. Y., assignor to Ajax Rubber Company, Inc., Millbrook, N. Y., a Corporation of New York. Filed Apr. 2, 1921. Serial No. 458,046. Term of patent 14 years.



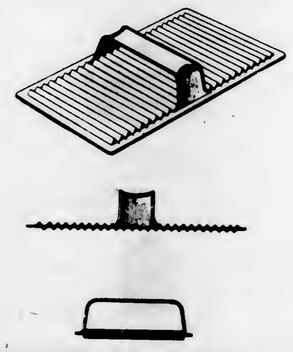
The ornamental design for a tire tread, substantially as shown.

59,076. KITCHEN-TOOL. CLARENCE L. GRAVES, Eland, Wis., assignor of one-half to Lavea Oleson, St. Paul, Minn. Filed Apr. 15, 1921. Serial No. 461,694. Term of patent 14 years.



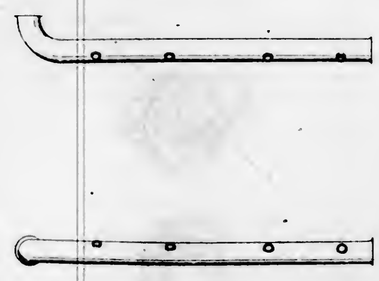
The ornamental design for a kitchen tool as shown and described.

59,077. SURFACE ORNAMENTATION FOR A GLASS GOBLET OR SIMILAR ARTICLE. J. WILLARD GROVES, Barnesville, Ohio, assignor to The Lotus Cut Glass Co., Barnesville, Ohio. Filed Mar. 17, 1921. Serial No. 453,152. Term of patent 3½ years.



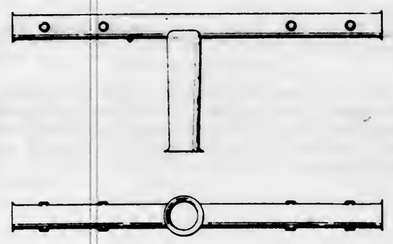
The ornamental design for the surface ornamentation for a glass goblet or similar article, as shown.

59,078. ELECTRIC-PLATE. LOUIS R. HAMLIN, Kokomo, Ind., assignor to The Globe Stove & Range Co., Kokomo, Ind. Filed Apr. 2, 1921. Serial No. 458,042. Term of patent 14 years.



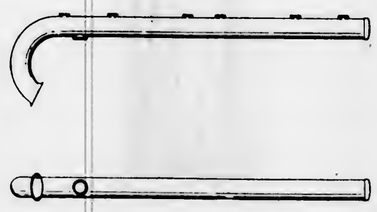
The ornamental design for an electric plate, as shown.

59,079. HAND-WASHBOARD. WARREN A. HARWI, Atchison, Kans. Filed Jan. 8, 1920. Serial No. 350,221. Term of patent 7 years.



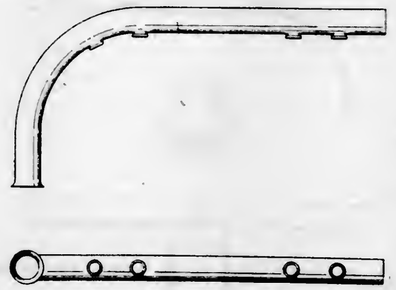
The ornamental design for a hand washboard as shown.

59,080. IGNITION-WIRE MANIFOLD. CURTIS E. HENDRICKS, Southport, Ind. Filed Oct. 16, 1920. Serial No. 417,518. Term of patent 14 years.



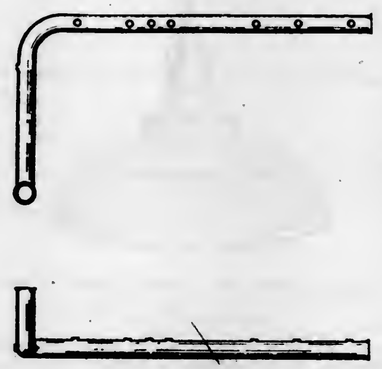
The ornamental design for an ignition wire manifold, as shown.

59,081. IGNITION-WIRE MANIFOLD. CURTIS E. HENDRICKS, Southport, Ind. Filed Oct. 16, 1920. Serial No. 417,519. Term of patent 14 years.



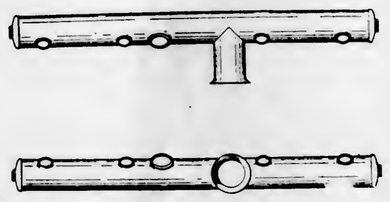
The ornamental design for an ignition wire manifold, as shown.

59,082. IGNITION-WIRE MANIFOLD. CURTIS E. HENDRICKS, Southport, Ind. Filed Oct. 16, 1920. Serial No. 417,520. Term of patent 14 years.



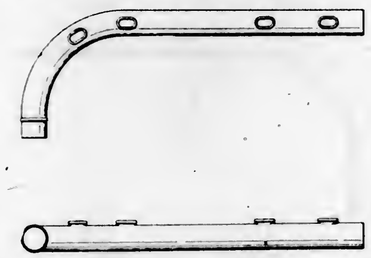
The ornamental design for an ignition wire manifold, as shown.

59,083. IGNITION-WIRE MANIFOLD. CURTIS E. HENDRICKS, Southport, Ind. Filed Oct. 16, 1920. Serial No. 417,521. Term of patent 14 years.



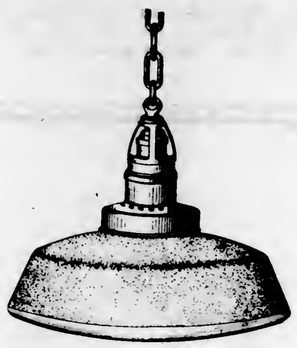
The ornamental design for an ignition wire manifold, as shown.

59,084. IGNITION-WIRE MANIFOLD. CURTIS E. HENDRICKS, Southport, Ind. Filed Oct. 16, 1920. Serial No. 417,522. Term of patent 14 years.



The ornamental design for an ignition wire manifold, as shown.

59,085. IGNITION-WIRE MANIFOLD. CURTIS E. HENDRICKS, Southport, Ind. Filed Oct. 16, 1920. Serial No. 417,523. Term of patent 14 years.



The ornamental design for an ignition wire manifold, as shown.

59,086. IGNITION-WIRE MANIFOLD. CURTIS E. HENDRICKS, Southport, Ind. Filed Oct. 16, 1920. Serial No. 417,524. Term of patent 14 years.

The ornamental design for an ignition wire manifold, as shown.

59,087. LIGHTING-FIXTURE. SAMUEL G. HIBBEN, Bloomfield, N. J. Filed Jan. 27, 1921. Serial No. 440,510. Term of patent 3½ years.

Ornamental design for a lighting fixture, as shown.

59,088. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Nov. 12, 1920. Serial No. 423,748. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,089. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Nov. 12, 1920. Serial No. 423,750. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,090. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Nov. 12, 1920. Serial No. 423,751. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,091. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,447. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,092. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,449. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,093. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,454. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,094. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,457. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,095. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,466. Term of patent 3½ years.

The ornamental design for a talcum powder box as shown.

59,096. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,469. Term of patent 3½ years.

The ornamental design for a talcum powder box as shown.

59,097. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,470. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,098. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,474. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,099. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,478. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,100. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,487. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,101. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,489. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,102. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,493. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,103. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,495. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,104. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,505. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,105. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,507. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,106. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,510. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,107. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,511. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,108. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,515. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,109. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,517. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,110. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,518. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,111. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,522. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,112. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,523. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,113. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,524. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,114. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,527. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

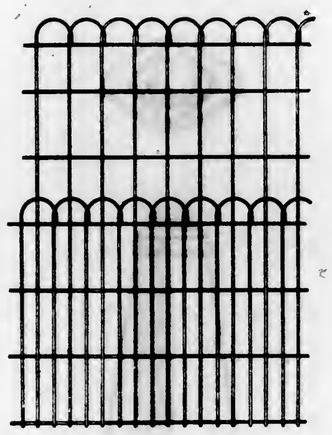
59,115. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,528. Term of patent 3½ years.

The ornamental design for a talcum powder box, as shown.

59,116. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,533. Term of patent 3½ years.

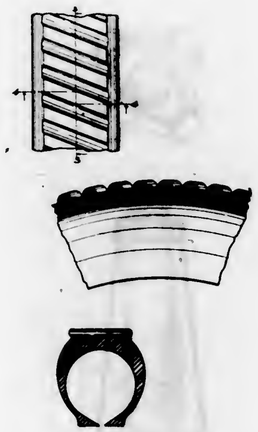
The ornamental design for a talcum powder box, as shown.

59,117. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,536. Term of patent 3½ years.



The ornamental design for a talcum powder box as shown.

59,118. TALCUM-POWDER BOX. JOHN M. HOTHERSALL, Brooklyn, N. Y., assignor to American Can Company, New York, N. Y., a Corporation of New Jersey. Filed Dec. 13, 1920. Serial No. 430,537. Term of patent 3½ years.

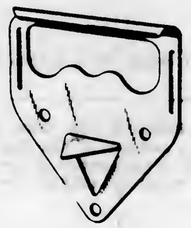


The ornamental design for a talcum powder box, as shown.

59,119. WIRE FENCE. AUGUST G. JOHNSON, Monessen, Pa. Filed Oct. 24, 1918. Serial No. 259,500. Term of patent 14 years.

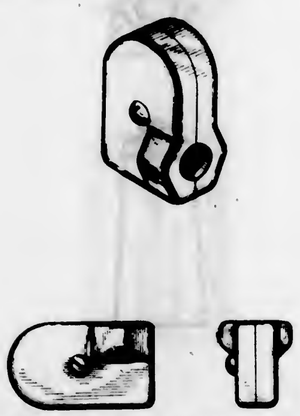
The ornamental design for a wire fence, as shown.

59,120. TIRE-TREAD. KEAMON KUROSE, Seattle, Wash. Filed Nov. 24, 1920. Serial No. 426,296. Term of patent 7 years.



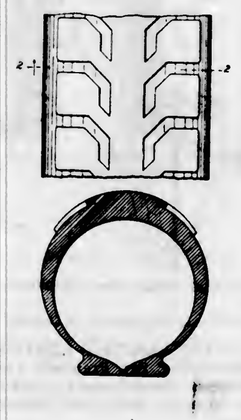
The ornamental design for a tire tread, as shown.

59,121. LAMP. CHARLES WILLIAM LA ROCHE, Philadelphia, Pa., assignor of one-half to J. Nicholas Meyers, Philadelphia, Pa. Filed Jan. 25, 1921. Serial No. 439,866. Term of patent 3½ years.



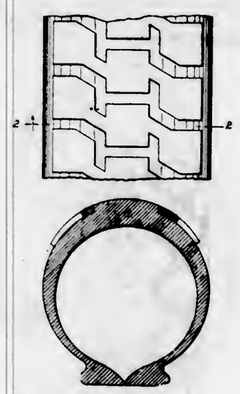
The ornamental design for a lamp, as shown.

59,122. HANDLE. PAUL M. MARKO, Brooklyn, N. Y. Filed Apr. 12, 1921. Serial No. 460,814. Term of patent 7 years.



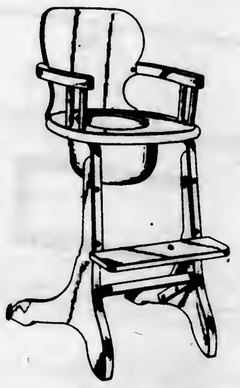
The ornamental design for a handle, as shown.

59,123. CASING FOR A RADIATOR AIR-VALVE. PAUL MIRK, New York, N. Y. Filed Nov. 16, 1920. Serial No. 424,566. Term of patent 14 years.



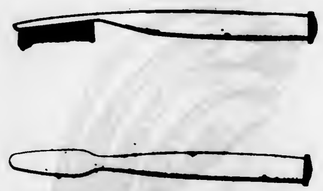
The ornamental design for a casing for radiator air-valve, substantially as shown.

59,124. TIRE-TREAD. WILLIAM J. MURPHY, Cedar Falls, Iowa. Filed Apr. 4, 1921. Serial No. 458,546. Term of patent 14 years.



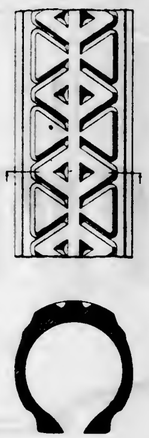
The ornamental design for a tire tread, as shown.

59,125. TIRE-TREAD. WILLIAM J. MURPHY, Cedar Falls, Iowa. Filed Apr. 4, 1921. Serial No. 458,547. Term of patent 14 years.



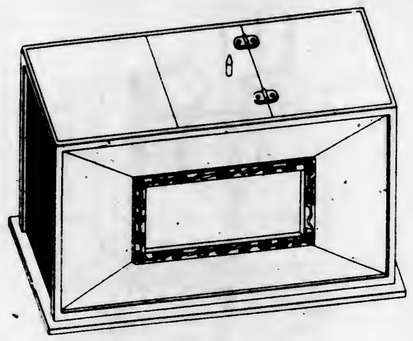
The ornamental design for a tire tread as shown.

59,126. TOILET-CHAIR. ALBERT L. MORTON, Springfield, Ill. Filed Jan. 28, 1921. Serial No. 440,817. Term of patent 14 years.



The ornamental design for a toilet chair as shown.

59,127. TOOTHBRUSH. JOSEPH E. PERRAULT, Northampton, Mass. Filed Apr. 10, 1920. Serial No. 373,010. Term of patent 7 years.

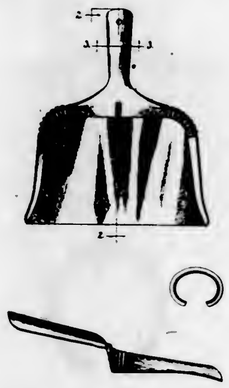


The ornamental design for a toothbrush, as shown.

59,128. TIRE-CASING. ELMER A. REID, Trenton, N. J., assignor to Ajax Rubber Company, Inc., Millbrook, N. Y., a Corporation of New York. Filed Dec. 30, 1919. Serial No. 348,500. Term of patent 14 years.

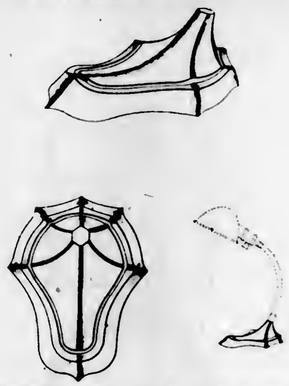
The ornamental design for a tire casing, substantially as shown.

59,129. SELF-SETTING MOUSETRAP. LUCAS ROMANSON, Fisherton, Manitoba, Canada. Filed May 4, 1921. Serial No. 466,705. Term of patent 7 years.



The ornamental design for a self-setting mousetrap as shown.

59,130. STAND FOR DISPLAYING ARTICLES OF MERCHANDISE. LOUIS ALBERT SAMSTAG, New York, N. Y. Filed Mar. 20, 1920. Serial No. 367,497. Term of patent 14 years.



The ornamental design for a stand for displaying articles of merchandise as shown.

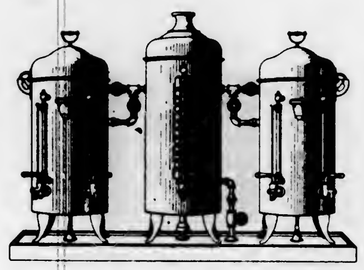
59,131. DUSTPAN. ORESTE SCALISE, Chicago, Ill. Filed Apr. 30, 1921. Serial No. 465,846. Term of patent 7 years.

The ornamental design for a dustpan, as shown.

59,132. PORTABLE LAMP-BASE. S. ROBERT SCHWARTZ, New York, N. Y. Filed Oct. 20, 1920. Serial No. 418,340. Term of patent 7 years.

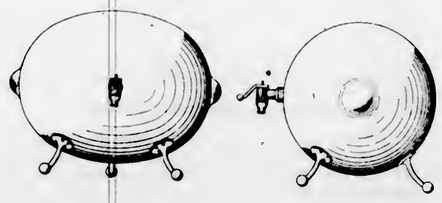
The ornamental design for a portable lamp base, as shown.

59,133. RADIANT ELECTRIC HEATING UNIT. MILTON H. SHOENBERG, San Francisco, Calif., assignor to Majestic Electric Development Co., San Francisco, Calif. Filed Feb. 26, 1920. Serial No. 361,561. Term of patent 14 years.



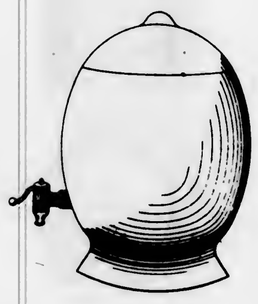
The ornamental design of a radiant electric heating unit substantially as shown.

59,134. CUSHION-TIRE TREAD. CARL SODERLUND, Akron, Ohio. Filed May 7, 1921. Serial No. 467,579. Term of patent 14 years.



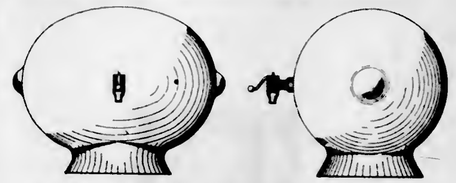
The ornamental design for a cushion-tire tread, as shown.

59,135. COFFEE-URN. THOMAS J. TOPPER, San Francisco, Calif. Filed Apr. 14, 1921. Serial No. 461,423. Term of patent 14 years.



The ornamental design for a coffee urn, as shown.

59,136. BEVERAGE-DISPENSING APPARATUS. JOHN M. TRAVIS, St. Louis, Mo. Filed May 5, 1921. Serial No. 467,209. Term of patent 7 years.



The ornamental design for a beverage dispensing apparatus as shown.

59,137. BEVERAGE-DISPENSING APPARATUS. JOHN M. TRAVIS, St. Louis, Mo. Filed May 5, 1921. Serial No. 467,210. Term of patent 7 years.

The ornamental design for a beverage dispensing apparatus, as shown.

59,138. BEVERAGE-DISPENSING APPARATUS. JOHN M. TRAVIS, St. Louis, Mo. Filed May 5, 1921. Serial No. 467,211. Term of patent 7 years.

The ornamental design for a beverage dispensing apparatus, as shown.

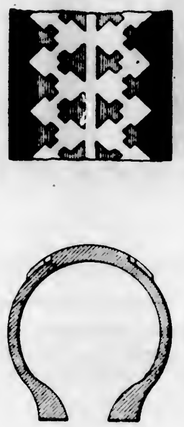
59,139. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,365. Term of patent 3½ years.

The ornamental design for a tire as shown.

59,140. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,366. Term of patent 3½ years.

The ornamental design for a tire as shown.

59,141. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,367. Term of patent 3½ years.



The ornamental design for a tire as shown.

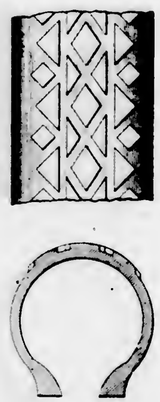
59,142. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,368. Term of patent 3½ years.

The ornamental design for a tire as shown.

59,143. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,369. Term of patent 3½ years.

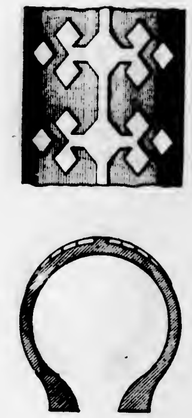
The ornamental design for a tire as shown.

59,144. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,371. Term of patent 3½ years.



The ornamental design for a tire as shown.

59,145. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,372. Term of patent 3½ years.

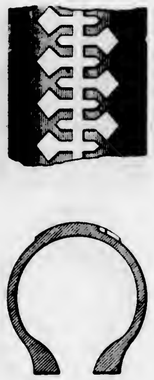


The ornamental design for a tire as shown.

59,146. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,375. Term of patent 3½ years.

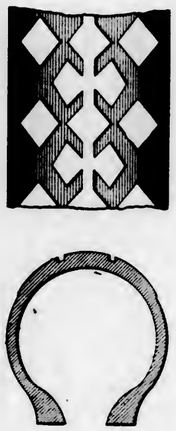
The ornamental design for a tire as shown.

59,147. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,376. Term of patent 3½ years.



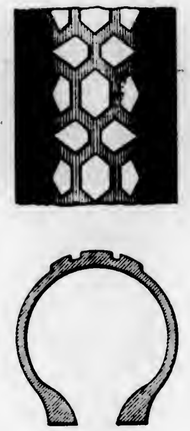
The ornamental design for a tire as shown.

59,148. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,377. Term of patent 3½ years.



The ornamental design for a tire as shown.

59,149. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,378. Term of patent 3½ years.



The ornamental design for a tire as shown.

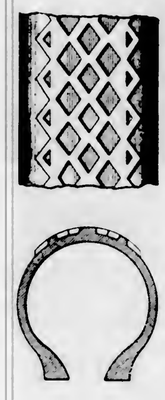
59,150. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,379. Term of patent 3½ years.

The ornamental design for a tire as shown.

59,151. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,380. Term of patent 3½ years.

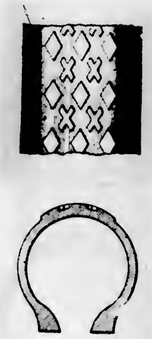
The ornamental design for a tire as shown.

59,152. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,381. Term of patent 3½ years.



The ornamental design for a tire as shown.

59,153. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,382. Term of patent 3½ years.

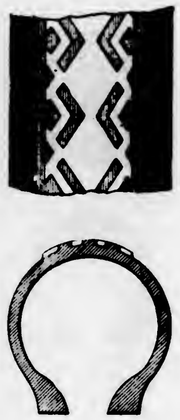


The ornamental design for a tire as shown.

59,154. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,383. Term of patent 3½ years.

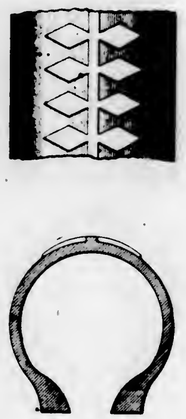
The ornamental design for a tire as shown.

59,155. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,384. Term of patent 3½ years.



The ornamental design for a tire as shown.

59,156. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,385. Term of patent 3½ years.

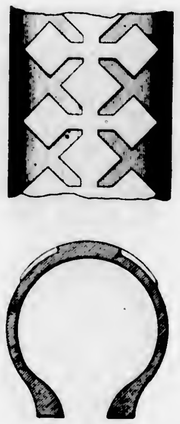


The ornamental design for a tire as shown.

59,157. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,386. Term of patent 3½ years.

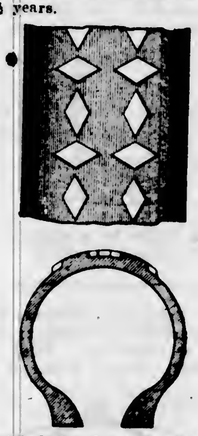
The ornamental design for a tire as shown.

59,158. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,387. Term of patent 3½ years.



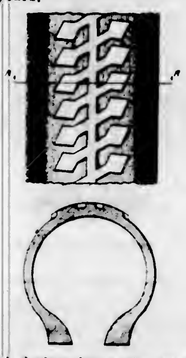
The ornamental design for a tire as shown.

59,159. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,388. Term of patent 3½ years.



The ornamental design for a tire as shown.

59,160. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,389. Term of patent 14 years.



The ornamental design for a tire as shown.

59,161. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,390. Term of patent 3½ years.

The ornamental design for a tire as shown.

59,162. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,391. Term of patent 3½ years.

The ornamental design for a tire as shown.

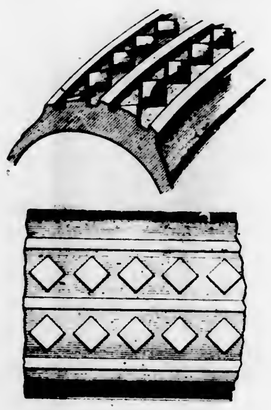
59,163. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,392. Term of patent 3½ years.

The ornamental design for a tire as shown.

59,164. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,393. Term of patent 3½ years.

The ornamental design for a tire as shown.

59,165. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,395. Term of patent 3½ years.

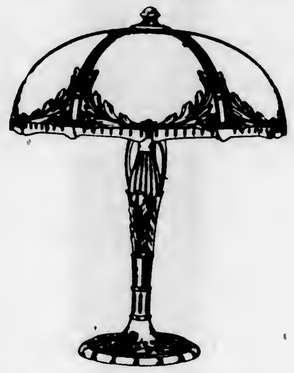


The ornamental design for a tire as shown.

59,166. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,396. Term of patent 3½ years.

The ornamental design for a tire as shown.

59,167. TIRE. ROLAND S. TROGNER, Akron, Ohio, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Filed Mar. 18, 1921. Serial No. 453,397. Term of patent 3½ years.



The ornamental design for a tire as shown.

59,168. SUPPORT FOR A LAMP OR SIMILAR ARTICLE. HERMAN H. WOLTER, Meriden, Conn., assignor to Edward Miller & Company, Meriden, Conn., a Corporation of Connecticut. Filed Feb. 24, 1921. Serial No. 447,616. Term of patent 3½ years.

The ornamental design for a support for a lamp or similar article, substantially as shown.

59,169. LAMP. HERMAN H. WOLTER, Meriden, Conn., assignor to Edward Miller & Company, Meriden, Conn., a Corporation of Connecticut. Filed Feb. 24, 1921. Serial No. 447,617. Term of patent 3½ years.

The ornamental design for a lamp substantially as shown.

59,170. LAMP. HERMAN H. WOLTER, Meriden, Conn., assignor to Edward Miller & Company, Meriden, Conn., a Corporation of Connecticut. Filed Feb. 24, 1921. Serial No. 447,618. Term of patent 3½ years.

The ornamental design for a lamp substantially as shown.

TRADE-MARKS

OFFICIAL GAZETTE, SEPTEMBER 20, 1921.

[PUBLISHED SEPTEMBER 30, 1921.]

The letter "C" being shown in red.

Particular description of goods.—Liquid Fuel for Internal-Combustion Engines, Benzol, Toluol, and Naphtha.

Claims use since on or about Feb. 12, 1918, on liquid fuel and since on or about January, 1917, on benzol, toluol, and naphtha.

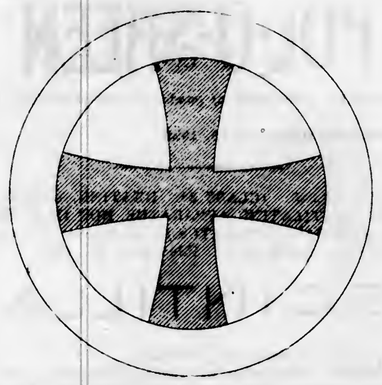
Ser. No. 127,998. (CLASS 40. FANCY GOODS, FURNISHINGS, AND NOTIONS.) WILLIAM E. DODD, New York, N. Y. Filed Feb. 5, 1920.

"JUST ENUFF"

Particular description of goods.—Cut Lengths of Silk and Velvet Ribbons.

Claims use since July 15, 1919.

Ser. No. 128,026. (CLASS 1. RAW OR PARTLY-PREPARED MATERIALS.) THE SOUTHERN COAL & COKE COMPANY, Knoxville, Tenn. Filed Feb. 5, 1920.



No claim is made to the representation of coal shown in the drawing of the trade-mark apart from the trade-mark as shown.

Particular description of goods.—Coal.

Claims use since about 1908.

Ser. No. 128,345. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) DR. ANANIA FLORES, Marianna, Pa. Filed Feb. 13, 1920.

The cross being green.

Particular description of goods.—Emulsion for Influenza, Palliative for Venereal Diseases; Medicine for Kidneys, Stomach, Liver, Dyspepsia, Indigestion; Tonic, Strengthening-Tonic for the Appetite, a Physic and System-Purifier; Bay-Rum, Perfume, Hair-Tonic, and Hair-Restorer, Cough-Syrup, Liniment Preparation for External Use for Rheumatism, Neuritis, Neuralgia, Soreness, Sprains, Stiff and Swollen Joints.

Claims use since about Jan. 1, 1919.

Ser. No. 129,417. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) ISIDORE RESSLER, Detroit, Mich. Filed Mar. 8, 1920.

DEODORA

Particular description of goods.—Deodorant and Disinfectant.

Claims use since July, 1919.

Ser. No. 129,928. (CLASS 19. VEHICLES, NOT INCLUDING ENGINES.) H. L. G. MANUFACTURING COMPANY, Indianapolis, Ind. Filed Mar. 19, 1920.

No claim is made for the exclusive rights to the words "Indianapolis, Ind." the words "Shock Absorber," and the letters "U. S. A." apart from the mark shown in the drawing.

Particular description of goods.—Shock-Absorbers for Motor-Vehicles.

Claims use since Dec. 16, 1919.

Ser. No. 131,333. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) IRVIN-SMITH CO., Chicago, Ill. Filed Apr. 19, 1920.

SENSATION

Particular description of goods.—Lip-Sticks, Nail-Polish, and Incense.

Claims use since June 15, 1919.

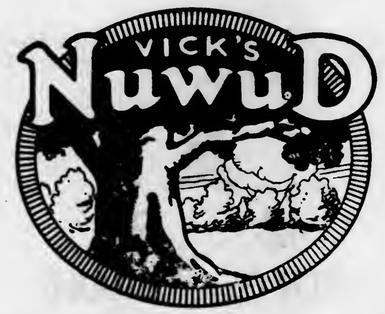
Ser. No. 131,681. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) MATHILDA WALINDER, Chicago, Ill. Filed Apr. 26, 1920.

BISMOLATUM

Particular description of goods.—Antiseptic Healing-Salve.

Claims use since Nov. 1, 1919.

Ser. No. 133,079. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) JULES BENGUÉ, Paris, France. Filed May 29, 1920.



ANGINOL

Consists of the word "Anginol."

Particular description of goods.—Lozenges for Throat Diseases.

Claims use since Feb. 19, 1920.

Ser. No. 133,255. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) ALBERT F. W. VICK, Philadelphia, Pa. Filed June 3, 1920.

Particular description of goods.—Material for Filling Cavities in Trees, Consisting of a Mixture of Calcined Magnesite and Sawdust, Which is Employed, After Having Been Mixed with Magnesium Chlorid, to Provide a Plastic Mass.

Claims use since Mar. 11, 1920.

Ser. No. 133,667. (CLASS 1. RAW OR PARTLY-PREPARED MATERIALS.) MILL AND MINE SUPPLY CO., Seattle, Wash. Filed June 14, 1920.

Particular description of goods.—Blacksmith-Coal.
Claims use since Jan. 1, 1908.

Ser. No. 134,090. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) WAYNE F. RHYNE, Rome, Ga. Filed June 23, 1920.

NUXIANA

Particular description of goods.—A General Tonic.
Claims use since Jan. 1, 1917.

Ser. No. 134,974. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) NELIA PARKER, Oakland, Calif. Filed July 14, 1920.

Hairgone

Particular description of goods.—A Preparation for the Removal of Superfluous Hair from the Human Face and Body.
Claims use since Dec. 12, 1919.

Ser. No. 135,460. (CLASS 15. OILS AND GREASES.) THE TEXAS COMPANY, Houston, Tex., and New York, N. Y. Filed July 27, 1920.

星
標 商
SING BRAND

The word "Brand" is disclaimed apart from the mark as shown on the drawing. A translation of the Chinese characters shown on the drawing is as follows: "Star Brand."
Particular description of goods.—Burning-Oils.
Claims use since Aug. 14, 1916.

Ser. No. 135,618. (CLASS 16. PAINTS AND PAINTERS' MATERIALS.) JOHN F. ROLSHAUSEN, Logansport, Ind. Filed July 30, 1920.

POL-O-SHEEN

Particular description of goods.—Automobile-Body Polish.
Claims use since July 15, 1920.

Ser. No. 136,045. (CLASS 34. HEATING, LIGHTING, AND VENTILATING APPARATUS, NOT INCLUDING ELECTRICAL APPARATUS.) SCINTILLA, Canton of Solothurn, Switzerland. Filed Aug. 12, 1920.

SCINTILLA

Consisting of the word "Scintilla."
Particular description of goods.—Petroleum and Oil Lamps, Lanterns, and Hand-Lamps and Parts Thereof; Ventilators, Steam and Hot-Water Radiators and Dampers and Parts Thereof.
Claims use since June 19, 1917.

Ser. No. 136,217. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) WINTHROP CHEMICAL COMPANY, INC., New York, N. Y. Filed Aug. 17, 1920.

EUROPHEN

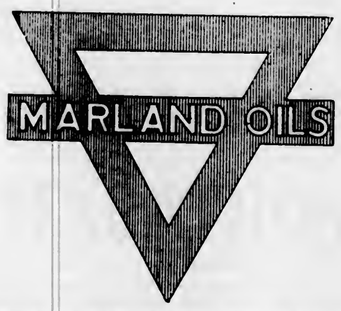
Particular description of goods.—Antiseptic Medical Substance in Powdered Form.
Claims use since about Feb. 4, 1890.

Ser. No. 136,296. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) H. P. HOOD & SONS, INC., Boston, Mass. Filed Aug. 20, 1920.

No claim is made to the representation of a cow appearing on the drawing apart from the mark shown or to the word "Milk."
Particular description of goods.—Milk, Cream, Butter, Cheese, Eggs, Buttermilk, Modified Milk, Tea, Coffee, Ice-Cream, Canned Beans, Canned Fruits and Vegetables.
Claims use since 1900.

Ser. No. 136,528. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) Mrs. BEULAH PARKER, Chicago, Ill. Filed Aug. 26, 1920.

PARKER'S
BEAUTIFIER



The portrait appearing on the drawing is that of the applicant. No claim is made to the word "Beautifier" apart from the mark as shown.
Particular description of goods.—Hair-Growers.
Claims use since April, 1915.

Ser. No. 136,585. (CLASS 38. PRINTS AND PUBLICATIONS.) DOYLE-KIDD D. G. CO., Little Rock, Ark. Filed Aug. 28, 1920.

Particular description of goods.—Weekly and Annual Publications.
Claims use since about Jan. 21, 1913.

Ser. No. 137,337. (CLASS 15. OILS AND GREASES.) MARLAND REFINING COMPANY, Ponca City, Okla. Filed Sept. 23, 1920.

The words "Marland Oils" are disclaimed apart from the mark shown. The shading represents the color red.

Particular description of goods.—Gasolene, Naphtha, Benzene, Kerosene, Kerosene Distillates, Gasolene Distillates, Fuel-Oil, Gas-Oil, Paraffin-Waxes, Lubricating Distillates, Lubricating By-Products Obtained from the Distillation of Crude Oil, Saponified and Solidified Greases Made from Petroleum for Lubricating, and Blends of the Various Oils and Distillates for Lubricating.
Claims use since Jan. 2, 1919.

Ser. No. 137,564. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) BOERICKE & RUNYON CO., San Francisco and Oakland, Calif. Filed Sept. 24, 1920.

Eupsa

Particular description of goods.—Medicines and Pharmaceutical Preparations—Namely, Internal Remedies in Tablet and Liquid Form—Namely, Constitutional, Mucous Membrane, Blood, Bronchitis, Nerve Exhaustion, Dyspepsia, Flatulence, Climacteric, Bilious, Headache, Invigorator, Coryza, Glandular, Laxative and Liver, Cough and Hoarseness, Hemorrhoid, Diarrhea, Malaria, Tonsillitis, Colic, Complexion, Urethritis, Rheumatism, Laryngitis, Sore Throat, Fever, Whooping-Cough, Asthma, Skin, Hives, Croup, Worm, Grippe, Influenza, Blood-Pressure, Uterine Catarrh, Heart, Neuritis, Painful Menstruation, Constipation, Seasickness, Goiter and Teething Tablets; Neurasthenia Special, Tonic Laxative, and Poison-Oak Remedy; Aromatic Castor-Oil, Sugar of Milk; Topical Remedies—Namely, Antiseptic Powder, Corn Remedy, Gargle, Scalp-Tonic, Eye-Water, Chilblain-Ointment, Poison-Oak Lotion, Poison-Oak Talcum Powder, Liquid Sulfur Soap, Alkaline Antiseptics, Ethereal Liquid Soap, and Pile-Suppositories; Dentifrice, Mouth-Wash, and Shampoo.
Claims use since 1898.

Ser. No. 137,656. (CLASS 50. MERCHANDISE NOT OTHERWISE CLASSIFIED.) FRED S. BENNETT, INC., New York, N. Y. Filed Sept. 27, 1920.

Aquashed

Particular description of goods.—Waterproof Fabrics.
Claims use since Sept. 1, 1920.

Ser. No. 137,729. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) FAIRY DYE COMPANY, Chicago, Ill. Filed Sept. 29, 1920.

Fairy

DYES

No claim being made to the word "Dyes" apart from the mark shown.

Particular description of goods.—Cloth-Dyes.

Claims use since June 1, 1920.

Ser. No. 138,530. (CLASS 19. VEHICLES, NOT INCLUDING ENGINES.) J. L. AIRCRAFT CORPORATION, New York, N. Y. Filed Oct. 20, 1920.

JL6

Particular description of goods.—Aeroplanes.

Claims use since July 2, 1920.

Ser. No. 138,613. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) SUSSMAN WORMSER & Co., San Francisco, Calif. Filed Oct. 20, 1920.

Century

Particular description of goods.—Canned Fruits, Canned Vegetables, Canned Oysters, Vinegar, Coffee, Tea, Spice, Evaporated Fruits, Fruit Jams, Fruit Jellies, Table-Syrup.

Claims use since Aug. 18, 1898.

Ser. No. 138,674. (CLASS 20. LINOLEUM AND OILED CLOTH.) W. A. W. DAVIS, CORP., Newark, N. J. Filed Oct. 22, 1920.

DAVISOLEUM

Particular description of goods.—Felt-Base Floor-Coverings, Linoleum, Oil-Cloth Fabrics for Floors, and Oil-Cloths.

Claims use since July 1, 1920.

Ser. No. 138,675. (CLASS 20. LINOLEUM AND OILED CLOTH.) W. A. W. DAVIS, CORP., Newark, N. J. Filed Oct. 22, 1920.

LINOLIN

Particular description of goods.—Felt-Base Floor Coverings, Linoleum, Oil-Cloth Fabrics for Floors, and Oil-Cloths.

Claims use since July 1, 1920.

Ser. No. 139,253. (CLASS 32. FURNITURE AND UPHOLSTERY.) CHAMBERLAYNE, INC., New York, N. Y. Filed Nov. 6, 1920.

CINC.

Particular description of goods.—Household Furniture—Namely, Tables, Chairs, Beds, Bureaus, Stands, Shades, Wardrobes, Cabinets, Credences, and Settees.

Claims use since Jan. 1, 1915.

Ser. No. 139,270. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) VICTOR HALPER, New York, N. Y. Filed Nov. 6, 1920.

KATALYSIN

Particular description of goods.—A Medicinal Preparation Indicated as a Specific for Insufficiency of the Hormones of the Reproductive Glands and the Glands of Internal Secretion and other Conditions of Physical and Nervous Debility.

Claims use since about Mar. 10, 1920.

Ser. No. 139,488. (CLASS 19. VEHICLES, NOT INCLUDING ENGINES.) THE WINTON COMPANY, Cleveland, Ohio. Filed Nov. 10, 1920.

SIX WINTON SIX

The word "Six" is disclaimed except in association with the word "Winton."

Particular description of goods.—Automobiles, Motor-Trucks.

Claims use since 1907.

Ser. No. 140,165. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) CHOCOLATS FINS ZURCHER S. A., Clarens-Montreux, Switzerland. Filed Nov. 26, 1920.

Particular description of goods.—Chocolate and Cocoa for Beverage Purposes; Raw and Prepared Cocoa and Cocoa Combined with Oats, Banana and other Flour, or with Medicaments; Chocolate in Blocks, in Wafers, in Sticks, in Balls and in Powder Form; Chocolate Combined with Nuts, Fruits, Liquors, Syrups, or Medicaments; Bonbons; Fresh, Dried, and Conserved Fruits; Candied Flowers; Condensed, Fresh, Conserved, and Powdered Milk and Cream; Lactated Flour, Pastils Used as a Confection, and Pastry.

Claims use since November, 1919.

Ser. No. 140,288. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) MARSHALL FIELD & COMPANY, Chicago, Ill. Filed Nov. 27, 1920.

MARATHON

Particular description of goods.—Sheets and Pillow-Cases.

Claims use since 1906.

Ser. No. 140,359. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) LEWIS LORIMER WILLIAMS, East Boston, Mass. Filed Nov. 27, 1920.

PEMROL

HAIR TONIC

No claim being made to the words "A Hair Tonic."

Particular description of goods.—Hair-Tonic.

Claims use since Nov. 1, 1920.

Ser. No. 141,366. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) MARSHALL FIELD & COMPANY, Chicago, Ill. Filed Dec. 21, 1920.

SILCOT

Particular description of goods.—Apparel Fabrics—Namely, Goods of Silk and Cotton Mixture Sold in Bolts or What are Commonly Referred to as Piece Goods.

Claims use since Apr. 20, 1920.

Ser. No. 141,784. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) BOLESLAW R. KOZLOWSKI, Chicago, Ill. Filed Jan. 3, 1921.

KORONA

Particular description of goods.—Ferrated Bitter Wine, to be Used as a General Tonic.

Claims use since December, 1912.

Ser. No. 141,844. (CLASS 1. RAW OR PARTLY-PREPARED MATERIALS.) HENRY W. PEABODY & Co., New York, N. Y. Filed Jan. 4, 1921.

C PURE

Exclusive use to the word "Pure" being disclaimed apart from the mark shown.

Particular description of goods.—Garnet Lac—a Grade of Gum-Shellac.

Claims use since November, 1911.

Ser. No. 141,955. (CLASS 42. KNITTED, NETTED, AND TEXTILE FABRICS.) MILLBROOK WOOLEN MILLS, New York, N. Y. Filed Jan. 7, 1921.

Elysian

Particular description of goods.—Woolen and Cotton Piece Goods.

Claims use since Jan. 15, 1914.

Ser. No. 142,007. (CLASS 16. PAINTS AND PAINTERS' MATERIALS.) CARPENTER-MORTON COMPANY, Boston, Mass. Filed Jan. 10, 1921.

COLORITE

Particular description of goods.—Liquid Paints, Varnishes, Varnish Stains for Coloring and Finishing Straw Hats and other Straw Goods of All Kinds, Leather, Ratan, Wood, and other Fibrous Materials, Including Textiles, and Metals, Glass, and other Materials.

Claims use since July 26, 1898.

Ser. No. 142,215. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) LANGLEY INGRAHAM, Philadelphia, Pa. Filed Jan. 13, 1921.

TIRETEX--RUBBERTEX

Particular description of goods.—A Liquid Preservative Coating for Automobile-Tires.

Claims use since Jan. 3, 1921.

Ser. No. 142,331. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) CITY CREAMERY CO. INC., Birmingham, Ala. Filed Jan. 17, 1921.

XTRIXPLEX

Particular description of goods.—Sweet Milk, Buttermilk, Cream, and Butter.

Claims use since Nov. 6, 1920.

Ser. No. 142,606. (CLASS 2. RECEPTACLES.) AMOSKEAG MANUFACTURING COMPANY, Manchester, N. H. Filed Jan. 22, 1921.

UNCANOONUC

Particular description of goods.—Bags Made of Cloth.

Claims use since Feb. 19, 1918.

Ser. No. 142,607. (CLASS 2. RECEPTACLES.) AMOSKEAG MANUFACTURING COMPANY, Manchester, N. H. Filed Jan. 22, 1921.

NAMASKE

Particular description of goods.—Bags Made of Cloth.

Claims use since Feb. 19, 1918.

Ser. No. 142,882. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) GIBSON-SNOW CO., INC., Albany, N. Y. Filed Jan. 28, 1921.

MUSTER-ICE

Particular description of goods.—A Salve or Ointment for Use in the Treatment of Influenza, Sore Throat, Rheumatism, Sprains, Cold in Head and Chest, Neuralgia, Asthma, Hay-Fever, Stiff Neck, Headache, and Tonsillitis.

Claims use since Oct. 1, 1919.

Ser. No. 143,440. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) LAWRENCE W. JENKINS, Greensboro, N. C. Filed Feb. 11, 1921.

LIVERITE

Particular description of goods.—A Laxative Tablet.

Claims use since November, 1916.

Ser. No. 143,570. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) MADS NELSON, Canton, Ohio. Filed Feb. 14, 1921.

Particular description of goods.—Medicinal Preparation for the Treatment of Rheumatism.

Claims use since about Jan. 21, 1921.

Ser. No. 143,615. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) THE NEEDHAM PRODUCTS COMPANY, Cleveland, Ohio. Filed Feb. 15, 1921.

Rep

Particular description of goods.—A Laxative.

Claims use since April, 1918.

Ser. No. 143,848. (CLASS 2. RECEPTACLES.) THE AMERICAN PAPER GOODS CO., Kensington, Conn. Filed Feb. 21, 1921.

PURITAN

Particular description of goods.—Round and Flat Paper Drinking-Cups.

Claims use since 1913.

Ser. No. 143,907. (CLASS 35. BELTING, HOSE, MACHINERY PACKING, AND NON-METALLIC TIRES.) THE ASHLAND TIRE AND RUBBER COMPANY, Ashland, Ohio. Filed Feb. 23, 1921.

The lining on drawing being merely shade-lines and not denoting color. No claim is made to the words "Ashland Tires" or the words "Sturdy as the Ash—Best in the Land" apart from the mark shown in the drawing. No claim is made to the representation of the tire apart from the mark shown.

Particular description of goods.—Vehicle-Tires of Rubber and Rubber and Fabric, Inner Tubes, Tire Casings and Shoes, All Rubber and Fabric and Repair Parts for Use in Connection with the Foregoing—Namely, Lace-On Boots and Hook-On Boots of Rubber and Fabric, Relliners, Blow-Out Patches, Cementless Patches, Cord Patches, and Valve-Pads.

Claims use since about Feb. 20, 1920.

Ser. No. 143,911. (CLASS 2. RECEPTACLES.) THE CENTRAL FURNITURE PACKING COMPANY, Chicago, Ill. Filed Feb. 23, 1291.

Particular description of goods.—Crates, Wood Boxes, and Cartons.

Claims use since Nov. 15, 1920.

Ser. No. 144,053. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) FANNIE B. STONER, Providence, Ky. Filed Feb. 25, 1921.

MADAM STONER'S BEAUTY

Particular description of goods.—Hair-Grower.
Claims use since Dec. 1, 1920.

Ser. No. 144,104. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) STANDARD CHEMICAL WORKS, Reading and Womelsdorf, Pa. Filed Feb. 26, 1921.

San-O-Spray

Particular description of goods.—Insecticides, Deodorants, Germicides, and Disinfectants.
Claims use since about Feb. 1, 1921.

Ser. No. 144,165. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) TRUST ESTATE OF ADOLPH C. MEYER, DECEASED, Baltimore, Md. Filed Feb. 28, 1921. Under ten-year proviso.

Particular description of goods.—Medicinal Preparations in Liquid Form—Namely, Cough-Syrup, Diarrhea-Curative, Baby-Syrup, Liniment for External Application for the Relief of Various Bodily Ailments, Such as Rheumatism, Neuralgia, Lumbago, Backache, &c., and for Medicinal Preparations in Dry Form—Namely, Pills Having Laxative and Tonic Properties, Headache-Powders, Antidotes and Substitutes for Tobacco—Namely, a Dry Stomach-Bitters, a Laxative Preparation Known as "Meyer's Blood Tea," Condition-Powders for Horses and Cattle, and Condition-Powders for Poultry.
Claims use since 1877.

Ser. No. 144,222. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) HARRY H. CULLINAN, Flats, Nebr. Filed Mar. 2, 1921.

Sunnyside

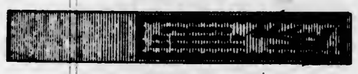
Particular description of goods.—Stock Gestation Compound.
Claims use since Jan. 11, 1921.

Ser. No. 144,240. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) TRUST ESTATE OF ADOLPH C. MEYER, DECEASED, Baltimore, Md. Filed Mar. 2, 1921. Under ten-year proviso.

Particular description of goods.—Medicinal Preparations in Liquid Form—Namely, Cough-Syrup, Diarrhea-Curative, Baby-Syrup, Liniment for External Application for the Relief of Various Bodily Ailments, Such as Rheumatism, Neuralgia, Lumbago, Backache, &c., and for Medicinal Preparations in Dry Form—Namely, Pills Having Laxative and Tonic Properties, Headache-Powders, Antidotes and Substitutes for Tobacco—Namely, a Dry Stomach-Bitters, a Laxative Preparation Known as "Meyer's Blood Tea," Condition-Powders for Horses and Cattle, and Condition-Powders for Poultry.
Claims use since October, 1877.

Ser. No. 144,345. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) TRUST ESTATE OF ADOLPH C. MEYER, DECEASED, Baltimore, Md. Filed Mar. 5, 1921. Under ten-year proviso.

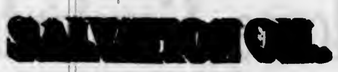
A. C. Meyer & Co



Particular description of goods.—Medicinal Preparations in Liquid Form—Namely, Cough-Syrup, Diarrhea-Curative, Baby-Syrup, Liniment for External Application for the Relief of Various Bodily Ailments, Such as Rheumatism, Neuralgia, Lumbago, Backache, &c., and Medicinal Preparations in Dry Form—Namely, Cough-Drops, Pills Having Laxative and Tonic Properties, Headache-Powders, Antidotes and Substitutes for Tobacco, Including Cubeb Cigarettes, a Laxative Preparation Known as "Meyer's Blood Tea," Condition-Powders for Horses and Cattle, and Condition-Powders for Poultry.
Claims use since September, 1882.

Ser. No. 144,400. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) TRUST ESTATE OF ADOLPH C. MEYER, DECEASED, Baltimore, Md. Filed Mar. 7, 1921. Under ten-year proviso.

John H. Bull.



Particular description of goods.—Medicinal Preparations in Liquid Form—Namely, Cough-Syrup, Diarrhea-Curative, and Baby-Syrup; and Medicinal Preparations in Dry Form—Namely, Pills Having Laxative and Tonic Properties.
Claims use since 1858.

Ser. No. 144,482. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) TRUST ESTATE OF ADOLPH C. MEYER, DECEASED, Baltimore, Md. Filed Mar. 8, 1921. Under ten-year proviso.

The ground color of the label being bright red.
Particular description of goods.—Medicinal Preparations in Liquid Form—Namely, Cough-Syrup, Diarrhea-Curative, Baby-Syrup, Liniment for External Application for the Relief of Various Bodily Ailments, Such as Rheumatism, Neuralgia, Lumbago, Backache, &c., and Medicinal Preparations in Dry Form—Namely, Antidotes and Substitutes for Tobacco.
Claims use since May, 1883.

Ser. No. 144,548. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) TRUST ESTATE OF ADOLPH C. MEYER, DECEASED, Baltimore, Md. Filed Mar. 9, 1921. Under ten-year proviso.

Particular description of goods.—Liniment for External Application for the Relief of Various Bodily Ailments, Such as Rheumatism, Neuralgia, Lumbago, Backache, &c.
Claims use since April, 1883.

Ser. No. 144,583. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) JOHN D. MASON, Chicago, Ill. Filed Mar. 10, 1921.

SALFENOL

Particular description of goods.—An Antiseptic, Germicide, and Medicinal Treatment for Pyorrhea.
Claims use since March, 1916.

Ser. No. 144,715. (CLASS 12. CONSTRUCTION MATERIALS.) THE FIREPROOF PRODUCTS CO., INC., New York, N. Y. Filed Mar. 14, 1921.

The words "Building Products" are disclaimed apart from the mark shown in the drawing.
Particular description of goods.—Roof-Coating Consisting of Oil and Asbestos Fiber and Mastic Roofing-Cement.
Claims use since October, 1920.

Ser. No. 144,845. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) BUTLER & COSGRAVE, San Angelo, Tex. Filed Mar. 17, 1921.

B&C

Particular description of goods.—Laxative Aspirin Tablets for Headaches, Colds, La Grippe, Rheumatism, and Similar Affections.
Claims use since Feb. 21, 1920.

Ser. No. 144,861. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) WM. W. HOAGLAND, D. D. S., San Francisco, Calif. Filed Mar. 17, 1921.

Pyro-Void

Particular description of goods.—Medicinal Preparation to be Used as a Fluid, Semifluid, or Powder Dentifrice for Treatment of Pyorrhea, Tender, Spongy, and Receding Gums.
Claims use since Oct. 3, 1920.

Ser. No. 144,982. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) EVELYN L. PETERSEN, Oakland, Calif. Filed Mar. 19, 1921.

The picture shown in the accompanying drawing is fanciful.

AMES IPECAC

The pictorial representation comprising part of the mark is that of applicant. No claim is made to the use of the word "Ipecac" apart from the mark as shown in the drawing.

Particular description of goods —Tooth-Wash.

Claims use since October, 1916.

Ser. No. 145,998. (CLASS 2. RECEPTACLES.) DRY ICELESS EXPRESS CONTAINER CO. INC., New York, N. Y. Filed Apr. 11, 1921.

Particular description of goods.—Shipping Containers.
Claims use since on or about Apr. 1, 1921.

Ser. No. 146,184. (CLASS 2. RECEPTACLES.) JAMES H. ROOK CO., Chicago, Ill. Filed Apr. 14, 1921.

Bon-Tay

Particular description of goods.—Gift-Boxes.
Claims use since October, 1920.

Ser. No. 146,270. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) MICHAEL RUTKAY, Philadelphia, Pa. Filed Apr. 16, 1921.

HERCULES

Particular description of goods.—Medicine for Asthma.
Claims use since May 1, 1920.

Ser. No. 146,287. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) A. AREND DRUG CO., Chicago, Ill. Filed Apr. 18, 1921.

LAX-WELL

Particular description of goods.—Laxative Tablets.
Claims use since July, 1900.

Ser. No. 146,355. (CLASS 2. RECEPTACLES.) HARRIET HUBBARD AYER, New York, N. Y. Filed Apr. 19, 1921.

200

Particular description of goods.—Vanity-Boxes.
Claims use since June 1, 1916.

Ser. No. 146,357. (CLASS 2. RECEPTACLES.) HARRIET HUBBARD AYER, New York, N. Y. Filed Apr. 19, 1921.

300

Particular description of goods.—Vanity-Boxes.
Claims use since June 1, 1916.

Ser. No. 146,359. (CLASS 2. RECEPTACLES.) HARRIET HUBBARD AYER, New York, N. Y. Filed Apr. 19, 1921.

400

Particular description of goods.—Vanity-Boxes.
Claims use since June 1, 1916.

Ser. No. 146,361. (CLASS 2. RECEPTACLES.) HARRIET HUBBARD AYER, New York, N. Y. Filed Apr 19, 1921.

500

Particular description of goods.—Vanity-Boxes.
Claims use since June 1, 1916.

Ser. No. 146,363. CLASS 2. RECEPTACLES.) HARRIET HUBBARD AYER, New York, N. Y. Filed Apr. 19, 1921.

600

The drawing is lined to indicate shading only.
Particular description of goods.—Vanity-Boxes.
Claims use since June 1, 1916.

Ser. No. 146,461. (CLASS 6. CHEMICALS, MEDICINES, AND PHARMACEUTICAL PREPARATIONS.) NAVAJO LABORATORIES, INC., Casper, Wyo. Filed Apr. 20, 1921.

NAVAJO

Particular description of goods.—Radiator Compound.
Claims use since Nov. 15, 1920.

Ser. No. 146,484. (CLASS 35. BELTING, HOSE, MACHINERY PACKING, AND NON-METALLIC TIRES.) GILLETTE RUBBER CO., Eau Claire, Wis. Filed Apr. 21, 1921.

COMMONWEALTH

Particular description of goods.—Rubber Tire Casings.
Claims use since Oct. 13, 1917.

Ser. No. 146,493. (CLASS 15. OILS AND GREASES.) FREDERICK A. MARSH, New York, N. Y. Filed Apr 21 1921.

CASTORINE

Particular description of goods.—Lubricating-Oils for Motors.
Claims use since Apr. 9, 1921.

Ser. No. 146,513. (CLASS 2. RECEPTACLES.) THE ASHTABULA CORRUGATED BOX CO., Ashtabula, Ohio. Filed Apr. 22, 1921.

Particular description of goods.—Fiber and Paper Shipping-Containers.
Claims use since 1914.

Ser. No. 146,620. (CLASS 2. RECEPTACLES.) HARRIET HUBBARD AYER, New York, N. Y. Filed Apr. 23, 1921.

Particular description of goods.—Vanity-Boxes.
Claims use since Nov. 15, 1919.

Ser. No. 146,622. (CLASS 2. RECEPTACLES.) HARRIET HUBBARD AYER, New York, N. Y. Filed Apr. 23, 1921.

Harriet Hubbard Ayer

Particular description of goods.—Vanity-Boxes.
Claims use since Nov. 15, 1919.

Ser. No. 146,659. (CLASS 12. CONSTRUCTION MATERIALS.) PETOSKEY PORTLAND CEMENT CO., Dover, Del. Filed Apr 23, 1921.

No claim is made to the words "Portland, Petoskey Cement" and "Petoskey, Mich." apart from the mark shown by the drawing.
Particular description of goods.—Portland Cement.
Claims use since Apr. 5, 1921.

Ser. No. 146,758. (CLASS 12. CONSTRUCTION MATERIALS.) THE EVANS BUILDERS COMPANY, Uhrichsville, Ohio; Washington, D. C., and Cincinnati, Ohio. Filed Apr. 26, 1921.

TEBCO
THE
EVANS

Registered November 3, 1891. Renewed November 3, 1921.

DECISIONS

OF THE

COMMISSIONER OF PATENTS

AND OF

UNITED STATES COURTS IN PATENT CASES.

DECISIONS OF THE U. S. COURTS.

U. S. Circuit Court of Appeals—Second Circuit.

KNAPP *v.* WILL & BAUMER CO.

Decided March 9, 1921.

[273 Fed. Rep., 380.]

1. PATENTS—PATENTABLE DESIGN MUST DISCLOSE NOVELTY AND INVENTION.

Though the design patent law was intended to encourage the decorative arts, and deals with the appearance of the thing designed rather than with its structure, uses, or functions, in a design patent, as in a mechanical patent, the subject-matter must be novel and must have called for an exercise of invention.

2. SAME—SQUARE INSTEAD OF ROUND SHAPE FOR CANDLE DOES NOT DISCLOSE NOVELTY OF DESIGN.

The right to make any article round or square or in any other standard form or shape is inherently open to all, and novelty cannot be predicated of a design for a square candle instead of the ordinary round one.

3. SAME—INVENTION IN DESIGN REQUIRES AS MUCH ORIGINALITY AS IN UTILITY PATENTS.

Design patents stand on as high a plane as utility patents and require as high a degree of exercise of the inventive or original faculty, and making a candle square instead of round does not involve the exercise of such faculty.

4. SAME—BURDEN IS ON PERSON ATTACKING PATENT TO SHOW CONCLUSIONS OF PATENT OFFICE WERE WRONG.

The grant of the patent by the Patent Office makes a *prima facie* case for the successful applicant, and one who attacks the patent has the burden of showing that the Patent Office reached a wrong conclusion concerning it.

5. SAME—NO. 44,480 FOR DESIGN FOR CANDLES, HELD INVALID FOR WANT OF DESIGN.

The Knapp patent, No. 44,480, for a design for a candle, which consisted in taking the ordinary coach-candle, making it square and giving it a fluted tapering base, both of which were known to the art before, does not show invention because of the bell-shaped top, which was similar to the top of the coach-candle.

6. SAME—NEW COMBINATION OF OLD ELEMENTS PATENTABLE DESIGN ONLY IF IT DISCLOSES INVENTION.

Though design invention may reside in the new combination of old elements, a new combination of such elements is only patentable if it is beyond the capacity of the ordinary routine designer.

APPEAL from the District Court of the United States for the Northern District of New York.

Suit by Edward J. Knapp against the Will & Baumer Company for infringement of a design patent. From an interlocutory decree for complainant (253 Fed., 191) defendant appeals. Reversed, and bill dismissed.

Mr. Howard P. Denison and *Mr. Eugene A. Thompson* for appellant.

Mr. Wordsworth B. Matterson, *Mr. Frank T. Miller*, and *Mr. William G. Henderson* for appellee.

Before WARD, ROGERS, and MANTON, Circuit Judges.

ROGERS, *Cir. J.:*

This is a suit in equity arising under the patent laws of the United States. The plaintiff is the owner of Letters Patent No. 44,480, issued to him by the United States Patent Office on August 13, 1913, and is a design patent for an improvement in candles.

The patent has never been assigned, and the plaintiff is now and always has been the sole owner of the patent. He has caused large numbers of candles embodying the patented design to be made and sold under his license by the Edward J. Knapp Candle Company, a corporation existing under the laws of the State of New York, with its principal place of business at Syracuse in said State. The plaintiff is a large stockholder in the company, as well as its president and manager, and alleges that he derives large profits from the manufacture and sale of the patented candles. The license is personal, and not assignable, and not in writing.

In his application for the patent the plaintiff states that the following is a specification, reference being had to the accompanying drawing, forming a part thereof:

The figure is a perspective view of a candle, showing my new design. The design as illustrated in the drawing is a pillar or column substantially square in cross-section, mounted upon a substantially cylindrical longitudinally fluted pedestal and surmounted by a bell-shaped cap, with its base lines set back from the square edges of the pillar top.

I claim: The ornamental design for a candle, as shown and described.

The following is a facsimile of the drawing filed with the application:

The court below entered a decree holding that the patent was valid and infringed by the defendant. (253 Fed., 191.) The case was heard again in that

court on new and additional evidence, for the introduction of which the prior decree was opened. But at the second hearing the court adhered to the former decision. "I regard this," said the district judge, "as a close case, but on consideration of the evidence heretofore taken and the new and additional evidence I am constrained to adhere to the decision made."

The application for this patent was filed February 3, 1911, and on March 11, 1911, was rejected, by the Examiner in the Patent Office, on the state of the art cited. The Examiner declared: "There is held to be nothing patentably novel set up in this application." On April 19, 1911, it was again rejected by the Examiner on the ground of want of any patentable novelty. On October 10, 1911, another application was filed; the original having been amended. On November 23, 1911, the applicant was informed that the application was again rejected, and was informed that—

It must be again held that applicant's design fails to present anything patentably novel from an ornamental standpoint over the reference of record. * * * The claim is accordingly again and finally rejected on the state of the art cited.

The case was then appealed to the Board of Examiners-in-Chief. On July 10, 1913, the Board sustained the application and reversed the Examiner. They said:

There appears to us to be a certain unity in design between a rectangular form of a candle and that of the tip, which possesses some degree of novelty and invention, which is sufficient to support a design patent, and we therefore reverse the decision of the Examiner.

On August 12, 1913, the patent was accordingly issued.

(1) The design law was intended to encourage the decorative arts. It therefore deals with the appearance of the thing designed, rather than with its structure, uses, or functions. But in a design patent, as in a mechanical patent, the subject-matter must be novel, and must have called for an exercise of the inventive faculties. If either of these essentials is absent, the patent cannot be sustained.

(2, 3) In order that there may be novelty, the thing must not have been known to any one before. Mere novelty of form is insufficient. (*O'Reilly* v. *Morse*, 15 How., 62; 14 L. Ed., 601.) The patent in suit is a square candle. But any one had as much right to make a candle square as to make it round. There are some standard forms and shapes that are known to every one and inherently open to any one to use. The right to make any article round or square is open to all. Novelty cannot be predicated of either. But it is equally plain that to make candles square, instead of round, does not involve any exercise of the inventive faculties, and invention is required as much in design patents as in other kinds of patents. It has been held that design patents stand on as high a plane as utility patents and require as high a degree of exercise of the inventive or original faculty. (*Perry* v. *Hoskins*, (C. C.,) 111 Fed., 1002; *Myers* v. *Sternheim*, 97 Fed., 625; 38 C. C. A., 345; *Western Electric Mfg. Co.* v. *Odell*, (D. C.,) 18 Fed., 321.)

But the patent appears to have been granted upon the theory that there is "some degree of novelty and invention" in the combination of the bell-shaped tip with the square form of the candle; that is, in the setting back of the base of the bell-shaped cap from the square edges of the square column having flat sides. That was certainly the theory upon which the validity of the patent was sustained in the court below and the theory upon which the patent was granted in the Patent Office. In the court below the district judge said:

While, in view of the prior art, it may be doubted whether there is patentable invention in this combination containing this feature, I am inclined to hold the patent valid as the presumption is in its favor.

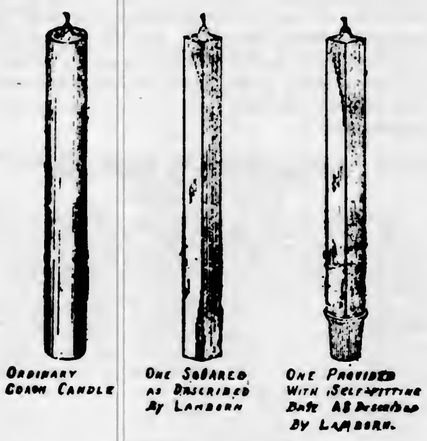
(4) The grant of the patent by the Patent Office makes out a *prima facie* case for the successful applicant, and one who attacks it has the burden of showing that the Patent Office reached a wrong conclusion concerning it. And in our opinion in this case the burden of proof has been sustained by the defendant.

(5) It must be conceded that, if there is any possibility of inventive genius being present in this design patent, it can only be found in the peculiar form of the tip. What Knapp has done was to place a small coach-candle tip in the center of a square column. To do this did not show patentable novelty or involve inventive genius. The patent in suit was, as we have seen, granted in August, 1913. But in 1906 there was published *Lamborn's American Soaps, Candles and Glycerine*. That work, on page 526, contains the following statement:

Candles are molded in a great variety of shapes; the most common shape being that of a plain cylinder of varying diameter and length. A great variety of ornamental forms for religious and decorative purposes are molded in numerous prismatic cross-sections, as squares, triangular, octagonal, etc. They may also be molded longitudinally or spirally fluted.

And on page 530 there is the following statement:

Candles may be made with tapering butts, to enable them to fit any holder either by use of the tapering machine shown in Fig. 201, or by the use of additional molds inserted in the fluted or regular candle mold. A type of candle of this description is shown in Fig. 197. The first self-fitting end candle is attributed to Field, who in 1861 patented his device for giving candles a conical end or butt by molding.



Knapp's own testimony admits that the base of his candle was not new. This is his admission:

Q. Was it also ancient to make candles with this particular kind of a base on them? A. That was made a good many years ago, I believe; back 20 years, that I know of.

The following is an illuminating excerpt from his testimony:

Q. Now take plaintiff's Exhibit 4 and tell us of record, Show his honor exactly how you made that particular candle. In the first place, you started with what sort of a candle? A. A round candle.
Q. Probably such as his honor referred to yesterday? A. I should imagine it was. After the round candle was casted, it was drawn through a hot die, and that die was square; the result is, it made that candle.
Q. It transformed that from a round candle into a square candle? A. Into a square candle.
Q. Where did you learn that sort of thing? A. The die for drawing candles?
Q. Yes. A. Oh, about 25 years ago.
Q. When you were with the Will & Baumer people, or associated with them? A. Yes.
Q. That was a common practice, was it not? A. Oh, yes, that was sort of an ancient practice, I guess. The idea is to smooth the candle.
Q. To form the candle? A. To form the candle.
Q. And were those dies always round, through which the candle was drawn? A. Some of the dies are round.
Q. What other shapes were there? A. We only had round and square dies at my plant. And we have had a die that was corrugated.
Q. Now, we have got the shank of the candle formed. Now, please form the lower end of it, which we term the base. How do you do that? A. The candle is put into warm water, the lower end of it; when the candle gets pliable, it is placed into a die, and it forms that corrugated base.
Q. And where and when did you first learn about that operation, of taking the ends of a candle—warming the end and forming it? A. At the Mosbroder plant, 25 years ago, when I went there.
Q. Was that connected in any way with Will & Baumer? A. It was not. They were not organized in those days.
Q. But later, before you manufactured your square candles, the Will & Baumer Company to your knowledge did form the end of the candles in that same way, did they not? A. Oh, yes.
Q. And that end is the same as formed on the round candles. A. Certainly.
Q. Previous to that time you made round candles with that particular end, did you not? A. Yes.
Q. And that has been an old practice for many years? A. Yes.
Q. What is the purpose of it? In candle language, it is called self-fitting. A. That is the usual term.
Q. And it is usually at its upper part larger diameter than at the other end? A. Certainly.
Q. Sometimes candles are made with that end, and sometimes without? A. Yes.
Q. And to your knowledge thousands have been made that way many years before your application was filed? A. Certainly.
Q. Now, take the other end, Mr. Knapp; when was the upper end on that candle formed? A. The bell shape?
Q. The bell-shaped end; the upper end. A. That round shape was a very old pattern; I should imagine it was.
Q. When did you first see candles with a small bell-shaped end on a larger upper portion of the candle? A. Oh, well, I guess ever since I have been in the candle business. It is originally what they called a coach candle.
Q. That is the candle term a coach candle? A. Yes.

Knapp's own testimony as to the designing of his patented candle convinces us that the square candle of his patent involved no inventive thought or practice. He followed precisely the teachings of the art as set forth by Lamborn. What he did was to take a coach-candle of ordinary type as shown by Lamborn and draw it through a square mold, a thoroughly familiar process, and then equip it with a self-fitting base as directed by Lamborn. The effect of these several steps is disclosed in the following cuts:

What Knapp did involved no inventive act. He took an ordinary coach-candle, with its bell-shaped tip, and simply changed the column from a round one into a square one, leaving the bell-shaped tip the same as before. In converting a round column into a square one, he followed precisely the teachings of the art as previously set forth by Lamborn. He did what any ordinary workman would have done—drew a round candle through a square mold in accordance with a common practice. Then he provided it with a self-fitting base in accordance with the teachings of the art since 1861.

(6) It is true that invention may reside in a new combination of old elements. Every new combination of old elements, however, is not patentable. But as this court said in *Steffens* v. *Steiner*, (232 Fed., 862; 147 C. C. A., 56:)

The question in the case at bar is not whether a design patent can be sustained, although each separate element in the design may be old, but it is whether what has been done in assembling the old elements in the new designs rose in these particular cases to the level of invention.

And in *Strause Gas Iron Co.* v. *William M. Crane Co.* (235 Fed., 126; 148 C. C. A., 620) this court again said:

The test for invention is to be considered the same for designs as for mechanical patents; *i. e.*, was the new combination within the range of the ordinary routine designer?

In both of those cases this court held design patents void for want of invention. In what was held in those cases we were simply applying the doctrine which was announced in *Smith* v. *Whitman Saddle Co.* (148 U. S., 675; 13 Sup. Ct., 768; 37 L. Ed., 606,) in which case the Court approved the following statement:

To entitle a party to the benefit of the act, in either case, there must be originality, and the exercise of the inventive faculty. In the one, there must be novelty and utility; in the other, originality and beauty. Mere mechanical skill is insufficient. There must be something akin to genius—an effort of the brain as well as the hand. The adaption of old devices or forms to new purposes, however convenient, useful, or beautiful they may be in their new rôle, is not invention.

We are quite at a loss to find in the patent in suit anything "akin to genius" in what the patentee did. We find nothing beyond the ability of the ordinary routine candle-maker. What was done did not rise to the level of invention.

As the patent in suit is not valid, it is not necessary to inquire whether it has been infringed.

The decree must be reversed, and the bill dismissed. It is so ordered.

U. S. Circuit Court of Appeals—Third Circuit.

BANKERS' SERVICE CORPORATION *v.* LANDIS CHRISTMAS SAVINGS CLUB CO.

Decided May 9, 1921.

[273 Fed. Rep., 722.]

PATENTS—No. 1,202,646, FOR COUPON BANK DEPOSIT BOOK—VOID FOR LACK OF INVENTION.

The Barkley patent, No. 1,202,646, for an improved coupon bank deposit book, is for an improvement which would naturally follow the use of the devices preceding it by experienced persons and discloses no patentable invention.

APPEAL from the District Court of the United States for the Middle District of Pennsylvania; Charles B. Witmer, judge.

Suit in equity by the Bankers' Service Corporation against the Landis Christmas Savings Club

Company. Decree for defendant, (273 Fed., 717,) and complainant appeals. Affirmed.

Mr. John P. Bartlett and *Mr. Henry B. Brownell* for the appellant.

Mr. James A. Watson (*Mr. E. E. Beidleman* and *Mr. J. W. Swartz* of counsel) for the appellee.

Before BUFFINGTON, WOOLLEY, and DAVIS, Circuit Judges.

BUFFINGTON, *Cir. J.:*

In the court below the plaintiff, the owner of Patent No. 1,202,646, issued October 24, 1916, to Merrill B. Barkley, for a coupon bank deposit book, brought a suit against defendant, charging infringement thereof. On final hearing, the court held Barkley's patent invalid and entered a decree dismissing the plaintiff's bill, supporting its view by referring to *Hollister* v. *Benedict Manufacturing Co.*, 113 U. S., 59; 5 Sup. Ct., 724, (28 L. Ed., 901,) where, of an alleged invention of a revenue stamp, Mr. Justice Matthews said:

> It is but the display of the expected skill of the calling, and involves only the exercise of the ordinary faculties of reasoning upon the materials supplied by a special knowledge, and the facility of manipulation which results from its habitual and intelligent practice, and is in no sense the creative work of that inventive faculty which it is the purpose of the Constitution and the patent laws to encourage and reward.

Thereupon this appeal was taken.

Our study of the case satisfied us the court below committed no error, and its decree should be affirmed. Its opinion so adequately discusses the case that we restrict ourselves to a brief reference to some of the things which lead us to the same conclusion.

The patent concerns stationery adapted for use in banks receiving Christmas club deposits. The idea of the Christmas club was not original with the patentee; on the contrary, there were large numbers of such clubs, and stationery suitable for receiving and handling deposits, and evidencing both to the bank and to the depositor the fact and the amount of such deposits, were in common use when Barkley entered the field. The patentee, who was in the bank stationery supply business, with the aid of a cashier of a bank which was using the Landis Christmas club system, set about to observe and improve that system, presumably with a view to his company, the present plaintiff, entering into the business of supplying stationery for Christmas clubs. The result of this observation was that Barkley soon saw certain places where the Landis system could be improved, and which, in a general way, may be described as a reversing of that system.

The Landis system consisted in the bank holding a coupon sheet in its hands and delivering to the depositor a coupon detached from such sheet as credit evidence of his deposit, while the coupon detached from the sheet afforded debit evidence to its bookkeepers of the bank's receipt of the deposit. In Barkley's device, the entire outfit was placed in the hands of the depositor in the shape of a compact book of sheets, one-half of which sheet was a stub, the other a detachable coupon, showing the amount of the deposit. When the club member deposited his stipulated amount in the bank on the fixed pay day, he delivered the detached coupon with his money to the bank; the coupon was stuck on a hook and gave the bank's bookkeeper the data from which the deposit could be entered at convenience. A single impression of a stamp of the bank, part of which impression went on the stub and part on the coupon to be detached and deposited, authenticated to the bank its receipt of the deposit and to the customer the bank's admission of his making the deposit.

That the Barkley reverse device could be more easily and conveniently handled than the Landis may be conceded; but, like the court below, we are of opinion it did not involve invention. On the contrary, it was the to-be-expected result which would naturally follow the study of men familiar with the banking and stationery business, when they set themselves to study and improve the Christmas club system, as all bank employees would do. When such a new system was used by the thousands of keen minds, when better detail and further efficiency of such system would be the customary result of the experience that came from use, we would expect improvements, and the ideas such as Barkley worked out are, in our judgment, the steps that would naturally follow use. To take the cleverness of an improver and award the monopoly of an invention thereto would, to our minds, make of the patent law a hindrance, not a help, in the evolution of progress.

Adverse Decision in Interference.

PATENT No. 1,373,931.

On August 26, 1921, a decision was rendered that Ernst F. W. Alexanderson was not the first inventor of the subject-matter covered by claim 3 of his Patent No. 1,373,931, subject, "Radio-receiving system," and no appeal having been taken within the time allowed such decision has become final.

Patents Nos. 1,391,658 to 1,392,287.

THE OFFICIAL GAZETTE OF THE United States Patent Office.

Vol. 290—No. 4. TUESDAY, SEPTEMBER 27, 1921. Price—$5 per year.

[PUBLISHED OCTOBER 6, 1921.]

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscriptions, $5.00 per annum; single numbers, 10 cents each.

Printed copies of patents are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.

Nolan Act—Reciprocity of the Laws of Czechoslovakia Recognized.

(ORDER No. 2,695.)

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., September 21, 1921.

Notice is hereby given that the laws of Czechoslovakia are recognized as affording to citizens of the United States privileges substantially reciprocal to the privileges accorded by the Nolan Act of March 3, 1921, (41 Stat. L., 1313,) and that consequently the privileges specified in said act will be extended to citizens of Czechoslovakia.

Interference Notices.

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., September 20, 1921.

The American Perfumer Company, their assigns or legal representatives, take notice:

An interference having been declared by this Office between the applications of Hersey P. Barnes, of 156 Jamestown street, Manayunk, Philadelphia, Pa., for registration of a trade-mark and trade-mark registered May 1, 1906, No. 51,958, to The American Perfumer Company, of 15 Taylor street, Springfield, Mass., and a notice of such declaration sent by registered mail to The American Perfumer Company at the said address having been returned by the post-office undeliverable, notice is hereby given that unless The American Perfumer Company, their assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the interference will be proceeded with as in case of default.

This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

THOMAS E. ROBERTSON,
Commissioner.

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., September 27, 1921.

The All in One Tractor Company, its assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of Stroud Motor Manufacturing Ass'n., Ltd., of 117 East Houston street, San Antonio, Tex., for registration of a trade-mark and trade-mark registered April 22, 1913, No. 91,271, to The All in One Tractor Company, Waterloo, Iowa, and a notice of such interference sent by registered mail to The All in One Tractor Company at the said address having been returned by the post-office undeliverable, notice is hereby given that unless The All in One Tractor Company, its assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the interference will be proceeded with as in case of default.

This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

THOMAS E. ROBERTSON,
Commissioner.

DEPARTMENT OF THE INTERIOR,
UNITED STATES PATENT OFFICE,
Washington, D. C., September 27, 1921.

H. J. Nice Company, its assigns or legal representatives, take notice:

An interference having been declared by this Office between the application of Percy Pierce, 445 North Fifth street, Philadelphia, Pa., for registration of a trade-mark and trade-mark registered December 28, 1909, No. 76,231, to H. J. Nice Company, 15 Northeast Fifth street, Minneapolis, Minn., and a notice of such interference sent by registered mail to said H. J. Nice Company at the said address having been returned by the post-office undeliverable, notice is hereby given that unless said H. J. Nice Company, its assigns or legal representatives, shall enter an appearance therein within thirty days from the first publication of this order the interference will be proceeded with as in case of default.

This notice will be published in the OFFICIAL GAZETTE for three consecutive weeks.

THOMAS E. ROBERTSON,
Commissioner.

Communications to the Patent Office.

Rule 8. A separate letter should in every case be written in relation to each distinct subject of inquiry or application. Assignments for record, final fees, and orders for copies or abstracts must be sent to the Office in separate letters.

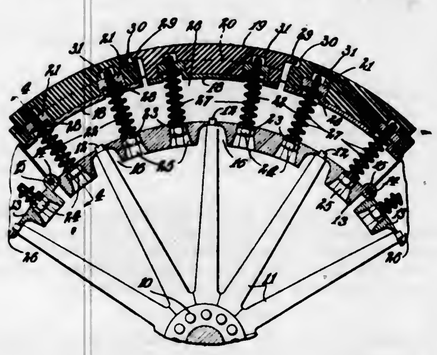
PATENTS

GRANTED SEPTEMBER 27, 1921.



1,391,658. RAIL-CHAIR. DAVIS AMBROSE, Louisville, Ky. Filed Mar. 8, 1921. Serial No. 450,561. 2 Claims. (Cl. 238—191.)

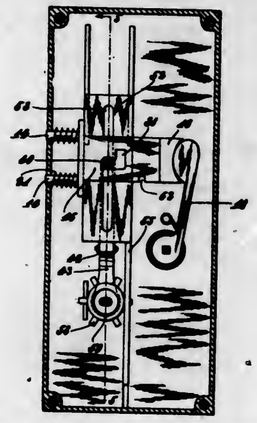
1. A rail chair, comprising two companion sections each including a base, upstanding flanges at the upper edges thereof providing side plates and inwardly directed flanges on the upper edges of the said side plates, removable means connecting the bases of the chair sections for holding the chair in rail receiving position, a wedge member having a rounded lower face between the base of the rails and the base of the chair sections, and spring influenced means between the wedge and the connecting means for the chair sections for securing the wedge on the chair and in frictional engagement with the base of the rails.

1,391,659. [WITHDRAWN.]

1,391,660. RESILIENT WHEEL. JOSEPH ARDO, New hall, W. Va. Filed Sept. 17, 1920. Serial No. 410,974. 5 Claims. (Cl. 152—8.)

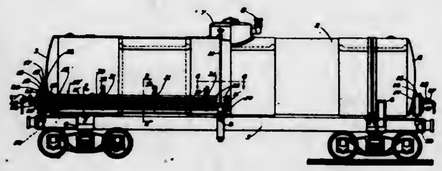
2. In a vehicle wheel, a felly, a series of metallic rim sections resiliently mounted on said felly and having their adjacent ends spaced a short distance apart circumferentially of the wheel, separate resilient tread sections fixed on said rim sections, certain ones of said tread sections having their surface portions extended to overlap the ends of adjacent tread sections, the main bodies of said tread sections being spaced circumferentially from one another in correspondence to the spacing of said rim sections.

1,391,661. BOLT FOR LOADED GRAIN-CARS. CHARLIE R. ARMSTRONG, Hawarden, Iowa. Filed July 27, 1920. Serial No. 399,299. 1 Claim. (Cl. 85—3.)



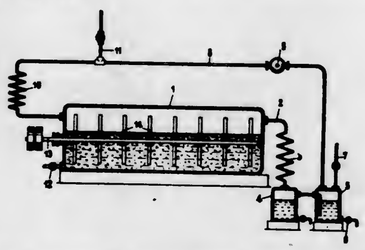
A bolt having its shank provided with a longitudinal slot and a cross head pivotally mounted in said slot and having a pivot pin engaging a slot disposed in intersecting communicating relation with the first-named slot to permit longitudinal movement of the cross head when in a position transverse to the length of the shank, the shank being formed with a shallow longitudinal peripheral groove extending from the said slot to the end remote from the cross head, the latter being also formed with a similar groove extending through one end edge and one side edge, and a flexible leader disposed in said shallow groove in the shank and anchored in the cross head at one extremity of the groove formed in the end edge thereof, the said leader lying in both grooves in the cross head when the latter is in a position in alinement with the shank.

1,391,662. COMBINATION-LOCK. ANDRO AUGUSTIN, East Derby, Conn. Filed Oct. 4, 1917. Serial No. 194,680. 1 Claim. (Cl. 70—18.)



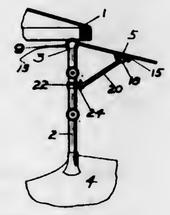
In a lock, the combination with a casing and a keeper therefor, of a lock bar carrying bolt engageable with said keeper, said lock bar being slidable transversely in said casing, a plate slidable longitudinally of said casing en-

gageable with said lock bar, said lock bar having a recess, a sliding plate having a part engageable within said re-



cess, and means for operating said sliding plate, whereby said lock bar may be held in an outward position.

1,391,663. TANK-CAR. HERMAN P. ANDRESEN, Chicago, Ill. Filed Apr. 29, 1920. Serial No. 377,656. 14 Claims. (Cl. 257—238.)

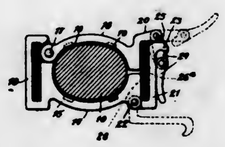


3. In a device of the class described, a steam inlet, a steam outlet, a plurality of heating elements, all free to expand and contract longitudinally and individually, and all of said heating elements having communication with said inlet and outlet, and each of said heating elements being pointed at one end.

1,391,664. PROCESS OF HYDROGENATING CARBON COMPOUNDS UNDER HIGH PRESSURE AND ELEVATED TEMPERATURE. FRIEDRICH BERGIUS, Essen-Ruhr, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc., a Corporation of Delaware. Filed Apr. 18, 1916. Serial No. 92,065. 9 Claims. (Cl. 196—27.)

1. In a process of hydrogenating carbon compounds under high pressure and at elevated temperature bringing together suitable carbon compounds with a hydrogen containing atmosphere under suitable reaction pressure and temperature within a high pressure vessel partly filled with the material to be treated, circulating the gaseous contents of the space above the material under treatment, the quantity of circulated gas being in excess of the consumed reaction gas and subjecting the circulated gas within the circulating conduit to heat exchange so as to control the temperature conditions within the reaction vessel.

1,391,665. AUXILIARY PROTECTOR. FRED W. BILLINGS, Millwood, Wash. Filed Mar. 19, 1921. Serial No. 453,570. 2 Claims. (Cl. 296—95.)

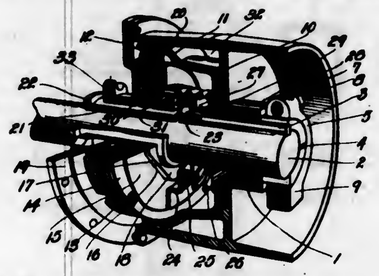


1. The combination with a support, of a pair of frictionally engaged, open, bearing collars, of an adjustable panel, bearing sleeves attached to the panel and pivotally supported on said collars, and means for holding the panel in adjusted position.

1,391,666. CATALYST AND METHOD OF MAKING SAME. CARL BOSCH, OTTO SCHMIDT, and ALWIN MITTASCH, Ludwigshafen-on-the-Rhine, Germany, assignors, by mesne assignments, to The Chemical Foundation, Inc., a Corporation of Delaware. Filed June 4, 1914. Serial No. 842,956. 6 Claims. (Cl. 23—28.)

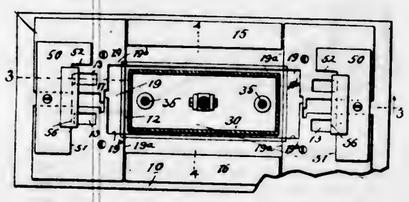
3. A method of preparing a catalyst which comprises drying an intimate water-containing mixture of an organic nickel compound and a soluble compound of silicon, then reducing the dried mixture by hydrogen to thereby produce a catalyst composed of finely divided nickel intimately associated with dry precipitated non-colloidal silica.

1,391,667. ANTISKIDDING DEVICE FOR VEHICLE-WHEELS. EDWARD N. BREITUNG, New York, N. Y. Filed June 3, 1921. Serial No. 474,594. 5 Claims. (Cl. 152—14.)



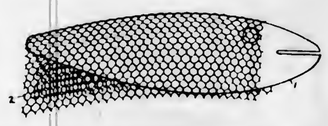
1. A device of the class described comprising hinged arms adapted to embrace a vehicle spoke, means for holding said arms in closed position, an eye carried by said arms and coöperating with the aforementioned locking means for securing a flexible element thereto.

1,391,668. CLUTCH. EVERETT B. CUSHMAN, Topeka, Kans., assignor to The Piersen Manufacturing Company, Topeka, Kans., a Corporation of Kansas. Filed Sept. 20, 1920. Serial No. 411,418. 4 Claims. (Cl. 192—69.)



1. In combination, a shaft, a sleeve rigidly mounted on said shaft, a cup-shaped member integral with the sleeve,

a pulley mounted on the sleeve and having an internal tubular member projecting from one end, interleaving laminations carried by the tubular member and the cup-shaped member respectively, an actuator for normally

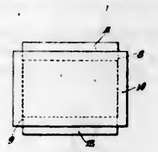


holding the laminations in frictional contact, an expansion spring interposed between the actuator and one end of the cup-shaped member, and a longitudinally movable releaser for shifting the actuator longitudinally to relieve the frictional contact between the laminations.

1,391,669. BOX-MAKING MACHINE. HAROLD A. DENMIRE, Akron, Ohio, assignor to The General Tire & Rubber Company, Akron, Ohio, a Corporation of Ohio. Filed Apr. 9, 1920. Serial No. 372,624. 8 Claims. (Cl. 93—51.)

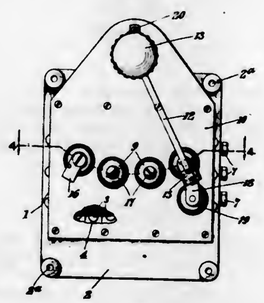
1. In a box making machine, the combination of a bed plate having a rectangular hole therethrough, and four immovable blank supporting flap bending blocks secured upon said bed plate adjacent the four corners of said rectangular hole and in position such that they will engage with and support only the inside end flaps of the described box blank when said blank is in position to be operated upon by the machine, and a vertically reciprocating plunger for forcing the box blanks down into said hole and thereby causing the flaps to be bent into positions substantially as herein described.

1,391,670. PROCESS OF FISH-BAIT MANUFACTURE. HENRY S. DILLS, Garrett, Ind., assignor of one-half to James Heddon's Sons, Incorporated, Dowagiac, Mich., a Corporation of Michigan. Filed Jan. 25, 1918. Serial No. 213,628. 7 Claims. (Cl. 41—29.)



6. The method of representing fish scales on a body which comprises applying flexible thread closely to the body in such a manner that the thread will form the outline for the individual scales, then applying a distinctive coat of selected coloring material to the body over the thread, and then removing the thread.

1,391,671. THERMIONIC VALVE FOR USE IN WIRELESS TELEGRAPHY AND TELEPHONY. HORACE ST. JOHN DE AULA DONISTHORPE, London, England. Filed Mar. 23, 1921. Serial No. 454,925. 8 Claims. (Cl. 250—27.)



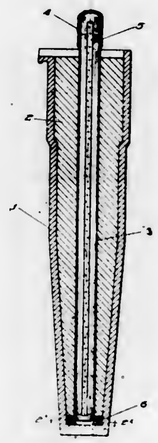
1. In a thermionic valve for use in wireless telegraphy and telephony, the combination of a hollow hemispherical plate electrode with a grid electrode formed as a hollow hemisphere adapted to damp out mechanical vibration and microphonic disturbances and a filament adjacent to said grid, substantially as described.

1,391,672. ELECTRICAL CONDENSER. WILLIAM DUBILIER, New York, N. Y. Filed Aug. 1, 1918. Serial No. 247,740. 5 Claims. (Cl. 250—41.)

4. A high tension stacked condenser comprising a plurality of flat conducting plates, each having an edge portion of substantially greater length than adjacent edge portions, and insulating sheets disposed between the same, the said conducting plates and insulating sheets being so alternately stacked as to project the edge portions of greater length of said plates laterally beyond said insulating sheets whereby exposed terminal portions of said plates are presented providing the shortest mean heat conduction path to the exterior of the condenser.

1,391,673. ANTENNA-SHORTENING DEVICE. WILLIAM DUBILIER, New York, N. Y., assignor, by mesne assignments, to Dubilier Condenser Co., Inc., a Corporation of New York. Filed Mar. 7, 1919, Serial No. 281,181. Renewed Mar. 5, 1921. Serial No. 449,745. 7 Claims. (Cl. 250—41.)

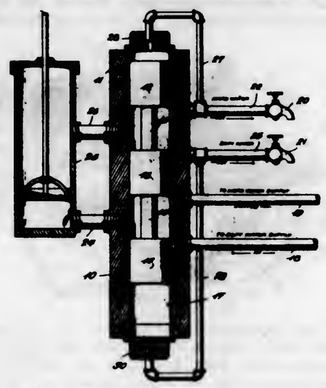
1. An antenna shortening device comprising a casing, a condenser within said casing having a plurality of con-



denser sections connected in series, terminal posts carried by said casing, connections leading respectively from different sections of said condenser to said terminal posts, a switch arm movable with regard to said posts, and means whereby said arm may engage only one of said posts with a given setting of the condenser.

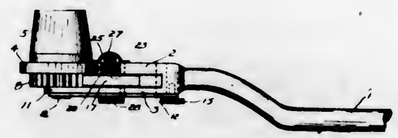
1,391,674. SPECTACLE-HOLDER. VINCENT E. DUNCANSON, Lynchburg, Ohio. Filed July 3, 1919. Serial No. 308,378. 6 Claims. (Cl. 206—5.)

3. As a new and improved article of manufacture, a spectacle-holder composed of a single piece of sheet material of general oblong shape, with its longitudinal opposite edge parts bent upwardly and inwardly and extended part of the way across the holder toward each other, leaving a space between the edges throughout their lengths, and a clip cut out from said sheet and extending from said holder on the side opposite to that toward which said edge parts are bent upward.



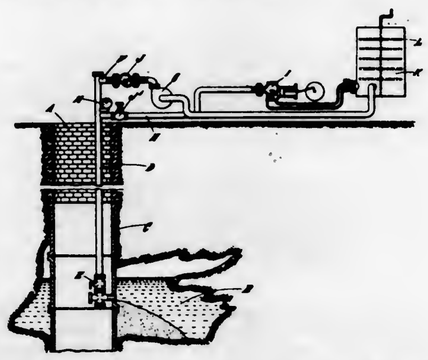
1,391,675. ART OF PRODUCING HOLLOW CASTINGS. ALBERT H. EMERY, Stamford, Conn. Filed May 12, 1920. Serial No. 380,743. 4 Claims. (Cl. 22—212.)

1. The manufacture of hollow castings having initial strains of compression at and near the bore by filling a mold partly full of molten metal and after pouring the metal introducing a hollow core provided with means for cooling the core and thereby cooling the casting principally from its interior.



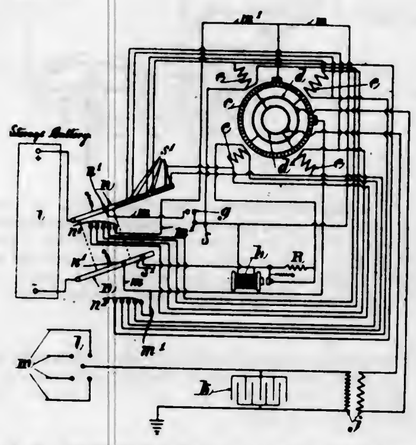
1,391,676. LIQUID-SUPPLY SYSTEM. COURT H. FINLEY, Williamsburg, Iowa. Filed Mar. 7, 1921. Serial No. 450,319. 5 Claims. (Cl. 103—79.)

1. A liquid supply system comprising, in combination, a pump having an intake and a discharge port, independent conduits adapted to be connected to supplies of different kinds of liquids, a separate discharge faucet for each kind of liquid, and means to automatically place the discharge port of the pump into communication with an open faucet



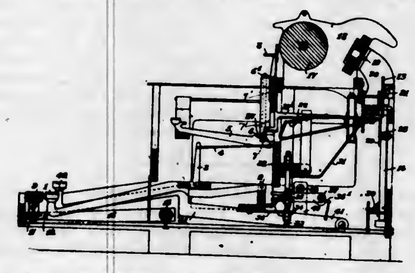
and the intake port of the pump into communication with the corresponding supply conduit when the pump is operated with a faucet open.

1,391,677. SOCKET-WRENCH. FRED FOSS, Spokane, Wash. Filed Mar. 31, 1921. Serial No. 457,430. 3 Claims. (Cl. 81—62.)



1. The combination with a shank and its forked head, of a ratchet head in said forked head and a driving device for the ratchet head, said ratchet head having a boss provided with an annular groove, and a slotted slide plate on one of the forks of said head engaging said grooved boss to prevent displacement of the ratchet head.

1,391,678. FILLING SPACES OR CAVITIES WHICH ARE DIFFICULT OF ACCESS WITH CONCRETE, CEMENT, OR THE LIKE. ALBERT FRANÇOIS, Doncaster, England. Filed May 20, 1918. Serial No. 235,554. 9 Claims. (Cl. 61—41.)

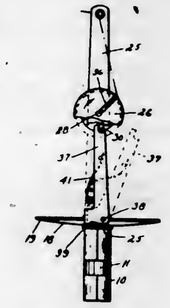


1. A method of consolidating and shutting off water from subterranean water bearing spaces which consists in establishing access to the space to be filled by means of small diameter boreholes, providing pipes and valves located in said boreholes which are capable of withstanding the pressures generated during the filling operation, connecting said pipes by means of a conduit to a system comprising a low pressure pump and a high pressure pump, providing means for cutting into or out of the system either of said pumps, forcing a filling material into said space by means of said low pressure pump, and subsequently forcing into said space under a higher pressure by means of said high pressure pump a filling material different from the kind first employed.

1,391,679. ELECTRIC GENERATOR FOR MOTOR-VEHICLES. JOSEPH GAMBS, Lyon, France. Filed July 27, 1918. Serial No. 247,072. 2 Claims. (Cl. 290—35.)

1. In apparatus for the purpose set forth the combination of an accumulator battery, a shaft, a commutator on said shaft, an armature on said shaft having a single winding, a plurality of field coils coacting with said armature, means including electric conductors and a manually controlled two-way switch for connecting said field coils and said armature to said battery in two alternative circuits, in one of which said coils are in series with each other and in parallel with the armature, and in the other of which said coils are in parallel with each other and in parallel with said armature, an automatic switch for opening the circuit wherein said coils are in series with each other, and a centrifugal governor on said shaft, whereby said automatic switch is closed when said shaft attains a predetermined speed.

1,391,680. TYPEWRITING-MACHINE. RICHARD FREDERICK GORDON, Liverpool, England. Filed Dec. 27, 1917. Serial No. 209,095. 2 Claims. (Cl. 197—97.)

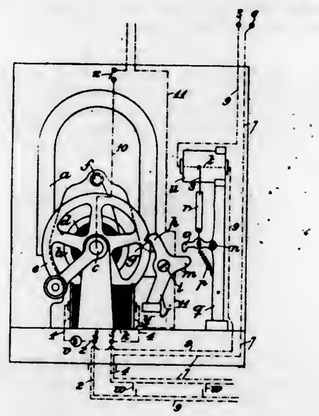


1. In a typewriter, the combination of a vertically disposed oscillatable post adapted to operate an escapement, a substantially horizontally disposed tappet on said post, type levers, a vertically shiftable universal bar adapted to be shifted horizontally by said levers and having an integral projection depending parallel about said post and arranged to be in position to operate said tappet when said bar is shifted horizontally irrespective of the vertical position of said bar.

1,391,681. RECEIVING DEVICE FOR SUBAQUEOUS SOUND-SIGNALS. WALTER HAHNEMANN, Kitzeberg, near Kiel, and HEINRICH HECHT, Kiel, Germany. Filed July 10, 1914, Serial No. 850,185. Renewed Jan. 9, 1918. Serial No. 270,441. 2 Claims. (Cl. 181—5.)

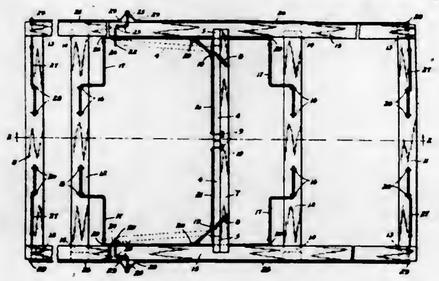
1. A submarine sound signaling plant in combination with a vessel, comprising a sound receiver surrounded by a protective envelop consisting of plates laterally inclosing said receiver and rigidly connected with said vessel; said envelop being arranged in the passing water, and being of substantially stream-line form and arrangement to prevent the formation of eddies in the passing water.

1,391,682. CARRIER FOR BRAIDING-MACHINES. JOSHUA B. HALE, Providence, R. I., assignor, by mesne assignments, to Textile Engineering Company, a Corporation of Rhode Island. Filed Feb. 2, 1920. Serial No. 355,808. 11 Claims. (Cl. 28—24.)



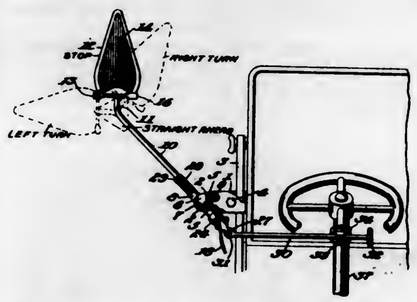
1. A carrier for braiding machines having a rotatable yarn-takeup member provided with a yarn-guiding passageway leading from its center portion to its periphery, a yarn release, and means on said takeup for operating said release when more yarn is required.

1,391,683. NUTRIMENT-CONTAINING ALBUMEN AND THE METHOD OF PRODUCING IT. ALEXANDER HERZFELD, Berlin, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc., a Corporation of Delaware. Filed Apr. 15, 1918. Serial No. 228,755. 5 Claims. (Cl. 99—11.)



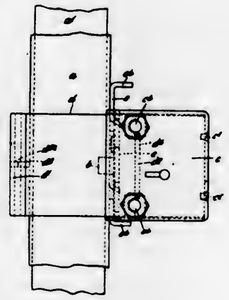
1. The process for producing an albuminous nutriment from waste yeast and sugar-juices containing saccharose which consists in sterilizing moist yeast by adding alkali and heating, then freeing the mass from water by evaporation, then adding saccharose, concentrating to a syrup-like consistency, partly inverting the sugar by means of fresh yeast and heating to nearly the boiling point.

1,391,684. ALARM APPARATUS. AAGE HALFDAN JÖRGENSEN, Lyngby, near Copenhagen, Denmark. Filed Apr. 11, 1919. Serial No. 289,398. 2 Claims. (Cl. 179—5.)



1. Alarm apparatus adapted to be inserted in the wiring of a telephone installation, comprising in combination with a local electric circuit, a movable member for producing an electric current causing the alarm, a means tending to operate said member, a locking means normally holding said member in inoperative position, a plurality of contact elements in said electric circuit, adapted to be automatically closed, a second electric circuit adapted to be short-circuited upon the cutting of the wires in the said first circuit, and means independent of each other included in each circuit and adapted to disengage the said locking means releasing the said movable member upon any of the said circuits being closed.

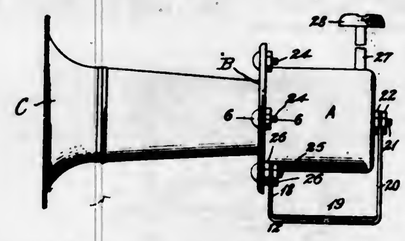
1,391,685. DOOR AND GATE ACTUATING MECHANISM. VICTOR LINDER, Elko, Minn. Filed Nov. 24, 1919. Serial No. 340,272. 4 Claims. (Cl. 268—9.)



1. A door actuating mechanism comprising a post, a door extending therefrom and hinged thereto at one side, a raised rail normally extending longitudinally to the plane of the door when in closed position, a sill extending transversely to said rail at some distance from said door at each side thereof, upstanding cranks pivoted on said sills, the ends of the cranks extending to a point substantially below said rail, guiding means on said rail, one above the end of each crank member, a pair of guiding means on said rail adjacent the hinged side of said door, a cable for each crank member having its end attached to the end thereof, passing through the guiding means thereabove and through one of the guiding means adjacent the door having its other end attached to said door adjacent to the hinge thereof, and spring means tending normally to close the door.

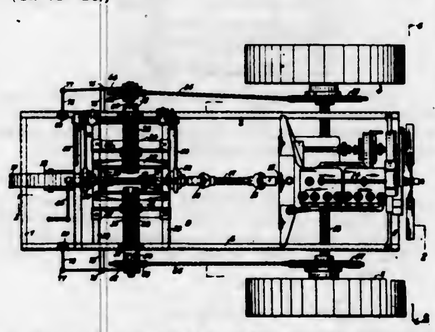
1,391,686. AUTOMOBILE DIRECTION-SIGNAL. CLARENCE F. LYNN, Canandaigua, N. Y. Filed Mar. 12, 1921. Serial No. 451,684. 11 Claims. (Cl. 116—47.)

1. An automobile direction signal comprising an inclined operating shaft, and a triangular pointer secured at its rear end to the outer end of the shaft at obtuse angle thereto; said pointer normally pointing horizontally straight ahead, and means for turning the shaft to bring the pointer into its several indicating positions.



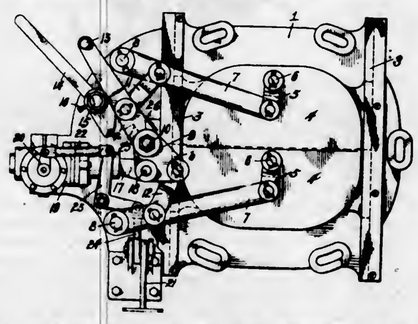
1,391,687. LOCKING DEVICE FOR USE WITH ROAD-VEHICLES. WILLIAM JOHN NIXON MANN, London, England. Filed June 10, 1920. Serial No. 387,889. 8 Claims. (Cl. 70—90.)

1. A locking device for the purpose set forth, comprising a locking member, a spring urging said member into locking position, lock mechanism for controlling said locking member by use of a key, a movable control member restraining in one position said locking member and in another position allowing the said locking member to operate, and a key controlled engagement device for said control member in its restraining position.



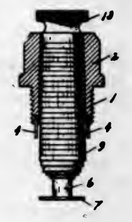
1,391,688. HORN-SHELL AND BRACKET. GERARD R. MARSICO, Brooklyn, N. Y., assignor to Puriton Manufacturing Corporation, Brooklyn, N. Y., a Corporation of New York. Filed Nov. 8, 1919. Serial No. 336,701. 2 Claims. (Cl. 248—20.)

2. The combination with a horn casing including a plunger guide passage therein, of a recessed bracket turnable on the casing, the recess of the bracket adapted to register with the guide passage when the bracket is turned to



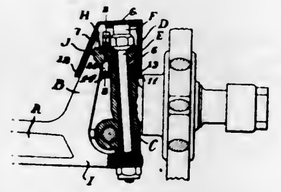
one position, and means for holding the bracket against turning movement.

1,391,689. TRACTOR. WILLIAM NASH, Denver, Colo. Filed June 13, 1919. Serial No. 303,873. 5 Claims. (Cl. 74—26.)



1. In combination, a frame, a support therefor including traction wheels, an operating shaft, gears arranged on opposite sides of the shaft and having their axes approximately at right angles to the axes of the shaft, pinions mounted on the shaft on opposite sides of the axial centers of the gears, an operative connection between the gears and the traction wheels, spaced pivoted yokes having movable bearings in which the operating shaft is journaled, the shaft being normally positioned between the gears to maintain the pinions out of engagement with the gears, and means for adjusting the yokes to cause the pinions to respectively engage the gears.

1,391,690. FURNACE-DOOR-OPERATING MECHANISM. CHARLES J. PILLIOD, Toledo, Ohio, assignor to Daniel Searles, trustee, Toledo, Ohio. Filed Apr. 26, 1920. Serial No. 376,524. 4 Claims. (Cl. 110—176.)

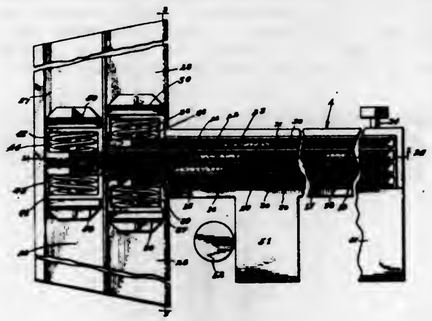


4. In a mechanism of the class described, a pair of oppositely movable sliding doors, a pair of levers fulcrumed at a side of the path of movement of the doors and each having its free end connected to one of the doors, an operating lever fulcrumed between the door levers and having an arm extended to provide a manual control, and links connecting the operating lever at opposite sides of its fulcrum to respective door levers whereby a rocking of the operating lever will impart opposed door opening and closing movements to the door levers.

1,391,691. SPARK-PLUG. WALTER B. POHLE, Lynn, Mass., assignor of one-half to Alfred Charles Page, Wollaston, Mass. Filed July 30, 1919. Serial No. 314,318. 2 Claims. (Cl. 123—169.)

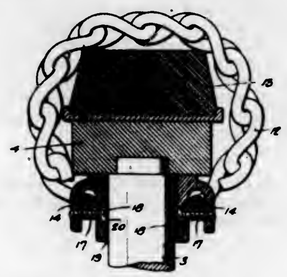
1. In a spark plug the combination of a sleeve having a tapered bore, a spark terminal thereon, a terminal post slidable within said sleeve and insulated therefrom by an insulating bushing tapered to form a gas-tight joint with said sleeve in the raised position of said post within said sleeve, a spark terminal carried by said post, and a binding post nut having screw-threaded engagement with the upper end of said post, said nut having an external diameter greater than the diameter of the bore of said sleeve whereby when said post is depressed within said sleeve, said post is prevented from passing entirely through said sleeve.

1,391,692. DUST AND DIRT CAP. CHESTER J. PUGH, Ida, La. Filed Mar. 12, 1921. Serial No. 451,850. 8 Claims. (Cl. 280—96.)



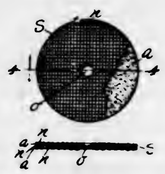
1. A dust protector arranged to house the upper end of a spindle bolt, and the upper end of the forked terminal of the front steering knuckle of motor vehicles comprising a housing, a spring catch adapted to detachably hold the housing in position against accidental displacement, and means for moving the catch into operative or inoperative position.

1,391,693. MAIL-DISTRIBUTING DEVICE. CHARLES M. RICHARDSON, Washington, D. C. Filed Mar. 14, 1919. Serial No. 282,625. 10 Claims. (Cl. 214—11.)



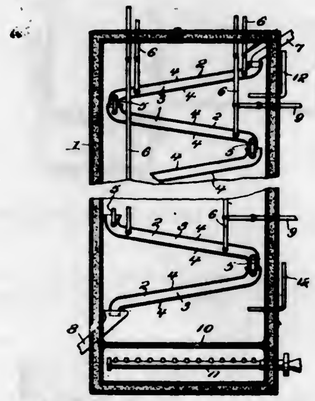
1. In a mail distributing device, a horizontal endless conveyer for initially receiving and moving letters thereon with the plane of each letter extending substantially in the direction of movement of the conveyer and intersecting the latter at an angle, a second conveyer for

subsequently receiving and moving letters with the plane of each letter extending at right angles to the direction



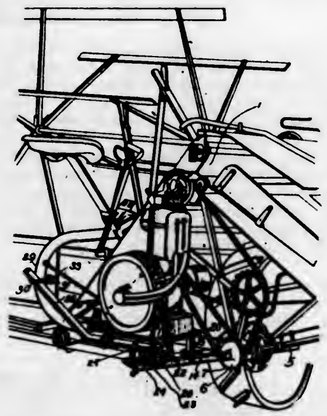
of movement imparted to the letters by said second conveyer, and means for shifting letters from the first conveyer to the second conveyer.

1,391,694. NON-SKID ATTACHMENT FOR MOTOR-VEHICLE WHEELS. BENJAMIN M. ROOF, Lima, Ohio. Filed Sept. 8, 1919. Serial No. 322,414. 2 Claims. (Cl. 152—2.)



1. In a non-skid device comprising a two-part member spoke clamp; a chain securing means consisting of a chain-link securing hook formed as a part of the clamp member, said hook and clamp-member having registering openings, and a guard member engaging the openings in the hook and clamp member and preventing disconnection of a chain and hook.

1,391,695. WATER-HEATER. PAUL C. SACHSE, St. Louis, Mo. Filed Nov. 29, 1920. Serial No. 427,254. 2 Claims. (Cl. 126—362.)

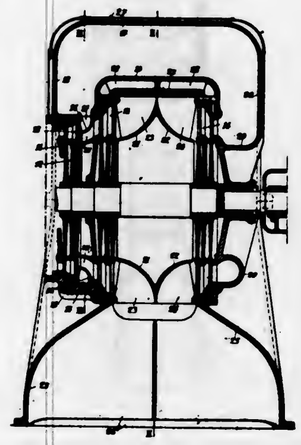


1. A heater attachment comprising top and bottom sheets of wire netting, and intermediate layers of asbestos in a loose state, permitting of a free passage of gases therethrough.

1,391,696. CEREAL AND PROCESS OF MAKING THE SAME. GEORGE HERBERT SAUNDERS, Akron, Ohio, assignor of one-half to Addison T. Saunders, Chicopee, Mass. Filed Apr. 16, 1920. Serial No. 374,458. 4 Claims. (Cl. 99—10.)

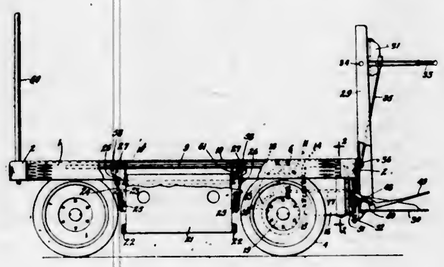
1. As a new article of manufacture, an edible cereal product consisting of whole grain having its natural surface dry-parched and its interior body portion steam cooked, said grain being slightly expanded.

1,391,697. ENGINE-MOUNTING. HARRY E. SCHANK, Topeka, Kans., assignor to The Piersen Manufacturing Company, Topeka, Kans., a Corporation of Kansas. Filed Sept. 25, 1919. Serial No. 326,405. 19 Claims. (Cl. 248—30.)



1. In combination, a frame, an engine mounting comprising a supporting beam on the frame, a stabilizing bar on the supporting beam and frame, an engine adjustably mounted on said bar and beam, and means for adjusting said engine comprising a rod attached to said engine, a rod attached to a portion of the frame and a turn buckle between said rods for the purpose set forth.

4. In combination, a frame, having a transport wheel carried thereby, an engine mounting comprising a supporting beam mounted on the frame and extending adjacent one side of the transport wheel, a stabilising bar mounted on the supporting beam and frame and extending adjacent another side of said transport wheel, and means for mounting an engine on said supporting beam and stabilising bar clear of said wheel.

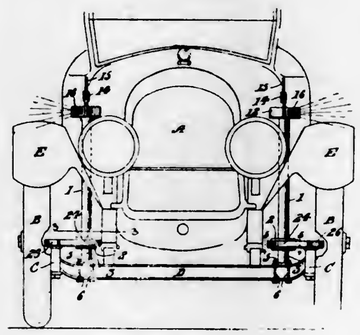


16. In an engine mounting, an engine supporting beam, a bar carried thereby, engine engaging means on the beam and bar, and mechanical means for shifting the engine with respect to the beam and bar.

1,391,698. STEAM-TURBINE. EUGÈNE SCHNEIDER, Paris, France, assignor to Schneider & Cie., Paris, France, a Limited Joint-Stock Company of France. Filed July 21, 1920. Serial No. 397,951. 8 Claims. (Cl. 253—69.)

1. In a turbine, a casing containing a plurality of pressure-stages through which successively flows the fluid-pressure, a collector in the casing leading from the outlet of a preceding pressure-stage to the inlet of a succeeding pressure-stage, and a series of guiding vanes at the outlet of the preceding pressure-stage operating to utilize the residual velocity of the fluid-pressure at its exit from said preceding pressure-stage to guide the fluid-pressure in the direction of the collector leading to the succeeding pressure-stage.

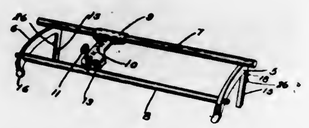
1,391,699. INDUSTRIAL TRUCK. WILLIAM SCHROEDER, Brooklyn, N. Y., assignor to Karry-Lode Industrial Truck Company, a Corporation of New York. Filed June 20, 1919. Serial No. 305,582. 25 Claims. (Cl. 180—50.)



1. An industrial truck having a flexible platform composed of sheet metal with integral bent sides, an axle and wheels independently secured to said platform adjacent each end, and longitudinal intermediate stiffening means carried by said platform.

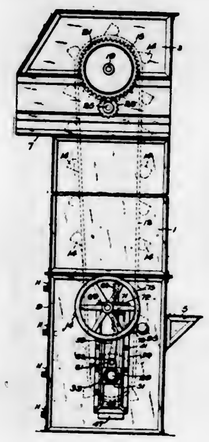
1,391,700. STORM-SASH HANGER. JULIUS J. SCHUBERT, St. Paul, Minn. Filed Apr. 23, 1920. Serial No. 376,010. 1 Claim. (Cl. 16—48.)

A window sash hanger comprising, in combination, a pair of separable, hinged plates, one constituting a loop member, the other a hook member, said members being adapted to be respectively fastened to a sash and window frame, said hook member consisting of a plate formed with two angularly disposed wings and an intermediate body, said body being flexed diagonally to form an outwardly tapering hook, said wings being flexed at the base of said hook to form a supporting back, disposed in a corresponding plane, the upper edges of said hook adjoining said back being notched to form a loop receiving journal seat for the loop member, the hook and loop of said members being so proportioned that the loop member is locked against removal from the hook member in the extreme angular positions of the former with respect to the latter, said loop member being capable of removal from said hook member only in its intermediate position, wherein the sash rests at a substantially small angle with respect to the window frame, whereby accidental removal of said sash from said window frame by wind or otherwise is avoided.



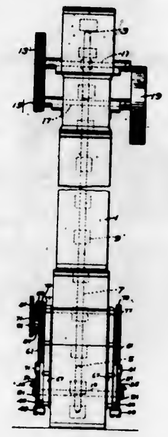
1,391,701. AUTOMOBILE DIRECTION-INDICATOR AND WHEEL-ANGLE GAGE. JOHN STANO, Livingston, Ill. Filed May 16, 1921. Serial No. 470,032. 2 Claims. (Cl. 116—36.)

1. An automobile direction indicator and wheel angle gage comprising a tubular casing adapted to be secured to a chassis bar of the automobile, a rod journaled in said casing, coöperative connections between said rod and the steering knuckles of the automobile, a direction indicator and wheel angle gage carried by the upper end of the tubular casing and rod, said direction indicator and wheel angle gage embodying a hollow casing head fixed to the upper end of said rod and overlying the tubular casing, a bracket carried by the casing head, an arrow head carried by said bracket, an arcuate dial upon the upper face of



said casing head and an indicator arm carried by said tubular casing and overlying said casing head to coöperate with said dial.

1,391,702. LAWN-MOWER SHARPENER. REUBEN STONE, Ogema, Wis., assignor of one-half to Oscar V. Soderstrom, Ogema, Wis. Filed Oct. 19, 1920. Serial No. 418,104. 1 Claim. (Cl. 51—246.)



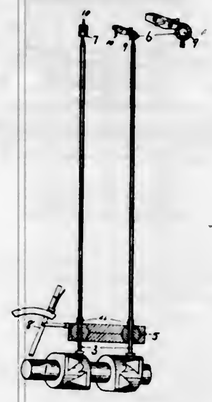
In a device of the character described, a frame, a pair of spaced rods, end members having connection with the rod, means for securing the frame to a lawn mower, a support having a curved extremity embracing one of the rods, a sharpening element carried by the support, said support having a threaded opening overlying one of the rods, a screw passing through the opening and having an enlargement contacting with the opposite rod of the frame for adjusting the support with respect to the frame, and flanges on the support for carrying the sharpening element.

1,391,703. ELEVATOR. THOMAS J. STURTEVANT, Wellesley, Mass., assignor to Sturtevant Mill Company, Boston, Mass., a Corporation of Massachusetts. Filed Feb. 23, 1918. Serial No. 218,647. 2 Claims. (Cl. 64—52.)

1. In an elevator or the like, the combination of a pair of spaced oppositely disposed frames, bearing boxes mounted to slide vertically in the frames, a shaft journaled in the bearing boxes and having a vertically disposed conveyer belt passed thereabout, and means for adjusting the shaft and securing it in different positions of adjustment, comprising a cross shaft journaled upon said frames, a rack slidably mounted upon each frame and each rack having an end thereof pivotally secured to one of the bearing boxes, gears upon the cross shaft meshing with the respective racks, a hand wheel fast on the cross shaft and having wedge-shaped locking notches formed therein, and a gravity operated dog pivotally mounted upon one of said frames and having a tooth shaped to conform to and enter automatically into firm locking engagement with the wedge-shaped notches.

1,391,704. ELEVATOR. THOMAS J. STURTEVANT, Wellesley, Mass., assignor to Sturtevant Mill Company, Boston, Mass., a Corporation of Massachusetts. Filed Sept. 3, 1920. Serial No. 408,004. 11 Claims. (Cl. 64—52.)

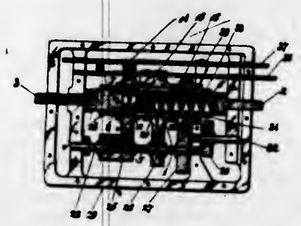
9. In an apparatus of the character described, the combination of a pair of wheels, a belt connecting the wheels, a shaft for one of the wheels, journal boxes for the shaft, carriers having the boxes movably mounted thereupon, and means simultaneously and equally to adjust said boxes including a pair of rack bars secured to the carriers, pinions meshing with the rack bars, a shaft for said pinions, a hand wheel for rotating the shaft, and a locking device adapted to automatically lock the adjusting means in position; and spring means for yieldingly holding the boxes in position upon the carriers to allow one of the wheels to move toward the other when material works in between one of the wheels and the belt.



1,391,705. PROCESS FOR PRODUCING TANNIC-ACID COMPOUND OF THE DIGITALISGLYCOSIDS. RUDOLF TAMBACH, Ludwigshafen-on-the-Rhine, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc., a Corporation of Delaware. Filed Jan. 18, 1917. Serial No. 143,144. 7 Claims. (Cl. 167—4.)

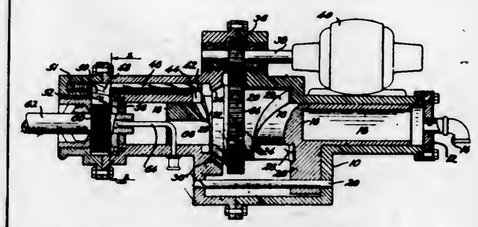
1. The process of producing a therapeutical preparation which comprises extracting a solution of digitotannates with a solvent, removing the solvent by distillation, dissolving the product thus obtained in alcohol, adding thereto an alcoholic solution of tannates, and thereafter removing the solvent.

7. As a new therapeutical preparation, the digitoglucotannic acid compound obtained by treating digitalis glucosids with a tannic acid compound, said preparation being a grayish brown powder, amorphous, insoluble in water and dilute acids, soluble in ethyl alcohol, and readily soluble in alkalis.



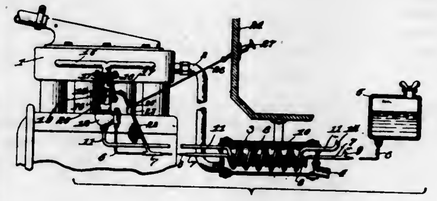
1,391,706. REVERSING-GEAR FOR INTERNAL-COMBUSTION ENGINES. JOHN F. VAN TUYL, Minneapolis, Minn. Filed Aug. 13, 1920. Serial No. 403,360. 2 Claims. (Cl. 123—41.)

1. In an internal combustion engine, in combination with a cam having lobes severally fitted for forward and back motion, a push rod having a universal joint at the valve end and a rotatable guide carried in a movable



harness near the cam end; and means for manipulating the same, substantially as described and for the purpose set forth.

1,391,707. AUTOMATIC CHANGE-SPEED TRANSMISSION. PHILIP VIVIANO, St. Louis, Mo. Filed Aug. 15, 1918. Serial No. 250,035. 3 Claims. (Cl. 74—59.)

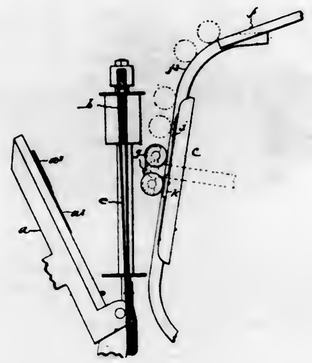


1. An automatic change speed transmission, comprising a supporting frame; a tubular link rigidly joined to the driving shaft and having a free bearing on the driven shaft; two oblique adjustment worms cut through the opposite walls of said link; a cylindrical head slidingly mounted within said tubular link; a pin rigidly set through said head with its ends projecting through said adjustment worms to form dogs; a counter-shaft journaled in the frame parallel to said tubular link and spaced therefrom as required; keys rigidly joined to the ends of the driving and driven shafts adjacent said link; a set of variable primary gears freely mounted on said tubular link, and the two end gears being adapted to longitudinal movement along same; alined key-ways cut across the bearings of said gears and adapted to engage both the shaft keys and the projecting dogs aforesaid; a set of secondary, variable gears rigidly mounted on said counter-shaft in mesh with their respective primary gears, the high speed secondary gear being of a width sufficient to permit the aforesaid longitudinal travel of the high speed primary gear; a reverse gearset mounted forwardly in permanent mesh with said secondary gears and adapted to mesh with the forward primary gear when same is moved forward and engages the key on the driving shaft; and means for moving the primary end gears back and forth into and out of engagement with the shaft keys as required.

1,391,708. PNEUMATIC ROCK-DRILL. CLARENCE R. WELCH, Denver, Colo. Filed Feb. 14, 1920. Serial No. 358,584. 6 Claims. (Cl. 255—42.)

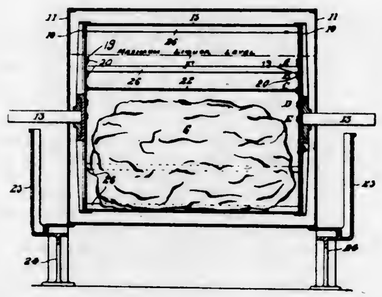
1. In a rock drill, a casing, a hammer reciprocable therein, a drill to be engaged by said hammer, a rotary cam, about the hammer, a gear on the cam to turn the same, means operated by the cam to turn the drill, and pneumatic means to propel the hammer.

1,391,709. AIR AND FUEL HEATER FOR AUTOMOBILE-MOTORS AND OTHER OIL-ENGINES. JESSE N. WOOD, Venice, Ill., and FREDERICK ROEWEKAMP, St. Louis, Mo. Filed Sept. 13, 1919. Serial No. 323,667. 1 Claim. (Cl. 257—241.)



An improved air and fuel heater for automobile motors and other oil-engines, comprising a heating-chamber, an engine exhaust-pipe connected to said heating-chamber, whereby the latter will act as a muffler for the exhaust as well as a heater for the devices on the interior of said chamber, a composite coil located on the interior of said heating-chamber and consisting of a fuel-pipe placed within an air-pipe of larger diameter than said fuel-pipe and both pipes coiled together, a fuel-tank from which liquid fuel is delivered to the said fuel pipe coil, a carbureter to which heated fuel is delivered by said fuel-pipe coil, a separate air-pipe coil located in said heating-chamber, and connected to said carbureter to deliver heated air to the latter, an engine intake-manifold, a casing connecting said carbureter to said intake-manifold, a check-valve in said casing, an air-pipe connection which leads heated air from one of said coils in said heating-chamber to the interior of said casing at a point between said carbureter and said check-valve, and a valve for throttling the air in said air-pipe connection.

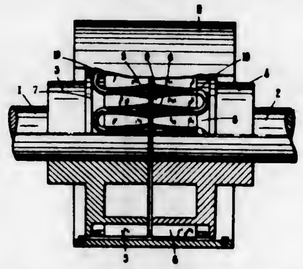
1,391,710. PROCESS FOR CONVERTING LIMESTONE INTO A COMPRESSIBLE ARTIFICIAL STONE. CARL LUDWIG VALENTIN ZIMMER, Berlin-Wilmersdorf, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc., a Corporation of Delaware. Original application filed Aug. 11, 1915, Serial No. 45,023. Divided and this application filed Feb. 7, 1918. Serial No. 215,940. 2 Claims. (Cl. 106—31.)



1. The herein described process of converting limestone into compressible artificial stone which consists in mixing stone containing lime with a bituminous substance containing sulfated sebacic acid.

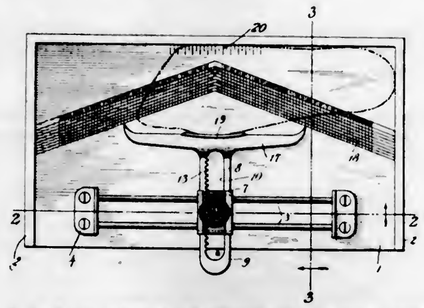
1,391,711. PRINTING-PRESS. REED ADAMS, Detroit, Mich. Filed Feb. 13, 1920. Serial No. 358,444. 3 Claims. (Cl. 101—195.)

1. In a printing press having inking rollers, a body of type having its printing surface so located as to receive ink from said rollers, an address-plate supporting surface located out of the path of travel of said rollers, means for supporting an inking ribbon in front of said address plate holding surface and a platen adapted to receive an impression sheet and press the same against the printing surface of said type and an address plate on said surface.



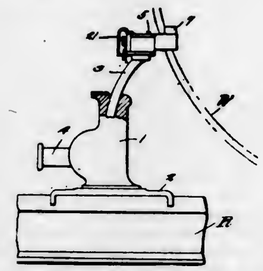
1,391,712. BLEACHING, DYEING, WASHING, AND SOAPING CYLINDER FOR KNITTING-MILLS, DYE-HOUSES, BLEACHERIES, AND LAUNDRIES. DEAN BROWN BECKER, Port Atkinson, Wis. Filed Mar. 2, 1921. Serial No. 449,071. 5 Claims. (Cl. 8—8.)

1. A device for treating textiles with liquids comprising a casing, a foraminous cylinder mounted for rotation therein having opposite doors in the outer annular wall thereof, the cylinder having opposite ends provided with pairs of ribs with grooves in alinement between the said doors adapted for the removable reception of perforated, slotted or foraminous shelves at adjustable elevations.



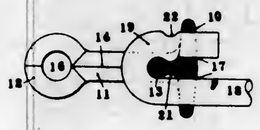
1,391,713. POWER-TRANSMISSION COUPLING. JAMES BIBBY, London, England. Filed Dec. 14, 1920. Serial No. 430,709. 5 Claims. (Cl. 64—96.)

5. A flexible shaft coupling comprising coupling elements on the driving and driven shafts respectively and having peripheral axially directed and normally alined inwardly flaring grooves, a grid-like interconnecting member housed in said grooves, the walls of the latter being modified as compared with the natural curvature of the par-



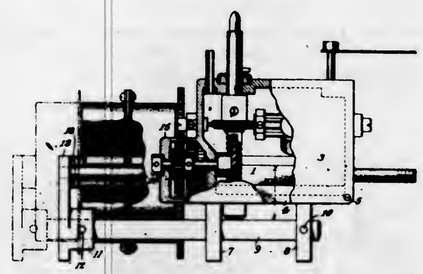
allel limbs of said member in their maximum deflected condition so that as the limbs become deflected their unsupported length becomes less.

1,391,714. FOOT-MEASURE. THOMAS B. BLAKE, Demopolis, Ala., assignor of one-half to J. R. Vance, Demopolis, Ala. Filed May 28, 1918. Serial No. 237,038. 5 Claims. (Cl. 33—3.)



5. In a foot measure the combination of a board having abutments at each end and at one side, said board having scale lines parallel with the end abutments for indicating the shoe lengths for the left foot and for the right foot, respectively, when the foot is placed against one of the end abutments, and other scale lines extending diagonally from the end abutments toward the middle and inclined toward the side abutment for indicating the width of shoe, an indicating member carried by said board adjustable both longitudinally and transversely thereof for indicating the proper scale marks for the foot being measured.

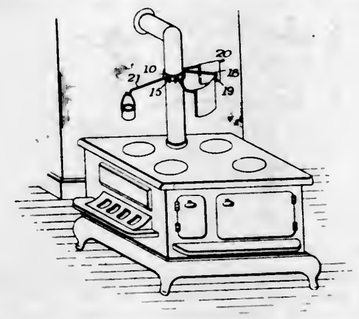
1,391,715. CAR-MOVER. GUY L. BONHAM, Hartford, Conn. Filed July 6, 1920. Serial No. 394,082. 5 Claims. (Cl. 254—131.)



1. In a car mover the combination with a gripping head and means for moving the same upwardly and downwardly, of opposed gripping jaws carried by the gripping head, a spring, means operated by the spring for holding the jaws normally shifted toward each other, a slide, means controlled by the lowering of the gripping head for shifting the slide relative to said gripping head, and means operated by the slide for moving the jaws against the action of the spring.

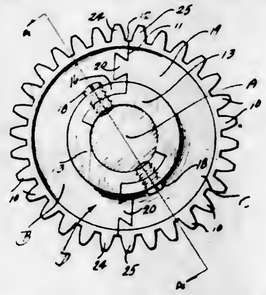
1,391,716. BRAKE-ROD JAW. STERLING H. CAMPBELL, St. Louis, Mo. Original application filed Oct. 15, 1919, Serial No. 330,944. Divided and this application filed July 9, 1920. Serial No. 394,929. 4 Claims. (Cl. 29—164.)

1. A forged metal blank for forming brake rod jaws, comprising a pair of arms terminating in enlarged ends for the pin eyes, said ends having their central parts extending beyond the sides of the arms, said extending parts being adapted to be removed by the perforation of the ends to produce the pin eyes.



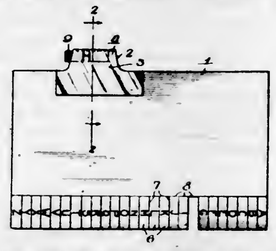
1,391,717. FRAME FOR PHONOGRAPH-MOTORS. GEORGE T. CHERINGTON, Waukegan, Ill. Filed Apr. 9, 1920. Serial No. 372,567. 4 Claims. (Cl. 74—56.)

3. A frame for phonographs, comprising a rectangular casing, having a chamber therein, open on one side, a wall partially closing said side, a detachable plate covering both said wall and said open side, a plurality of downwardly depending lugs, having openings therethrough, adjustable means carried by the lugs, and an outboard bearing detachably secured thereto.



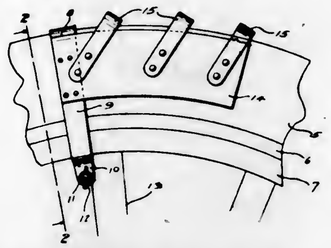
1,391,718. HOUSEHOLD DRYING-RACK. CHARLES H. CLARKSON, Worcester, Mass. Filed Apr. 5, 1920. Serial No. 371,255. 1 Claim. (Cl. 126—343.)

As an article of manufacture, a kitchen drier comprising a band of soft metal provided with a tongue on one end and two perforations at the other for receiving said tongue, said tongue passing under said other end out through one perforation and inwardly through the other perforation nearest the end, whereby the band can be passed about a stove pipe and clamped thereto so that it will hold its position thereon, said band having a plurality of vertical sockets on its outer surface, two of them being opposite said tongue and spaced apart, horizontal supports independently pivoted in the sockets located at the sides, a hanger consisting of a horizontal curved bar located in the same horizontal plane as said pivoted supports, having at its ends two converging horizontal arms, the ends of the arms being bent downwardly at right angles and being received in said two sockets opposite the tongue, whereby the hanger is supported



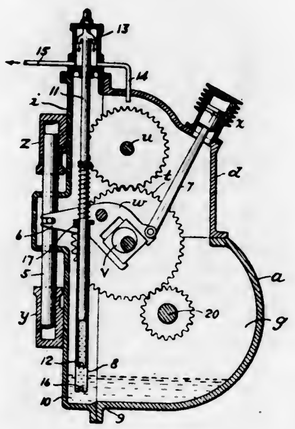
rigidly in position solely thereby and spaced from the band and its supports, and when loaded will pull said band into position to apply additional pressure on the tongue and thereby hold it more firmly in place.

1,391,719. SECTIONAL GEAR-WHEEL. WILLIAM B. CONYNGHAM, Wilkes-Barre, Pa. Filed July 29, 1920. Serial No. 399,700. 11 Claims. (Cl. 74—28.)



In a sectional gear wheel, the combination with a shaft, of a pair of sections forming the gear wheel, said sections being dove tailed to prevent pulling apart thereof with respect to each other, and means to prevent translational movement with respect to each other, said means also adapted to key the gear sections to the shaft.

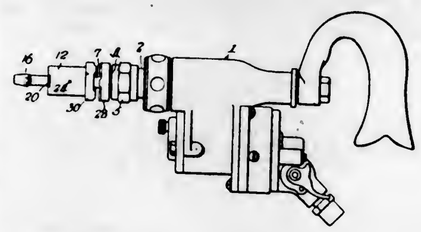
1,391,720. INDEX. ELMER W. DAVIS, Newton Center, Mass., assignor to Shaw-Walker Company, Muskegon, Mich., a Corporation of Michigan. Filed Dec. 18, 1920. Serial No. 431,530. 4 Claims. (Cl. 129—16.8.)



1. An index card having a marginal tab comprising a pocket adapted to retain a removable insert, of a series of index designations printed on the body of said card, and adapted to be cut therefrom to provide said insert.

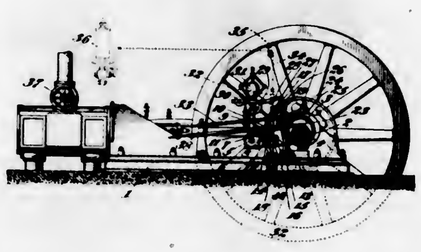
1,391,721. TRACTION DEVICE. PLINY W. DEUEL, Chicago, Ill. Filed July 7, 1920. Serial No. 394,415. 1 Claim. (Cl. 152—14.)

An anti-slipping device for vehicle tires, comprising plates seating along the sides of the tire, a plurality of arched traction strips connecting said plates and straddling the tread of the tire transversely at an oblique angle to and facing in the direction the wheel travels, said strips being spaced intermediate their ends from the tread of the tire, and attaching means for the aforesaid side plates.



1,391,722. LUBRICATING SYSTEM FOR INTERNAL-COMBUSTION ENGINES. ELEUTHERE PAUL DU PONT, Montchanin, Del. Original application filed Feb. 25, 1919, Serial No. 279,083. Divided and this application filed Sept. 11, 1919. Serial No. 323,181. 9 Claims. (Cl. 184—27.)

8. In an internal combustion engine, the combination with the cylinders and moving parts thereof including the crank shaft, of an open faced housing for inclosing the moving parts, a cover for the opening in said housing, a pocket in said cover forming an oil well, a pump extending into said oil well, an eccentric on the shaft, an arm adapted to be rocked by said eccentric, means for operating the pump from the arm, and means to lead the pumped oil to the moving parts of the engine.

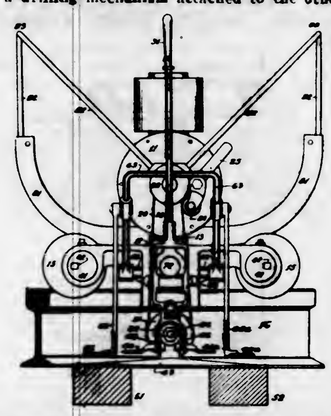


1,391,723. TOOL-HOLDING DEVICE. GILES H. DU SELL, Chicago, Ill., assignor to Independent Pneumatic Tool Company, Chicago, Ill., a Corporation of Delaware. Filed Feb. 9, 1920. Serial No. 357,187. 3 Claims. (Cl. 144—32.)

1. A device of the character described, comprising a sleeve adapted to be connected with a rotary power driven member, a tool holding chuck having a spindle extending into said sleeve from the outer end thereof and being slidably and rotatably mounted therein, opposed clutch members, one on the outer end of said sleeve and the other on said chuck at the outer end of said spindle, and resilient means in said sleeve and acting on said spindle to normally hold said clutch members disengaged, said clutch members having clutch teeth

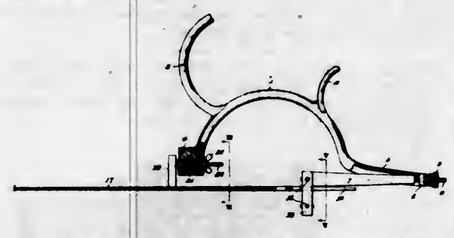
connecting the sleeve and chuck together during the rotation of said sleeve when the clutch members are moved into engagement by the chuck being moved toward the sleeve on forcing the tool carried by the chuck against the work, said clutch teeth having their engaging side faces inclined at such angles that the clutch members will slip relatively to each other when the chuck is held against rotation while the clutch members are engaged.

1,391,724. SAFETY DEVICE FOR ENGINES. WILLIAM R. EICHENSER, Johnstown, Pa. Filed Oct. 7, 1920. Serial No. 415,290. 6 Claims. (Cl. 137—140.)



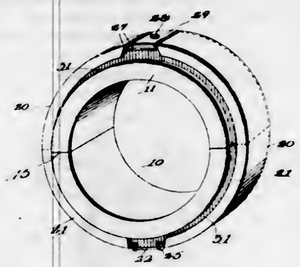
1. The combination with an engine governor of a safety device comprising a weighted stop rod having one end extending over the admission valve reach rod of the engine, a trip adapted to hold said stop rod normally clear of said reach rod, and a weighted trip lever fulcrumed on the engine frame and having the weighted end thereof normally supported by the governor belt whereby when the governor belt breaks the trip lever actuates said trip to release the stop rod which drops on to the admission valve reach rod, thereby lowering the same and reducing the engine speed.

1,391,725. TRACK-DRILLING MACHINE. EDWARD A. EVERETT, New York, N. Y. Filed Mar. 3, 1919. Serial No. 280,208. 7 Claims. (Cl. 77—9.)



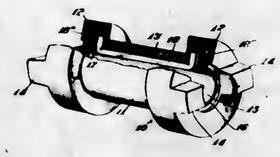
1. In a track drilling machine, the combination of a carriage mounted upon rollers on one rail of said track,

a motor adjustably positioned on one side of said carriage, a drilling mechanism attached to the other side of



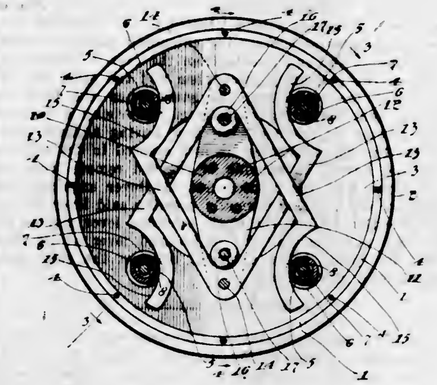
said carriage, and means for operating said mechanism by said motor.

1,391,726. TOOL-HANDLE. MICHAEL FALOS, Boston, Mass. Filed June 11, 1920. Serial No. 388,160. 6 Claims. (Cl. 29—80.)



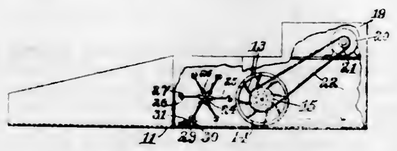
1. An implement of the class described comprising an arched handle, an apertured head carried by one end thereof, the opposite end of said handle having a passage opening therein, tool supports associated with each end of the handle, one of said supports including a block, a screw carried by the block and extending through the head of the handle and an adjusting nut for said screw.

1,391,727. SAFETY SPLIT SET COLLAR. JOHN CROSS FIELD, Lutcher, La. Filed June 26, 1920. Serial No. 392,030. 7 Claims. (Cl. 287—52.)



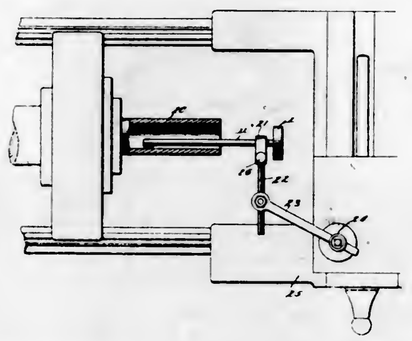
5. A safety split set collar comprising a pair of hinged collar sections detachably connected and adapted to be swung to separated positions, and a safety shield therefor comprising hinged sections and means for securing the free ends of said sections to the collar sections.

1,391,728. SPLINE-CARRYING-MACHINE ELEMENT. ALVA J. FISHER, Evanston, Ill. Original application filed Dec. 23, 1918, Serial No. 267,991. Divided and this application filed Feb. 16, 1920. Serial No. 358,953. 5 Claims. (Cl. 287—52.)



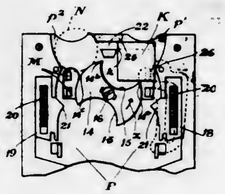
1. A splined-machine-element comprising a shaft-receptive liner having a slot, a spline projecting inwardly through said slot and outwardly beyond the liner, and a cast body exteriorly investing said liner and the outwardly-projecting spline portions.

1,391,729. RESILIENT WHEEL. THEODORE C. FORBES, Chicago, Ill. Filed June 28, 1919. Serial No. 307,323. 9 Claims. (Cl. 152—28.)



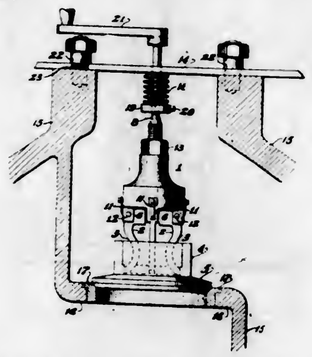
1. In a resilient wheel, the combination of a hub and a rim arranged normally concentrically therewith, pivots disposed on opposite sides of said hub, and a pair of open ends substantially V-shaped members mounted to oscillate at their apices on said pivots and yieldably connected at their free ends with said rim.

1,391,730. WATER-WHEEL. LOUIS E. FRANKE, Washington, D. C. Filed May 11, 1917. Serial No. 167,885. 4 Claims. (Cl. 170—102.)



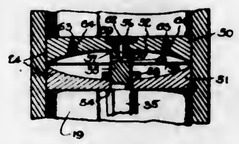
1. In combination with a water wheel, an impeller wheel co-acting therewith, said impeller having spring pressed hinged blades, and a stop in the path of said blades intermittently obstructing the movement of said impeller.

1,391,731. TEST-INDICATOR. GEORGE JOSEPH GENUNG, Beaver Falls, Pa., assignor of one-half to Walter G. Klein, Beaver Falls, Pa. Filed July 19, 1920. Serial No. 397,159. 3 Claims. (Cl. 33—172.)



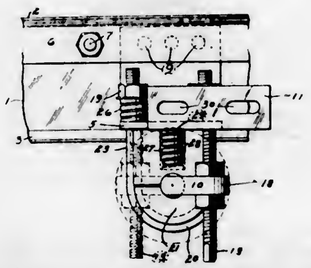
1. In combination, a case having indicating mechanism, and having a tubular extension of relatively great length and small diameter, a lever pivoted in the extension and having an integral contact lug extending radially beyond the same at the end remote from the case, a connection between the indicating mechanism and the other end of the lever for controlling the same when the lever is moved, said indicating mechanism comprising a pointer arm pivoted to the case, the case having a scale with which the arm coöperates, an arm secured to the pointer arm and having an opening at the end remote from its connection with the pointer arm, the lever engaging the opening, and a spring normally pressing said lever lug in one direction against the work, a second lever pivoted to the case and engaging the first-named lever at its free end, the spring being arranged between the said last-named lever and the case.

1,391,732. SLOT-CLOSING DEVICE FOR COIN-CONTROLLED VENDING-MACHINES. ALBERT D. GROVER, New York, N. Y., assignor to Autosales Corporation, a Corporation of New York. Filed Nov. 20, 1918, Serial No. 263,252. Renewed Feb. 16, 1921. Serial No. 445,491. 6 Claims. (Cl. 194—1.)



1. In a coin-controlled vending machine, a casing having a compartment for containing the vendible package, a normally closed lid for said compartment, said casing being provided with a coin-entrance slot which is open when the lid is closed, coin-controlled mechanism for opening said lid, said mechanism including means for automatically closing said coin-entrance slot when the lid is open, and a member constructed to be fully inserted into said coin-entrance slot when the lid is closed, whereby said slot is closed against the insertion of a coin, said member being readily adjustable in said slot to cause a portion thereof to project out of the casing for removal through said slot.

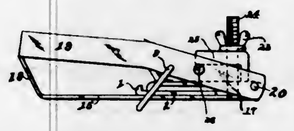
1,391,733. HOLDER FOR VALVES WHILE BEING GROUND. FREDERICK W. HECKLER, Darby, Pa. Filed July 13, 1920. Serial No. 395,896. 3 Claims. (Cl. 51—29.)



1. In a valve grinding device, a tubular head, a threaded spindle having a threaded portion engaging the threaded bore of the head and a narrow threaded portion which is free from engagement with said threaded bore of the head, elbow-shaped jaws pivotally mounted on said head and having inturned limbs at top extending in the path of the spindle, jamming means on the narrowed threaded portion of the spindle adapted to bear against said head, and means resiliently pressing on the spindle to force the valve to its seat while being ground.

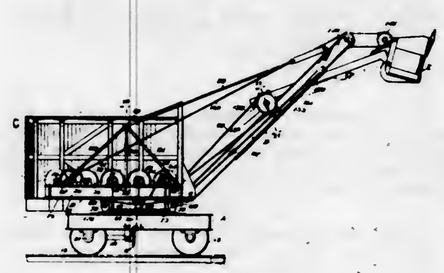
1,391,734. LUBRICATING DEVICE FOR INTERNAL-COMBUSTION ENGINES AND THE LIKE. DANIEL C. HEISTER, Boulder, Colo. Filed Oct. 27, 1919. Serial No. 333,457. 6 Claims. (Cl. 74—108.)

1. The combination with a cylinder, of a piston therein comprising a pair of spaced sections providing between them a lubricant reservoir and an annular slot communicating with said reservoir and with the periphery of said piston.



1,391,735. SUSPENSION DEVICE. ISIDOR M. JACOBS, Kansas City, and WILLIAM CRAMER, St. Louis, Mo., assignors to Truck, Tractor and Manufacturing Company, St. Louis, Mo., a Corporation of Missouri. Filed Mar. 17, 1920. Serial No. 366,660. 14 Claims. (Cl. 180—64.)

1. The combination of a support, a plate running longitudinally thereof, bolts for connecting the same together,

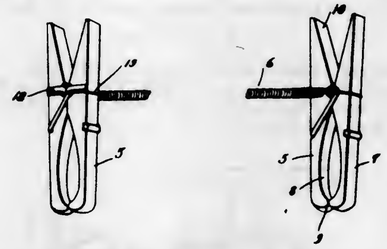


a primary supporting member held by said support, a secondary supporting member borne by the said primary member, and spring means in relation to the said primary and secondary supporting members adapted to absorb shock and jar, and a tertiary supporting member, the said tertiary supporting member being adjustable vertically.

1,391,736. BELT-LACING TOOL. ISIDOR M. JACOBS, Kansas City, and WILLIAM CRAMER, St. Louis, Mo., assignors to Truck, Tractor and Manufacturing Company, St. Louis, Mo., a Corporation of Missouri. Filed July 12, 1920. Serial No. 395,668. 4 Claims. (Cl. 1—50.)

2. A belt lacing device comprising a plate having staple receiving means, a staple retaining pin passed through said plate, a clamping device engaged with said plate to hold the staple retaining pin in position, a U-shaped belt holding member having a cross rod engaged by said clamping device, tensioning means for said clamping device, and an anvil supporting said plate.

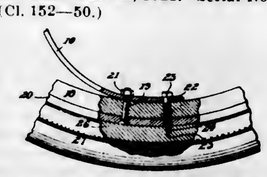
1,391,737. POWER-SHOVEL. CHARLES S. JOHNSON, Toledo, Ohio. Filed Nov. 13, 1919. Serial No. 337,754. 9 Claims. (Cl. 214—135.)



1. A truck frame having in structural combination four beams connected together and forming a quadrangle, a member centrally placed in the quadrangle and having recesses in its sides, four beams diagonally placed in the quadrangle and connecting the corners thereof with the centrally placed member, means for rigidly connecting the diagonal beams with the beams forming the quadrangle and with the center member, and angular brackets fixed to the inner end portions of the diagonal beams and fitting in the recesses in the central member.

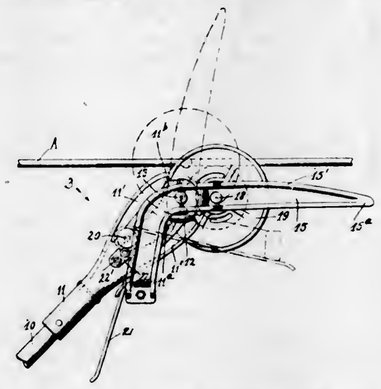
1,391,738. SEALING-PASTE. FREDERICK E. KEY, St. Louis, Mo., assignor to Key Boiler Equipment Company, St. Louis, Mo., a Corporation of Missouri. Filed Mar. 18, 1920. Serial No. 366,981. 4 Claims. (Cl. 106—8.)

3. A sealing paste of the character described comprising graphite mixed with molasses, and a substance preventing fermentation of the molasses.



1,391,739. TAIL-HOLDER. ELIAS D. KING, Prairie du Sac, Wis. Filed Apr. 14, 1920. Serial No. 373,876. 1 Claim. (Cl. 24—253.)

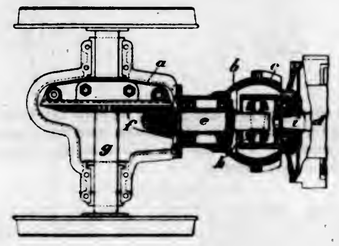
A clamp including opposed jaws pivotally connected together, a spring actuating member associated with the jaws, said spring actuating member including a central coiled spring section and arms, the arms adapted to embrace the opposed jaws, a relatively small wire member embracing the jaws, a pin extending through the central



coiled spring section and having its ends extending at right angles for securing the pin thereto, said wire member having connection with the pin and said pin having an eye forming a part thereof.

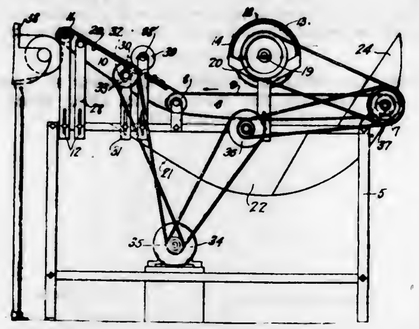
1,391,740. SPRING-WHEEL. MICHAEL KOSTECKI, Hartford, Conn. Filed Mar. 31, 1921. Serial No. 457,551. 1 Claim. (Cl. 152—50.)

A spring wheel including a spoke carrying hub section the spokes of the hub section being formed of curved sheet metal, a felly having a permanent rim secured thereon, a bolt passing through the outer end of each spoke and through said felly and rim for securing the outer ends of the spokes to said felly, a detachable rim adapted to carry a cushion tire and disposed upon said permanent rim, said detachable rim being provided with sockets in its inner face, and a removable bolt passing through the free end of each spoke and through the felly and permanent rim, said detachable bolt being provided with a reduced smooth outer end seated within a socket of the detachable rim.



1,391,741. TROLLEY-WHEEL. CHRISTIAN E. LIEBENBERG, Essington, Pa. Filed July 22, 1920. Serial No. 398,113. 3 Claims. (Cl. 191—83.)

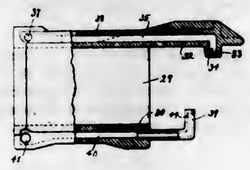
1. In a device of the class described, a harp having a forked end, a carrier and guard pivoted on said harp, a



trolley wheel carried by said carrier and guard, a spring arm attached to the harp and bearing in said carrier and guard and urging the same upwardly, the point of engagement of said arm with said carrier and guard increasing in distance from its point of attachment to the harp as the carrier and guard moves upwardly relatively to the harp.

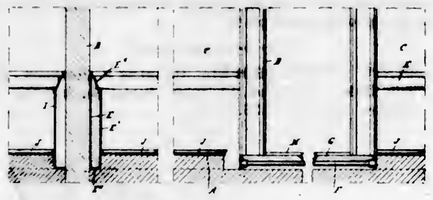
1,391,742. BOGIE FOR RAILWAY-VEHICLES. HERMANN LIECHTY, Berne, and JACOB WERZ, Geneva, Switzerland. Filed July 21, 1920. Serial No. 398,025. 1 Claim. (Cl. 105—118.)

In a drive and draw device for bogies of railway vehicles, a driving axle on the bogie, a driving and drawing hollow bracket coupled to said axle, a rotary driving shaft within said bracket, a motor fixed on the main frame of the vehicle to actuate said driving shaft, a universal joint for connecting the latter to said motor, power transmission means between said driving shaft and the driving axle of the bogie and a universal joint for connecting the hollow bracket to the main frame of the vehicle, substantially as and for the purpose described.



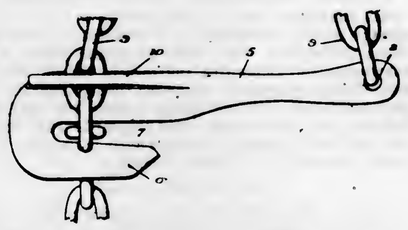
1,391,743. MACHINE FOR PRODUCING RAISED PRINTING. SAMUEL LIPSIUS, New York, N. Y. Filed Mar. 23, 1920. Serial No. 368,017. 17 Claims. (Cl. 91—59.)

2. In a device of the character described, inclined means for conveying a printed sheet to a heater, means for depositing powder on the sheet, and a vibrator for the conveyer to cause excess powder to fall off.



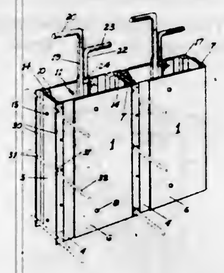
1,391,744. FUEL-DISTRIBUTER. NATHAN M. LOWER, Pittsburgh, Pa., assignor to Locomotive Stoker Company, a Corporation of Pennsylvania. Filed June 19, 1920. Serial No. 390,143. 7 Claims. (Cl. 302—61.)

1. In a fuel distributer, an open ended tube adapted to be disposed in a substantially horizontal position and through which fuel may be impelled, and a fluid-discharging nozzle at the upper side of the forward end of the tube



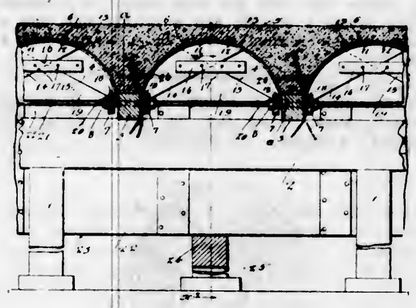
and having its outlet ports backwardly and downwardly directed.

1,391,745. HEATING ARRANGEMENT FOR ROOMS AND THE LIKE. HILDING LUBECK, Heserud, Sweden. Filed Feb. 4, 1919. Serial No. 274,990. 2 Claims. (Cl. 257—133.)



1. In a heating arrangement for rooms and the like, radiator sections arranged alongside the walls of a room, and having their lower portions in the floor of the room, and pipes, also located in said floor, for connecting said radiator sections.

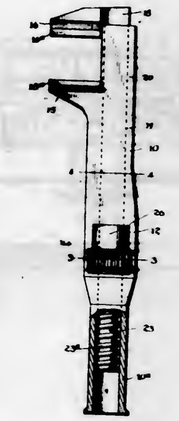
1,391,746. GRAB-HOOK. ALBERT W. MCGUIRE, Carmel, Me. Filed June 24, 1920. Serial No. 391,387. 2 Claims. (Cl. 24—230.5.)



1. A chain hook comprising a shank having an eye at one end and a bill at the opposite end with a chain-engaging slot between said bill and shank opening in a direction toward the first named end of the shank, said shank being provided at that side of said slot opposite to said bill with a substantially longitudinal flange at one side of the shank and at an angle therewith, said flange having a longitudinal slot in overlapping relation with the aforesaid slot and opening in a direction away from the first named end of said shank.

1,391,747. COLLAPSIBLE FORM. WILLIAM H. MALTMAN and TIMOTHY R. MCCOY, Stockton, Calif. Filed Oct. 18, 1920. Serial No. 417,604. 5 Claims. (Cl. 25—128.)

1. A collapsible form comprising inclosing walls arranged for telescopic movement to alter the cross sectional area of the inclosure, and means whereby all areas thus obtained will be symmetrical in shape to each other.

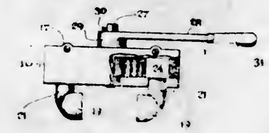


1,391,748. SYSTEM OF ARCH-RIB FLOOR CONSTRUCTION. EDWARD L. MAYBERRY, Los Angeles, Calif. Filed Dec. 22, 1915. Serial No. 68,187. 2 Claims. (Cl. 25—131.5.)

1. In combination, impost beams, transverse bolts extending through said beams, flexible metal arch plates having their lower edges resting upon said bolts, clamp strips engaging over the bolts, soffit plate supports fitting the under-side of the arch plates and notched to fit the outer upper corners of the clamp strips, and clamp means coöperating with the bolts to clamp the marginal edges of the plates between the impost beams and the clamp strips.

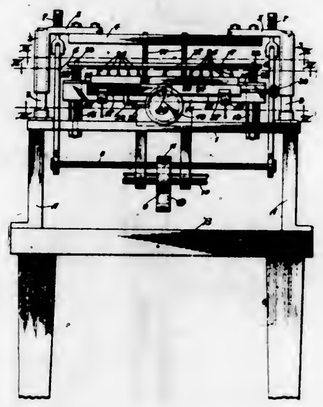
1,391,749. WRENCH. ARTHUR WELLS MINNEY, Stockton, Calif. Filed Apr. 6, 1921. Serial No. 458,917. 1 Claim. (Cl. 81—167.)

In a wrench of the character described, a body portion having a longitudinal bearing therein of polygonal cross section and having a recess extending from side to side thereof, a fixed jaw carried by said body portion, a movable jaw coacting with said fixed jaw, a shank carried by said movable jaw and slidably received in the bearing of said body portion, said shank being of polygonal cross section and having shoulders formed adjacent said movable jaw, an extension bearing carried by the body portion and alined with its bearing and having longitudinal flanges slidably engaging the shoulders of the shank, a traveling screw secured to the shank, a rotatable nut journaled in the recess of the body portion and having a sleeve carried by one face and rotatably abutting the body portion, a seat carried by the body portion and rotatably abutting the other face of the nut, a plurality of ribs carried by the traveling face of said nut, and a tubular extension carried



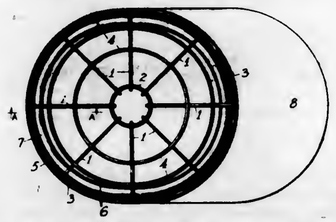
by the body portion and constituting a bearing and housing for the traveling screw and a hand grip for the wrench.

1,391,750. STRAW HAT. ROBERT C. MONTGOMERY, Brooklyn, N. Y., assignor to Knox Hat Company, Incorporated, New York, N. Y., a Corporation of New York. Continuation of application Serial No. 255,731, filed Sept. 26, 1918. This application filed Apr. 15, 1921. Serial No. 461,715. 7 Claims. (Cl. 2—108.)



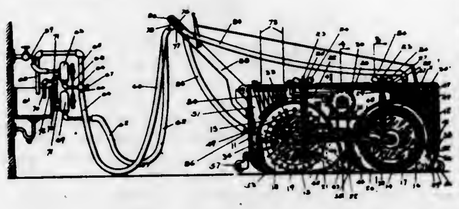
1. A straw hat of the character described, in which the region connecting crown and brim is made of straw braid which is *per se* different from and relatively more flexible than that composing the remainder of the hat.

1,391,751. HAND-NUTCRACKER. HARRY C. ATWOOD, Ardmore, Okla. Filed July 10, 1920. Serial No. 395,241. 3 Claims. (Cl. 146—3.)



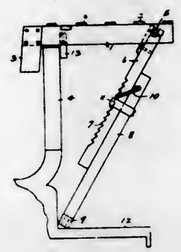
1. A hand nut cracker comprising a hollow casing having spaced horizontally alined slots at one side, coöperating opposed recessed jaws having shank portions extending transversely horizontally through the slots of the casing and prolonged longitudinally therein, and means at the other side of the casing and operatively engaged with said shank portions within the casing for simultaneously moving the jaws in opposite directions for cracking or releasing a nut.

1,391,752. MACHINE FOR MARKING VAMPS OF SHOES. CHARLES AUGUSTINE, Hermann, Mo. Filed Aug. 18, 1919. Serial No. 318,259. 13 Claims. (Cl. 33—4.)



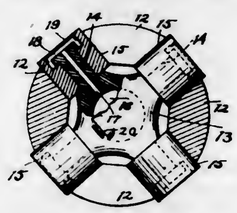
1. A shoe vamp marking machine comprising piercing pins for marking a vamp at its tip and quarter receiving portions, a vamp support above said piercing pins, and means for moving said vamp into engagement with said pins.

1,391,753. SAFETY HEAD-GEAR. L. STANLEY BAIER, Portland, Oreg. Filed Mar. 29, 1921. Serial No. 456,544. 3 Claims. (Cl. 2—192.)



1. In a safety head gear, the combination of a crown comprising a plurality of meridional strands and latitudinal rings both of spring steel wire, spotwelded at the crossing points, a metal visor spotwelded to the rim of the crown, and an air cushion at the rim within the crown.

1,391,754. WASHING-MACHINE. DEAN L. BAIR, Portland, Oreg. Filed July 7, 1919. Serial No. 309,224. 4 Claims. (Cl. 15—14.)



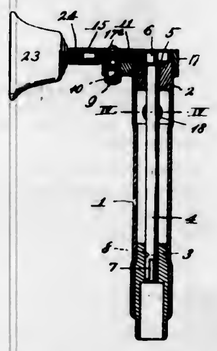
3. A scrubbing machine comprising a portable scrubbing member; a hydraulic motor; a pump operated by said motor; a hose connection from said motor to a source of water supply under pressure; a hose connection from said motor discharge to said scrubbing member; and a hose connection from said scrubbing member to said pump.

1,391,755. SERVING-TABLE. AUGUST BOYSEN, Houston, Tex. Filed Aug. 23, 1920. Serial No. 405,342. 2 Claims. (Cl. 45—51.)

2. In a device of the character described, a table including a supporting frame work, a supporting rod running through one end of said table, a supporting leg depending from the center of said rod, and revolubly secured thereto, and adjustable lengthwise, relative to the table, and depending stops carried by the other end of said table, and adapted for engagement over the side of a vehicle body, said leg being formed of a hinged member having a smooth, and a ratchet side, and a member slidably secured thereto by a bearing and a clevis.

1,391,756. UNIVERSAL JOINT. ALANSON P. BAUSH, Detroit, Mich. Filed Oct. 26, 1917. Serial No. 198,591. 4 Claims. (Cl. 64—102.)

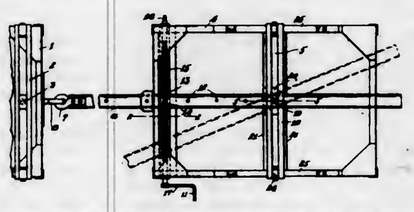
2. A universal joint comprising driving and driven members with forked ends composed of straight arms, the arms of one member extending between the arms of the other, an intermediate power transmitting member capable of moving freely relative to each member axially thereof, said power transmitting member comprising a body having radially disposed rollers between the adjacent arms of the two members, said power transmitting member having a lubricant reservoir with provision for supplying lubricant to the bearing surfaces of the rollers.



1,391,757. PRODUCTION OF PENTACHLORACETONE. HYYM E. BUC, Roselle, N. J., assignor to Standard Oil Company, Bayonne, N. J., a Corporation of New Jersey. Filed Nov. 4, 1920. Serial No. 421,729. 7 Claims. (Cl. 23—24.)

1. The process of preparing pentachloracetone which consists in subjecting isopropyl alcohol to the action of chlorin under conditions controlled to produce chloracetones, separating the chloracetones and subjecting them to the action of chlorin to effect their conversion into pentachloracetone.

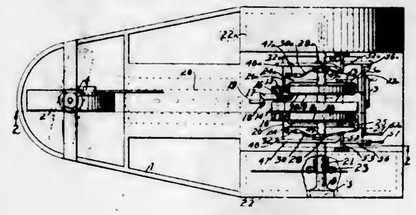
1,391,758. ART OF CHLORINATION. HYYM E. BUC, Roselle, N. J., assignor to Standard Oil Company, Bayonne, N. J., a Corporation of New Jersey. Filed Nov. 22, 1920. Serial No. 425,748. 4 Claims. (Cl. 23—24.)



1. The process of forming chlor-propanes which comprises passing chlorin into isopropyl-alcohol while maintaining a temperature above 65–70° C.

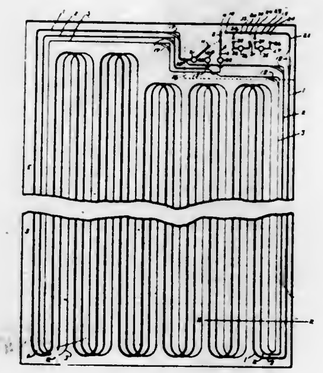
1,391,759. VIBRATORY MASSAGING DEVICE. SAMUEL M. COFFMAN, Kansas City, Mo., assignor to The Barbers Electric Specialty Company, a Corporation of Kansas. Filed Feb. 19, 1918. Serial No. 218,170. 2 Claims. (Cl. 128—48.)

1. A massaging device consisting of a handle, a shaft journaled in said handle, a brake projecting through said handle and engaging the shaft so that the speed thereof can be retarded by pressure on said brake, an applicator, and means associated with one end of the handle and driven by the shaft to actuate said applicator.



1,391,760. VEHICLE-TRAIN AND VEHICLE. JOSEPH W. COLLIER, Newark, N. Y., assignor to Arcadia Trailer Corporation, Newark, N. Y., a Corporation. Filed Oct. 25, 1919. Serial No. 333,278. 8 Claims. (Cl. 280—33.4.)

2. A two wheeled trailer comprising a body, a bolster mounted to swing about an upright axis on the body, a reach pole pivotally connected to the body, and adjusting means between the body and the reach pole for swinging said body with reference to the reach pole and the bolster.

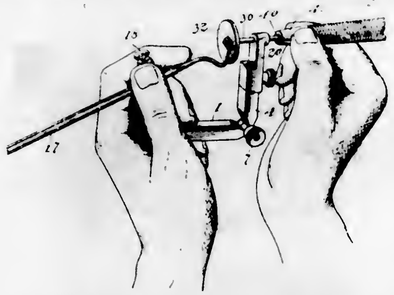


1,391,761. TRACTOR. ANGELO G. CRIBARI, San Bruno, Calif. Filed June 16, 1920. Serial No. 389,419. 4 Claims. (Cl. 180—17.)

1. A tractor including a frame, a bearing shaft mounted thereon, a revoluble double friction wheel centrally mounted on said shaft, means for actuating the same, a sleeve revolubly mounted on each end of said shaft, a drive wheel mounted on each sleeve, a pair of brake bands mounted on said friction wheel, a supporting arm mounted on each revoluble sleeve to revolve therewith and extending outwardly to a point adjacent the ends of said brake bands, and means operatively mounted on each

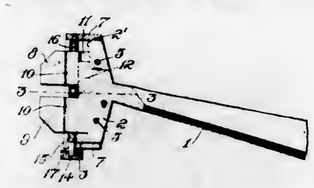
arm and slidably mounted on said revoluble sleeves to revolve therewith for operating said brake bands, independently of each other.

1,391,762. THERMOMAGNETIC THERAPEUTIC APPLIANCE. JOHN H. DEQUER, Kansas City, Mo. Filed May 1, 1920. Serial No. 378,217. 8 Claims. (Cl. 174—177.)



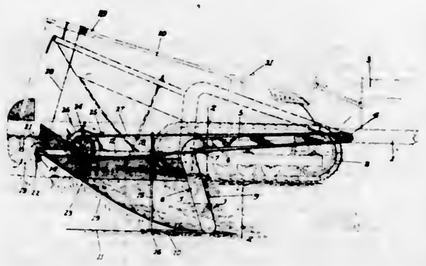
1. A thermo-magnetic therapeutic appliance, embodying a base support of suitable material; resistance conducting means comprising an anterior and a successive coil complement wound on said base support, each having a separate entrant contact end with the exit end of said successive coil complement connected in series with the entrant end of said anterior coil complement to provide for continuous circuits of varying lengths having a single final exit within the zone of said base support; and switching means associated with said respective entrant contact ends for selectively closing a shorter circuit through said anterior coil complement and a longer circuit through said successive and anterior coil complements.

1,391,763. SHARPENER FOR CUTTING INSTRUMENTS. CLOYD C. DICKINSON, Chicago, Ill. Filed Apr. 2, 1920. Serial No. 370,657. 6 Claims. (Cl. 51—166.)



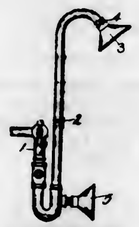
1. A grinding tool having a support with two elements which are angularly adjustable with reference to each other, one of said elements being adapted to carry the instrument to be ground and the other having a

journal bearing, a grinding wheel, and a spindle for said wheel which is both rotatable and freely slidable in said



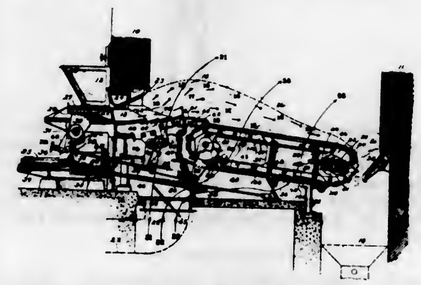
bearing, whereby the wheel may be fed toward the instrument without altering their angular relationship.

1,391,764. WRENCH. CHARLES W. DIXON, Turkey Ford, Okla. Filed June 14, 1920. Serial No. 388,912. 1 Claim. (Cl. 81—163.)



A wrench comprising a head providing guide ways, opposed jaws mounted to slide in the guide ways, one of said jaws being provided with an offset inserted centrally under the opposed jaw, the second jaw being provided with spaced offsets located upon opposite sides of the central offset of the first jaw, the offsets of each of said jaws being projected and slidably engaging the under side of the opposed jaw.

1,391,765. DITCHING-MACHINE. JAMES O. DONALDSON, Stockton, Calif. Filed Apr. 5, 1920. Serial No. 371,356. 2 Claims. (Cl. 37—25.)



1. A ditching machine comprising a driven wheel-mounted frame, a digging mechanism mounted to the frame, means for altering the digging level of said mechanism, a fixed conveyer on the frame, independent of the digging mechanism, a runway fixed to the digging mechanism leading from the bottom level of the ditch being dug to the conveyer, and an apron formed with said runway and depending downwardly against the outside of the conveyer, the runway being free for vertical movement at the conveyer end thereof.

1,391,766. BATH-SPRAY. JEROME J. DONOVAN, Oakland, Calif. Filed June 30, 1919. Serial No. 307,618. Renewed Aug. 10, 1921. Serial No. 491,289. 5 Claims. (Cl. 299—25.)

1. A union formed in two sections, a spiral guide mounted in one of said sections, the other section having ports, and a valve wheel mounted in said other section to rotate past said ports under the influence of the water delivered from said guide.

1,391,767. FUEL-BURNING METHOD AND FURNACE. WARREN C. DRAKE, Inwood, N. Y. Filed July 12, 1918. Serial No. 244,656. 39 Claims. (Cl. 110—44.)

1. A fuel burning method comprising forcibly underfeeding fuel into the front portion of the bed of burning fuel and consecutively thereabeyond bodily carrying along the fuel bed rearward with substantially horizontal travel toward the discharge.

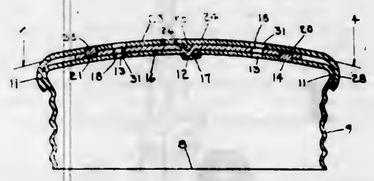
1,391,768. ART OF PRODUCING GLUES OR CEMENTS. ANDREW A. DUNHAM, Bainbridge, N. Y., assignor to The Casein Manufacturing Company, a Corporation of Vermont. Filed Mar. 16, 1918. Serial No. 222,961. 5 Claims. (Cl. 87—17.)

1. The herein described process of preparing a glue or cement capable of resisting the action of boiling water, consisting in mixing about 100 parts of dry commercial casein with from 200 to 300 parts of water, agitating the mixture until the casein becomes soft, then adding about five parts of dry caustic alkali to the casein mixture, agitating this mixture until the casein has been dissolved, and then stirring into this casein mixture a substantial amount, of not less than 50 per cent. of the amount of the casein, of an alkaline earth hydroxid.

1,391,769. ART OF PREPARING CASEIN GLUES. ANDREW A. DUNHAM, Bainbridge, N. Y., assignor to The Casein Manufacturing Company, a Corporation of Vermont. Filed Aug. 1, 1919. Serial No. 314,611. 1 Claim. (Cl. 87—17.)

A casein glue composition consisting of about 70 parts of casein, about 10 parts of sodium phosphate, and about 20 parts of calcium hydroxid, to which is added a small percentage of sodium silicate to govern the jelling or setting action of the glue.

1,391,770. ART OF PREPARING CASEIN GLUES. ANDREW A. DUNHAM, Bainbridge, N. Y., assignor to The Casein Manufacturing Company, a Corporation of Vermont. Filed Aug. 8, 1919. Serial No. 316,184. 2 Claims. (Cl. 87—17.)

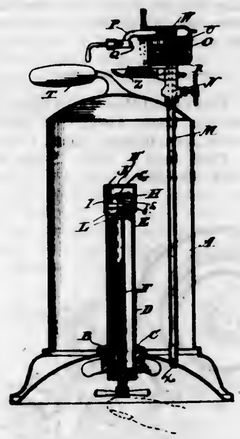


1. A casein glue preparation or composition consisting of about 70 parts of casein, about 10 parts of sodium phosphate, and about 20 parts of an alkaline earth hydroxid, all in dry comminuted form and thoroughly mixed together.

1,391,771. HEAD FOR DISPENSING VESSELS. WILLIAM G. DUNHAM, New Britain, Conn., assignor of one-half to William J. Keith, Providence, R. I. Filed Feb. 10, 1921. Serial No. 443,806. 2 Claims. (Cl. 221—64.)

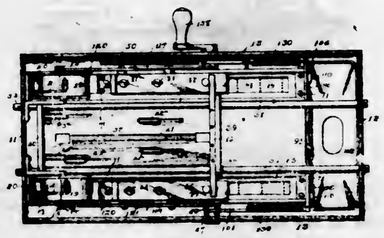
1. In a head for dispensing vessels, a cover provided with dispensing holes, a cap provided with dispensing holes rotatably engaging the cover, an incomplete annular rib on the cap, a rotatable disk valve provided with dispensing holes mounted intermediate the cover and cap, and a lug on the valve intermediate the ends of the rib.

1,391,772. HEAD FOR DISPENSING VESSELS. WILLIAM G. DUNHAM, Maple Hill, Conn., assignor of one-half to William J. Keith, Providence, R. I. Filed Feb. 26, 1921. Serial No. 448,167. 1 Claim. (Cl. 221—64.)



In a head for dispensing vessels, a cover provided with dispensing holes and with a central cavity, a projection on the cover, a valve rotatably mounted on the cover, provided with dispensing holes and with a central cavity and with arcuate slots, one of said slots slidably receiving the projection, a central projection on the valve loose in the cavity of the cover, a rotatable cap on the valve loosely engaging the cover provided with dispensing openings, a projection on the cap registering in another of said slots, and a central projection on the cover loose in the cavity of the valve.

1,391,773. COMBINED TRUCK AND JACK. MARTIN W. FORBES, Miamisburg, Ohio. Filed Feb. 25, 1921. Serial No. 447,821. 2 Claims. (Cl. 254—4.)

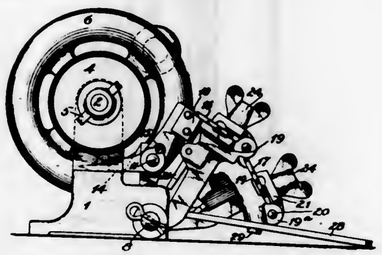


1. In a device of the type described, the combination with a truck frame, of links pivotally secured at their upper ends to the latter, upwardly inclined supporting members pivotally secured at their lower ends to the free ends of said links and to the middle portions of each other, a platform resting upon the free top portions of said supporting members, and means for actuating one or more of said links to thrust the supporting members upwardly to elevate the platform above the frame.

1,391,774. BLOWTORCH. FREDERICK E. GERSTENBERGER, South Euclid, Ohio. Filed June 16, 1919. Serial No. 304,492. 6 Claims. (Cl. 158—33.)

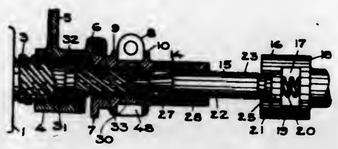
1. In a blow pipe, an annular chamber, a supply pipe for fuel oil under pressure, leading into the lower part of said chamber, a supply pipe for fuel gas leading from the upper part of said chamber, a burner nozzle in said fuel gas supply pipe arranged to discharge axially into said chamber, and supplying heat thereto for superheating, expanding and vaporizing said fuel oil therein, a baffle plate in the central opening in said annular chamber and adjustable longitudinally thereof.

1,391,775. STAMP-VENDING MACHINE. J. C. HAWKINS, Newton, Iowa, assignor to Clipless Paper Fastener Company Inc., Newton, Iowa. Filed Nov. 20, 1916. Serial No. 132,411. 13 Claims. (Cl. 211—33.)



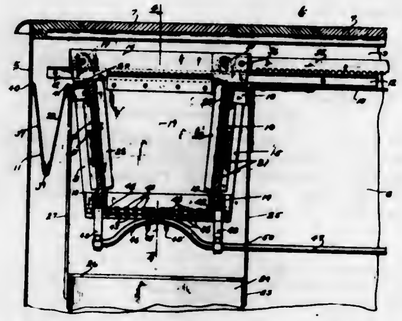
1. In a stamp vending machine, a slidable member for advancing stamps of one denomination, a second slidable

member for advancing stamps of another denomination, an actuating member adapted when operated to actuate one of said stamp advancing members, and coacting means on the stamp advancing members whereby the movement of one of said stamp advancing members imparts movement to the other of said stamp advancing members.



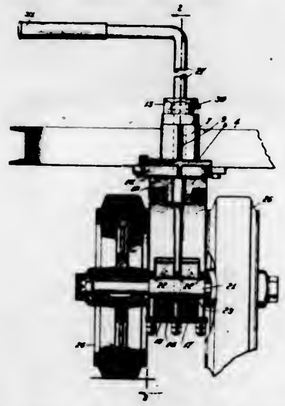
3. In a stamp vending machine, a stamp advancing device having a projecting member, a second stamp advancing device having a projecting member, an actuating device having a series of receiving means for receiving and holding a coin, whereby when the coin is selectively deposited in one of said means and said actuating member is moved, the coin will be caused to contact with one of said projecting members, said projecting members being so arranged that the movement of one of said stamp advancing devices brings the projecting members into coacting relation for imparting movement to the other of said stamp advancing devices.

1,391,776. DUPLICATING-MACHINE. NORMAN B. HURD, New Britain, Conn., assignor to American Hardware Corporation, New Britain, Conn., a Corporation of Connecticut. Filed June 7, 1920. Serial No. 386,935. 16 Claims. (Cl. 90—13.2.)



1. In a duplicating machine, a rotary cutter, a positioning device arranged at one side of, and outside of said cutter, a carriage, holding means thereon for a blank and a model, said carriage being movable to and fro and laterally said holding means being constructed to hold said blank and model in proper position relatively to said cutter and positioning device.

1,391,777. MAGNETO-COUPLING. OSKAR J. F. JACOBSON, New York, N. Y. Filed May 2, 1921. Serial No. 466,361. 5 Claims. (Cl. 64—90.)

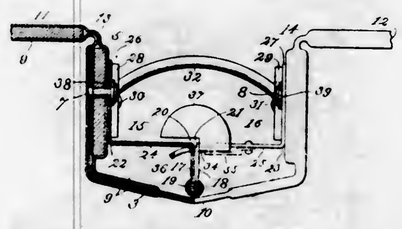


5. A magneto coupling including a projecting magneto shaft, a slotted head upon a drive shaft in alinement with said first shaft, a key located in said slotted head and extending to said magneto shaft interior undercut shoulders in the head of said drive shaft, a flange upon said key to seat in said shoulders, and transeverse projections upon said key to engage the sides in the slots of said head, there being an axially disposed spring in said head pressing upon the extremity of said key, and a projection upon said key into aforesaid magneto shaft.

1,391,778. STOVE OR RANGE. FRANK KESSLER, Sr., Milwaukee, Wis. Filed May 22, 1920. Serial No. 383,508. 2 Claims. (Cl. 126—1.)

1. A stove comprising an inclosing frame having a top heat compartment and a fire box chamber, a fire box movably mounted within said chamber, and means preventing the communication of the heat compartment with the top of the fire box chamber irrespective of the position of said fire box.

1,391,779. TRACTOR. LAWRENCE J. KLINE, Chicago, Ill., assignor to Mercury Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed Sept. 27, 1920. Serial No. 412,989. 4 Claims. (Cl. 280—80.)

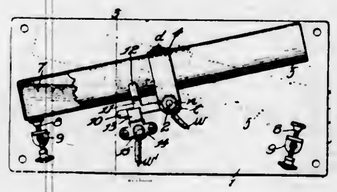


1. In a tractor, the combination of a frame, a yoke journaled in said frame and rotatable about a vertical axis, a semi-elliptical spring below said yoke and connected with end portions of the yoke, said yoke and spring being bowed in opposite directions, supporting wheels located at opposite sides of said spring, an axle connecting said wheels, and means for securing the central portions of said axle and spring together.

1,391,780. LOOSE-LEAF BINDER. ERIK L. KRAG, Chicago, Ill. Filed Nov. 14, 1918. Serial No. 262,512. 2 Claims. (Cl. 129—17.)

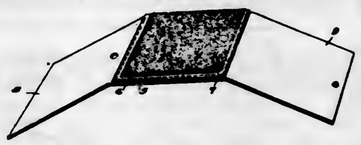
2. In a loose-leaf binder, the combination of a pair of rigid cover-supporting members having parallel side portions each adapted to be connected with a cover leaf, each of said rigid cover-supporting members having a rear portion extending toward but spaced apart with respect to the opposite rigid cover-supporting member, a pair of

pivotally connected inner flanged binding members connected with said side portions of said rigid cover-supporting members, flexible covering material upon both sides of and covering said rigid cover-supporting members and



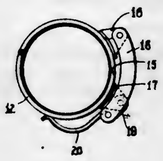
forming inner and outer flexible connecting hinge portions between the rear margins of said rigid cover-supporting members, and means for locking said pivotally connected inner flanged binding members together.

1,391,781. VENTILATOR. JOHN W. LIPPINCOTT, Little Rock, Ark. Filed May 20, 1919. Serial No. 298,500. 2 Claims. (Cl. 98—26.)

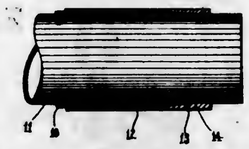


2. In a ventilator for piled vegetables, the combination of a plurality of sections, each section comprising inverted V-shaped end frames, one end frame of a size to telescope within the other, said end frames comprising legs pivoted together near their lower ends, adjustable means to space said legs apart, slats connecting said end frames to form reticulated sides, said sections being capable of arrangement in overlapping relation.

1,391,782. ELECTRIC SWITCH. ALEXANDER MCDANNOLD, Hallandale, Fla. Filed Mar. 15, 1920, Serial No. 366,019. Renewed Apr. 29, 1921. Serial No. 465,499. 1 Claim. (Cl. 200—52.)

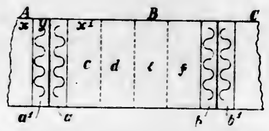


An electric switch comprising a tube hinged at an intermediate point about an axis exterior to the tube to oscillate in a vertical plane, a longitudinally disposed insulated switch arm projecting from said axis parallel to the tube and participating in the oscillations of the tube, fluent contents in the tube gravitating toward one end of the tube and keeping the same weighted at said end, an adjustable bearing against which the weighted end of the tube may rest, and a second adjustable bearing for engaging the opposite end of the tube with a tilting of the tube in the opposite direction due to the shifting of the fluent mass toward said end with a change in the angular position of the tube.



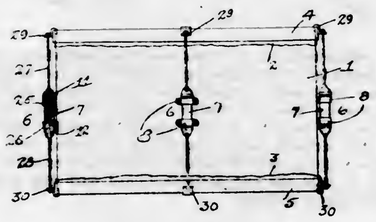
1,391,783. FOLDING BRUSH. WILLIAM R. MCDERMOTT and CHARLES E. SHOWALTER, Seattle, Wash. Filed Apr. 14, 1919. Serial No. 290,066. 1 Claim. (Cl. 15—30.)

A folding brush of the class described comprising a pliable elongated cover embodying middle and end sections, a single brush back secured to the middle section and having laterally directed bristles capable of flexing to lie substantially parallel to the plane of the middle section, said end sections being adapted to be folded onto the bristles and one upon the other to cover said bristles, and means to hold the end sections folded with the bristles retained flexed thereby.



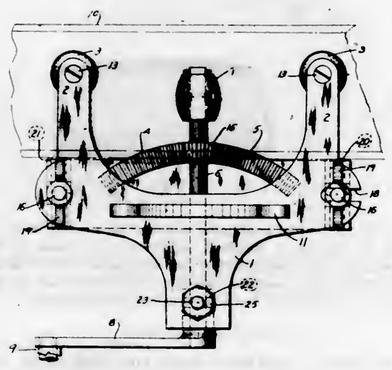
1,391,784. BEVELING AND SEALING CLAMP. CHARLES EDGAR MAYNARD, Northampton, Mass., assignor to The Fisk Rubber Company, Chicopee Falls, Mass., a Corporation of Massachusetts. Filed June 25, 1920, Serial No. 391,689. Renewed Mar. 12, 1921. Serial No. 451,841. 6 Claims. (Cl. 18—43.)

1. The method of producing rubber tubes comprising locating the tube on a mandrel, compressing the ends of the tube against the mandrel by a smooth surface which is tapered toward the mandrel so as to skive the end of the tube, and vulcanizing the tube while so compressed.



1,391,785. MANUFACTURE OF TAPESTRY OR PRINTED CARPETS, RUGS, TABLE-COVERS, AND THE LIKE. JAMES MORTON, Dentonhill, Carlisle, England. Filed Apr. 4, 1919. Serial No. 287,638. 6 Claims. (Cl. 139—71.)

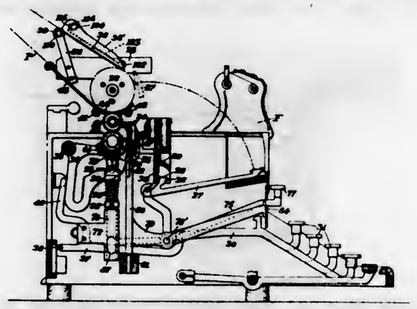
5. The method of manufacturing tapestry or printed carpets and the like in which the warp yarn for the body design of the carpet is printed separately from the cross border yarn, the printing being effected on a drum small enough to print only one repeat of the body design, the



printed cross border yarn and the printed body yarn being set on separate beams and woven in the tapestry loom the yarn from the one beam being put out of action when the yarn from the other beam is in action and vice versa.

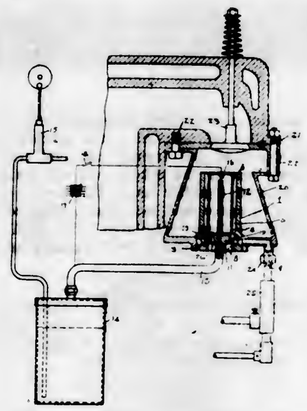
1,391,786. DRUM. WESLEY D. NELSON, Chicago, Ill. Filed Oct. 6, 1919. Serial No. 328,803. 3 Claims. (Cl. 84—411.)

1. A drum, a skin therefor, a hoop for placing said skin under tension and means for drawing said hoop, said drawing means including a device fastened to the drum, a rod slidable in said device, a spring interposed between said device and the end of said rod, means at the other end of the rod for engaging said hoop, and symbols on said slidable rod to indicate the degree of tension.



1,391,787. DEVICE FOR STRAIGHTENING SHEET METAL. ELMO P. ORNER, St. Louis, Mo. Filed Sept. 11, 1919. Serial No. 323,200. 3 Claims. (Cl. 153—32.)

2. The combination with a body portion having arms and movable members mounted on said arms of a rack bearing member having hinged connection at one end to the body portion, a removable connection between the other end of said rack bearing member and the body portion, a shaft having a swinging connection with the body portion, a movable member on said shaft, and a pinion arranged on the shaft and coöperating with the rack.



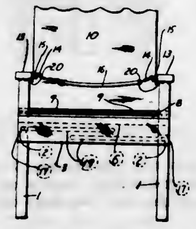
1,391,788. WRITING-MACHINE. ROBERT J. ORR, Brooklyn, N. Y. Filed Sept. 23, 1918. Serial No. 255,326. 32 Claims. (Cl. 197—8.)

1. In a writing machine, the combination with a carriage carrying a platen, and impression making devices, of finger key lever actuated means to advance and retract the platen predetermined distances at will, and means to shift the platen carriage to change the position of the line of

writing on the platen and shift the lever actuated platen advancing and retracting means with the platen carriage for the purpose specified.

1,391,789. APPARATUS FOR VAPORIZING FUEL-OILS AND THE LIKE. SAMUEL PESKIND, Cleveland, Ohio. Filed May 31, 1919. Serial No. 300,802. 2 Claims. (Cl. 48—102.)

1. In apparatus of the character described, the combination of an outer casing provided with a fuel inlet opening and a fuel outlet cap, said casing having an interiorly threaded base portion, a combustion chamber casing having a base threaded into said outer casing and provided with a flared upper end to make a small outlet area between said two casings, outlet apertures in said base of said combustion chamber casing, a burner tube removably mounted through said base of said combustion chamber casing, an electric ignition element mounted in said combustion chamber casing adjacent the outlet end of said burner tube, means for supplying oil to be vaporized between said two casings, and other means for supplying a combustible mixture under pressure to said burner tube.

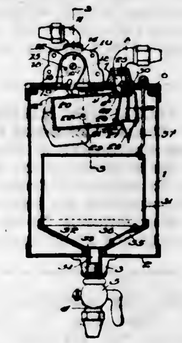


1,391,790. PHOTOGRAPHIC SHUTTER. HENRI RAYMOND PONTON, Paris, France. Filed Feb. 24, 1920. Serial No. 360,856. 5 Claims. (Cl. 95—63.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

5. In a photographic shutter, the combination with a blade mechanism actuated by bulb, time and timed mechanisms, means for modifying the action of the timed mechanism, of a setting mechanism including a rotatable member carrying cams circumferentially spaced around said member to set respectively the actuating mechanisms and the modifying means, the cams controlling the timed mech-

anism and the modifying means acting simultaneously on such mechanism and means, and the cams controlling the bulb and time mechanisms operating at intervals different from each other and from the interval of operation of the cams controlling the timed mechanism and the modifying means.

1,391,791. CHILD'S FOLDABLE TOILET-CHAIR. WILLIAM C. RATHJEN, St. Louis, Mo. Filed Oct. 3, 1919. Serial No. 328,212. 3 Claims. (Cl. 155—148.)



2. In a folding chair of the character described, a seat provided with notches on its opposite sides having depending flanges on two opposite sides thereof and notches in the side edges thereof, a pair of side members having supporting legs to be received in said notches when the chair is unfolded, said flanges on the seat having superposed grooves therein, each of said side members having a pivoted slidable connection in one of said grooves in each of said flanges, whereby said side members and legs may be moved to underlie the seat in superposed relation to each other.

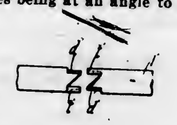
1,391,792. METHOD OF MAKING INSTALLATION-LOOPS FOR ELECTRIC FIXTURES. ADOLPH C. RECKER, Oakville, Conn., assignor to The Chase Companies Inc., Waterbury, Conn., a Corporation. Filed June 29, 1920. Serial No. 392,633. 2 Claims. (Cl. 29—155.5.)

1. A method of producing wrought-metal installation-loops for electric fixtures, consisting in forming a bead near one end of a tubular blank, then drilling the blank at a point adjacent to but separated from one edge of the said bead, then flattening the blank, so as to include that portion of the hole opposite to the bead, then piercing the drilled and flattened portion of the blank so as to enlarge the opening therein, and then trimming the pierced portion of the blank and threading the portion thereof extending beyond the said bead.

1,391,793. VACUUM FEEDING DEVICE FOR CARBURETERS. FRANK V. RISINGER, Youngstown, Ohio, assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill., a Corporation of Virginia. Filed July 9, 1920. Serial No. 394,988. 7 Claims. (Cl. 158—36.)

1. In a device for the purpose indicated, in combination with a chamber having a suction port, an atmosphere port and a liquid supply inlet; a receptacle for liquid pivotally mounted in said chamber and adapted when empty to be overbalanced in one direction, and when liquid-filled to a predetermined degree to be over-balanced in the other direction, said receptacle having a filling aperture positioned for receiving liquid from the liquid inlet port of the chamber; a valve for closing said liquid inlet port and operating connections thereto from the receptacle for opening said valve upon the tilting of the receptacle; valve means by which said receptacle discharges its liquid contents by being over-balanced thereby and connections from said receptacle for operating the valve of said means.

1,391,794. SUSPENSION APPARATUS. NORMAN F. RUTHERFORD, East Falmouth, Mass. Filed May 16, 1919. Serial No. 297,450. 4 Claims. (Cl. 191—12.)

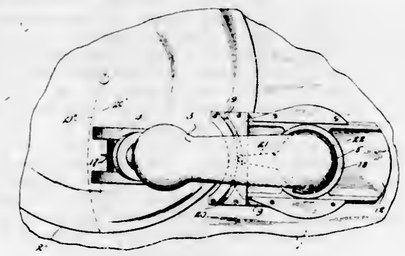


1. An apparatus comprising a source of electrical energy, a transmission line connected thereto, an electrical energy consuming device connected to the end of said line and contacting with the earth thereby requiring contiguity of the end of said line and the earth and a means for insulating said line from earth contact, said means permitting movement of said device anywhere within the area swept by the line and simultaneously operating to take up any slack in said line.

1,391,795. PISTON-RING. LOUIS A. SAFFORD, St. Louis, Mo. Filed Sept. 8, 1919. Serial No. 322,345. 3 Claims. (Cl. 74—109.)

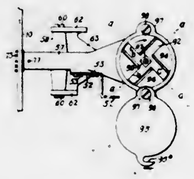
1. A one-piece piston ring comprising a resilient split metal band terminating at each end in a tongue flush with one side of the band, and in a recess offset from the

opposite side, the tongue of one terminal being on the same side as the recess of the opposite terminal and adapted to be received by the recess upon compression of the band to working size, the engaging surfaces of said tongues and recesses being at an angle to the plane of the



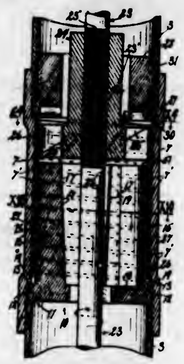
ring, and suitable formations intermediate the recesses and tongues coöperating to form a lap-joint between the bases of the tongues when received by the recesses, said lap-joint being disposed on a diagonal to the sides of the band.

1,391,796. PROTECTIVE MIXTURE FOR HIGH EXPLOSIVES. WALTER T. SCHEELE, Hackensack, N. J., assignor to the Government of the United States, represented by the Secretary of the Navy. Filed Dec. 9, 1919. Serial No. 343,574. 7 Claims. (Cl. 52—5.)



4. A protective composition for high explosives having nitric acid as a base, including 2% of anilin $C_6H_5NH_2$, 96% of carbon disulfid and 2% of hydrocarbon.

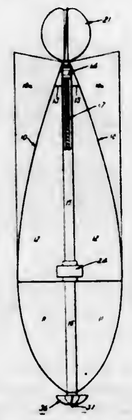
1,391,797. SOUND-BOX MOUNTING. CARL SCRABIC, Urbana, Ohio. Filed Mar. 25, 1920. Serial No. 368,495. 6 Claims. (Cl. 274—23.)



1. In a talking machine, an oscillatory tone arm structure, a sound reproducer carried by the free end of said structure, and means for longitudinally shifting the positions of said tone arm during its horizontal swinging movement across the playing surface of a record, whereby the stylus of said reproducer will be caused to travel a substantially straight radial path across said record.

1,391,798. TYPEWRITING-MACHINE. GEORGE A. SEIB, Ilion, N. Y., assignor to Remington Typewriter Company, Ilion, N. Y., a Corporation of New York. Filed May 1, 1920. Serial No. 378,174. 16 Claims. (Cl. 188—184.)

5. A governor for regulating the speed of a traveling carriage comprising a circular casing, a slidable device within said casing provided with a straight face and a curved face, and a rotary arm provided with a radial face coöperative with said straight face to insure frictional engagement of said curved face with the circular inner wall of said casing.



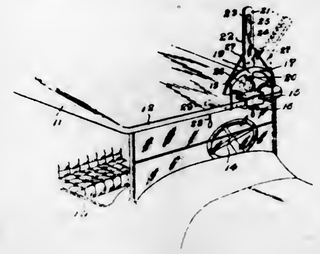
1,391,799. PUMP. GEORGE W. SLOCOMB, Los Angeles, Calif. Filed Sept. 9, 1919. Serial No. 324,231. 7 Claims. (Cl. 253—179.)

1. In a pump the combination with a substantially vertical casing comprising lengths of tubing joined together by couplings, said couplings having threaded portions adapted to connect said lengths, and having shoulders at the inner end of said threaded portions, of a shaft rotatably mounted in the casing; a cylindrical guide in each coupling, said guide surrounding the shaft and being concentric therewith and firmly held between the end of a length of tubing and one of said shoulders and extending upwardly therefrom, radial wings in each of said guides; helical blades connected with the shaft above the guide in each coupling and provided with a downwardly extending sleeve surrounding the shaft and the guide and being concentric therewith, there being an annular recess between the inner periphery of the sleeve and the outer periphery of the guide and also an annular recess between the outer periphery of the sleeve and the inner periphery of the coupling so that liquid supplied by the action of the pump may fill said recesses and hold the sleeve in true axial rotation; a deflector secured above the helical blades in each coupling for preventing a whirling action of the liquid and for guiding it upwardly; said deflector having a threaded flanged end which is held between the end of a length of tubing and the other of said shoulders; a helical channel on the inner surface of each coupling, said helical channel leading in the direction of rotation in order that sediment may be expelled from the casing by the action of the liquid and in order that the efficiency of the pump may be maintained; and means for rotating the shaft.

1,391,800. WATER-BOMB. FLOYD SMITH, San Diego, Calif. Filed Nov. 1, 1917. Serial No. 199,679. 16 Claims. (Cl. 102—2$_4$)

13. In a bomb, the combination of a charge holding body, a detonator for the body, firing means for the detonator, the detonator and firing means being normally out of operative relation to each other, means actuated by passage of the bomb through a fluid to positively put the detonator and firing means into operative relation

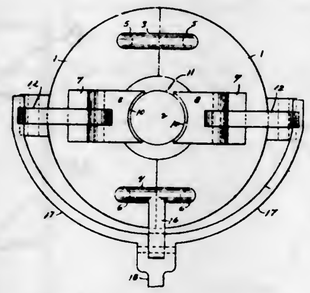
to each other, and means to cause operation of the firing means.



1,391,801. SAFETY DEVICE FOR DELIVERY OF MILK AND OTHER ARTICLES. RAYMOND A. SMITH, Philadelphia, Pa. Filed Apr. 11, 1921. Serial No. 460,257. 4 Claims. (Cl. 232—41.)

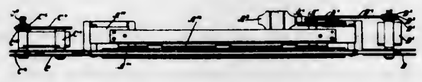
1. A device for delivering articles to houses, comprising a door section or panel, provided with means for supporting the articles, said section or panel being centrally pivoted to swing on a vertical axis, the panel and adjacent door sections being provided with coöperating safety catches.

1,391,802. LAMP-BRACKET FOR AUTOMOBILE DIRECTION-INDICATORS. JOSEPH I. STANFA, Erie, Pa. Filed Aug. 24, 1917. Serial No. 187,976. 3 Claims. (Cl. 240—57.)



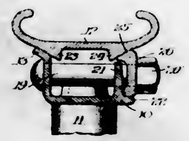
3. A lamp bracket for automobile direction indicators comprising a central tubular flexible section having its center cut away, the metal of which forms attaching ears, end sections comprising flexible tubular members telescoping within the central section, means carried by the central section for holding the end sections in their adjusted position within the central section, and means carried by the central and end sections for supporting a lamp, whereby the support can be extended to bring the end sections close to the side of the automobile and whereby the support may be bent to conform to the shape of the body of the automobile and lie close thereto.

1,391,803. SIGNAL DEVICE FOR MOTOR-VEHICLES. BUELL STANLEY, Washington, D. C. Filed Nov. 20, 1920. Serial No. 425,408. 2 Claims. (Cl. 116—52.)



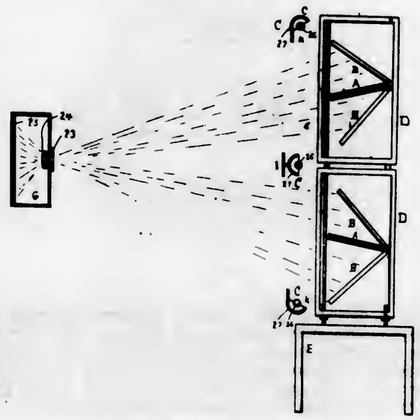
1. In a device of the character described the combination of a vehicle top front ledge, a clamp support engaged thereon, a direction indicator on the support movable in a vertical plane transverse to the vehicle, said indicator being so positioned on the bracket as to set over the top, and operating means for the indicator.

1,391,804. PIPE-GRIPPING DEVICE. BUFORD J. STEEN, Goose Creek, Tex. Filed Mar. 5, 1919. Serial No. 280,694. Renewed July 26, 1921. Serial No. 487,722. 4 Claims. (Cl. 24—249.)



1. A device of the character described, including a block formed of two sections and having a central opening to receive a pipe, a vertical slot in each section, oppositely disposed dogs pivoted in said slots and having serrated faces, and a manually operated means for forcing said dogs into engagement with said pipe.

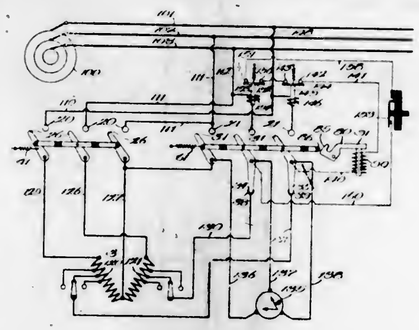
1,391,805. MACHINE FOR THE CONTINUOUS VULCANIZATION OF BANDS OR BELTS. LAWRENCE A. SUBERS, Lakewood, Ohio. Filed Dec. 13, 1920. Serial No. 430,442. 10 Claims. (Cl. 18—6.)



1. In a machine for continuously applying heat and pressure to material passing therethrough, the combination of complementary conveyer chains adapted to receive the material to be treated, means for moving said chains in the same direction and at the same speed, means for continuously heating said chains, and means for pressing said chains yieldingly together to compress and heat the material between said chains during movement of the latter.

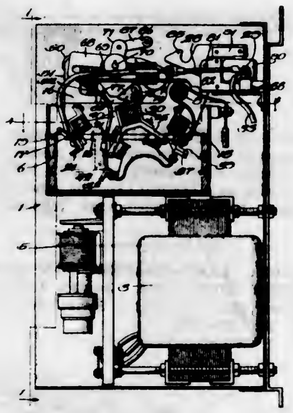
1,391,806. **DEMOUNTABLE-RIM CONSTRUCTION.** JOSEPH G. SWAIN, Akron, Ohio, assignor to The Firestone Steel Products Company, Akron, Ohio, a Corporation of Ohio. Filed Jan. 25, 1919. Serial No. 273,064. 4 Claims. (Cl. 301—19.)

1. A construction for wheels and demountable rims, comprising a fixed rim, two radially extending flanges on said fixed rim, a bearing seat on the outer edge of one of said flanges, a demountable rim, one side of said demountable rim resting on said seat, means for holding the rim on the seat comprising a locking member and a bolt passing through said flanges and said locking member, the inner edge of said locking member bearing against the fixed rim and means on said bolt to force the locking member toward the fixed rim to hold the demountable rim on its seat.



1,391,807. **IMAGE PRODUCING OR RECORDING APPARATUS.** WILLIAM E. SWALM and WILLIAM C. BRYAN, Los Angeles, Calif. Filed Dec. 9, 1914, Serial No. 876,219. Renewed July 20, 1921. Serial No. 486,187. 5 Claims. (Cl. 88—24.)

1. The combination with angularly-related image reflecting members, of an approximately transparent object adapted to be reflected, means for holding the object in position to be reflected, and means for illuminating the object causing light rays to pass therethrough.

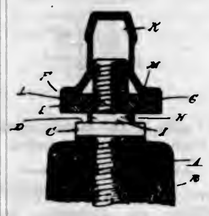


1,391,808. **SYSTEM OF MOTOR CONTROL.** HERMON L. VAN VALKENBURG, Milwaukee, Wis., assignor to Industrial Controller Company, Milwaukee, Wis., a Corporation of Wisconsin. Original application filed July 25, 1918, Serial No. 246,635. Divided and this application filed Apr. 14, 1920. Serial No. 373,771. 4 Claims. (Cl. 172—179.)

1. An alternating current compensator having a starting switch and a running switch, both tending to open, an auto-transformer, a starting circuit including said transformer and starting switch, a running circuit including said running switch, a detent for holding the starting switch closed, a second detent for holding the running switch closed, and means for tripping the first detent and thereby permitting the starting switch

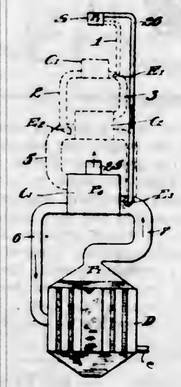
to open when the operating handle approaches initial position during its backward movement.

1,391,809. **SWITCH-MOUNTING.** HERMON L. VAN VALKENBURG, Milwaukee, Wis., assignor to Industrial Controller Company, Milwaukee, Wis., a Corporation of Wisconsin. Original application filed July 25, 1918, Serial No. 246,635. Divided and this application filed Apr. 26, 1920. Serial No. 376,473. 8 Claims. (Cl. 200—6.)



4. A motor starter having a starting switch, a running switch, an oil tank, a rock shaft axially fixed relatively to said tank, a frame pivotally mounted on said shaft and carrying the switches, means actuated by said shaft for opening and closing the switches, and an operating handle for rocking said shaft.

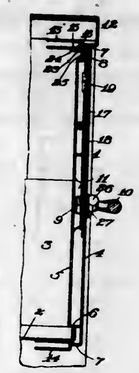
1,391,810. **ELECTRIC TERMINAL.** RALPH B. VESSEY and ALBERT SCHMIDT, Flint, Mich., assignors to Champion Ignition Company, Flint, Mich., a Corporation of Michigan. Filed Jan. 17, 1919. Serial No. 271,624. 4 Claims. (Cl. 173—259.)



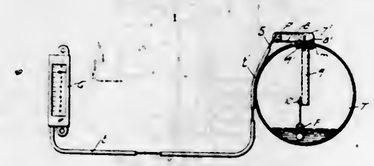
4. An electric terminal, comprising an insulated threaded stud, an annular collar on said stud forming a seat for a connector, a nut engaging the threaded stud for

exerting a clamping pressure upon an eye connector when seated on said bearing, and a shoulder on said stud

spaced from said bearing by less than the thickness of said eye connector for limiting the inward movement of said nut to form a narrow groove.



1,391,811. **STEAM SYSTEM FOR MANUFACTURING SALT AND THE LIKE.** CHARLES LEWIS WEIL, Port Huron, Mich.; Ella S. Weil administratrix of said Charles Lewis Weil, deceased. Filed Nov. 23, 1918. Serial No. 263,895. 15 Claims. (Cl. 127—16.)

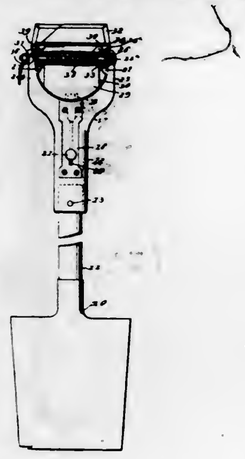


10. In manufacturing salt and the like by evaporation in a closed evaporator, where live steam is available at a relatively high pressure and exhaust steam is produced in the evaporator at a lower pressure, the method of controlling the evaporation comprising passing the live steam and exhaust steam in opposite directions through a series of steam loops so as progressively to lower the pressure of the live steam in one direction and progressively to raise the pressure of the exhaust steam in the other direction in a plurality of stages, and feeding steam to the evaporator from one of said stages at a pressure intermediate the pressures of the live steam and exhaust steam.

1,391,812. **LATCH FOR FURNITURE-DRAWERS.** ALBERT T. WEISS, Rochester, N. Y., assignor to Yawman & Erbe Manufacturing Company, Rochester, N. Y., a Corporation of New York. Filed Dec. 18, 1913. Serial No. 807,489. 2 Claims. (Cl. 292—175.)

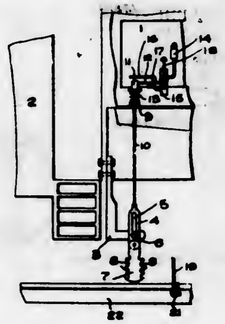
1. The combination with a drawer casing provided with a keeper on one wall thereof and a drawer in said chamber having a front wall embodying a front plate, of a latch bolt movable vertically on said drawer wall in rear of the front plate and adapted to coöperate with the keeper, an operating member on the latch bolt projecting through the front plate and a horizontally disposed rigid drawer pull on the extension of the front plate arranged to span the operating member but independent thereof.

1,391,813. **GASOLENE-GAGE.** JULIUS WILHELM, St. Louis, Mo. Filed Mar. 3, 1921. Serial No. 449,375. 1 Claim. (Cl. 73—82.)



In combination with a fluid tank, a level gage mounted at a point removed from said tank, said gage comprising a housing having a scale plate extending from one wall thereof and spaced from the opposite wall, a weight suspended behind the scale plate and having a pointer operating through said space and extending over the scale plate, a pulley within the housing, a cord traversing said pulley and having one of its ends secured to the weight, means operable by the fluid within the tank for actuating the gage, said means comprising a tube mounted within the tank, a rod traversing the tube, a lever mounted on said tube and terminating in a float, a connecting link between the lever and rod, and the aforesaid cord having its other end secured to said rod.

1,391,814. **COMBINATION FOUNDRY-TOOL.** HARRY E. WOLFE, Hastings, Mich. Filed Apr. 20, 1921. Serial No. 462,867. 4 Claims. (Cl. 294—51.)



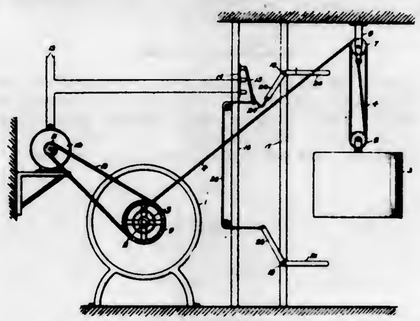
1. In a combined shovel and tamping tool, a shovel having a handle, a hollow shank applied to the handle of the shovel and terminating in diverging arms, a latch slidable with relation to the arms and adapted to

project therebetween, a tamping head rotatably mounted between the said arms and having means for engaging

the latch, and a resilient member for turning the tamping head on its pivot.

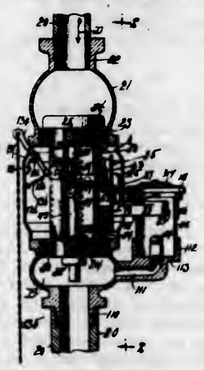
1,391,815. RAILWAY SAFETY-SIGNAL. PHILIP ADAMS, North Bay, Ontario, Canada. Filed Aug. 23, 1920. Serial No. 405,439. 3 Claims. (Cl. 246—200.)

1. In a railway safety signal, the combination with a bracket depending from the side of the cab of a locomotive, of a link pivoted thereto, said link capable of vertical movement, a depending portion hinged to the lower end of the link, said depending portion having serrated forward and rear edges, an emergency warning signal on the locomotive, means on the track for engaging the teeth of the depending member thereby pulling the link downwardly, and means connected to the link for operating the warning signal when the link is pulled downwardly.



1,391,816. PISTON-RING. JOHN AREND, Mankato, Minn. Filed July 29, 1920. Serial No. 399,846. 2 Claims. (Cl. 74—109.)

1. In a piston ring, a series of coacting ring section, comprising a central ring having its top and bottom walls converging outwardly and terminating short of the point of intersection, an upper ring section having an upper straight side and beveled lower side conforming approximately to the bevel of the central section and having its outer face and beveled edge intersecting to produce an angular lower edge, a lower ring section having a straight lower side and a beveled upper side coacting

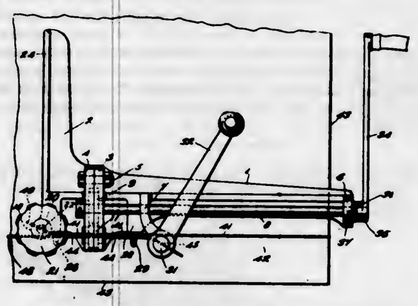


with the beveled side of the middle section, and having its outer upper edge downwardly beveled.

1,391,817. REWINDING APPARATUS FOR GAS-MACHINE MOTORS. ES. ATHERTON, Maquoketa, Iowa. Filed Apr. 8, 1920. Serial No. 372,273. 2 Claims. Cl. 185—33.)

1. The combination with a winding drum, of a weight, a cable supporting the weight and adapted to wind upon and unwind from the drum, an electric motor geared to the drum for operating the same to wind the cable on the drum, bell cranks pivotally supported respectively above and below the weight and each comprising angularly disposed arms, one of which projects into the path of the weight, an electric switch controlling the electric motor and having a movable member that has a support independent of the crank arms, and flexible cables connected to the other arms of the bell cranks and to the movable member of the switch to respectively move it in opposite directions.

1,391,818. AUTOMATIC VALVE-CLOSER. AURELIO BARCHIESI, Jersey City, N. J., assignor of two-fifths to Angelo Baratta, Jersey City, N. J., and one-fifth to Giovanni Squarcialupi, New York, N. Y. Filed Feb. 20, 1920. Serial No. 360,225. 6 Claims. (Cl. 67—117.)

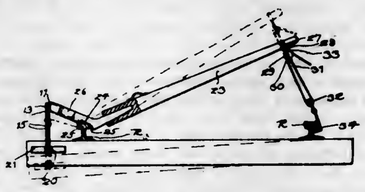


1. In an automatic valve closer the combination of a valve for a gas conduit, a stem for the valve, means to manually raise the valve, a spring actuated toe normally locking said stem in position, means to heat the spring of said toe and thereby unlock it from the stem, a second spring actuated toe locking with said stem when the spring thereof is heated and releasing the said valve stem when the latter spring is at its normal temperature.

1,391,819. CAR-REPLACER. THOMAS HENRY BELLOWS, Walla Walla, Wash. Filed Feb. 5, 1921. Serial No. 442,792. 4 Claims. (Cl. 104—265.)

1. In a car replacer, a body portion, said body portion having a cut out portion at either end thereof providing arms, a track section having a tongue, said tongue adapted to be disposed between the arms of the body portion at either end thereof, each of said arms having a notch formed therein, means carried by the track section and adapted to be positioned within the notches of the arms for restricting movement of the track sections with respect to the body portion, and means passing through the body and track sections for securing the body portion and track section against movement.

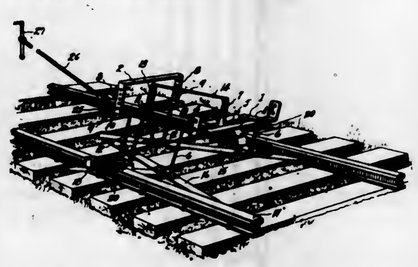
1,391,820. PORTABLE WIRE-TYING MACHINE. WILLIAM M. BOENNING, Manitowoc, Wis., assignor to Alec J. Gerrard, Chicago, Ill. Continuation of application Serial No. 250,685, filed Aug. 20, 1918. This application filed June 5, 1920. Serial No. 386,692. 15 Claims. (Cl. 140—93.)



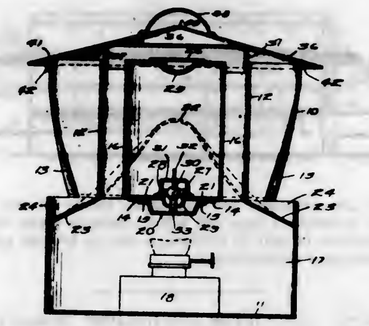
1. In a wire tying machine, the combination of a frame having a flat surfaced bottom adapted to contact with the top of the box to be wired; an extension of said frame adapted to overlie the edge of said box and provided with an operating handle; a second extension of said frame disposed at an angle to said first named extension and adapted to aid in steadying the machine during the wire twisting operation; means for putting the wire under tension; and means operated by said handle adapted to twist together two lights of said wire while under tension, substantially as described.

1,391,821. FISH-COOKER. ARTHUR SCOVILL DAVIES, Santa Cruz, Calif. Filed Dec. 26, 1918. Serial No. 268,359. 3 Claims. (Cl. 126—41.)

1. A fish cooker, comprising a suitable oven, with upper entrance and exit openings, having a pair of rails projecting therethrough, and trap doors providing closures; lower smaller openings, with a pair of rails projecting therethrough; an endless sprocket-driven wire mesh fish conveyer, with cross rods bracing the conveyer against sagging, and sliding on the various rods for support; a partition beneath which there is a suitable heat producing means, of absorbent material to catch oil drippings, slightly spaced from the oven sides to provide heat passages; and supporting means for the partition, including a pipe coil which contains water for the conduction of heat to all corners and to provide an even temperature distribution.



1,391,822. TIE LIFTER AND HOLDER. ROBERT EVANS, Othello, Wash. Filed Feb. 26, 1921. Serial No. 447,995. 2 Claims. (Cl. 254—121.)

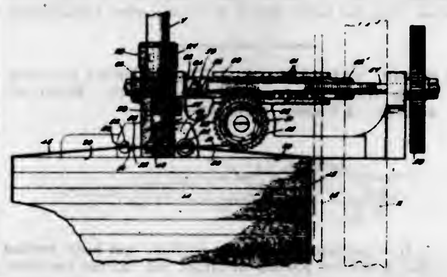


1. In a device of the type described, a lever adapted adjacent one end for engagement with a rail, toggle tongs carried by said end for engaging a tie to be elevated and means for connecting the opposite end of the lever and the other rail of the track for elevating the first named end of the lever and holding said end in elevated position, comprising a rail engaging hook, a block and tackle connection between said hook and the last named end of the lever, and means associated with the flexible element of said block and tackle normally preventing movement of the flexible element in a direction permitting separation of the blocks thereof.

1,391,823. WEED-CUTTER. MERTON W. FLEET, National, Wash. Filed June 15, 1920. Serial No. 389,216. 3 Claims. (Cl. 56—230.)

2. The combination with frame members of a railway car or the like mounted to travel upon parallel rails, of a weed cutting device comprising a pair of rearwardly converging cutting blades suspended beneath said frame members to operate between the said rails, laterally extending blades fixed to the first named blades to overlie and extend beyond the said rails and means operable from the car for moving the blades to and from cutting position.

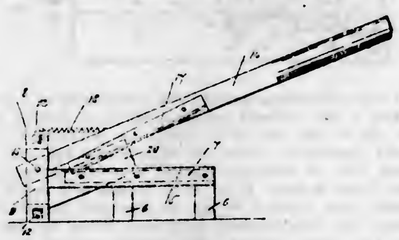
1,391,824. WATERER AND FEEDER. HENRY A. FOSTER, Des Moines, Iowa. Filed Mar. 25, 1921. Serial No. 455,687. 2 Claims. (Cl. 119—52.)



1. In a device of the class described, an outer cylindrical casing, an inner casing spaced from said outer casing and terminating short of the lower end of said outer casing, supporting members mounted in said outer casing substantially at the lower edge of the inner casing, a tank arranged to rest on said supporting members within the inner casing and spaced therefrom, a water trough arranged below said inner casing and tank and projecting to the outer casing, said outer casing having openings for permitting access to the ends of said trough, a partition member between the outer and inner casing, having raised portions above the ends of said trough and lower portions at points between the ends of the trough, said lower portions forming the bottom of troughs for feed, the walls of said outer casing being cut and forced inwardly above the lower parts of said partition to provide access to such lower parts, said lower parts of said partition being inclined downwardly and outwardly and terminating at their outer edges below the points where said outer casing is cut.

1,391,825. APPARATUS FOR DEVOLATILIZING COAL, WOOD, SHALES, &c. CLAUDE M. GARLAND, Chicago, Ill. Filed Mar. 3, 1919. Serial No. 280,294. 15 Claims. (Cl. 202—9.)

1. In coking apparatus of the type described a heating chamber, a retort extending through the said heating chamber and a plurality of parallel partitions vertically disposed within the said retort.

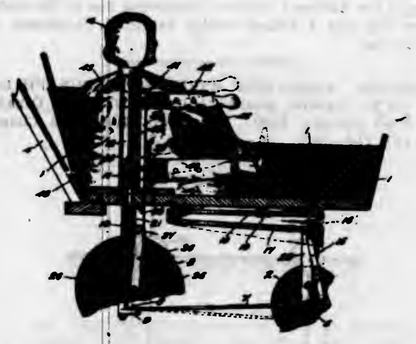


1,391,826. AUTOMATIC WIRE STRETCHING AND TWISTING MACHINE. ALEC J. GERRARD and PARVIN WRIGHT, Chicago, Ill. Filed Oct. 30, 1920. Serial No. 420,739. 10 Claims. (Cl. 100—31.)

1. In a wire tying machine the combination of means for compressing a bundle; means for holding one end of wire while being passed around the compressed bundle; means for automatically tensioning said wire to a predetermined degree after passing the same around the compressed bundle; and means for twisting together two bights of said wire while under tension, substantially as described.

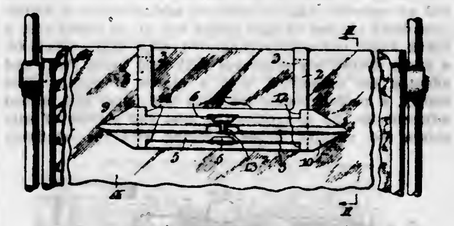
10. In a wire tying machine the combination of a standard; a bundle supporting means adjustable up and down said standard; a wire tensioning and twisting mechanism; a supporting frame for said mechanism having a flat bottom adapted to rest on and compress a package carried by said supporting means; means associated with said mechanism for holding one end of the wire while it is being tensioned; means associated with said mechanism for automatically tensioning the wire to a predetermined degree; means associated with said mechanism for severing the other end of the wire after the twisting operation; means for moving said wire tensioning and twisting mechanism and said frame to cause the bottom of the latter to compress said package; and automatic means to lock said flat bottom in its compressing position, substantially as described.

1,391,827. SHEARS. OSCAR ALEXANDER GOETZE, Golden, Colo. Filed Sept. 20, 1920. Serial No. 411,407. 1 Claim. (Cl. 164—41.)



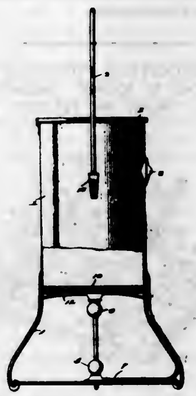
A shears for cutting soft metal, comprising a stationary platen, a stationary blade secured to the rear edge of the platen and having a sharp cutting edge, an upright secured to one end of the platen, a bar having its end portions secured against the rear side of the upright, a space being formed between the middle portions of the said upright and bar, a pivot pin having its end portions supported in the middle parts of the said upright and bar, a cutter lever engaging with the middle part of the pivot pin and working in the said space, a guide arm for the cutter lever secured at one end to the said bar adjacent to the lever pivot and projecting laterally from the said bar and parallel to the cutter lever and bearing against its rear side and preventing the cutter lever from being pressed rearwardly away from the stationary blade, and a blade secured to the front side of the cutter bar and having a sharp cutting edge which cuts off the soft metal against the sharp cutting edge of the stationary blade.

1,391,828. CLAMP. FREDERICK HACHMANN, St. Louis, Mo., assignor to William H. Gregg, trustee, St. Louis, Mo. Filed Mar. 15, 1920. Serial No. 365,938. Renewed May 11, 1921. Serial No. 468,728. 3 Claims. (Cl. 144—304.)



1. A clamp comprising a yoke having oppositely disposed thrust-receiving arms, one of said arms being in the form of a channel having a web and marginal flanges extending therefrom, a threaded thrust-receiving tube between said flanges, said web having an extended end portion turned downwardly and backwardly to form a seat for one end of said thrust-receiving tube, and a clamping screw mounted in said thrust-receiving tube.

1,391,829. FIGURE WHEELED TOY. RUDOLPH C. HARTLEB and THOMAS J. LEVEY, Baltimore, Md., assignors to The Cambridge Mechanical Toy Company, Cambridge, Md., a Corporation of Maryland. Filed Sept. 28, 1920. Serial No. 413,379. 8 Claims. (Cl. 46—45.)

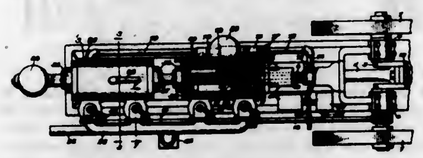


1. In a toy the combination of a support; front wheels and rear wheels provided with axles turning therewith for carrying said support; a figure mounted on said support having arms and legs, and a head adapted to oscillate from side to side; a vertically disposed member rigid with said head and provided with a crank; a second crank, carried by the axle of said front wheels; a connection between said cranks for oscillating said head as said front axle revolves; a third crank, carried by the rear axle; and a connection between said third crank and a leg and an arm for moving the latter up and down as said crank revolves; substantially as described.

1,391,830. SIGNALING DEVICE FOR AUTOMOBILES. WILLIAM L. HEWES, Springfield, Mass. Filed July 24, 1920. Serial No. 398,718. 5 Claims. (Cl. 116—30.)

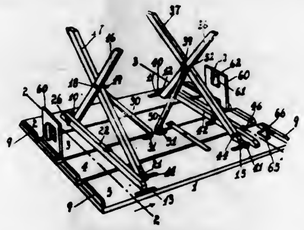
4. A device of the character described comprising a mounting plate with means for mounting it at the rear of the wind shield of an automobile, toward the driver overhanging guide and retaining means outstanding rearward from said plate at the center thereof, and a signaling member at the rear of said plate slidable in said guide means so that either end thereof may be projected beyond the corresponding end of the plate to an extent limited by engagement of the other end thereof with said guide means.

1,391,831. ELECTRIC LANTERN. LOUIS AUGUST HORNBURG, Omaha, Nebr. Filed Mar. 25, 1921. Serial No. 455,678. 3 Claims. (Cl. 240—8.5.)



3. A self contained electric lantern, comprising a container adapted to hold a cell or battery, an open wire frame attached to its lower end, a pair of lamps of different colors supported in said frame and arranged one above the other, a reflector attached to the bottom of the container above the lamps and adapted to serve each of the lights, electrical connection for supplying energy from said battery to said lamps, and a switch controlling said connections for opening the lamp circuits or independently closing the same.

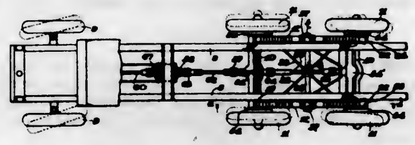
1,391,832. INTERNAL-COMBUSTION ENGINE. LANSON B. JOYNER, Washington, La. Filed Mar. 29, 1920. Serial No. 369,762. 2 Claims. (Cl. 123—57.)



2. In an internal combustion engine, a pair of horizontally disposed co-axially alined water jacketed cylinders, a hollow piston rod extending through said cylinders and having its ends projecting beyond the remote ends thereof, a hollow piston rigidly mounted on said piston rod within each cylinder and arranged for recipro-

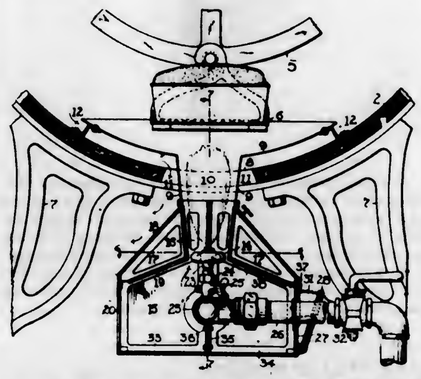
cation therein, said piston rod being provided with closures in the portions of its inner bore encompassed by said pistons and with passages communicating with the cavity in each of said pistons and with the piston rod at opposite sides of each of said closures, a hollow cross-head carried by said piston rod at its outlet end, a crank shaft operatively connected with said cross-head, a pump operatively connected with said crank shaft and adapted for connection with a source of cooling fluid supply, a conduit connecting with said pump and formed adjacent its end to receive the inlet end portion of said piston rod, packing means engaging with the relatively

moving portions of said piston rod and said conduit for preventing loss of the cooling fluid passing therethrough, a second conduit connecting said hollow cross-head with the water jackets of said cylinders, said last named conduit comprising telescopingly arranged sections having packing means engaging the relatively moving sections thereof to prevent loss of the cooling fluid passing therethrough while permitting free functional movement of the piston rod and the section of the last named conduit joined thereto, and a conduit communicating with said water jackets and adapted for connection with the source of cooling fluid supply.



1,391,833. COMBINATION FOLDABLE TABLE AND BENCH. RALPH L. KAISER, Oakland, Calif. Filed Nov. 10, 1920. Serial No. 423,149. 1 Claim. (Cl. 45—116.)

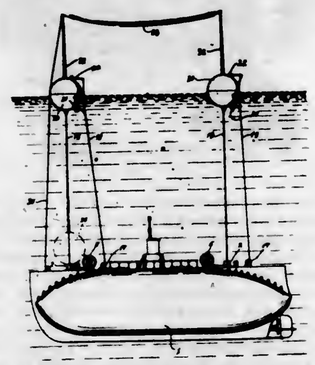
A foldable table including a plurality of leaves hinged together, two pairs of legs, each pair being pivoted together, cleats on the upper end of each of said legs, straps secured to the underside of the outer leaves into which said cleats are introduced to mount the table leaves unfolded on said legs, two bars, a cleat on one end of each bar, a strap on the underside of each of the outer leaves to receive a cleat on one bar with said bars against the underside of said leaves, each of said bars having a hole in its other end, a bolt extending through the upper end of one of the legs of each pair and through said holes, and nuts screwing on the end of said bolts.



1,391,834. MOTOR-DRIVEN VEHICLE. RUDOLPH E. KERLIN, Cudahy, Wis. Filed Oct. 15, 1920. Serial No. 417,113. 10 Claims. (Cl. 180—22.)

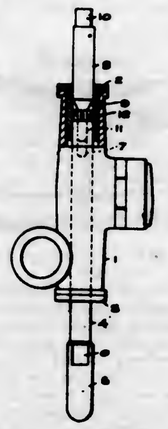
1. In a vehicle, the combination with the vehicle frame, of a wheeled structure supporting said frame comprising a front wheeled truck having a free lateral movement and a rear wheeled truck having a swinging movement relative to said frame, supporting springs operatively connected to said wheeled trucks and to said frame, and a connection between said wheeled trucks controlling the

swinging movement of the rear truck on the lateral movement of the front truck.



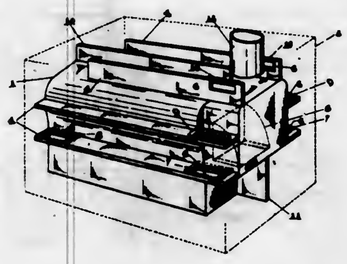
1,391,835. BAKING-OVEN. HARRY E. KERR, Cleveland, Ohio, assignor to The Federal System of Bakeries of America, Davenport, Iowa, a Corporation of Delaware. Filed Dec. 22, 1919. Serial No. 346,647. 18 Claims. (Cl. 107—59.)

1. A baking oven having an upwardly flaring combustion flue extending into its bottom, a gaseous fuel burner within the reduced mouth of said flue, and an inclosed frame for said burner having an air intake.



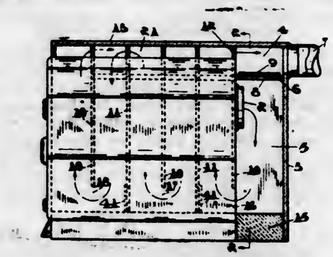
17. A heating appliance for a baking oven, comprising a box having a vertical combustion flue at its center and top and a hinged section extending lengthwise of said flue.

1,391,836. SUBMARINE WIRELESS-TELEGRAPH DEVICE. GABRIEL KLEM, Gardenton, Manitoba, Canada. Filed Oct. 25, 1920. Serial No. 419,219. 3 Claims. (Cl. 114—16.)



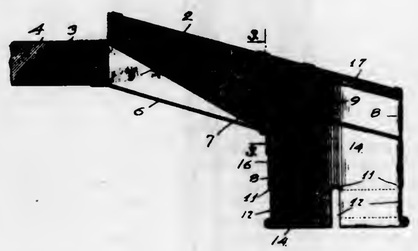
1. A device of the class described comprising floats adapted to be raised or lowered, means on a submarine boat for raising or lowering said floats, means for filling or emptying said floats, one of said floats being situated at each end of said boat, staffs extending from the upper surface of said floats, and an antenna stretched between said staffs.

1,391,837. BUSHING REMOVER. HERMAN KONOPASKA, Paris, Ontario, Canada. Filed May 3, 1920. Serial No. 378,641. 5 Claims. (Cl. 29—88.2.)



1. A bushing remover comprising a rod adapted to extend through a bushing, a split ring on said rod, and means operating against the opposite sides of the ring for expanding the split ring against the interior of said bushing.

1,391,838. HEATING APPARATUS. ARTHUR J. LA FAY, Toronto, Ontario, Canada, assignor of one-half to Hugh R. Tudhope, Orillia, Ontario, Canada. Filed Mar. 25, 1919. Serial No. 284,962. 5 Claims. (Cl. 122—494.)



3. The combination with a fluid heating furnace of the horizontal type having a smoke exit at one end of an external casing spaced therefrom at the sides, top and smoke outlet end; longitudinal baffle plates dividing the space between the sides and top of the furnace and the external casing into a plurality of communicating flues; a depending flue with which the smoke collar communicates extending down to the level of the lower baffle plates; a smoke outlet leading from the uppermost flue; and dampers whereby the products of combustion may be allowed to pass either substantially directly to the smoke outlet or caused to pass in zig-zag fashion through two or more flues at each side of the furnace to the smoke outlet; a partition extending from the end of the furnace to the end of the external casing, below the depending flue, dividing the lowermost flues from one another, and a partition extending along the top of the furnace dividing the uppermost flue.

1,391,839. HEATING APPARATUS. ARTHUR JOSEPH LA FAY, Toronto, Ontario, Canada, assignor of one-half to Hugh R. Tudhope, Orillia, Ontario, Canada. Filed Aug. 16, 1920. Serial No. 403,974. 3 Claims. (Cl. 122—225.)

1. The combination with a fluid heating furnace of the horizontal type provided with internal flues for the products of combustion and spaces for the fluid to be heated externally bounded by the casing of the furnace, of an external casing spaced from the sides and top of the furnace, a smoke outlet at the end of the external casing, depending baffles dividing the space between the furnace and external casing into a plurality of vertical flues, the upper part of said baffles extending over the top of the furnace casing, a plurality of baffles alternately disposed between the first mentioned baffles, said last mentioned baffles, extending only partly across the top of the furnace casing and forming openings communicating with the flue spaces between the said baffle plates, angularly disposed walls extending between the top of the furnace casing and the top of the external casing, the said walls forming triangular shaped return flues communicating with the vertical flues, a chamber opening into the smoke outlet, a jacket adapted for the reception of the products of combustion from the furnace, a damper controlling the communication between the chamber and jacket, said chamber communicating with the return flues and smoke outlet, the upper part of the first mentioned baffles adapted to direct the products of combustion from the jacket to the said return flues and the smoke outlet.

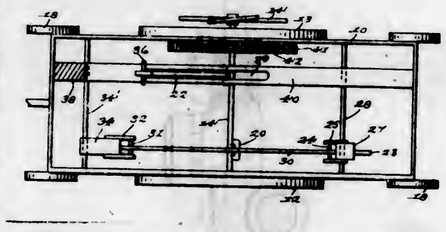
1,391,840. COIN RECEIVING AND DELIVERING DEVICE. VIVIAN A. LEACH, San Francisco, Calif. Filed Oct. 22, 1919. Serial No. 332,846. 2 Claims. (Cl. 133—1.)

1. As an article of manufacture, a coin receiving and delivering device comprising an inclined chute adapted for engagement to the edge of a shelf or the like for receiving coins; a housing mounted upon the lower end

of the chute having an orifice connecting the interior of the housing with the chute; an inner housing slidably mounted within the first mentioned housing, and having an orifice adapted to register with the first mentioned orifice when said inner housing is raised, said inner housing being open at both ends thereof and provided with a plurality of longitudinally disposed slots in the sides thereof; inwardly turned lugs formed upon the bottom of the outer housing, and adapted to engage the slots in the inner housing for limiting the downward movement of said inner housing, whereby the housing orifices are normally retained in a non-registered relation.

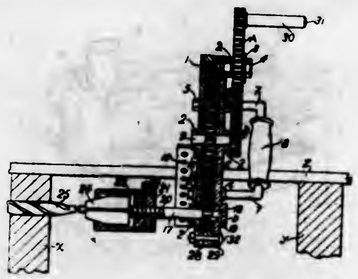
2. As an article of manufacture a coin receiving and delivering device comprising an inclined chute adapted at the upper end thereof for engagement with a shelf or the like, said chute being offset longitudinally along a median line whereby coins on either side of said line may be held in different planes to prevent binding of said coins within the chute; a housing mounted upon the lower end of the chute and having an orifice for the passage of coins from said chute to said housing.

1,391,841. LANDING-NET. FRANK R. LEWIS, San Francisco, Calif. Filed July 30, 1919. Serial No. 314,216. 7 Claims. (Cl. 43—12.)



1. In a device of the character described, a rigid handle, a landing net hoop freely pivoted to one end of said handle, means for bringing the hoop and handle into folded interlocked relation to each other and means embodied within the hoop structure for frictionally engaging the handle and holding the hoop and handle in their unfolded positions to each other.

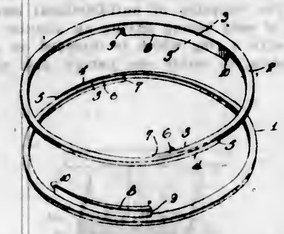
1,391,842. BLADE-HOLDER. ROY L. LIGHTFOOT, San Antonio, Tex. Filed May 9, 1919. Serial No. 295,995. 1 Claim. (Cl. 30—25.)



A blade holder including a handle formed of grips spaced apart, said grips terminating in opposing jaws which are connected at their outer extremities and spaced apart to receive a blade between them, a shaft having a swiveling connection with one grip and being threaded through the other, a disk on said shaft whereby the shaft may be turned and said jaws thereby clamped against and released from the blade between them.

1,391,843. FIGURE WHEELED TOY. ANTONI MARKIEWICZ, Detroit, Mich. Filed Mar. 5, 1921. Serial No. 449,992. 2 Claims. (Cl. 46—45.)

1. A toy of the character described, comprising a wheeled frame, a shaft rotatably arranged in said frame, a pair of large wheels on said shaft, and a toothed wheel on said shaft, a link on said shaft, a toy figure, a link connection pivotally secured to said link and connecting it with said toy figure, an inclined saw pivotally secured to the opposite end of said link, a toy figure adapted to be operated by said inclined saw upon the rotation of said shaft, a horizontal, slotted saw adapted to be operated by said first named toy figure upon its operation by said link connection, a second toy figure at the opposite end of said horizontal saw, a wind-mill, and a second gear meshing with said first named gear for operating said wind-mill when the toy is trunneled along a floor for the operation of said toy figures and saws.

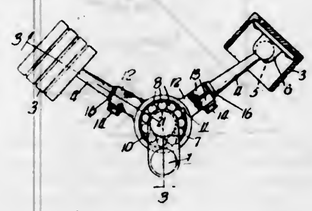


1,391,844. ELECTRICIAN'S JOIST - BORING TOOL. JAMES C. MOORE, Smyrna, N. Y. Filed Jan. 26, 1920. Serial No. 354,312. 1 Claim. (Cl. 144—105.)

A portable joist-boring tool, comprising a frame or casing supporting gear and having a bit chuck projecting from one face, a pair of bracket plates on opposite edges of said frame having alined perforations to receive a rod transversely to said bit projecting beyond the frame to rockingly support the same on spaced supports and handle grips projecting from the opposite face at opposite edges.

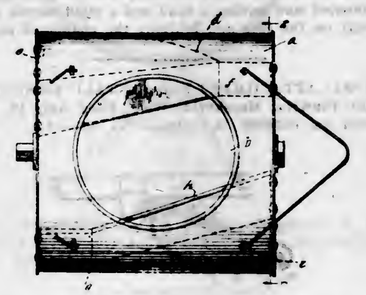
1,391,845. PISTON-RING. MATHEW M. MORATTA, Princeton, Ind. Filed Oct. 29, 1920. Serial No. 420,403. 3 Claims. (Cl. 74—109.)

1. A piston ring comprising a pair of complimentary circular members having their ends separated and adapted to be overlapped for a considerable portion of their surfaces, the outer overlapped end portion being tapered to a fine point, the inner overlapped portion being cut abruptly to provide a shoulder, and a flange formed ap-



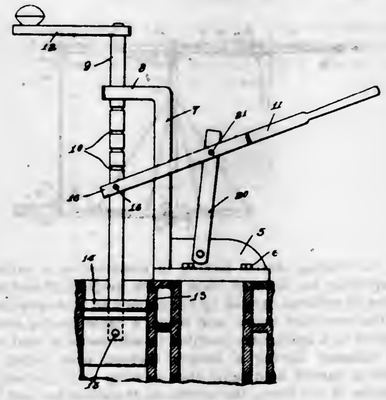
proximately diametrically opposite the said overlapped end, and of tapered formation to provide an abutment member adapted to engage the said shoulder, of the corresponding complimentary member.

1,391,846. METHOD OF FASTENING CUSHION-TIRES TO RIMS. LOUIS F. NIENABER, St. Paul, Minn., assignor to Lambert Tire & Rubber Co., Incorporated, Akron, Ohio. Original application filed May 21, 1920, Serial No. 383,277. Divided and this application filed Aug. 23, 1920. Serial No. 405,262. 2 Claims. (Cl. 154—12.)



1. The method of fastening cushion tires to rims which consists in building the base portion of the tire on the rim, fastening the base to the rim at intervals and tying the base by encircling members to the fastening means.

1,391,847. CONNECTING-ROD. REINHOLD A. NORLING, Aurora, Ill., assignor to Independent Pneumatic Tool Company, Chicago, Ill., a Corporation of Delaware. Filed May 22, 1920. Serial No. 388,476. 9 Claims. (Cl. 74—17.)



7. The combination with a crank pin and two pistons working in cylinders on opposite sides of the crank pin and arranged at an angle to each other and in the same plane, of connecting rods connecting the pistons with the crank pin, each rod having a pitman and a bearing sleeve surrounding said crank pin, said bearing sleeves being arranged side by side and each connected with its pitman with the longitudinal axis of the pitman offset inwardly from the center of the width of the sleeve, each sleeve having an inwardly extending annular flange at its inner side, bearing rollers between the crank pin and each sleeve and having their inner ends against said flange, and said crank pin having end thrust surfaces on opposite sides of said sleeves, one end thrust surface for the outer ends of the bearing rollers of each sleeve.

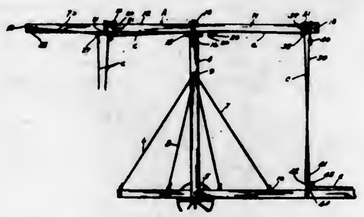
1,391,848. WASHING - MACHINE. FREDERICK OWEN, Detroit, Mich. Filed Feb. 28, 1921. Serial No. 448,297. 15 Claims. (Cl. 259—85.)

1. In a washing machine, a drum arranged for containing clothes and for a cleansing liquid, said drum having blades therein with portions having right and left hand pitches or helical arrangements on the drum, each blade extending substantially from end to end of the cylinder.

1,391,849. PISTON - GRINDING MACHINE. ORRIN PERKINS, Fayette, Mo. Filed Oct. 13, 1920. Serial No. 416,613. 1 Claim. (Cl. 51—26.)

In a grinding machine, a base, a standard having connection with the base, said standard having a right angled upper extremity, said right angled upper extremity having an opening providing a bearing, a rotatable shaft supported within the bearing, said shaft having a plurality of circumferential grooves disposed in spaced relation with each other, an adjusting lever, a collar having pivotal connection with the adjusting lever, set screws extending through the collar and having their ends disposed within a predetermined groove of a shaft to connect the adjusting lever and shaft, means for connecting a piston to one end of the shaft, and means for rotating the shaft.

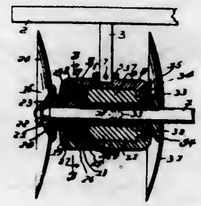
1,391,850. OINTMENT-APPLICATOR. WILLIAM A. E. PFAFF, Kansas City, Mo. Filed July 10, 1919. Serial No. 309,864. 6 Claims. (Cl. 128—261.)



1. An instrument of the character described, comprising a channeled core having a head and a rigid sheath fitting slidingly on the core and bridging the channeled portion.

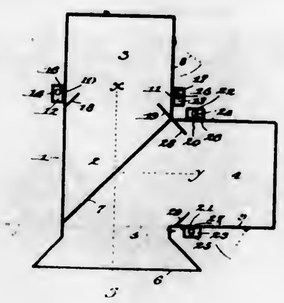
1,391,851. ATTACHMENT FOR CANTALIVER-SPRINGS. PAUL PIRWITZ, Marshfield, Wis. Filed Apr. 19, 1921. Serial No. 462,558. 5 Claims. (Cl. 267—41.)

1. A device of the character described, comprising an upper section adapted to be secured to the under side of a cantaliver spring; a lower auxiliary spring section adapted to be secured, at a point spaced inwardly from the outer end thereof, to the axle of the vehicle; a shackle pivotally connecting the outer end of the upper section with the projecting outer end of the lower section; and means for pivotally connecting the inner end of the lower section to the inner end of the cantaliver spring with which the device is to be used.



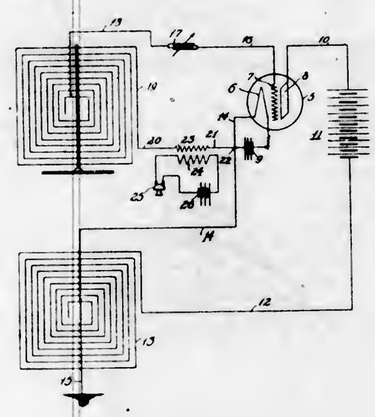
1,391,852. LOADING DEVICE. JACOB PLEIN, Plainview, Minn. Filed Oct. 22, 1920. Serial No. 418,859. 9 Claims. (Cl. 214—95.)

1. A loading device having in combination a structure comprising an elevated boom which projects therefrom, a series of sheaves carried by the boom and a sheave carried by the structure below said boom, a cable having one end secured in a stationary position in said boom, a load carrying member having a sheave thereon over which said cable is passed, said cable then passing over the series of sheaves on the boom, the sheave on the structure and being secured to a power means, the other end of the cable being secured in a stationary position at some distance from said structure, a second sheave on said load carrying member over which said cable is then passed, and a plurality of sheaves secured to fixed points also distant from said structure over which the cable passes to the power means.



1,391,853. DISK-HARROW SPINDLE AND BOXING. RAY A. PRESS, Grinnell, Kans. Filed Mar. 30, 1921. Serial No. 456,890. 1 Claim. (Cl. 64—10.)

In a disk harrow spindle, a boxing, a shaft, a pair of harrow disks mounted upon the shaft and having their adjacent faces provided with spindle sleeves, slot and lug connections uniting the sleeves, whereby both disks may operate together, an annular ring threaded to one of the sleeves, a second annular ring fitted in the boxing, the two rings having adjacent beveled faces provided with raceways for the reception of anti-frictional members, the outer end of said boxing having an annular flange cooperating with a ring which is threaded on one of the spindle sleeves, to retain one harrow disk and spindle



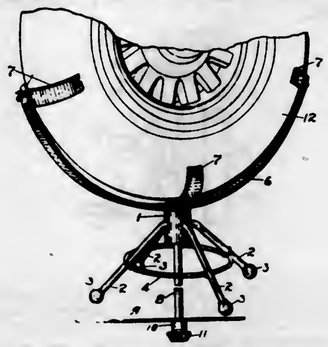
sleeve on the shaft, the other end of the boxing having a radial flange, and an interior radial flange, a flange on the spindle sleeve of the other harrow disk engaging between the last two mentioned flanges to connect the second harrow disk to the boxing, the interior of the boxing near one of the rings having an annular flange, and a hard wood filler sleeve mounted on the boxing surrounding the two spindle sleeves and interposed between the interior flanges of the bearing boxing.

1,391,854. APPARATUS FOR PRODUCING STAGE ILLUSIONS. GUS ROGERS and NICHOLAS E. POLYTES, New York, N. Y. Filed Apr. 30, 1920. Serial No. 377,821. 2 Claims. (Cl. 46—70.)

1. In a device of the class described, the combination of a pair of chambers arranged at right angles to each other and in each of which an object for observation may be located, a sheet of glass interposed diagonally at the mouths of said chambers, separate lighting means for each of said chambers, separate shutters for each of said lighting means, and means for concomitantly operating said shutters to effect the darkening of one of said chambers and the lighting of the other of said chambers whereby the objects in said chambers may appear to blend and dissolve into each other.

1,391,855. WIRELESS TRANSMITTING SYSTEM. HENRY K. SANDELL, Chicago, Ill., assignor to Herbert S. Mills, Chicago, Ill. Filed Nov. 28, 1919. Serial No. 340,998. 3 Claims. (Cl. 280—17.)

1. In a wireless transmitting system, an electron tube having an input and an output circuit, a loop aerial in series in the input circuit, and a loop aerial in series in the output circuit and in proximity to the first mentioned loop.

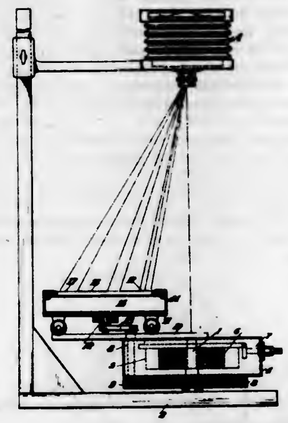


1,391,856. STAMPING DEVICE. FRANK J. SCHMIDT, Chicago, Ill., assignor to A. Stein & Company, Chicago, Ill., a Corporation. Filed Mar. 10, 1921. Serial No. 451,256. 7 Claims. (Cl. 101—368.)

1. In a device of the class described means for resisting, after a degree of pressure has been established between the face of the type and the imprintable surface, further pressure between said face and said surface.

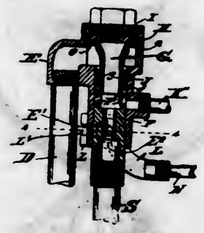
1,391,857. SUPPORT FOR TIRE-CASINGS, &c. ALOYS P. SCHMITT, Buffalo, N. Y. Filed Sept. 30, 1919. Serial No. 327,517. 1 Claim. (Cl. 211—24.)

In a tire holder, a vertical cylindrical shaped body, a shaft bearing hole formed longitudinally through the center of said body, said body supported by means of legs comprising rods inserted at right angles into said body and bent downward to meet the floor at an angle, a ring fastened to each of said legs to form a brace for said legs, a semi-circular shaped holder mounted on said body by means of a shaft extending through the hole in said body, said holder being formed of a flat strip of material and



having flat semi-circular shaped arms fastened at right angles to said holder and means to rotate said shaft and holder, as shown and described.

1,391,858. PROCESS OF PRODUCING BARIUM CHLORATE. EUGENE P. SCHOCH, Austin, Tex. Filed Sept. 13, 1920. Serial No. 409,794. 4 Claims. (Cl. 23—13.)

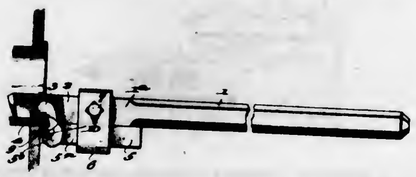


4. The continuous process of making barium chlorate which consists in treating a hot solution of barium hydroxid with chlorin to form a mixture of barium chlorate and barium chlorid in solution; continuing the addition of the reacting ingredients until said solution is saturated with barium chlorate; cooling said solution to precipitate mixed crystals of said chlorate and chlorid; and recovering in a substantially pure form said barium chlorate, substantially as described.

1,391,859. PROCESS AND DEVICE FOR PRODUCING GUILLOCHES AND THE LIKE. ARTHUR SCHULZE, Berlin, Germany. Filed Sept. 27, 1919. Serial No. 327,012. 10 Claims. (Cl. 88—24.)

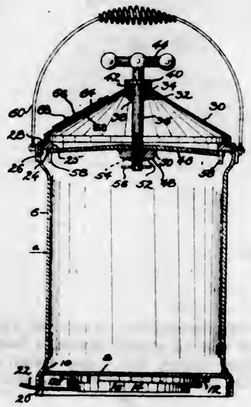
1. A device for producing guilloches comprising means for causing a luminous spot to describe a symmetrical closed orbit corresponding to a desired guilloche, and photographic means for photographing the successive positions of said spot in said orbit.

1,391,860. WATER-INLET VALVE FOR FLUSHING-TANKS. WILLIAM SHERWOOD, Detroit, Mich. Filed Oct. 30, 1920. Serial No. 420,767. 3 Claims. (Cl. 137—104.)



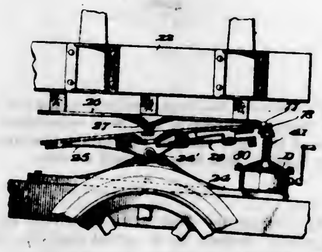
3. In a device of the character described; a flushing tank; a valve body in said tank; a reciprocating sleeve in said body; an annular valve having a flaring end carried by said reciprocating sleeve; a disk valve seat supported on an annular flange formed integral with the valve body; a screw threaded plug screwed into said body to secure said disk valve seat in position; a cup-washer supported between the annular valve and the reciprocating sleeve; a float lever fulcrumed upon trunnions integral with the valve body, and a pair of opposing set screws carried by the reciprocating sleeve for connecting the float lever with the reciprocating sleeve adjacent to the fulcrum of the float lever.

1,391,861. DEVICE FOR ATTACHING SIGNS TO GLASS. LEWIS MARION SMITH, Pocatello, Idaho. Filed June 7, 1919. Serial No. 302,502. 1 Claim. (Cl. 248—39.)



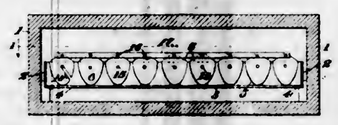
A vacuum sticker comprising an integral rubber structure providing a body having an inner flat face and an outer surface which is rounded both transversely and longitudinally, said body being thicker at one of its ends than at its other end and having its flat face, at its thickened portion formed with a cup-shaped depression, the said flate face, at the narrow portion of the body having spaced concentrically arranged ribs and having a transverse in-cut portion on its flat face between the outer rib and the cup-shaped depression whereby to provide a yieldable connection between the portions, to permit of the outward movement of the ribbed portion without interfering with the vacuum in the cup, and to also cause the said ribbed portion to spring against and lie flat upon the article engaged thereby.

1,391,862. BOILER-FLUE TOOL. CHARLES M. SPANGLER, Emporium, Pa. Filed May 4, 1921. Serial No. 466,722. 3 Claims. (Cl. 81—15.)



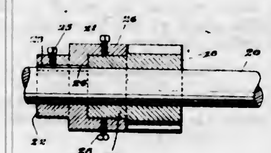
1. A boiler flue tool comprising a lever or handle provided with a jaw having a fulcrum adapted to engage the inner surface of the flue which is to be removed, a bending or prying jaw adapted to engage the outer flange of the tube, said jaw being slidable lengthwise of the lever or handle aforesaid for the purpose of positioning it as desired in relation to the jaw and fulcrum, and a yoke embracing the shanks of the aforesaid jaws and provided with means for locking the bending jaw.

1,391,863. PRESSURE-COOKER. HENRY R. SPANGLER, Denver, Colo. Filed July 21, 1919. Serial No. 312,415. 2 Claims. (Cl. 53—1.)



1. In a pressure cooker, a container, a cover therefor to maintain pressure, retaining devices on the bottom of the cooker, and an electric heater held by said devices in close engagement with the bottom of said container, whereby pressure within the container against said bottom increases and maintains the said close engagement by reason of curvature produced in said bottom by the pressure within the cooker.

1,391,864. MOTOR-VEHICLE. DUNCAN G. STANBROUGH, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed Jan. 31, 1918. Serial No. 214,732. 7 Claims. (Cl. 280—33.1.)



1. A trailer attaching unit comprising a member for attachment to a tractor vehicle, a member for attachment to a trailer vehicle, one of said members being pivotally mounted, connecting means between said members, and means engageable with said pivoted member for moving said member on its pivot to raise the other member.

1,391,865. INCUBATOR-TRAY. ARCHIE B. STEVENSON and LEWIS L. STEVENSON, Sonoma, Calif. Filed Mar. 7, 1921. Serial No. 450,117. 3 Claims. (Cl. 119—44.)

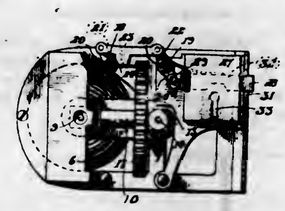
1. An incubator tray consisting of an open tray frame, a plurality of parallel spaced cradles pivotally mounted at their ends in said frame, said cradles each provided with a removable side wall and an operating member pivotally connected to all of said cradles whereby the same may be pivoted in unison within said frame and to position the side edges of one wall of adjacent cradles in substantially meeting relation in a horizontal plane to provide a substantially continuous floor for the frame when desired.

1,391,866. EVENER-GEAR ATTACHMENT FOR COTTON-PICKERS. WALTER R. STONE, Inman, S. C. Filed Jan. 6, 1921. Serial No. 435,497. 3 Claims. (Cl. 287—52.)

1. An adjustable gear attaching means for the shaft or spindle of the evener mechanism of a breaker or like picker, consisting of a sleeve provided with means for attachment to said shaft or spindle and having a socket for the revoluble reception of the collar of a stock gear.

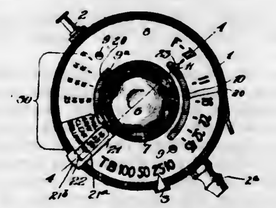
1,391,867. CAN-SOLDERING MACHINE. JOHN C. STRICKLER, San Francisco, Calif. Filed June 5, 1919. Serial No. 301,880. 6 Claims. (Cl. 113—67.)

1. In a machine of the character described, the combination of wheels coöperating with each other to grip and advance solder wire, means for movably supporting one of said wheels so that it can be moved to or from the other wheel, means for rotating both of said wheels, irrespective of the position of the last-named wheel, a can track, means for moving cans in succession on said track, and means adapted to be operated by each can in succession for moving said movably supported wheel toward the other.



1,391,868. LOCKING DEVICE FOR INCANDESCENT LAMPS. LEON M. TOROOSIAN, Springfield, Mass. Filed Aug. 9, 1919. Serial No. 316,506. 3 Claims. (Cl. 173—356.)

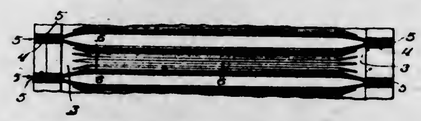
1. A lamp socket having a base-portion formed with an opening therethrough, one end of which is enlarged to form a shouldered part, a tubular member in the opening and formed with an enlarged internally threaded part to engage the shouldererd part of the opening, the other end of the tubular member being externally threaded, a pin having an enlarged threaded part to engage the internal threads of the tubular member, and a smaller



part extending through the tubular member and having a sharpened end for engaging the end of an incandescent lamp for locking the same in the socket, as described.

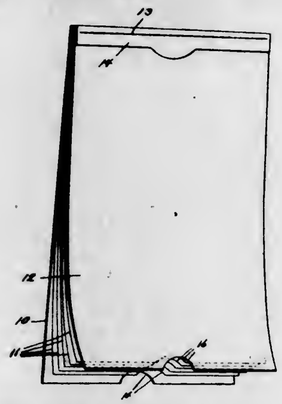
1,391,869. COMBINATION SASH BALANCE AND LOCK. THOMAS TAYHOOK, Hamtramck, Mich. Filed July 11, 1921. Serial No. 483,796. 4 Claims. (Cl. 16—201.)

3. A combined sash balance and lock including a casing having a transverse shaft journaled therein, a coil spring having one end fixed to the frame and its other end fixed to one end of said shaft, a second shaft journaled within the casing at right angles to the first named shaft and rotatably geared thereto, a pinion fixed upon the second named shaft and projecting partially through the casing to engage a window sash rack, manually operable means mounted in the frame for movement transversely of the pinion to engage the teeth of the latter so as to lock the same against rotation, said manually operable means comprising a member accessible for operation to lock said pinion against rotation and movable to an inaccessible position whereby the same may not be grasped for unlocking the pinion, and means permitting only key actuation of the locking means for releasing the same from said pinion.



1,391,870. EXPOSURE-INDICATOR. ERNEST E. UNDERWOOD, Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed Oct. 17, 1918. Serial No. 258,596. 11 Claims. (Cl. 95—10.).

1. An exposure device for photographic shutters comprising a movable aperture adjusting member, a scale having a plurality of different light character indications



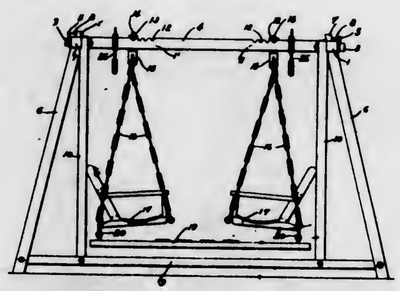
connected thereto and movable therewith, and shutter speed indications for each of said light character indications whereby the aperture formed by the adjustment of the member indicates automatically the appropriate shutter speeds for each of the light character indications.

1,391,871. TUBULAR-RADIATOR CONSTRUCTION. SIDNEY VOLK, Benton Harbor, Mich. Filed May 26, 1919. Serial No. 299,807. 6 Claims. (Cl. 257—128.)

1. In a radiator, a plurality of parallel sheet metal tubes formed with reduced middle portions to provide spaces between them for the circulation of the water and having rectangular heads which are externally smooth and internally reinforced and which are held together by solder which seals the spaces to prevent leakage of the water and to render each tube removable endwise without disturbing the others adjacent thereto.

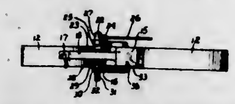
1,391,872. CARBON BINDER AND ECONOMIZER. JOSEPH ADIE WHITE, Chicago, Ill., assignor to F. S. Webster Company, Boston, Mass., a Corporation of Massachusetts. Filed Feb. 13, 1920. Serial No. 358,463. 5 Claims. (Cl. 282—22.)

1. A carbon binder comprising a sheet of carbon paper and a superposed separate sheet of vellum which protects the carbon sheet from being cut by the type, both fastened together at their top edges.



1,391,873. PUMP. JAMES ANDREW WHITLING, Healdton, Okla. Filed Dec. 10, 1920. Serial No. 429,647. 4 Claims. (Cl. 103—80.)

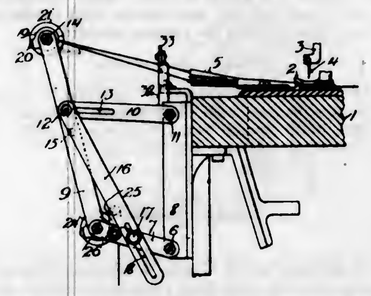
1. A pump of the character specified comprising a casing consisting of upper and lower sections, a stand pipe at the lower end of the lower section through which the liquid enters into the said section, said stand pipe extending well above the lower end of the section and having a check controlled port at its top, a barrel extending upwardly from the lower end of the section, the space between the barrel and the said lower end of the lower section being closed, a connection between the upper end of the barrel and the casing, said plunger being hollow and having a hollow piston rod connected therewith and extending to near the top of the upper section of the casing, a section of perforate casing interposed between the upper end of the barrel and the top of the said upper



section, a check valve at the top of the hollow piston, and a packing gland at the top of the barrel through which the piston rod moves.

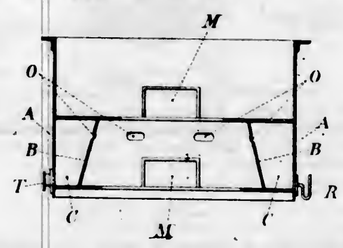
1,391,874. SWING. NEVIN A. ARCHIBALD, Concord, N. C. Filed Apr. 22, 1920. Serial No. 375,805. 2 Claims. (Cl. 155—64.)

2. A swing including a bar, means for supporting the same, cross heads extending from the bar and adjustable relative to each other, said cross heads being mounted for independent rotation, and a seat below each cross head, and flexible connections between each seat and its cross head.



1,391,875. ABRASIVE FEEDING MECHANISM FOR GRINDING AND POLISHING MACHINES. SIGMOND F. BECK, Westville, Conn., assignor of one-half to George A. Hill, New Haven, Conn. Filed June 5, 1920. Serial No. 386,877. 4 Claims. (Cl. 51—263.)

1. A machine of the character described comprising a holder for a cake for abrasive material, a member adapted to bear against a cake in the holder, said member being provided with rack teeth, a pinion engaging said teeth and imparting movement thereto, a shaft carrying said pinion, a ratchet wheel on said shaft, an



oscillating lever carrying a pawl engaging said wheel, said lever being provided with a plurality of longitudinally arranged apertures, and a reciprocating rod pivotally connected to said lever in one of said apertures.

1,391,876. STRIP-GUIDE FOR SEWING-MACHINES. JOHN BOSTON, Newark, N. J., assignor, by mesne assignments, to Thomas Carter & Sons, Inc., a Corporation of New York. Filed Sept. 4, 1918. Serial No. 252,526. 4 Claims. (Cl. 112—152.)

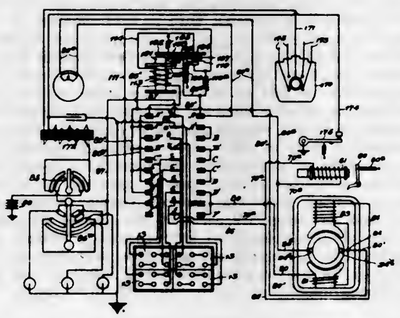
3. The combination with a sewing machine and its support, of a gate comprising a pair of upper arms and a pair of lower arms mounted to swing and projecting from the sewing machine, upright supports mounted on the outer ends of said pairs of arms and adapted to swing therewith toward the sewing machine, and fabric guiding means carried by said upright supports.

1,391,877. ASH-PIT FOR GAS-PRODUCERS MOUNTED ON AUTOMOBILES. VICTOR LÉON CAZES, Neuilly-sur-Seine, France. Filed Nov. 14, 1918. Serial No. 262,618. 3 Claims. (Cl. 48—67.)

1. An ash pit for gas producers comprising in combination an outer wall, an inner wall, and horizontal walls arranged below a gas producer and forming an outer annular chamber and a central chamber under the said gas producer, the central chamber being in open communication with the gas producer, means for feeding water to said annular chamber, means for automatically preventing the said chamber from flooding, means for feeding a mixture of air and steam to the said annular chamber, the inner wall being provided with holes affording communication between the upper part of the annular chamber and the upper part of the central chamber.

1,391,878. METHOD OF SCALING THERMOMETER-TUBES AND THE LIKE. LEE F. CHANEY, Springfield, Ohio, assignor to The Chaney Manufacturing Company, a Corporation of Ohio. Filed Dec. 20, 1918. Serial No. 267,705. 14 Claims. (Cl. 73—52.)

1. The herein described method of calibrating thermometer tubes or like devices, comprising heating the filled but unsealed tubes to a predetermined "heating out" temperature whereby the liquid fills the tube at that temperature and the end of the tube becomes the indicating point of the column of liquid for such temperature, closing the tube, subjecting the tube to a bath of lesser known temperature to determine the indicating point of the column of liquid at such known temperature, measuring the distance between the end

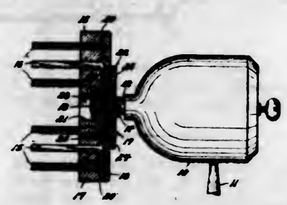


of the column of liquid at such known temperature and the end of the tube, and applying the tube to a scale having thereon an indication corresponding to the "heating out" temperature represented by the end of the tube, and on which the distance from such indication to the indication corresponding to said known temperature is equal to the distance from the known temperature point of the fluid column to the end of the tube.

1,391,879. STRAP-HOLDER, BELT-FASTENER, AND THE LIKE. OLIVER WILLIAM JAMES CHESTER, Glenmaggie, Gippsland, Victoria, Australia. Filed May 24, 1921. Serial No. 472,121. 8 Claims. (Cl. 24—182.)

1. In a fastener of the kind stated a tapering chamber having projecting into it a guide to locate part of a strap or belt, and a roller to jam the strap or belt as set forth.

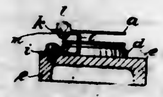
1,391,880. ELECTRICAL SYSTEM FOR MOTOR-VEHICLES. JAMES K. DELANO, New York, N. Y. Original application filed Dec. 20, 1912, Serial No. 737,815. Divided and this application filed Dec. 15, 1916. Serial No. 137,180. 3 Claims. (Cl. 171—313.)



1. In an electrical system, the combination with a dynamo electric machine, of a storage battery arranged to be charged by current from said electric machine, combined cutout and regulating means for closing and opening the circuit connecting said electric machine and battery and also for regulating the output of said electric machine, means for affecting said combined means in response to voltage fluctuations, and means for affecting said combined means in response to current fluctuations, said affecting means including means whereby the affecting means coöperate in the regulation of said electric machine.

1,391,881. CLINICAL THERMOMETER. MAX D. DREYFUS, New York, N. Y. Filed Oct. 18, 1920. Serial No. 417,628. 3 Claims. (Cl. 73—52.)

1. In combination with a clinical thermometer of triangular cross section, having an index on one of the walls thereof, means associated with the thermometer arranged to position the wall having the index, when the thermometer is laid upon a support at such angle with respect to said support as to facilitate the reading of the thermometer.



1,391,882. BRUSH. JOHN DWORNICZAK, Chester, Pa. Filed June 18, 1920. Serial No. 389,931. 1 Claim. (Cl. 15—37.)

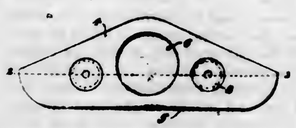
The combination with a rotatable shaft having a threaded end, of a brush including two disk-like members of relatively different thicknesses, both of said members having alined squared openings, one of said members having a plurality of apertures, bristles threaded through the apertures and projecting from one side of the member, the opposite side or face of said member being recessed and providing an annular shoulder, the other part of said head reposing upon said shoulder, a flange projecting from the confronting face of the latter mentioned member inwardly of the peripheral edge, and arranged to engage said shoulder, a coupling plate reposing upon the latter mentioned member, fastening elements passed through said plate and the respective parts of the head of the brush, whereby all of said parts are held operatively associated, a threaded boss projecting centrally from said plate and received by the aforementioned squared openings, and said boss being threaded on the threaded end of the shaft.

1,391,883. ANTIBALLOONING AND THE LIKE DEVICE FOR RING-SPINNING AND DOUBLING FRAMES. FRED FIELDING and THOMAS POTTER, Jr., Oldham, England. Filed June 29, 1920. Serial No. 392,792. 2 Claims. (Cl. 118—11.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

1. An anti-ballooning device of the hereinbefore specified type, comprising pairs of annular flat sectional thread controlling rings concentrically located in very close proximity above the traveler rings and having each integrally a rearwardly extending arm, a member located between each pair of said annular rings secured to the ring rail serving both as a support for the said pair of rings and as

a dirt catcher and means for individually concentrically securing on said member, said annular rings in relation to the ring on the rail, for the purpose specified.

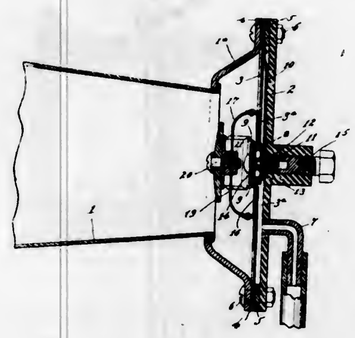
1,391,884. PHONOGRAPH-NEEDLE. THEODORE FLETCHER, San Antonio, Tex., assignor of one-half to J. M. NIX, Bexar county, Tex. Filed June 5, 1919. Serial No. 301,871. 1 Claim. (Cl. 274—38.)



A phonograph needle, having V portions, produced by removing sufficient parts from alternately opposite sides of the body.

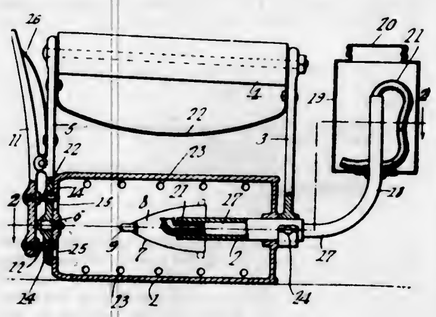
1,391,885. CUSHION-HEEL FOR SHOES. HENRY FRATERNALI, Dobbs Ferry, N. Y. Filed Jan. 13, 1921. Serial No. 436,918. 4 Claims. (Cl. 36—36.)

1. A resilient heel adapted for attachment or connection to the heel portion of a shoe, said resilient heel including a substantially hemispherical body, the heel body comprising an elastic shell structure having a hollow core, the core defining a cavity when the resilient heel is attached or connected to the heel portion of the shoe.



1,391,886. SHIM. PERRY E. FRITZ, Los Angeles, Calif. Filed Mar. 24, 1921. Serial No. 455,112. 3 Claims. (Cl. 64—55.)

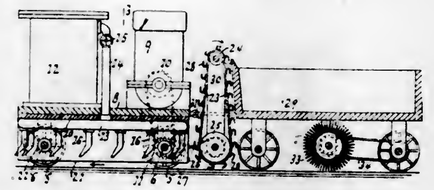
1. A shim comprising a soft metal blank and a plurality of stops of harder metal embedded in said blank, adapted to prevent compression of the blank beyond a predetermined degree.



1,391,887. PNEUMATIC HORN. WALTER A. GARRATT, Covington, Ky. Filed Jan. 30, 1920. Serial No. 355,053. 12 Claims. (Cl. 116—138.)

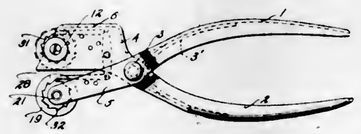
1. In a sounding device, means for peripherally supporting a vibrant disk, means for applying suction behind said disk, said disk having at least one opening therein, a valve device of which said opening forms a part, and vi-

bratory mechanism carried by the disk, to modify the vibrations thereof.



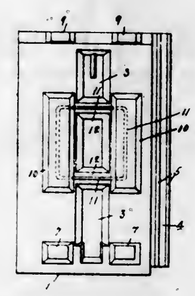
1,391,888. SADIRON. JOHN W. GATES, Swifton, Ark., assignor of one-half to C. M. Searcy, Swifton, Ark. Filed May 18, 1920. Serial No. 382,210. 1 Claim. (Cl. 158—232.)

A self heating sad iron including a body, a handle, arms extending from the handle, a pivotal connection between one end of the body and one of the arms, a tube fixedly connected to the other arm and projecting into the body to constitute a bearing for the other end of the body, a wick tube slidably mounted in the bearing tube and having that end thereof within the body rounded and provided with a top opening for a wick, said tube being slidable bodily within the bearing tube to fit the opening relative to the inner end of the bearing tube, a fuel container mounted on the wick tube and supported solely thereby, and means carried by the bearing tube for engaging the wick tube to hold said wick tube against movement relative to the handle and its arms and for fastening the bearing tube to one of the arms, and means for securing the body against rotation upon the bearing tube and relative to the arms.



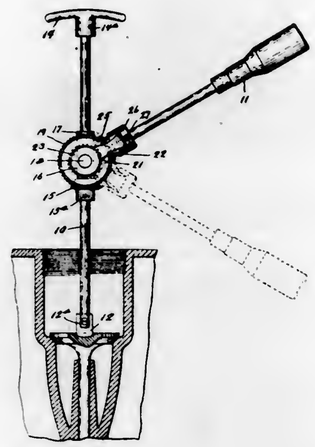
1,391,889. SNOW-MELTING APPARATUS. BARNEY GOLDMAN, New York, N. Y. Filed Mar. 8, 1920. Serial No. 364,059. 2 Claims. (Cl. 37—60.)

2. A snow melting apparatus comprising a truck having a frame, a fuel generator mounted on the frame, a plurality of coils connected to the generator arranged under the frame, each coil being independent of the other, means for controlling the volume of fuel admitted to each coil, a valve for shutting off one of the coils, and a series of noz-



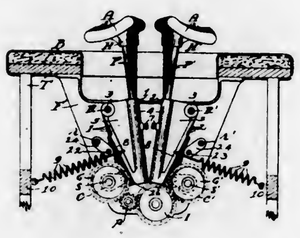
zles projecting downwardly from the coils with angular portions to point in a direction of the travel of the truck.

1,391,890. HAND-PUNCH. EARL C. GREEN, Spokane, Wash. Filed Feb. 23, 1921. Serial No. 447,123. 5 Claims. (Cl. 101—20.)



1. The combination in a punch comprising pivoted jaws and a complementary turret and anvil rotatably supported therein, male and female dies on said turret and anvil, detents engaging said turret and anvil, and means carried by one jaw for synchronously moving said turret and anvil to cause registration of selected dies.

1,391,891. ROOFING-TILE. ISRAEL GREENBERG, Baltimore, Md. Filed Dec. 14, 1920. Serial No. 430,593. 1 Claim. (Cl. 108—10.)



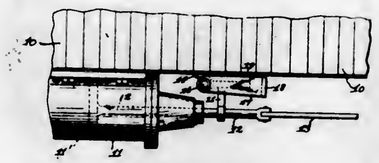
A roofing tile having its sides adapted to overlap and two grooves in its upper surface and a central groove in its lower surface thereof, two lugs on the lower surface of the tile adapted to fit in the grooves on the upper surface of the adjoining tile, two webs extending across the central groove 3 and having their lower surfaces flushed with a lower surface of the tile, two integral parallel projections on the lower surface of the tile on opposite sides of said central groove, and a wire embedded in said projections and extending across and resting against the lower surface of said webs.

1,391,892. VALVE-GRINDING TOOL. OTTAR T. HAIG, Jamaica Plain, Mass. Filed Sept. 15, 1920. Serial No. 410,520. 12 Claims. (Cl. 51—29.)

1. A valve grinding tool comprising a rotatable, valve-engaging rod, an operating handle, and means connecting said handle and rod admitting of a reciprocatory movement of said handle in the plane of said rod to reciprocate said rod and a rotary movement of said handle to rotate said rod.

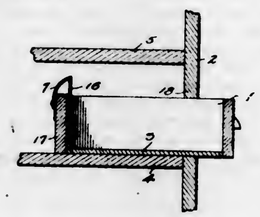
1,391,893. MECHANICAL MANIPULATING-MACHINE. CLARA B. HARDY, Los Angeles, Calif. Filed July 14, 1920. Serial No. 396,274. 10 Claims. (Cl. 128—69.)

1. A machine of the character described comprising longitudinally alined applicators arranged in opposed sets transversely of the machine, rocking supports for moving said applicators transversely of the machine, and vertically adjustable means carried on said supports for holding said applicators in selected positions.



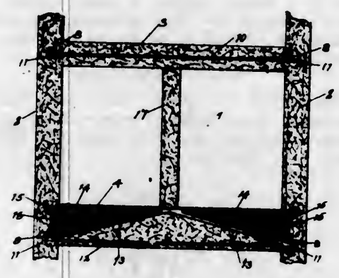
1,391,894. DEVICE FOR LINING AND RELINING BRAKE-BANDS. MILO B. HARRISON, Los Angeles, Calif. Filed Apr. 5, 1921. Serial No. 458,724. 1 Claim. (Cl. 218—19.)

A device for lining and relining brake bands, consisting of the attaching portion, an upright extending upwardly from the attaching portion, an anvil top provided on the top end of the upright, the anvil having a face inclined to the upright and arch-shaped crosswise to the



incline, the inclined arch-shaped top face being provided with a recess and a wedge at a distance from the recess.

1,391,895. RAILWAY-BRAKE INDICATOR. BRODERICK HASKELL, Franklin, Pa. Filed Dec. 23, 1920. Serial No. 432,846. 9 Claims. (Cl. 116—127.)



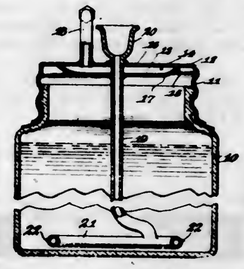
1. An air brake indicator in combination with a brake cylinder provided with a piston and piston rod, comprising a pivoted drop signal arm, means interposed between said piston rod and signal arm and operated by the movement of the piston for controlling the position of said signal arm and indicate the extent of travel of said piston in the cylinder.

1,391,896. DRAWER-STOP. VAN E. HISERODT, Algona, Iowa. Filed Apr. 16, 1920. Serial No. 374,317. 6 Claims. (Cl. 45—7.)

6. A drawer stop comprising a single strip, of resilient material having a straight flat portion and a drawer-straddling portion formed adjacent one end of the straight portion, said portions relatively tending to spring away from each other, and brace straps extending from the straight portion and affixed to the straddling portion for retaining the parts in shape.

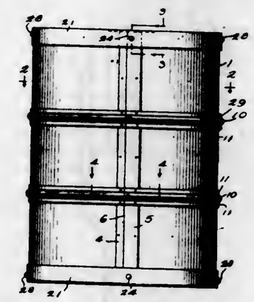
1,391,897. BUILDING CONSTRUCTION. JAMES HUNDLEY, Noblesville, Ind. Filed Sept. 5, 1919. Serial No. 321,983. 2 Claims. (Cl. 72—1.)

1. In a concrete building construction having vertical walls and horizontal floors, said walls and floors thereof being of unitary poured construction, a plurality of vertical cores or ducts within said walls, a plurality of horizontal cores or ducts within said floors, said horizontal cores preferably registering with said vertical cores, a plurality of horizontal cores or ducts interconnecting said vertical cores, and means for reinforcing said walls and floors, adjacent said cores, substantially as described.



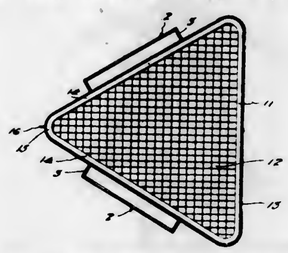
1,391,898. WRENCH. FRITZ KETTLER, Munich, Germany. Filed Nov. 13, 1920. Serial No. 423,985. 7 Claims. (Cl. 81—87.)

1. A wrench comprising a stationary jaw, a shank carrying the same, a handle for said shank, a sleeve slidable on said shank, a movable jaw, the same being connected with said sleeve, a tongue attachable to said sleeve adapted to movably engage said shank, said tongue having its lower portion inclined, and a lever mounted on said shank movable to and from said handle, the head of said lever being adapted to engage the inclined portion of said tongue and ride thereon whereby the tongue and sleeve and thereby the movable jaw may be operated to close the jaws.



1,391,899. AUXILIARY CARBURETER. PETER J. LYNCH, Omaha, Nebr. Filed Feb. 25, 1919. Serial No. 279,116. 1 Claim. (Cl. 261—124.)

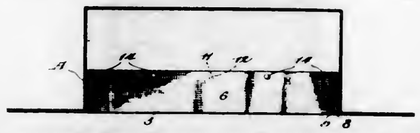
An auxiliary carbureter including a container, a cap closing the container having a top wall, the top wall of the cap being depressed to provide a central recess, a plate overlying the depressed portion of the wall and secured thereto closing said recess to define a chamber, the depressed portion of the wall being provided with a plurality of small openings therethrough leading from the container into the chamber, an air inlet pipe extending



through the plate and said wall into the container, the pipe coacting with the plate and being secured to the wall for bracing and retaining said plate, and an outlet pipe connected to the plate leading from the chamber.

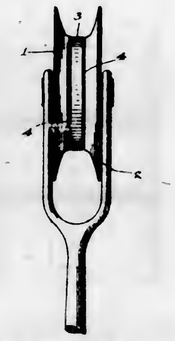
1,391,900. COLLAPSIBLE BARREL. WILLIAM H. MCCREERY, Norfolk, Va., assignor to McCrery Sanitary Collapsible Barrel Company, Incorporated, Philadelphia, Pa., a Corporation of Delaware. Filed May 10, 1921. Serial No. 468,319. 3 Claims. (Cl. 217—44.)

1. A collapsible barrel comprising a plurality of stave sections, the adjacent edges of said stave sections being provided with interlocking joints, hoop sections secured to said stave sections, one end of each of said hoop sections being provided with a recess, a projecting lip arranged on the other end of each of the hoop sections and adapted to be received in the recess of the adjacent section, and fastening means to retain said hoop sections in position.



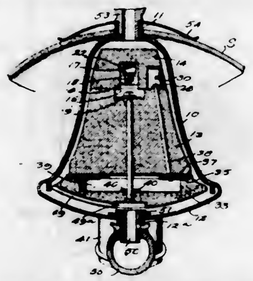
1,391,901. RACKING-FRAME FOR POOL-BALLS. JAMES H. MCCOOL, Ellsworth, Kans. Filed Nov. 9, 1920. Serial No. 422,867. 1 Claim. (Cl. 46—6.)

In a racking frame for billiard or pool balls, yoke members on the opposed sides thereof constructed of round



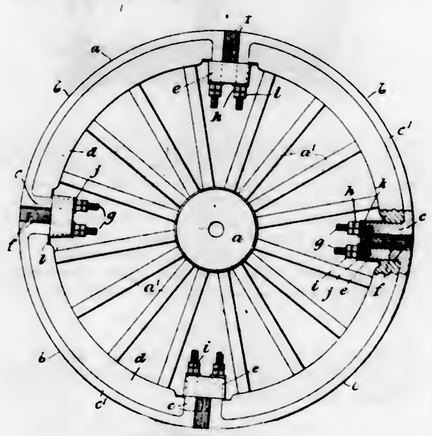
wire and comprising lower longitudinal members which are disposed below the lower edge of the frame, arms on the ends of the said longitudinal members having inturned portions which are connected to the said sides of the frame, a fabric mesh providing a removable bottom for the frame and when in operative position embracing the sides of the frame, and latching means at the front of the frame for removably locking the fabric thereon.

1,391,902. SWEATBAND-PROTECTOR. JOSEPH MARTIN, Brooklyn, N. Y. Filed Nov. 6, 1920. Serial No. 422,297. 4 Claims. (Cl. 2—32.)



1. A sweat band protector for hats comprising a strip of tubular cellular fabric, a stiffening strip of non-absorbent material inserted between the walls of said fabric, and a strip of absorbent material between one side of said stiffening strip and one wall of the fabric.

1,391,903. TROLLEY-WHEEL FOR ELECTRIC STREET-CARS. JULIO SOTO NAVARRO, Habana, Cuba. Filed Apr. 9, 1921. Serial No. 459,913. 1 Claim. (Cl. 191—68.)



A trolley wheel for electric street cars comprising at least three separate parts, the outer parts flanged, and the intermediate parts of cylindrical form (in disks form) these parts to be used joined together on the same axle, each having free and independent movement of the other.

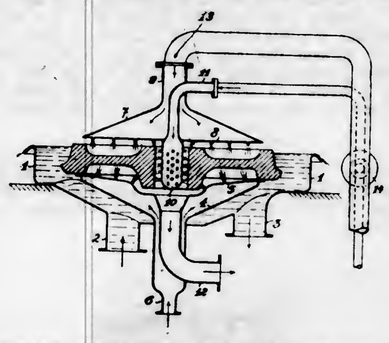
1,391,904. CLUSTER LAMP-SOCKET. THOMAS O'DONNELL, Ironwood, Mich. Filed Nov. 12, 1919. Serial No. 337,462. 2 Claims. (Cl. 240—78.)

1. A reversible cluster lamp socket comprising a casing, lamp sockets arranged in the bottom of said casing, said casing being provided with threaded extensions arranged at the top and bottom, means for suspending said casing, comprising a tubular element adapted to engage either of said extensions and provided with an opening for the reception of a flexible element, a second tubular element adapted to engage the other extension, and globe supporting means adapted to be carried by either of said tubular elements.

1,391,905. TIRE OF ROAD AND LIKE VEHICLES. ALEXANDER ORR, Choma, Northern Rhodesia, South Africa. Filed Apr. 30, 1919. Serial No. 293,754. 1 Claim. (Cl. 301—94.)

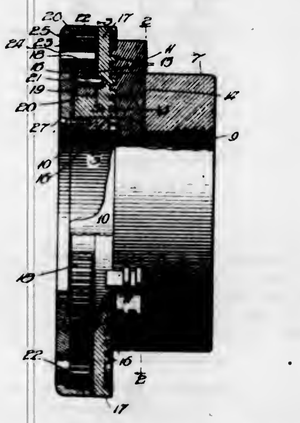
In combination with a wheel rim, a tire composed of a plurality of arcuate sections, radially disposed inwardly extending flanges at the respective ends of the sections, the opposed faces of the adjacent flanges being tapered, a supporting pin arranged between each of the adjacent flanges, a plurality of distance pieces removably arranged between the adjacent flanges and supported by the pin, a plate arranged over the flanges and secured to the inner surface of the rim, a tapered collar engaged with the adjacent flanges and arranged over the plate, and means associated with the flanges for releasably clamping the collar against the plate to rigidly hold the rim with respect to the tire sections in addition to clamping the flanges.

1,391,906. DENTAL-ENGINE HANDPIECE. WILL R. PORTER, Prince Bay, N. Y., assignor to The S. S. White Dental Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 23, 1920. Serial No. 412,333. 9 Claims. (Cl. 32—15.)



1. A dental engine handpiece having a shield arranged to prevent contact of the operator's hand with the interior parts thereof.

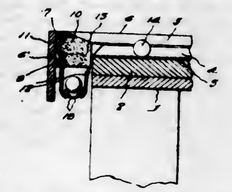
1,391,907. METHOD OF MAKING RAILWAY DISK WHEELS. FRIEDRICH SCHAFFER, Leobersdorf, near Vienna, Austria. Filed Mar. 28, 1916. Serial No. 87,146. 5 Claims. (Cl. 148—13.) (Granted under the provisions of the Act of Mar. 3, 1921, 41 Stat. L., 1313.)



1. The process of making railway-wheels of the disk-type of steel containing a comparatively large percentage of manganese, which process consists in first subjecting the wheel to a suitable heat treatment, and then cooling

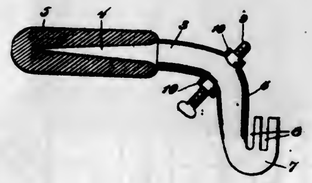
the wheel by subjecting the rim of the wheel to the maximum cooling effect, the hub to a lesser cooling effect

and the disk portion to the minimum cooling effect but cooling the parts more slowly than they would be cooled when quenched.



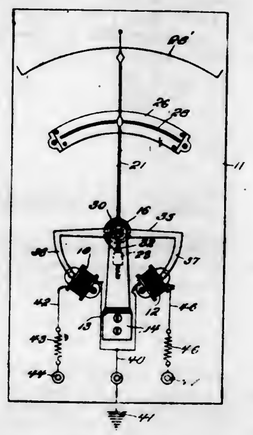
1,391,908. CHUCK. ALBERT H. SEGLER, Chicago, Ill. Filed Apr. 3, 1919. Serial No. 287,166. 2 Claims. (Cl. 279—114.)

1. A chuck comprising a supporting member containing openings therethrough forming guides, jaws mounted in said guides and adjustable toward and away from the center of said member, said supporting member being provided with an annular extension of reduced external diameter, and means for adjusting said jaws comprising a rotatably mounted ring on said extension and presenting at a face thereof a spiral flange, shoulder portions on said jaws engaging said flange, said ring being formed, beyond the face thereof equipped with said spiral flange, of reduced external diameter, a spur gear mounted upon the reduced end of said ring, and a spur pinion rotatably mounted on said supporting member and meshing with said spur gear, with a portion of said spur pinion accessible at a face of the chuck at which said pinion is adapted to be engaged for rotating it, said ring at its spiral-flange-equipped portion extending radially beyond said spur gear.



1,391,909. POOL-TABLE. JAMES H. MCCOOL, Ellsworth, Kans. Filed Nov. 9, 1920. Serial No. 422,865. 4 Claims. (Cl. 46—12.)

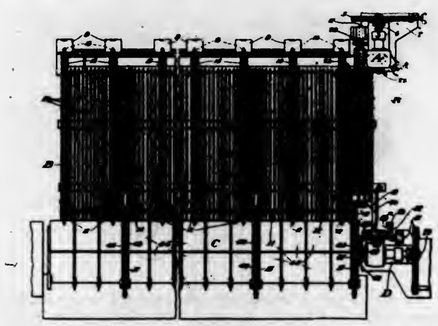
1. In a pool table construction, a top rail which is beveled upwardly from the cushion and which is elevated at the portions of the table provided with the pockets and notched at such portions, a ledge at the top and a strip below the notched portions forming flanges, a



fabric pocket secured to the flanges and bellied between the flanges, and formed with a sack-like extension below the lower flange, and a ball receiving track passing through the said depending portions of the pockets.

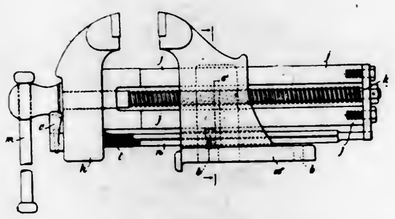
1,391,910. SAW-SET. FRANK SIKOWSKI, Mount Carmel, Pa. Filed Dec. 11, 1919. Serial No. 344,108. 2 Claims. (Cl. 76—71.)

1. In a saw set, a shank, an arm disposed at an angle to said shank and formed integral with the latter, a foot at the outer end of said arm, the said foot having a recess in the upper edge thereof, the said recess being disposed parallel to said arm, and a screw threaded through said arm and movable toward or away from the plane of the recess.



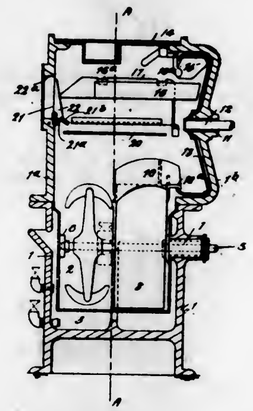
1,391,911. GROUND-DETECTOR. ERNEST J. SIMON, Guantanamo, Cuba. Filed July 8, 1918. Serial No. 243,782. 1 Claim. (Cl. 175—183.)

In a device of the class described, a pivotally mounted arm, a plurality of coiled springs connected with the pivotal mounting of the arm and assisting in returning the latter to a given position when deflected, a pointer



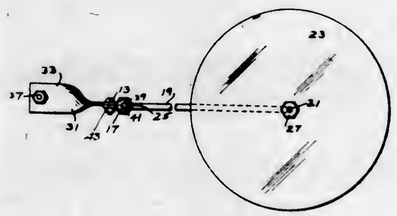
mounted on the pivot, a plurality of coils, an armature member for each coil, said members having connection with the arm at opposite ends thereof, means for connecting the coils with each other said means having connection with the ground, terminal members for connection with the leads of a circuit to be tested, and a resistance located adjacent each terminal member and connnected with the latter and with the respective coils, an air resistance vane connected with the arm and moving in a path concentric with the pivotal mounting of the arm, the aforesaid coiled springs and armature members also being approximately concentric with the pivotal mounting of the arm.

1,391,912. APPARATUS FOR HANDLING AND FORMING PIPE-SKELP. JAMES SIMPSON and HARRY E. CLAY, McKeesport, Pa. Filed Nov. 13, 1920. Serial No. 423,924. 11 Claims. (Cl. 164—49.)



1. The combination with a cutting-off shear and a combined clipping and cupping shear, of a transfer table for conveying the skelp from said cutting-off shear, a clipping table arranged to receive the skelp from said transfer table, and means for operating said tables.

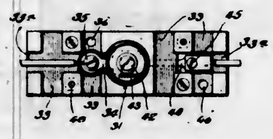
1,391,913. QUICK-RELEASE BENCH-VISE. MAURICE WILLIAM SMITH, Lyndhurst, Hoddesdon, England. Filed May 7, 1920. Serial No. 379,472. 2 Claims. (Cl. 81—36.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



1. A quick release vise comprising a fixed jaw adapted to be attached to a bench, two half nuts mounted in said fixed jaw, a double sliding bar, a movable jaw carried by said double sliding bar, said double sliding bar being adapted to slide in said fixed jaw, a clamping screw operating between said half nuts, means for opening and closing said half nuts, said means comprising vertical slots in said half nuts, pins carried by said half nuts, sliding members adapted to move simultaneously and in opposite directions and to operate in said vertical slots in said half nuts, inclined slots in said sliding members adapted to coact with the said pins carried by said half nuts, a square shaft disposed parallel with said double sliding bar, a two arm lever on said square shaft, slots formed in said two arm lever, pins on said sliding members, coacting with said slots in the two arm lever, a handle on said square shaft, and means for retaining the said half nuts in their closed position.

1,391,914. CHOCOLATE AND LIKE COATING MACHINE. ASBJORN SONSTHAGEN, Essex, England. Filed Nov. 4, 1920. Serial No. 421,805. 9 Claims. (Cl. 91—3.)

1. In combination, a rotatable member comprising an annular part having an inner face; adapted to receive material thereon; a horizontal conveyer disposed away from over said face; and means whereby said conveyer is adapted for receiving material from said face.



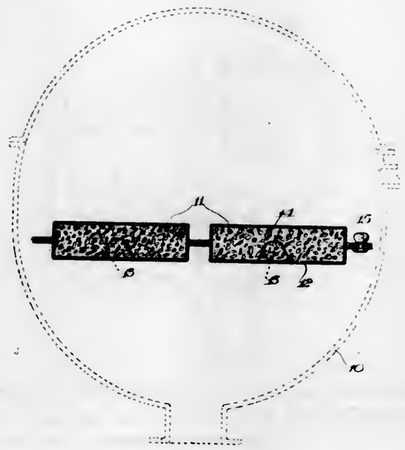
1,391,915. PROTECTIVE DEVICE. NORMAN S. STARR and LESTER E. COLLIER, Moweaqua, Ill.; said Collier assignor to said Starr. Filed Oct. 13, 1920. Serial No. 416,601. 1 Claim. (Cl. 296—97.)

A device of the class described, comprising a translucent celluloid disk member, a rod normally extending in a substantially horizontal direction when in service and having a bent threaded end, means on said end for mounting the disk member and securing it in its adjusted positions, the other end of the rod having a bent end, and a bracket comprising members adapted to be fastened

to an automobile at a portion thereof adjacent the wind shield, one of said bracket members terminating in a portion coöperating with an adjacent portion of another member to form a bearing for the second end of the rod, and means for clamping said portions together to retain the rod in its several adjusted positions and yet permit the rod to be rotated within said portions by the driver while the car is in motion, to vary the position of the disk member.

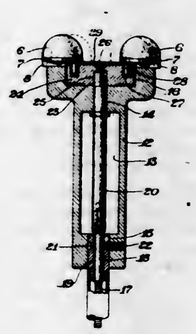
1,391,916. COMBINATION SWITCH AND DISTRIBUTING-PANEL. OLIVER T. SWEET, St. Louis, Mo. Filed Feb. 17, 1919. Serial No. 277,421. 1 Claim. (Cl. 200—133.)

A fuse plug block composed of insulating material and provided with a recess, a fuse plug socket within said recess, contact members arranged in said block adjacent to said fuse plug socket and electrically connected thereto, and there being a plurality of channels formed in said block and leading in different directions from each contact member.



1,391,917. PERMANENT CALENDAR. CARL TEICHTNER, Leipzig, Germany. Filed Feb. 19, 1920. Serial No. 359,961. 2 Claims. (Cl. 40—107.)

1. A permanent calendar comprising a supporting backing, individual booklets or pads containing data indicating independently the day and month of the year, the leaves of said pads or booklets being printed with the data on one side only, the leaves of the pads adapted to be turned over successively to expose new data, and retaining means supported by said backing and being openable away from the backing to permit the operator to have access to the booklets or pads for the purpose of turning the leaves over, said retaining means adapted to engage completely the turned-over leaves and to obscure such turned-over leaves but exposing the data on the leaves not yet turned over.

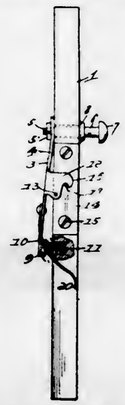


1,391,918. CANDY AND METHOD OF PRODUCING. LIVINGSTON A. THOMPSON, Waukesha, Wis. Filed Apr. 7, 1919. Serial No. 288,164. 3 Claims. (Cl. 99—11.)

3. The method of producing molded sponge candy which consists in placing in a mold a quantity of hot boiled candy, less than enough to fill the mold, and expanding the steam bubbles within the candy and thereby

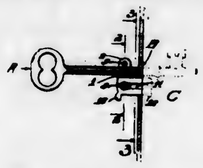
expanding the candy to fill the mold by extracting the air from the mold and allowing the candy to cool in such condition.

1,391,919. MASSAGE APPARATUS. LIVINGSTON A. THOMPSON, Waukesha, Wis. Filed Jan. 5, 1920. Serial No. 349,484. 4 Claims. (Cl. 128—59.)



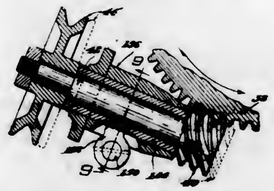
1. In a massaging device, the combination of a support, a shaft journaled therein, a cam on said shaft, massage members operatively connected to said cam and moved thereby toward and away from each other parallel to the plane of rotation of said cam, and guide means for said members disposed at right angles to said shaft.

1,391,920. DOOR-CATCH. ROY L. THOMPSON, Bend, Oreg. Filed Sept. 23, 1920. Serial No. 412,161. 5 Claims. (Cl. 292—96.)



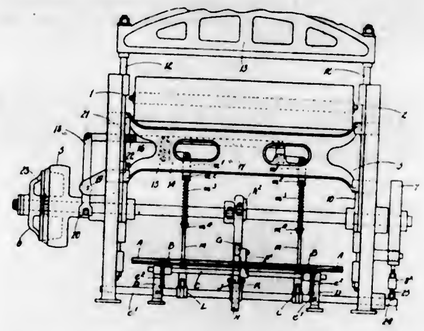
1. A device of the character described, comprising a catch-carrying plate pivoted to the inner face of one side of a door casing and adapted for engagement with the adjacent edge of the door, means for rocking said

plate to disengage the catch from the door, and spring means secured to and movable with thhe plate operable



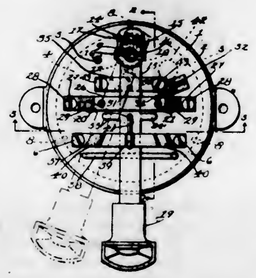
upon disengagement of the catch from said door to impart an opening thrust to the latter.

1,391,921. KEY ATTACHMENT. EDWARD TILLERT, Racine, Wis. Filed Feb. 24, 1921. Serial No. 447,520. 4 Claims. (Cl. 70—65.)



1. A key attachment of the character described, comprising a member, a key holding element secured to said member, and movable means forming said connection which permits the free movement of the holding element in one position and holding the same against movement in another position.

1,391,922. DRIVING AND STOPPING MECHANISM. LAURENCE E. TOPHAM, Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Mar. 14, 1919. Serial No. 282,689. 14 Claims. (Cl. 192—116.)



1. A driving and stopping mechanism having, in combination, a shaft, a high speed driving mechanism therefor, a low speed driving mechanism therefor, means for shifting from the high to the low speed mechanism, said low speed mechanism constructed to act first to reduce the speed of the shaft and then to drive the shaft at a low speed, stopping devices for the shaft, and means whereby the resistance offered by the shaft to the actuation thereof by the low speed mechanism is utilized to render the stopping devices active.

1,391,923. COMBINED CLUTCH-OPERATING GEAR AND BRAKE MECHANISM FOR REVOLUTION STAMPING-PRESSES. ELIHU VICK, Nailsworth, England. Filed Apr. 5, 1921. Serial No. 458,692. 18 Claims. (Cl. 192—17.)

1. In a stamping press the combination of a stamping top, a main driving shaft, means carried by said driving shaft to reciprocate said stamping top, a clutch upon said driving shaft, a pedal lever, a pair of interconnected levers associated with said pedal lever, means connecting said levers and said clutch, which means positively operate in one direction but allow relative movement in the other, whereby the clutch is operated to drive the shaft and to reciprocate the stamping top, means carried by said driving shaft to return said pedal and levers to its normal position and allow the clutch to disengage, a brake associated with the driving shaft and means associated with said levers to apply said brake when the levers are returned to their normal position.

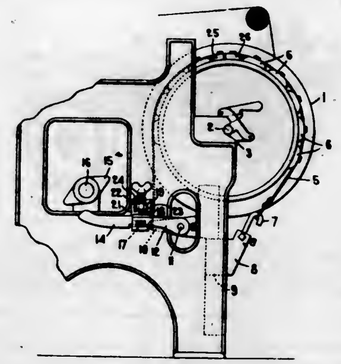
1,391,924. SWITCH. ORINGTON A. WARE, Easton, Pa., assignor to Smith Signal Corporation, New York, N. Y., a Corporation of Delaware. Filed Jan. 24, 1920. Serial No. 353,897. 9 Claims. (Cl. 200—4.)

2. A switch comprising a base, right and left contacts thereon, a pivotal blade movable right and left from neutral position over the base, and a common contact member bridging the blade, the blade having oppositely projecting compressible split wings adapted to enter frictionally between said contacts and the portions of the contact member thereover.

1,391,925. RAIN-SHIELD. JACOB WARSHAWSKY, New York, N. Y., assignor of one-half to Abraham Rodak, New York, N. Y. Filed Jan. 26, 1920. Serial No. 354,084. 2 Claims. (Cl. 2—108.)

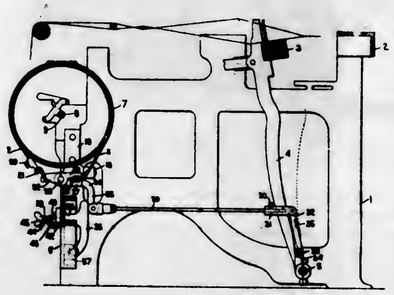
1. A temporary and inexpensive protector from the weather, adapted to fit loosely over the head and shoulders, consisting of a single sheet of waterproofed paper, cut approximately in the form of a thick and inverted letter T, the stem portion forming the head protecting portion, the free end edge of the stem of the T being

folded upon itself and stuck together to form the top of the protector, and the cross-bar of the T folding about the shoulders of the wearer and means for fastening the ends of the cross-bar part under the chin of the wearer.



1,391,926. FIRE-DOOR FOR LOCOMOTIVES. WILLIAM WHITE, Niles, Mich., assignor to Harry Vissering & Company, Chicago, Ill., a Corporation of Illinois. Filed May 29, 1915. Serial No. 31,254. 8 Claims. (Cl. 110—177.)

1. In a fire door, the combination of a frame, an inwardly swinging door mounted in said frame, a lever having upper and lower portions pivotally attached intermediate its ends, to said frame, the lower part of said lever being adapted only to contact with and open said door when the upper part of said lever is moved rearwardly.

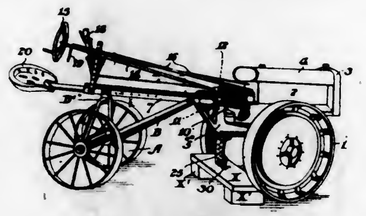


1,391,927. CAM-ACTUATED WARP-TENSION-CONTROLLING MECHANISM FOR LOOMS. HENRY W. YOUNGQUIST, Manchester, N. H., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Sept. 8, 1920. Serial No. 408,999. 6 Claims. (Cl. 139—58.)

1. A warp tension controlling mechanism for looms having a cam shaft comprising a warp beam having a brake drum thereon, a brake engaging said drum, brake applying means acting normally to maintain a substantially uniform tension upon the warp and a cam on said cam shaft operable to engage said brake applying means

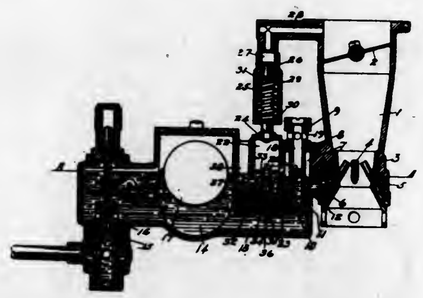
and increase the tension upon the warp at predetermined intervals in the operation of the loom.

1,391,928. WARP-TENSION-CONTROLLING MECHANISM FOR LOOMS. HENRY W. YOUNGQUIST, Manchester, N. H., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Sept. 8, 1920. Serial No. 409,000. 9 Claims. (Cl. 139—58.)



2. Warp tension controlling mechanism for looms having a warp beam provided with a friction drum comprising a brake band anchored at one end engaging said drum, a brake lever connected to the other end of said brake band, having a main section fulcrumed upon a pivot on the loom side and a supplemental section also fulcrumed upon said pivot, yielding means connecting said lever sections and means operating upon said lever when the lay reaches a predetermined position in its beat-up to cause said brake band to lock the warp beam against rotation.

1,391,929. TRACTOR. CHARLES J. ALLEN, Moorestown, N. J., assignor to S. L. Allen & Co., Inc., a Corporation of Pennsylvania. Filed June 9, 1920. Serial No. 387,541. 2 Claims. (Cl. 180—12.)

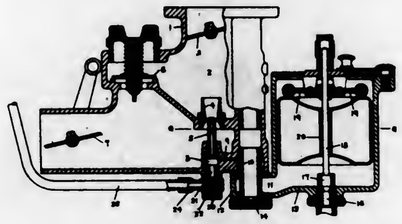


1. The combination with a tractor having a power unit, supporting wheels, a rearwardly extending beam adapted for attachment to a vehicle or implement to be drawn by the tractor and a depending draft plate in operative relation therewith, of anti-friction means supported by and adjacent the lower extremity of the draft

plate, said means being adapted to coact with a supporting surface whereby during an interchange of implements

the weight of said beam is sustained, the tractor maintained in upright position and the horizontal traverse of the beam with respect to the power unit facilitated.

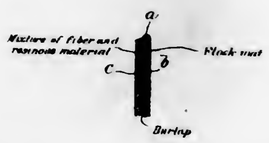
1,391,930. CARBURETER. FRANK H. BALL, Detroit, Mich., assignor to Ball & Ball Carburetor Company, Detroit, Mich., a Corporation of Michigan. Filed June 10, 1919. Serial No. 303,206. 8 Claims. (Cl. 261—41.)



1. In a carbureter, the combination of a suction passage; means for delivering a combustible mixture comprising as its elements air and fuel to said passage, the fuel being passed through a conduit delivering at least the major portion of the fuel supply for the combustible mixture; pick-up and step-up devices, said devices modifying said delivery through said conduit by the direct action of inflowing air to vary the relative flow of said elements to the suction passage to form a richer mixture with a lesser degree of vacuum and to momentarily further increase the richness of the mixture immediately following such variation; and mechanism responsive to variations of pressure in the suction passage actuating said devices.

5. In a carbureter, the combination of a suction passage; an intermediate chamber communicating with the suction passage, a source of fuel supply and with the atmosphere; a well in which fuel accumulates communicating with the atmosphere; a passage leading from the lower part of the well to said chamber; a valve varying the communication between the chamber and the atmosphere; and means responsive to variations of pressure in the suction passage for actuating the valve.

7. In a carbureter, the combination of a suction passage; a well in which fuel accumulates and having an opening to the atmosphere; a connection leading from below the fuel level in the well to the suction passage; and air passage leading from the connection to the atmosphere; a valve controlling said air passage; and means responsive to variations of pressure in the suction passage controlling the valve.

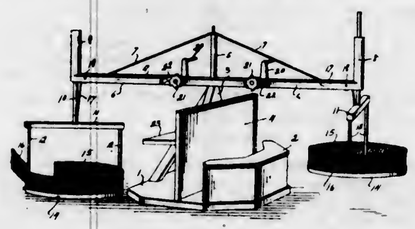


1,391,931. CARBURETER-CONTROL MECHANISM. FRANK H. BALL and FREDERICK O. BALL, Detroit, Mich., assignors to Ball & Ball Carburetor Company, Detroit, Mich., a Corporation of Michigan. Filed June 10, 1919. Serial No. 303,209. 4 Claims. (Cl. 261—63.)

1. In a carbureter control mechanism, the combination of a carbureter comprising devices for delivering fuel and air to form an explosive mixture; a controlling device; a fluid connection between the controlling device and the carbureter; and means on the carbureter for modifying the mixture through the action of a fluid in the connection, said device and means being correlated to produce with equal movements of the controlling device equal variations in the mixture.

3. In a carbureter control mechanism, the combination of a carbureter comprising a suction passage; devices for supplying an explosive mixture comprising as elements air and fuel to said passage; means for varying the quality of the mixture; a conduit leading from said means; and controlling devices for said conduit positioned at a point remote from the carbureter, said last-mentioned devices comprising an actuating element increasing the ratio of opening in the conduit with a given movement of the element.

1,391,932. SHOE-STIFFENER. HARRY H. BECKWITH, Brookline, Mass., and EDWARD E. COX, Dover, N. H.; said Cox assignor to said Beckwith. Filed Jan. 3, 1919. Serial No. 269,475. 5 Claims. (Cl. 91—68.)



1. A stiff resilient sheet comprising a foundation of flexible woven fibrous material and a coating adherent on the face thereof and interlocked therewith, said coating consisting of a mixture of disintegrated fiber and a resinous compound which is stiff and hard when cold but is capable of being softened and then sitting in a rigid state.

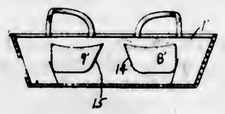
1,391,933. DISPLAY APPARATUS FOR STOCK. LORENZO W. BELL, Carrollton, Mo., assignor of one-fourth to Henry O. Keltner and one-fourth to Russell Keltner, Carrollton, Mo. Filed Mar. 16, 1921. Serial No. 452,854. 2 Claims. (Cl. 211—20.)

1. A display apparatus for stock comprising a member, means coacting with the intermediate portion of said member for supporting the same for swinging movement in substantially a horizontal path, upstanding tubular members carried by the first named member at spaced

points thereon, a rod slidably disposed through each of said tubular members, a cross head carried by the lower

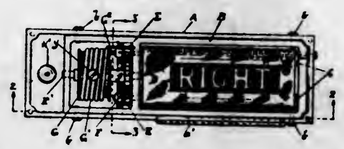
end portion of each of said rods, hangers depending from the opposite end portions of the cross head, and a platform supported by said hangers.

1,391,934. COMPOSITION FOR WATERPROOFING CLOTH. NELSON C. BISSELL, Modesto, Calif. Filed Oct. 7, 1920. Serial No. 415,398. 2 Claims. (Cl. 134—17.)



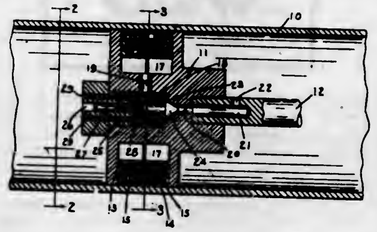
1. A composition for waterproofing cloth consisting of asphaltum, paraffin and liquid rubber mixed together in the proportions of 20 pounds of asphaltum, 3¼ pounds paraffin and 1 pint vulcanizing rubber, and a common solvent for said ingredients.

1,391,935. DEVICE FOR REGULATING TEMPERATURE. ALDEN BLOSSOM, Newton Square, Pa. Filed Mar. 12, 1921. Serial No. 451,703. 4 Claims. (Cl. 236—4.)



1. In combination with a compartment, a partition of textile material dividing said compartment into an upper chamber and a lower chamber, an air inlet opening and an air outlet opening in communication with the upper chamber, valves for controlling the flow through said openings, a thermostat within the lower chamber, and means coacting with the thermostat and the valves for automatically moving the same relatively to the coacting openings.

1,391,936. BRASSIÈRE. SADIE BOSKY, Brooklyn, N. Y. Filed Feb. 27, 1919, Serial No. 279,658. Renewed Aug. 16, 1921. Serial No. 492,874. 2 Claims. (Cl. 2—73.)

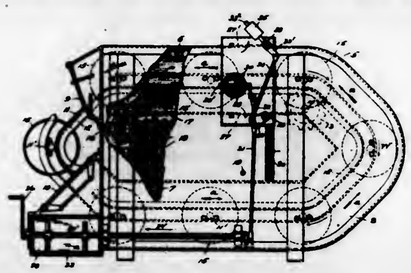


1. As an article of wearing apparel, a brassière comprising a strip of material, a pair of spaced pockets secured to the under side of said material on either side of and adjacent the middle portion thereof, and separable means for closing said brassière at the back of the wearer, said pockets being so positioned as to draw the breasts around and away from the middle of the chest, when the brassière is fastened around the wearer.

1,391,937. DIRECTION-INDICATOR FOR MOTOR-VEHICLES. CHARLES L. BOSSOLT, Erie, Pa., assignor of one-half to John C. Bossolt, Erie, Pa. Filed Nov. 12, 1920. Serial No. 423,607. 1 Claim. (Cl. 116—45.)

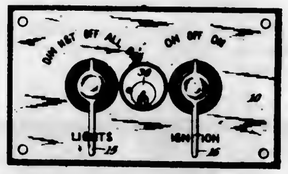
In a device of the class described, a frame, a pair of spaced parallel rollers, a curtain having its opposite ends secured to and wrapped around each of said rollers in opposite directions, journal pins in the ends of said rollers and mounted in said frame, a pinion gear secured on two of said journal pins at one end of said frame, a supporting shaft secured in one end of said frame, a spur-gear mounted on said shaft and intermeshing with each of said pinion gears, a spool secured to said spur gear, a cable wrapped around said spool and leading to an operating device to operate said spur gear in one direction, and spring actuated mechanism to operate said spur gear in the opposite direction, whereby said curtain is caused to wind from one roller to the other roller.

1,391,938. PISTON. WILLIAM M. CARLIN, Indianapolis, Ind. Filed Aug. 28, 1920. Serial No. 406,617. 3 Claims. (Cl. 103—63.)



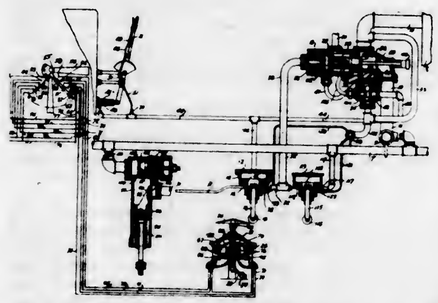
1. A pump construction including a cylinder, a piston having a chambered body portion, expansible packing means seatable in said piston body portion and bearable on said cylinder, means for introducing fluid into said chambered body portion to expand said packing means into contact with the cylinder upon one stroke of the piston, including valve means for supplying fluid upon the return stroke of the piston to said chambered body portion and closing upon the first mentioned stroke of said piston, and plug means associated with said piston and having a channel therein providing communication between said chambered body portion and said pump cylinder, said valve means being provided with a valve stem and said plug means slidably supporting said valve stem.

1,391,939. VENTILATING APPLIANCE FOR CLOTHES-DRYING MACHINES. CHARLES W. COLLINS, Seattle, Wash. Filed Nov. 20, 1919. Serial No. 339,379. 6 Claims. (Cl. 34—12.)



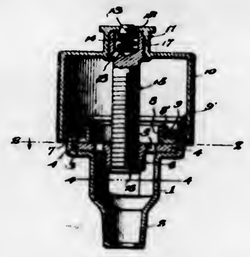
5. In a ventilator for clothes drying-machines, the combination with a drying chamber having an air inlet at one end, an air outlet at the other end and a second outlet intermediate the length of said chamber, a suction fan, pipe connections between each of said outlets and the fan, and valves for the respective pipe connections, of a screen gate provided interiorly of the drying chamber, and means for operating said gate to position the same alternately

across the second named outlet and across the chamber between the two outlets, said means being connected with



said valves whereby the said fan is rendered operative to effect the passage of air through said gate in both of the aforesaid positions thereof.

1,391,940. LOCK FOR SWITCHES AND THE LIKE. OLIVER F. CONKLIN, Detroit, Mich., assignor to Remy Electric Company, Anderson, Ind., a Corporation of Indiana. Filed Nov. 29, 1916. Serial No. 134,000. 11 Claims. (Cl. 70—14.)



1. In a lock for locking controlling devices in switches and the like having movable controlling elements, the combination with a movable key controlled member; of means coöperating therewith for locking or unlocking said elements when the key controlled member is moved to key retaining position, said means having provisions whereby the key controlled member may be restored to position for key removal while the controlling elements remain unlocked; and leaf spring means for yieldingly maintaining the key controlled member in key retaining position.

1,391,941. TRAIN-CONTROL APPARATUS. JOHN S. CRAWFORD, New London, Conn. Original application filed Dec. 26, 1917, Serial No. 208,779, Patent No. 1,362,927, dated Dec. 21, 1920. Divided and this application filed Dec. 21, 1920. Serial No. 432,182. 10 Claims. (Cl. 246—202.)

5. In a device of the character described, a trip for actuating the control member of an automatic train stop, and a track motor for positioning said trip in the path of the control member comprising a vertically reciprocating plunger supporting the trip member, an armature on said plunger, a field structure surrounding said armature, slidable electrical connections to the movable armature, means for relatively reversing the connections between the armature and field, an adjustable counterbalance for the armature structure, and a hood carried by the movable armature structure covering the armature and the sliding connections aforesaid.

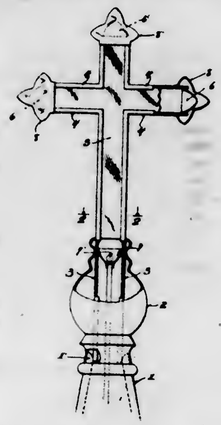
1,391,942. LUBRICANT-NIPPLE. NORMAN W. CUMMINS, Bridgeport, Conn., assignor to The Bassick Company, Bridgeport, Conn., a Corporation of Connecticut. Filed Mar. 26, 1921. Serial No. 455,731. 8 Claims. (Cl. 184—38.)

2. In a grease cup, a body having a seat, a spider on the seat, the body having its upper end bent to clamp the spider onto its seat and to form a second seat, a packing ring on the second seat, said upper end of the body being further bent to clamp said ring on said second seat, a cup engaged over and with the packing, and a lead screw borne by the cap and threaded through the spider.

1,391,943. LACE. LAWRENCE DINKELSPIEL, West New York, N. J. Filed Dec. 10, 1919. Serial No. 343,822. 9 Claims. (Cl. 2—146.)

1. Strip lace embodying a plurality of contiguous consecutive relatively nonextendible portions positioned in successive sequence, and extendible binding portions binding the relatively nonextendible portions together.

1,391,944. RELAY. FRANK L. DODGSON, Rochester, N. Y., assignor to General Railway Signal Company, Gates, N. Y., a Corporation of New York. Filed Mar. 31, 1917. Serial No. 158,821. 12 Claims. (Cl. 173—259.)

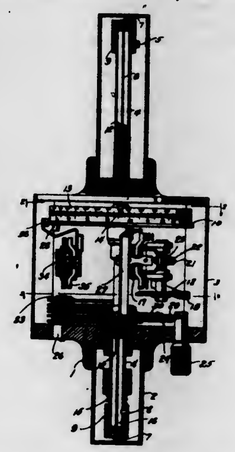


10. In a relay construction, a supporting panel having squared recesses formed on opposite sides thereof by projecting flanges, blocks of insulating material disposed on opposite sides of said panel and fitting in said recesses, said blocks and said panel having alined holes therein, a binding post passing loosely through said holes with an air space between it and the walls of said holes, one of said blocks having a groove formed in one of its faces extending outward from the holes therein to the outer

edge, one of said flanges having an opening therein alined with said groove, whereby a passageway is formed con-

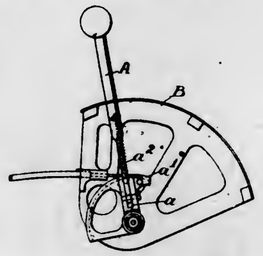
necting the air space around said post with the outside air, and means for clamping the binding post in place between said blocks.

1,391,945. ILLUMINATED CRUCIFIX. PHILLIPP F. FLAGGE, Green Bay, Wis. Filed Mar. 8, 1921. Serial No. 450,767. 2 Claims. (Cl. 240—2.)



2. An illuminated cross comprising a standard, metallic side panels extending from the standard, the same being merged into parallel horizontal sections to form cross arms, front and rear glass plates fitted to the flanges of the channel irons, a master reflector at the base of the cross stem, other reflectors at the ends of the cross arms and the top of the stem, and a lamp nested within the base reflector for diffusing light throughout the cross structure in conjunction with the series of reflectors at the top of the stem and the ends of the aforesaid cross arms.

1,391,946. BULK-CARGO CARRIER. HUGO P. FREAR, Bethlehem, Pa., assignor to Bethlehem Shipbuilding Corporation, Ltd., Bethlehem, Pa., a Corporation of Delaware. Filed Apr. 15, 1920. Serial No. 374,074. 36 Claims. (Cl. 114—73.)

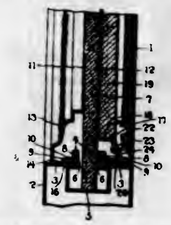


1. In a bulk cargo vessel of the character described, longitudinally extending, vertical trimming bulkheads on opposite sides of the center line extending in a fore and aft direction for any desired length of the hold, the distance between said trimming bulkheads being substantially less than the width of the cargo hold, and the height of said bulkheads being less than the distance between the bottom of the hold and the deck, whereby upper and lower openings are formed.

1,391,947. ELECTRICALLY-OPERATED TIMING APPARATUS. EDGAR W. GENT, New York, N. Y., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Jan. 29, 1921. Serial No. 441,091. 10 Claims. (Cl. 161—1.)

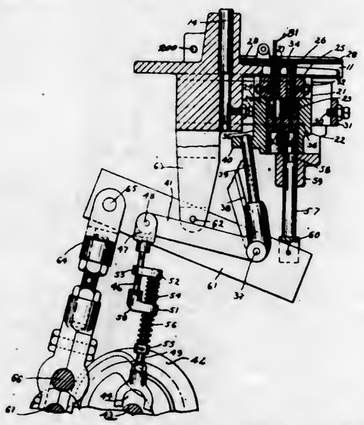
7. In a device for timing a series of electrical impulses, a time recording mechanism, a catch member to prevent the operation of said mechanism, a stepping magnet operated by said electrical impulses, and a stop magnet controlled by said stepping magnet to operate said catch member at the first and last of said series of impulses to respectively start and stop said time recording mechanism.

1,391,948. LEVER-CONTROL MECHANISM. ARTHUR HENRY GLEDHILL, Halifax, England. Filed Dec. 13, 1918. Serial No. 266,601. 1 Claim. (Cl. 74—39.)



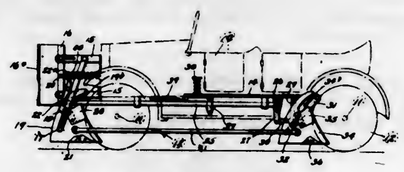
In lever control mechanism, the combination of a plate having a slot formed with ratchet teeth at each side, staggered in relation to one another, to form a continuity of inclined and transverse passages, a quadrant pivoted to move in a longitudinal direction in relation to such slot, a lever pivoted to the quadrant in such manner as to be capable of moving at right angles to the movement of the quadrant, and a spring connected at one end to the lever, and at the other end to the quadrant.

1,391,949. SHEET-METAL DOOR. HENRY R. GOGAY, Columbus, Ohio, assignor to Solar Metal Products Company, Inc., New York, N. Y., a Corporation of New York. Filed Mar. 17, 1917. Serial No. 155,501. 2 Claims. (Cl. 189—53.)



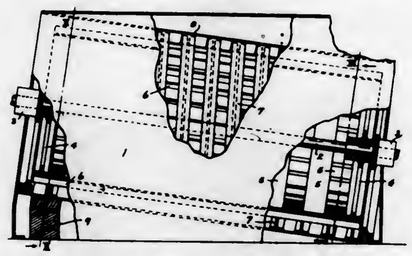
1. A sheet metal door comprising, a panel member having moldings formed integral therewith, said moldings being connected to form a continuous molding surrounding the periphery of said panel member and provided with inwardly turned flanges, stile and rail sections having longitudinal flanges, clamping members interposed between said flanges and arranged to slidably engage the flanges of the panel member to interlock the stile and rail sections to the panel member.

1,391,950. SHEET-METAL DOOR. HENRY R. GOGAY, Columbus, Ohio, assignor to Solar Metal Products Company, Inc., New York, N. Y., a Corporation of New York. Original application filed Mar. 17, 1917, Serial No. 155,501. Divided and this application filed Feb. 11, 1919. Serial No. 276,410. 4 Claims. (Cl. 189—53.)



1. A panel having a lateral wall and a continuous peripheral molding formed integral therewith, said molding and wall being offset from the panel to form a recess for the reception of a mirror or other member and a removable means for holding the mirror in the recess and in intimate contact with the panel.

1,391,951. PIERCING AND NAILING MECHANISM FOR HEEL-BUILDERS. GEORGE B. GROVER, Lynn, Mass., assignor to W. J. Young Machinery Company, Lynn, Mass., a Corporation of Massachusetts. Filed Aug. 2, 1919. Serial No. 314,946. 10 Claims. (Cl. 1—33.)



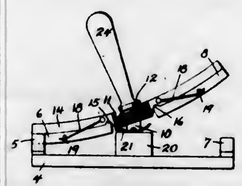
1. A heel building machine comprising supporting and gaging means arranged to define a space in which lifts may be assembled in position to form a heel, a piercing tool, a nail driver, and guiding means for said tools arranged to guide the latter across one end of said space in such manner that the tools may be placed alternately in a given operative position, whereby the piercing tool may be first actuated to open a passage through the assemblage of lifts and the driver may be subsequently operated to drive a nail into such passage.

1,391,952. AUTOMATIC SAFETY APPLIANCE FOR MOTOR-VEHICLES. MICHAEL JOSEPH HAGERTY, St. Louis, Mo. Filed Sept. 17, 1920. Serial No. 410,835. 7 Claims. (Cl. 180—83.)

1. The combination with a vehicle, of supporting members mounted thereon in a normally inoperative position and adapted to be moved into a supporting position on the ground, said supporting members being provided with seats for receiving the axles of said vehicle, laterally projecting lugs fixed on said members and designed to be engaged by the wheels of the vehicle when said supporting members are positioned on the ground whereby the vehicle is raised out of contact with the ground and the axles are seated in the axle seats of said members.

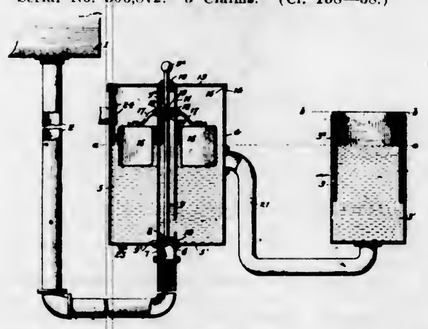
1,391,953. METHOD OF TREATING CANNED FOODS. OSWALD H. HANSEN, Port Washington, Wis., assignor of one-half to The Wisconsin Chair Company, Port Washington, Wis. Filed Nov. 9, 1918. Serial No. 261,791. 3 Claims. (Cl. 99—8.)

3. The method of sterilizing food, which comprises, hermetically sealing batches of the food in cylindrical metallic containers, gradually advancing the food laden containers endwise through a zone of uniform dry heat, and rotating the containers about their longitudinal axes while maintaining these axes inclined in the direction of advancement and at a constant angle relatively to a horizontal plane throughout the entire heating operation.



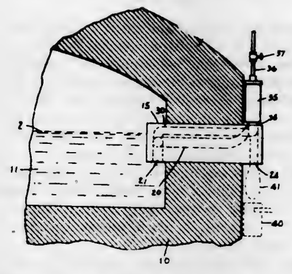
1,391,954. AUTOMOBILE DIRECTION-SIGNAL. WILLIAM S. HARRIS, WILLIAM CRONAN, and FRANK I. JACKSON, Bremerton, Wash. Filed Mar. 15, 1921. Serial No. 452,579. 4 Claims. (Cl. 116—50.)

1. In apparatus of the class described, the combination of a casing, means for securing the same at a side of an automobile, a rod pivotally connected to said casing, a frame connected to said rod, a pair of triangular plates pivotally connected to said frame and operatively connected to said plates, a bar movable longitudinally thereof in said casing, a lever fulcrumed to said bar, one end of said lever being pivotally connected to said rod, a spring carried by said bar and tending to maintain said lever in parallel relations with said bar,



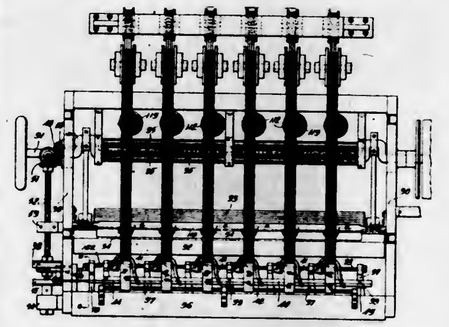
and means to impart longitudinal movements to said bar whereby said lever and rod influence said plates to afford direction indicative positions thereto.

1,391,955. ELECTRIC SWITCH. EDWARD VASSALLO HARTFORD, Deal, N. J. Original application filed Aug. 27, 1914, Serial No. 858,959. Renewed Oct. 19, 1918, Serial No. 258,909. Divided and this application filed Oct. 31, 1918. Serial No. 260,456. 2 Claims. (Cl. 200—1.)



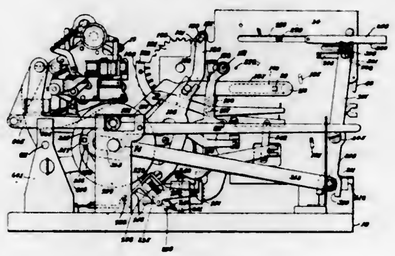
1. An electric switch comprising an insulating base, uprights mounted centrally thereon, an insulating block pivotally mounted in the upright, contact carriers having lateral extensions from each side of the block, each carrier being in electrical contact with an upright, a contact pivoted to each of said extensions, a spring connecting each contact with its extension and fixed contacts on the base to frictionally coöperate with the first mentioned contacts whereby a quick break may be obtained when the spring is tensioned.

1,391,956. AUTOMATIC FUEL-SUPPLY-REGULATING MEANS FOR HYDROCARBON-BURNERS. JAMES HENRY HOLLAND, Stuttgart, Ark. Filed June 26, 1919. Serial No. 306,872. 3 Claims. (Cl. 158—38.)



1. The combination with a hydrocarbon chamber, a liquid fuel reservoir and a pressure pipe line for conveying liquid fuel from the reservoir to the burner, of automatic fuel supply regulating means including a closed casing providing a fuel distributing chamber having an inlet opening in its bottom wall, said pressure pipe line leading to said opening, a conduit leading from the chamber to the reservoir of the hydrocarbon burner, a reciprocating valve for the inlet opening in the bottom of the chamber provided with a valve stem extending through the top wall of the casing a substantial distance outside of the same and provided with an operating knob or finger piece, the valve stem having a threaded portion intermediate its ends, a block having a threaded opening adjustably engaging the threaded portion of the stem, a guide on the casing and slidably supporting the upper part of the valve stem, an annular float in the chamber surrounding the valve stem, a tubular stem extending longitudinally of and secured to the casing, and levers pivoted intermediate their ends to the tubular stem, the outer ends of the levers being pivotally connected with the float and the inner ends of the levers being connnected with said block, the connection between the valve operating levers and valve stem being adjustable by the rotation of the valve stem through the operating finger piece or knob on the valve stem.

1,391,957. GLASS-DISCHARGING MECHANISM. EDWARD S. HUTTON, Lapel, Ind. Filed Mar. 26, 1920. Serial No. 368,867. 3 Claims. (Cl. 49—55.)

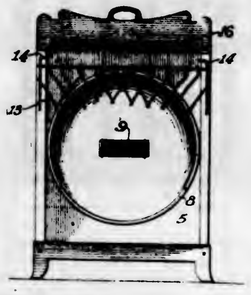


1. Discharge means for a glass tank, including a discharge member adapted to extend through the wall of the glass tank and beyond the inner and outer surfaces thereof, and having a glass conduit leading from the bottom of the inner end of said member upwardly and thence horizontally to the outer end of said member and thence upwardly to a point slightly above the normal level of the glass in the tank and thence downwardly to the discharge outlet, and an air conduit leading from the outer end of said member horizontally to the inner portion of said glass conduit, and means for introducing air under pressure in said air conduit.

1,391,958. NEEDLE-LOOM. SOLOMON KENDRICK, Chelsea, Mass., assignor to Everlastik, Incorporated, Boston, Mass., a Corporation of Massachusetts. Filed Jan. 5, 1921. Serial No. 435,155. 14 Claims. (Cl. 139—20.)

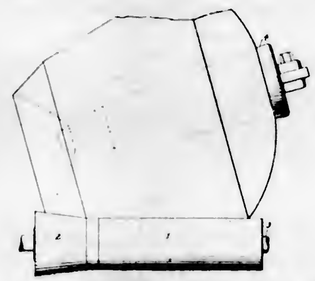
6. In a needle loom, an oscillatory needle and means for operating it to lay a loop of weft thread in the shed, in combination with an oscillatory shuttle arranged to enter and pass a selvage thread through said loop, and movable about a horizontal axis transverse to and below the warp.

1,391,959. TRANSFER OR CARRY-OVER MECHANISM. WILLIAM W. LASKER, Brooklyn, N. Y., assignor to Powers Accounting Machine Company, New York, N. Y., a Corporation of Delaware. Filed Apr. 3, 1918. Serial No. 226,493. 31 Claims. (Cl. 235—133.)



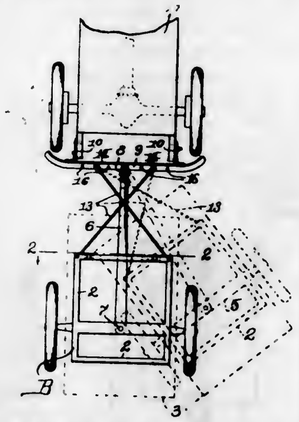
8. A printing tabulator mechanism comprising a printing mechanism, a tabulating mechanism comprising an accumulating carriage, accumulative elements carried thereby, reciprocating members for actuating the accumulative elements, a carry-over mechanism set in operation by the accumulator elements and engaging the reciprocating members for moving them, said carry-over mechanism comprising rockable levers adapted to engage the reciprocating members and a reciprocating cam plate for operating the rockable levers, and means for reciprocating the cam plate, said means comprising a rack bar carried by the plate, a pinion in mesh therewith and means for sliding the said pinion.

23. In an apparatus of the character described, the combination of an adding mechanism comprising actuating bars and a carrying mechanism adapted to positively kick back one or more of said bars when carrying is effected; and a spring pressed restoring slide slidably mounted to engage each bar and adapted to yieldably hold said bar inwardly.



31. In an apparatus of the character described, the combination of a reciprocatory accumulator carriage: accumulator gear wheels carried on said carriage; adding elements operatively connected to the accumulator gear wheels and provided with a shoulder; settable levers fulcrumed on said carriage and adapted to be set by the accumulator wheels; latches for holding the settable levers set; a carrying bar operatively connected to the setttable lever and adapted when the settable lever is set to be in position to engage said shoulder; and stationary means for positively releasing said latches.

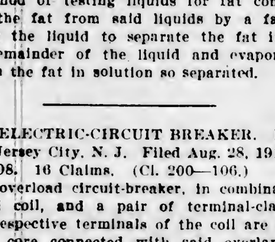
1,391,960. ELECTRIC HEATER. RICHARD G. LEDIG, Philadelphia, Pa., assignor to A. Mecky Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Oct. 25, 1920. Serial No. 419,172. 4 Claims. (Cl. 219—34.)



3. An electric heater comprising in combination, a casing open in front, a recessed partition within said casing, a reflecting member secured within the recess in said partition, ears secured to said reflecting member, and a heating element positioned entirely within said casing and partially within said reflecting member and secured to said reflecting member by the above mentioned ears.

1,391,961. COP-CONE. JOHN O. MCKEAN, Westfield, Mass., assignor to Foster Machine Company, Westfield, Mass., a Corporation of Massachusetts. Filed Sept. 22, 1920. Serial No. 411,968. 4 Claims. (Cl. 242—43.)

3. In a winding machine, the combination with a driving roll divided into a cylindrical member and a flaring member, of a rigid cop cone, its winding surface having a gradual taper opposite the cylindrical member terminating at its smaller end in a steeper taper in the same direction opposite the flaring member.



1,391,962. TRAILER CONNECTION. WALLIE C. MANGEL, Fairfax, Minn. Filed Jan. 27, 1919. Serial No. 273,659. 3 Claims. (280—33.4.)

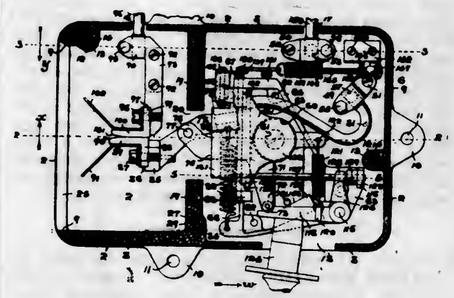
1. In a trailer for vehicles, the combination with a bumper secured to and extending beyond the rear end of an automobile chassis, of a rigid tongue pivotally secured by one end centrally to the trailer and its free end being adjustably and swivelly connected to the bumper, and flexible steering connections between said trailer and bumper.

1,391,963. STEERING AND COUPLING DEVICE FOR PLOWS. EDGAR T. MILLER, Greensburg, Pa. Filed Jan. 29, 1921. Serial No. 441,008. 4 Claims. (Cl. 213—67.)

1. In a steering device of the class described comprising a coupling plate adapted to be connected to the rear of a tractor, a rotating member carried by said plate, a steering post and coöperating gearing at the lower end thereof for operating said rotating member, a draw bar

straddling said member and pivotally connected forwardly thereof to the coupling plate, and means for angling said draw bar upon rotation of the steering post and said rotating member.

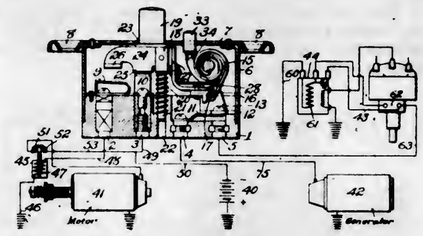
1,391,964. HEADREST FOR HAMMOCKS. HARRY MINTZ, Mattapan, Mass. Filed Oct. 8, 1920. Serial No. 415,541. 3 Claims. (Cl. 5—43.)



1. A head rest for use with a couch device having a mattress supporting frame provided with longitudinally and transversely extending spring forming elements, said head rest comprising a mattress engaging frame pivotally supported adjacent one end for angular adjustment, and a brace member pivoted to said head rest and comprising an integrally formed downwardly projecting toe constructed and arranged selectively to engage various of said transversely extending elements.

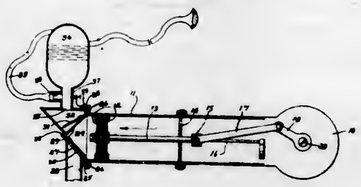
1,391,965. PROCESS OF TESTING MILK AND MILK PRODUCTS. JULIUS JOHN MOJONNIER, Oak Park, Ill., assignor to Mojonnier Bros. Co., Chicago, Ill., a Corporation of Illinois. Filed Feb. 6, 1920. Serial No. 356,666. 7 Claims. (Cl. 23—30.)

7. A method of testing liquids for fat consisting in extracting the fat from said liquids by a fat solvent, centrifuging the liquid to separate the fat in solution from the remainder of the liquid and evaporating the solvent from the fat in solution so separated.



1,391,966. ELECTRIC-CIRCUIT BREAKER. EDVARD M. MOLLER, Jersey City, N. J. Filed Aug. 28, 1919. Serial No. 320,508. 16 Claims. (Cl. 200—106.)

1. In an overload circuit-breaker, in combination with an overload coil, and a pair of terminal-clamps with which the respective terminals of the coil are connected, a magnetic core connected with said overland coil, a switch-arm oscillatorily mounted upon said core, a spring-controlled contact-lever connected with said switch-arm, a contact-tip carried by said switch-arm, a fixed contact-tip with which said first-mentioned contact-tip is normally in contact, a clamping element carried by said contact-lever, an electrical series-connection between said

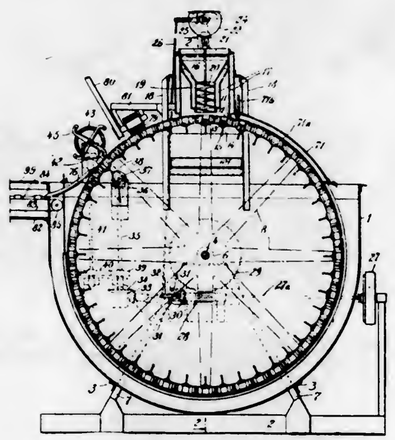


clamping element and one of said terminal clamps, and a tripping means for releasing said contact-lever and breaking the electrical contact between said contact-tips.

1,391,967. ELECTRICAL APPARATUS. WILLIAM B. MOSES, Brookline, Mass. Filed Mar. 6, 1917. Serial No. 152,542. 16 Claims. (Cl. 290—37.)

1. In apparatus of the character described, in combination, an ignition device for an internal combustion engine, a generator, an electric circuit including said ignition device and said generator and having means other than said generator for supplying current to said ignition device, and a thermostatic device in circuit adapted to be influenced by predetermined current values to automatically alter the operative condition of said circuit, and means for manually effecting such alteration in circuit conditions.

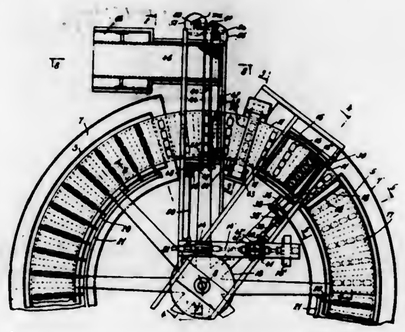
1,391,968. AUTOMOBILE-ACTUATED PUMP. WIGO G. NYMON, Fargo, N. D. Filed Mar. 5, 1921. Serial No. 449,819. 1 Claim. (Cl. 103—65.)



A pumping attachment for automobiles comprising a cylinder having a connected crank case, means for sup-

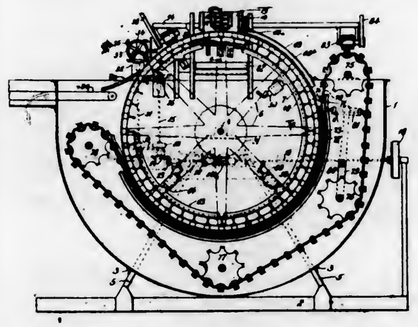
porting the attachment on the running board of an automobile, the cylinder at its opposite end from the crank case being provided with an approximately triangular head formed with an outlet and an inlet opening, a pipe leading from the inlet opening of the head, an inlet flap valve controlling the passage through the inlet opening, an outlet flap valve controlling passage through the outlet opening, a substantially triangular casing detachably engaged with the face of the head having the outlet flap valve, said casing having an outlet opening, a discharge pipe operatively connected with the outlet opening, a piston operating within the cylinder, a crank within the crank case, a connection between the piston and crank, and means for detachably connecting the crank to the driving shaft of an automobile.

1,391,969. ASPHALT PACKAGE AND METHOD OF MAKING THE SAME. FREDERICK C. OVERBURY, Hillsdale, N. J., and CHESTER E. RAHA, Brookline, Mass., assignors to The Flintkote Company, Boston, Mass., a Corporation of Massachusetts. Filed May 8, 1918, Serial No. 233,267. Renewed Mar. 9, 1921. Serial No. 450,937. 9 Claims. (Cl. 23—11.)



3. A method of packaging asphaltic material, which consists in introducing a flexible fibrous envelop into, and as the lining of, a removable form, then molding said asphaltic material in said form and envelop, and removing said form, leaving the envelop adhering to the molded mass.

1,391,970. APPARATUS FOR MOLDING SOAP. CECIL O. PHILLIPS, New York, N. Y., assignor to The American Cotton Oil Company, New York, N. Y., a Corporation of New Jersey. Filed June 5, 1920. Serial No. 386,912. 15 Claims. (Cl. 18—26.)

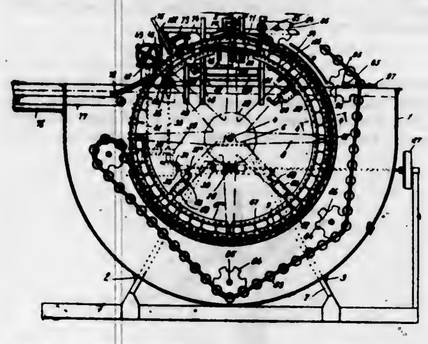


1. An apparatus for molding and cooling soap, comprising a series of molds for individual cakes of soap cylindrically arranged and opening radially outward, means for filling the molds with molten soap, means for moving the molds through a cooling liquid and relatively with respect to the liquid whereby to subject the molds to the action of continuously changing liquid, and means in connection with the molds for protecting the soap from direct contact with the liquid.

1,391,971. APPARATUS FOR MOLDING SOAP. CECIL O. PHILLIPS, New York, N. Y., assignor to The American Cotton Oil Company, New York, N. Y., a Corporation of New Jersey. Filed June 5, 1920. Serial No. 386,913. 20 Claims. (Cl. 18—26.)

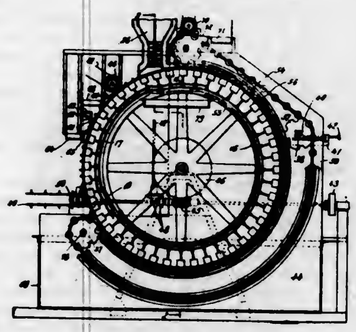
1. An apparatus for molding and cooling soap comprising a plurality of molds, means for moving the molds about a vertical axis, means for filling the molds with molten soap and means for conveying the molds in indirect contact with a cooling liquid.

1,391,972. METHOD AND APPARATUS FOR MOLDING SOAP. CECIL O. PHILLIPS, New York, N. Y., assignor to The American Cotton Oil Company, New York, N. Y., a Corporation of New Jersey. Filed Aug. 5, 1920. Serial No. 401,330. 8 Claims. (Cl. 18—26.)



1. The method of molding, cooling and pressing soap, in order to convert the soap into the form of compressed cakes, which comprises charging the molten soap into molds for the individual cakes of soap, passing the molds through cold brine without direct contact of the brine with the soap, subjecting the soap while in the molds to a sufficient degree of cooling to effect solidification, and to a sufficient degree of pressure to effect the pressing of the cooled soap, the cooling and pressing operations being so regulated as to give a cooled and pressed cake of soap, and removing the cake of soap thus produced from the molds.

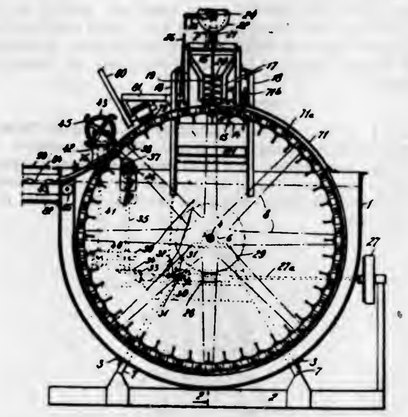
1,391,973. APPARATUS FOR MOLDING SOAP. CECIL O. PHILLIPS, New York, N. Y., assignor to The American Cotton Oil Company, New York, N. Y., a Corporation of New Jersey. Filed Feb. 24, 1921. Serial No. 447,403. 6 Claims. (Cl. 18—26.)



1. An apparatus for molding and cooling soap, comprising a cylindrically arranged series of molds for individual

cakes of soap, said molds opening outwardly, means for filling the molds with molten soap, means for conveying the molds through a cooling liquid, and means traveling

with the molds for closing them and protecting the soap therein from direct contact with the liquid while immersed therein.

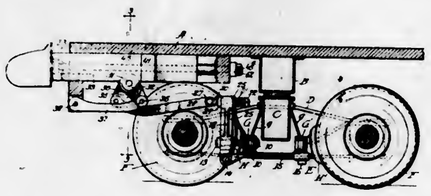


1,391,974. APPARATUS FOR MOLDING AND COOLING SOAP. CECIL O. PHILLIPS, New York, N. Y., assignor to The American Cotton Oil Company, New York, N. Y., a Corporation of New Jersey. Filed Mar. 5, 1921. Serial No. 449,709. 8 Claims. (Cl. 18—26.)

1. In a soap machine, a series of molds, means for moving the molds over a continuous path in succession, feeding means adjacent to such path for forcing molten soap into the molds as they pass the feeding means, means for ejecting the soap from the molds, cover plates for the molds, means for mounting the plates to move along a path adjacent to that traveled by the molds between the feeding means and the ejecting means, and in contact with the molds, interlocking means for constraining the plates to engage the molds in a predetermined relation and to travel with the molds in such relation, and means for spraying the molds and cover plates with a cooling liquid as they travel together.

1,391,975. METHOD FOR MOLDING AND COOLING SOAP. CECIL OCTAVIOUS PHILLIPS, New York, N. Y., assignor to The American Cotton Oil Company, New York, N. Y., a Corporation of New Jersey. Original application filed June 5, 1920, Serial No. 386,912. Divided and this application filed June 25, 1921. Serial No. 480,459. 5 Claims. (Cl. 18—38.)

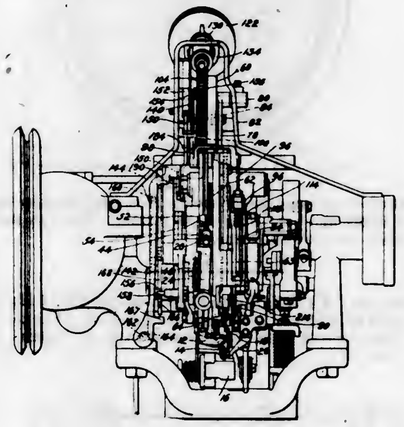
1. The method of molding and cooling soap which comprises charging the soap into molds, subjecting the molds to the action of cold brine without direct contact of the brine with the soap, and thereby effecting a preliminary



cooling of the soap in the molds, removing the soap from the molds and subjecting it to further cooling in direct contact with the cold brine.

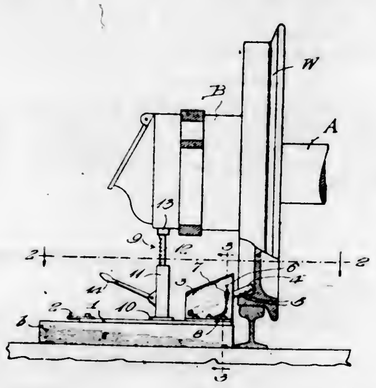
1,391,976. VALVE-OPERATING MECHANISM FOR VAPOR-BURNERS. OSBORNE E. QUINTON, Chicago, Ill. Filed June 18, 1920. Serial No. 390,010. 11 Claims. (Cl. 158—33.)

1. In a reservoir having a filling connection and a normally fixed outlet connection and adapted to contain fuel under pressure, a valve controlling the outlet connection of said reservoir to prevent the escape of air, and a gravity valve operating member insertible through the filling connection of said reservoir and detachably supported therein to swing in an arc and automatically operate said valve.



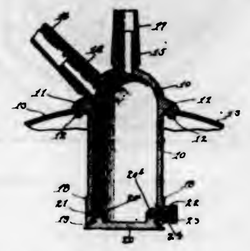
1,391,977. BRAKE MECHANISM FOR RAILWAY-CARS. JOSEPH REIF, Hebron, Ind., assignor of forty-five per cent. to Francis E. Ling, Hebron, Ind. Filed June 1, 1920. Serial No. 385,482. 7 Claims. (Cl. 188—168.)

1. In brake mechanism for railway cars, the combination of a brake beam and brake shoes, of a longitudinally



movable draw bar, pressure mechanism tending to hold said draw bar at a point intermediate the limits of its movement, connections between said draw bar and the brake beam whereby the brake shoes are applied to the wheels when the draw bar is at such point and whereby the brake shoes are released when the draw bar is shifted, and means whereby said draw bar may be manually shifted.

1,391,978. SEWING-MACHINE. WILLIAM THOMAS BUCKINGHAM ROBERTS, Leicester, England, assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Nov. 17, 1916. Serial No. 131,905. 12 Claims. (Cl. 112—35.)



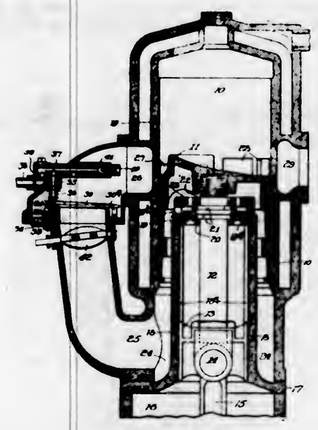
12. A sewing machine, having in combination, stitch forming devices including a looper, a looper threading mechanism, and means to operate the threading mechanism to thread the looper while the shoe remains in sewing position.

1,391,979. JACK-BLOCK AND CAR-WHEEL CLAMP. CLOID E. RODGERS, Logansport, Ind. Filed Aug. 25, 1920. Serial No. 405,987. 2 Claims. (Cl. 254—33.)

1. A wheel clamp comprising a base plate adapted to support a lifting jack, an inverted U-shaped housing detachably connected to said plate and provided with pairs of alined apertures, a clamp bar having one of its ends pivotally mounted within the housing and provided at its other ends with means to grip a wheel ball, and a pin adapted to be inserted into said apertures for bridging the interior of the housing and limiting the swinging movement of the bar upwardly.

1,391,980. MILKING-MACHINE. NEALON D. RUTHERFORD, Lansing, Mich., assignor to United Engine Company, a Corporation of Michigan. Filed Sept. 25, 1920. Serial No. 412,748. 6 Claims. (Cl. 31—98.)

1. In a valve mechanism for milking machines, the combination of a chamber provided with outlets leading to a vacuum producing device and to a teat cup, said chamber being provided with a downwardly opening lower extremity, a valve seat adjacent said lower extremity, a valve for coöperating with said seat at the lower extremity of the chamber and comprising a substantially circumferential member having a peripheral seat face thereon adapted to coöperate with the valve seat on the chamber, a vertically extending member above said valve face, said vertically extending member on said valve being undercut, and means secured to the wall of the chamber on the interior thereof adapted to extend into the undercut portion of the extension on the valve to secure the latter in its normal working position.

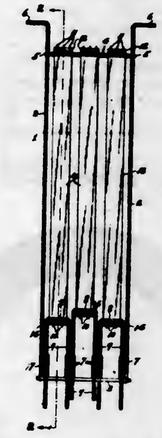


3. In a valve mechanism for milking machines, the combination of a chamber provided with outlets leading to a vacuum producing device and to a teat cup respectively, said chamber being provided with a downwardly opening lower extremity, a valve seat adjacent said lower extremity and formed integrally therewith, a valve for coöperating with said seat comprising a substantially circumferential member having a peripheral seat face thereon adapted to coöperate with the valve seat at diametrically opposite portions thereof adapted to extend on the interior of the chamber when the valve is in working position, and means secured to the wall of the chamber on the interior thereof adapted to coöperate with said vertical extensions to secure the valve in its normal working position.

4. In a valve mechanism for milking machines, the combination of a chamber provided with outlets leading to a vacuum producing device and to a teat cup respectively, said chamber being provided with a downwardly opening lower extremity, a valve seat adjacent said lower extremity, a valve seat adjacent said lower extremity and formed integrally therewith, a valve for coöperating with said seat comprising a substantially circumferential member having a peripheral seat face thereon adapted to cooperate with the valve seat on the chamber, vertical extensions on the valve at diametrically opposite portions thereof adapted to extend on the interior of the chamber when the valve is in working position, and means secured to the wall of the chamber on the interior thereof adapted to coöperate with said vertical extensions to secure the valve in its normal working position comprising a pin fixed in the wall of the chamber and a second pin screw threaded and being adjustably secured in the chamber wall.

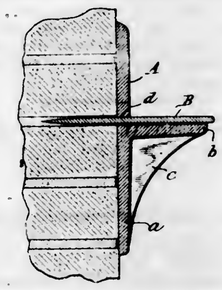
5. In a valve mechanism for milking machines, the combination of a valve chamber, a valve seat surrounding an opening in the chamber wall, a valve coöperating with said seat, said valve being provided with vertical extensions on diametrically opposite sides of the valve and said vertical extensions being provided with laterally extending sockets, a pin fixed in the wall of the chamber and extending to the interior thereof for coöperating with one of the sockets on the vertical extension on the valve and a second pin adjustably secured in the wall of the chamber and extending to the interior and being adapted to coöperate with the socket of an extension on the valve to retain the valve in its normal working position.

6. In a valve mechanism for milking machines, the combination with a chamber provided with a valve seat, a valve adapted to coöperate with said seat, said valve being provided with diametrically located vertical extensions each of which have laterally opening sockets therein, a fixed pin on the interior wall of the chamber for cooperating with one of the sockets of the valve, a member screw threaded in the chamber wall and a screw threaded pin adapted to coöperate with said screw threaded member for engaging the socket in the other vertical extension of the valve to retain the valve in its normal working position.



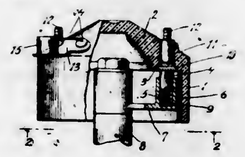
1,391,981. INTERNAL-COMBUSTION ENGINE. JOHN F. SANDELL, Chicago, Ill. Filed Oct. 25, 1919. Serial No. 333,222. 7 Claims. (Cl. 123—74.)

1. In an internal combustion engine, a cylinder, means for compressing air for said engine cylinder, a passage from said means to said cylinder, a throttle in said passage, a fuel nozzle in said passage between the throttle and cylinder, and means for ejecting fuel from said nozzle after part of the air in said passage has been passed into the cylinder.



1,391,982. PHOTOGRAPHIC-FILM-SUPPORTING FRAME. GEORGE I. SCHREIBER, Newark, N. J. Filed Sept. 21, 1920. Serial No. 411,709. 4 Claims. (Cl. 95—100.)

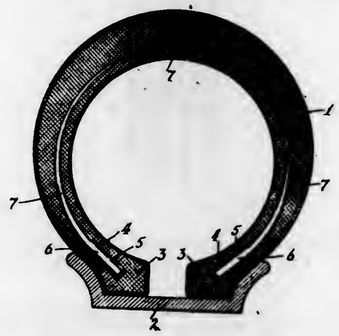
1. In a device of the kind described, a frame comprising side rods, a top bar and a bottom bar, upwardly projecting piercing pins connected with said top bar upon which one end of a film strip may be engaged, and adjustable film strip engaging means connected with said bottom bar, said engaging means having downwardly projecting piercing pins upon which the opposite end of a film strip may



be fastened, said engaging means being movable longitudinally to stretch tautly the body of said film strip.

1,391,983. SCAFFOLD-BRACKET. KARL R. SCHUSTER, Brooklyn, N. Y. Filed Nov. 10, 1915, Serial No. 60,682. Renewed Feb. 24, 1921. Serial No. 447,552. 5 Claims. (Cl. 304—33.)

1. A scaffold bracket comprising a body member provided with a shelf and a slot positioned above said shelf, and a wall-engaging member separate from said body member, said wall-engaging member being driven through the slot and a substantial part of said wall-engaging member being exposed above the shelf so as to be available in supporting a part of the load of the scaffold.



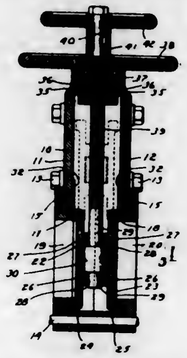
1,391,984. TIMER FOR INTERNAL-COMBUSTION ENGINES. JEROME F. SHERBINO, Mountain Lakes, N. J. Filed Oct. 15, 1919. Serial No. 330,818. 1 Claim. (Cl. 200—19.)

A timer comprising a conical cap having conical inner and outer surfaces, the said outer surface forming a

greater angle with the axis of the cap than said inner surface, so that said surfaces will diverge toward the base of the cap and will give the wall of the cap a thickness decreasing gradually toward the apex of the cap, the base of the cap having an internal surface transverse to said axis and contact members at said surface, and a casing extending from the outer portion of said base in the direction opposite to the cap, at a greater distance from the axis than said contact members.

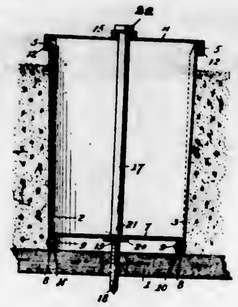
1,391,985. SPRING-TIRE. GAETANO E. SIINO, Pittsburg, Calif. Filed May 16, 1921. Serial No. 469,832. 1 Claim. (Cl. 152—8.)

A spring-tire comprising a cushion body longitudinally open at its base; holding-rings embedded in the body base one on each side of its opening; and a plurality of spring members embedded in said body, the ends of said members being fitted into the holding rings, and said members thence extending and traversing the side and tread regions of the body.



1,391,986. EDUCATIONAL APPLIANCE. KIRK D. SMITH, Wendell, N. H. Filed Jan. 22, 1921. Serial No. 439,314. 2 Claims. (Cl. 35—9.)

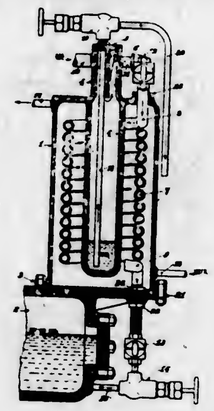
2. An educational device comprising a spindle, confining means spaced apart on the spindle, a plurality of disk-like sections having central apertures and arranged side by side between said confining means and around the spindle and bearing educational devices on their peripheries, and a continuous sleeve, of friction-creating material, extending between the confining means and through the plurality of side by side sections and resting snugly between and in contact with the spindle and the walls of the apertures in the sections, whereby the friction between the sleeve and each disk-like section is greater than the friction between adjacent disk-like sections.



1,391,987. GATE-VALVE. WILLIAM B. SMITH WHALEY, Malden, Mass., assignor to American Whaley Engine Company, Boston, Mass., a Corporation of Massachusetts. Filed Nov. 23, 1917. Serial No. 203,517. 2 Claims. (Cl. 251—64.)

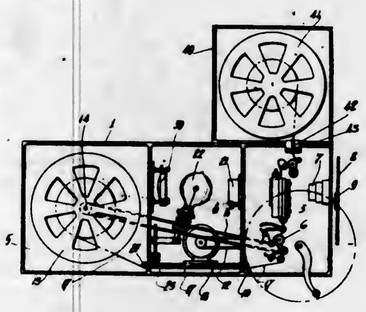
1. In a valve, the combination of a parted casing comprising two similar members adapted to be joined together to form a unit casing member provided with an elongated chamber, having an end or neck opening and oppositely disposed openings in the sides of said casing members provided with parallel valve seats surrounding said openings; a similar and independent valve for each of said oppositely disposed openings provided with a pair of cam retaining lugs; a valve stem interposed between said valve and having a screw threaded portion projecting through the neck portion of said unit casing and a cam portion engaged by said cam retaining lugs; a

hand wheel rotatably held in said neck and opening and against axial movement and engaging said screw threaded portion of said valve stem to move same axially therein; and an auxiliary hand wheel for said valve stem secured thereto to rotate therewith and adapted independently to rotate said stem and said cam thereof to cause the latter to wedge the said valves upon their respective valve seats or to release same therefrom.



1,391,988. MOLD. RAYMOND P. ZENTS, Omaha, Nebr. Filed Apr. 27, 1920. Serial No. 377,036. 15 Claims. (Cl. 25—128.)

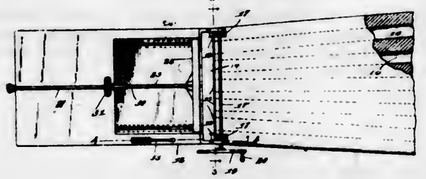
15. A mold comprising a sectional tapered sleeve, outwardly extending projections formed on the upper end of each section, a cover rotatably mounted on the top of the sleeve and adapted to engage the projections to reduce the diameter of the sleeve, an offset formed on the top of the cover, a cross-bar connecting the sections of the sleeve adjacent their lower ends, a threaded bolt extending through the offset on the cover and cross-bar, a washer carried by the threaded bolt and engaging the underface of the cross-bar, and a pin extending transversely through the bolt and engaging the under side of the washer.



1,391,989. CONDENSER. FERDINAND JOSEPH ZOPPEL, Cincinnati, Ohio. Filed Dec. 13, 1919. Serial No. 344,595. 3 Claims. (Cl. 257—29.)

1. In condensing apparatus, a condensing chamber provided with an oil pocket having a closed bottom, said pocket embraced within and extending above the condensing chamber through an otherwise closed top, said chamber and pocket being formed as a single integral

structure provided with a lower flange adapting it to rest upon and be secured to the ammonia receiver as a bottom support and closure.

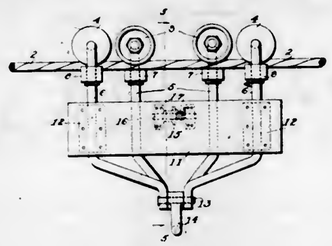


1,391,990. PORTABLE CINEMATOGRAPH-PROJECTOR. REGINALD IGNATIUS ATHERTON, North Finchley, England. Filed Aug. 24, 1920. Serial No. 405,713. 15 Claims. (Cl. 88—17.)

1. In a portable cinematograph projector, a casing, a series of separate compartments in the casing, projector mechanism in one compartment at the front of the casing, a take-up spool in a rear compartment, an illuminating device in a compartment between these two compartments and a channel connecting the front and rear compartments through which the film passes from the projector mechanism to the take-up spool.

1,391,991. GUN. CHESTER C. BELL, Galesburg, Ill. Filed Feb. 20, 1920. Serial No. 360,083. 2 Claims. (Cl. 89—9.)

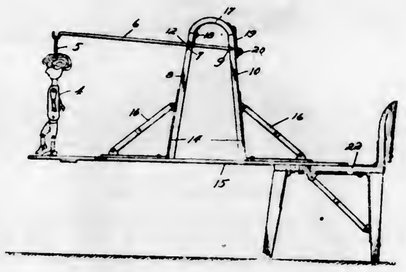
1. In a device of the class described, a framework, a plurality of barrels mounted thereon and having their axes in an approximately horizontal plane, a plurality of firing devices, a transverse member for mounting said devices, means for moving the transverse member vertically into and out of operative position, a hammer engaging the firing devices simultaneously, the framework having a bore therein, a slidable element connected with the hammer, a spring encircling said element and abutting the framework at the end of the above, one end of the spring being fixed with reference to the slidable element,



a lever, a rod pivoted to the lever and to the slidable element for moving the latter and the hammer outwardly and compressing the spring, and shell extracting means mounted in the framework.

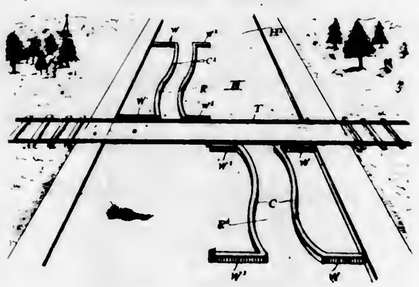
1,391,992. PROTECTING OBJECTS FROM WAVE ACTION. PHILIP BRASHER, New York, N. Y. Filed Sept. 11, 1920. Serial No. 409,682. 5 Claims. (Cl. 61—6.)

1. An apparatus of the character stated, comprising a pair of perforated air discharge pipes, one pipe of appreciably smaller diameter than the other and located within the other.



1,391,993. OVERHEAD-TRACK SUSPENSION MEANS AND LOAD-CARRIAGE. WILSON A. BROWNLEE, Quathiaski Cove, British Columbia, Canada. Filed Feb. 10, 1921. Serial No. 443,966. 6 Claims. (Cl. 104—182.)

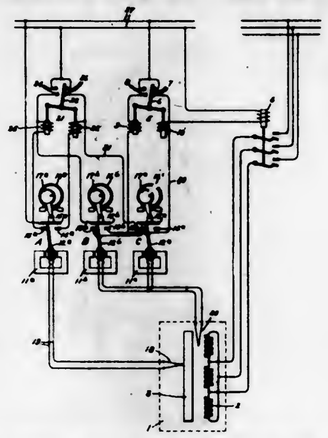
1. In an overhead wire rope system, the combination with the track rope, track plates secured to the track rope at the required intervals apart, the edges of each of which plates form tracks around each side from and to the line of the track rope, a suspension rod secured to the middle of each track plate from the overhead supports, sheaves grooved to fit the track rope, a carriage suspended from opposite sides of adjacent sheaves, means for retaining the sheaves together with their grooves in alinement with the track rope, means coöperative with the approach of the carriage to the suspension track plate for releasing the track sheaves from their retaining means



and permitting them to move apart around the opposite sides of the track plate, and means after leaving the track plate for again connecting the sheaves of each side together.

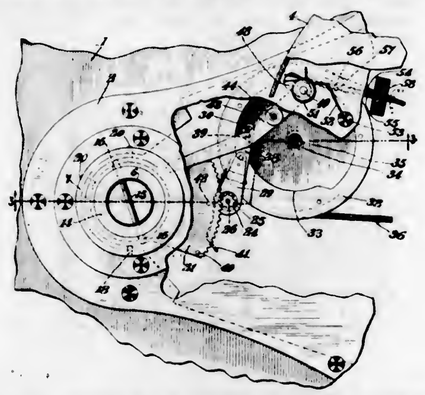
1,391,994. DANCING TOY. ROLAND F. CALHOON, Kansas City, Kans., assignor of one-half to Martha W. Langford, Kansas City, Kans. Filed Feb. 17, 1920. Serial No. 359,264. 3 Claims. (Cl. 46—40.)

1. A dancing toy structure comprising a jointed dancing figure and a collapsible frame work carrying a resilient rod suspending said figure, said frame work comprising a resilient strip presenting a surface in position for engagement with the feet of the dancing figure, and a pair of spaced upright members hingedly connected with said strip and provided with means for bracing and latching said members in upright relation.



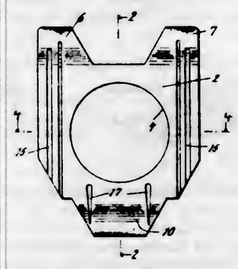
1,391,995. HIGHWAY FOR GRADE-CROSSINGS. KENNETH WILSON CARTER, San Antonio, Tex. Filed Oct. 29, 1920. Serial No. 420,416. 4 Claims. (Cl. 94—1.)

1. A highway for grade crossings, comprising curbings arranged in pairs at the opposite sides of a railway track, with the curbings of each pair spaced apart to provide tortuous roadways, the curbings of one pair being offset with relation to the curbings of the other pair to allow of the quick get-away of a vehicle after it has traversed one roadway.



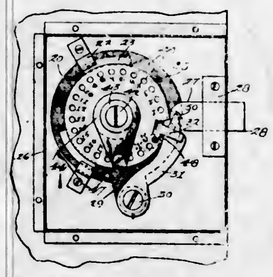
1,391,996. CONTROL FOR ELECTRIC FURNACES AND THE LIKE. EDGAR F. COLLINS, Schenectady, N. Y., assignor to General Electric Company, a Corporation of New York. Filed Nov. 14, 1918. Serial No. 262,458. 18 Claims. (Cl. 204—64.)

1. The combination with an electric furnace or the like, of a plurality of controlling devices for the heating element, each for maintaining the heating element at a different temperature, means responsive to the temperature of the heating element for controlling the said de-



vices and means controlled by the temperature of the furnace charge for shifting the control from one device to the other.

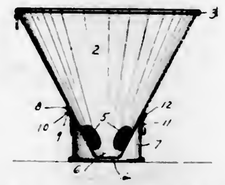
1,391,997. MECHANICAL MOVEMENT. EDWARD T. CONDON, Jr., Morristown, N. J. Filed Nov. 23, 1916. Serial No. 132,935. 26 Claims. (Cl. 192—116.)



10. In combination, a rotating member, a traveling member adapted to be swung inwardly by the rotating member, a movable element, a movable arm adapted to throw the movable element in one direction, a cam driven from the rotating member having two acting faces separated one from the other and adapted one to move the movable arm into the path of the second and the second to actuate the movable arm to throw the movable element, means including a sleeve connected to rotate with the swinging movement of the traveling member, a gear-sector mounted on the sleeve, a pinion in mesh with the gear-sector, and a frictional connection between the pinion and the movable arm for yieldingly pressing the said arm when released by the first acting face out of the path of the second acting face of the cam during the inward swinging movement of the traveling member, and means actuated by an outward swinging movement of the traveling member to starting position for restoring the movable element to its original position and yieldingly holding the movable arm pressed back out of the path of the second acting face of the cam.

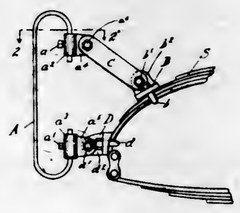
1,391,998. DUST-GUARD FOR CAR-AXLE BOXES. ALEXANDER CURRIE, Yonkers, N. Y. Original application filed Nov. 24, 1917, Serial No. 203,805. Divided and this application filed Nov. 18, 1918. Serial No. 263,030. 5 Claims. (Cl. 64—22.)

1. A dust guard for car axle boxes comprising a single plate having at its upper end a pair of spaced flanges located toward opposite sides of the plate, and at its lower end a single flange located centrally between opposite sides of the plate, said upper and lower flanges being adapted to bear on one wall of the dust guard slot, and the body of the plate being adapted to bear on the opposite wall of the dust guard slot.



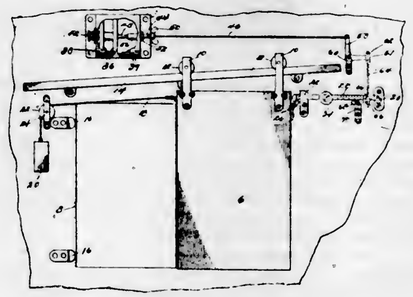
1,391,999. COMBINATION-LOCK. MICHAL CZYZ, Toledo, Ohio. Filed Dec. 9, 1920. Serial No. 429,434. 1 Claim. (Cl. 70—53.)

In a lock of the character described, a casing, an operating spindle extending into said casing, a plate on said spindle spaced from the inner face of the front wall of said casing, said plate having a plurality of arcuate slots near its periphery, a plurality of hooked clamps allowing a rotation of said plate within certain limits and securing the same to the casing, a locking bolt, a guide in the front wall of said casing for guiding said bolt, a forked rear end on said bolt straddling said plate, a pin connecting the prongs of said rear end, an arcuate, nearly radial slot in said plate in which said pin travels, an ear or projection on said plate, an operating finger pivotally secured at one of its ends to said ear, a plurality of recessed tumbler disks on said spindle, a lug on the upper end of said finger normally engaging the recesses in said disks, a finger at the other end of said operating finger opposite to its pivot point, an engaging face at the free end of said last named finger for engaging said forked lock bolt to press the same into locking position upon the proper operation of said spindle and to unlock the lock upon the operation of said plate.



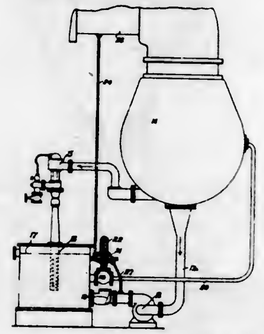
1,392,000. STRAINER. WALTER DIXON, Kimball, Minn. Filed May 10, 1918. Serial No. 233,643. 1 Claim. (Cl. 210—157.)

A strainer comprising a member having a flat closed bottom and side walls flaring upwardly and outwardly from said bottom to form a cone-shaped receptacle, said flaring walls having screened openings above said closed bottom, whereby the settlings will collect on said bottom



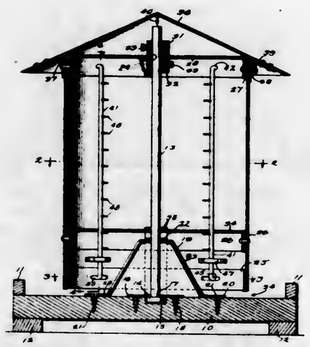
during the straining operation, a ring adapted to receive the lower end of said member and having a seat therefor, and means for securing said ring to the walls of said member.

1,392,001. VERTICAL COLLISION-BUMPER. PEARL V. ELLIOTT, Norwood, Ohio. Filed June 25, 1921. Serial No. 480,456. 5 Claims. (Cl. 293—55.)



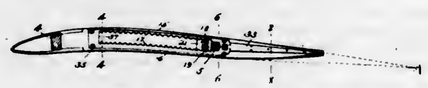
3. A vertical collision bumper having in combination a resilient member to receive the impact of collision, two vertically adjustable means, one above the other, for gripping said resilient member, means for pivotally connecting said upper gripping means to the vehicle and means for pivotally connecting said lower gripping means to the vehicle at a lower point, one of the means for connecting a gripping means to its vehicle connection having a link.

1,392,002. THERMO CONTROL FOR FIRE-DOORS. CHESTER E. ENGLE, Kansas City, Mo. Filed July 21, 1919, Serial No. 312,378. Renewed July 21, 1921. Serial No. 486,616. 6 Claims. (Cl. 189—47.)



1. A fire door structure comprising, in combination with a door opening, a door movable automatically into closed position over said opening, a latch bar carrying an adjustable counterweight and operative to latch said door in open position, and thermostatic means operating automatically to trip said latch bar and release said door, including thermo-responsive elements mounted in position overhanging said door opening.

1,392,003. AUTOMATIC CONTROL OF STEAM-CONDENSING PLANTS. HARRY FOTHERGILL, Westminster, London, England. Filed Aug. 8, 1919. Serial No. 316,186. 4 Claims. (Cl. 257—24.)

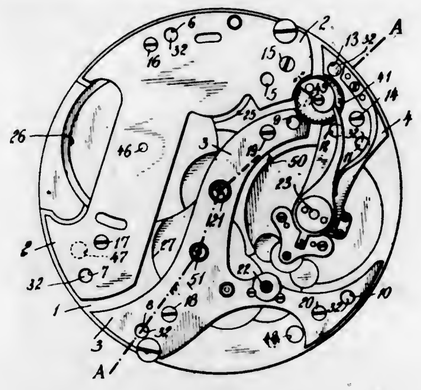


1. A steam condensing plant comprising a main condenser, an auxiliary condensing device into which condensate from the main condenser is discharged, a pipe leading from the auxiliary condensing device to the main condenser and an automatic valve in said pipe controlled by steam or other pressure available only when the engines are running for controlling the flow of water in said pipe.

1,392,004. HOG-FEEDER. FRANK FOUTS, Galveston, Ind. Filed Mar. 22, 1920. Serial No. 367,679. 8 Claims. (Cl. 119—53.)

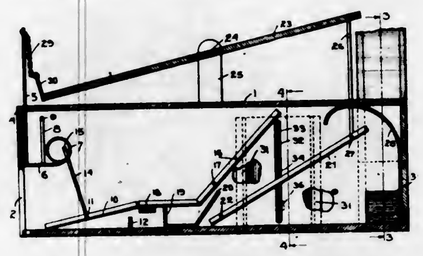
1. A hog feeding apparatus of the character described comprising a base for receiving the feed thereon, a post extending above the base and connected therewith, a rotatable container carried by the post, said container having its lower end spaced from the base, and combined means for rotating said container and agitating the feed pivotally mounted within the container, movable relatively thereto and having a portion arranged to be operated from the outside of the container.

1,392,005. VARIABLE-AREA WING. HARLAN DAVEY FOWLER, Sacramento, Calif. Filed Sept. 22, 1920. Serial No. 411,936. 19 Claims. (Cl. 244—12.)



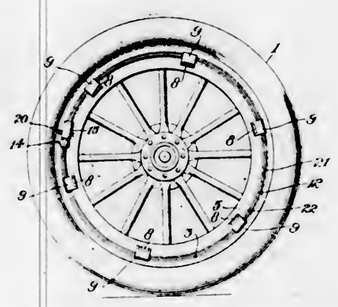
1. In aircraft, a cambered aerofoil having upper and lower surfaces, one of which is flexible, and a trailing extension adapted to be housed within the body of the aerofoil and to be projected through the trailing edge thereof while maintaining the streamline of said cambered surface.

1,392,006. WATCH. JOSEPH A. FREUND, Newtonville, Mass. Filed July 26, 1918. Serial No. 246,794. 2 Claims. (Cl. 58—59.)



2. In watches, a dial plate and a coöperating bridge member, there being alining steady pin holes extending through the corresponding portions of the bridge member and dial plate and steady pins supported in one of said sets of steady pin holes and having projecting ends to engage the other corresponding steady pin holes and aline the same, and jewel bearings mounted in said bridge member and dial plate in corresponding relation to said steady pin holes.

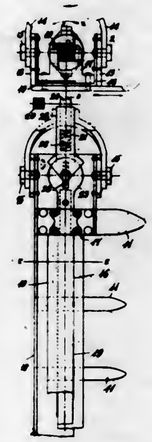
1,392,007. PROCESS OF MAKING WATCH-PLATES. JOSEPH A. FREUND, Newtonville, Mass. Filed Aug. 8, 1918. Serial No. 248,821. Renewed Jan. 13, 1921. Serial No. 437,127. 22 Claims. (Cl. 29—177.)



1. The process of forming and jeweling watch plates which comprises forming a corresponding series of steady pin locating holes in the dial plate and in the thin substantially uniform thickness bridge members by boring such steady pin holes through the same drill jig plate which is secured in alinement with the rear side of the dial plate against which the bridge members are secured in the watch movement, recessing the dial plate and bridge members and jeweling them on a series of jeweling quills, each of which is formed with quill alining pins coöperating with the steady pin holes in one of said bridge members to center with respect to said jeweling quill one of the bearings in said bridge member and counterboring and setting the jewel in said bearing, and mounting the dial plate on said jeweling quill and clamping the rear face of said dial plate against the face of said quill and inserting said quill alining pins in the corresponding steady pin holes in said dial plate to center with respect to said jeweling quill the corresponding bearing in said dial plate and counterboring and setting the jewel in said bearing to insure the accuracy and uprighting of the bearings in the said watch plates when they are assembled and held in alinement by steady pins engaging the corresponding steady pin locating holes in said bridge members and dial plate.

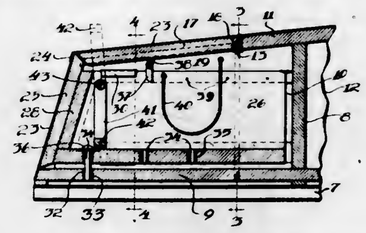
1,392,008. RAT OR ANIMAL TRAP. JOSEPH FRITSCH, Sedro Woolley, Wash. Filed Aup. 25, 1920. Serial No. 405,831. 1 Claim. (Cl. 43—76.)

In a device of the class described, a casing having an entrance; a door controlling the entrance; a trigger coöperating with the door to hold the door open; a first platform pivotally supported on the casing, the platform and the trigger having interengaged parts coacting to retract the trigger from the door; a third platform pivotally supported in the casing; means connected with the third platform and with the door for opening the door; a second platform pivotally supported in the casing between the first and third platforms, the second platform comprising an upwardly extended part forming a barrier preventing retreat from the third platform; and a detent on the casing, the detent being operated by the third platform, when the third platform is depressed, to engage the second platform and to prevent a depression of said upwardly extended part of the second platform.



1,392,009. DEMOUNTABLE RIM. THOMAS G. GERDINE, West Falls Church, Va. Filed Aug. 2, 1920. Serial No. 400,731. 5 Claims. (Cl. 301—23.)

1. The combination with a wheel rim and felly, of an extensible and contractible annulus, a plurality of latches pivotally supported on said wheel, and connections between said latches and annulus whereby the former may be forced into locking position with relation to the rim.

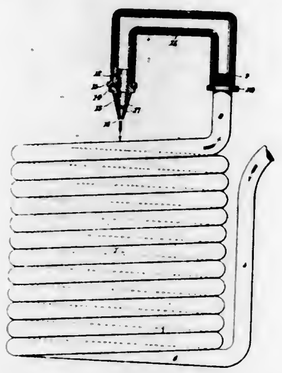


1,392,010. CUTTING MECHANISM FOR MOWING-MACHINES, HARVESTERS, REAPING-MACHINES, AND BINDERS. ALEXANDER GLINCHIKOFF, New York, N. Y. Filed Feb. 16, 1920. Serial No. 358,863. 5 Claims. (Cl. 56—294.)

1. A mowing machine embodying a pivoted finger bar, a cutter positioned above the finger bar and mounted for rotation, said cutter embodying a plurality of sharpened blades, a shaft for rotating the cutter, a ball and socket universal joint connecting the drive shaft to the cutter, said shaft being locked for rotation with one element of the universal joint and longitudinally adjustable relative thereto, and a spring coöperating with the shaft and said

element of the universal joint for maintaining the ball and socket portions of said joint in coöperative relation.

1,392,011. EXTENSIBLE AUTOMOBILE BOX OR BODY. PETER L. HEDBERG, Chicago, Ill. Filed Mar. 28, 1921. Serial No. 456,154. 7 Claims. (Cl. 296—26.)



1. In a device of the class described, the combination with a box suitably supported on the frame of an automobile having its rear end and a part of its top open, of a door hinged to the top of the box and adapted to close the opening in said top, another box slidably mounted within the first named box and having at its rear end an end piece adapted to close the open end of the first named box when the inner box is in its normal position.

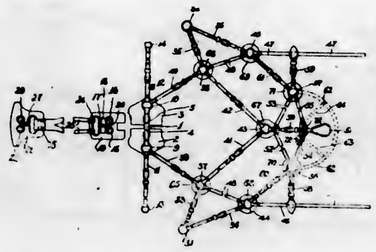
1,392,012. LIQUID-FUEL BURNER. CHARLES HOSEK, Floresville, Tex. Filed Jan. 15, 1921. Serial No. 437,506. 1 Claim. (Cl. 158—79.)

A liquid fuel burner of the class described including a fuel supply pipe extending downwardly and then laterally where it is formed into a series of closely related upwardly progressing helical coils, a supply pipe terminating at the uppermost coil adjacent one side of the burner and then extending upwardly and having an annular flange adjacent its upper end, the portion of the pipe above the flange being threaded, an inverted substantially U-shaped pipe having one end threaded upon said threaded end of the supply pipe, the said pipe being arranged with its central portion extending radially inwardly toward the center of the coils above the latter and with its free end directed downwardly toward the coils and terminating slightly above the latter and provided with an outwardly extending annular flange and a burner tip secured in the

free end of said inverted U-shaped pipe above the uppermost coil and having ports to direct the flames laterally

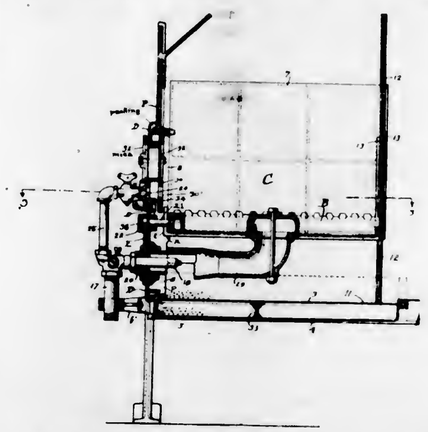
and downwardly for effectively heating said coils and provided with a flange intermediate its ends for impinging against the said flange of the U-shaped pipe.

1,392,013. CORE COMPOUND. WILLIAM HOSKINS, Chicago, Ill. Filed June 27, 1921. Serial No. 480,862. 5 Claims. (Cl. 22—188.)



5. The herein described core compound comprising a relatively permanent emulsion of oil, concentrated sulfite liquor and an emulsifying agent.

1,392,014. CHART FOR USE IN TEACHING THE ART OF READING. GEORGE EDWARD JONES, Bundarra, New South Wales, Australia. Filed Apr. 14, 1920. Serial No. 373,863. 3 Claims. (Cl. 283—46.)

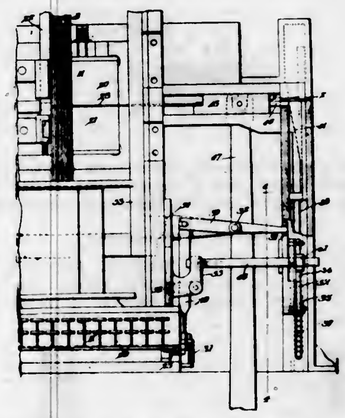


1. An article of manufacture as herein described, consisting of a chart which comprises a series of diagrams capable of individual representation manually by the palms and fingers of a person, and associated respectively with each of said diagrams, words or parts of words, each of said diagrams representing a sign visually indicating the vocalization or sound value of a letter or combination of letters contained in the word or part of a word with which it is associated.

1,392,015. HARNESS. JOHAN CATO ELI KÖHLER, Woudzicht, near Vrede, Orange Free State, South Africa. Filed Nov. 13, 1919. Serial No. 337,698. 8 Claims. (Cl. 54—1.)

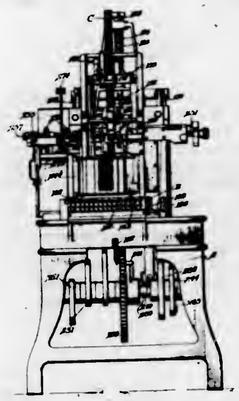
7. A harness for draft animals comprising a neck portion, a chest and underbody strap secured thereto, and adapted to extend between the forelegs to beneath the body, traces, means adapted to receive said traces, means connecting said receiving means with the rear portion of said chest and underbody strap and with the upper part of said neck portion, means adapted to extend from said receiving means over the extreme rear of the animal's back, and means connecting said latter means with the traces to the rear of the said receiving means, said parts being so proportioned that the draft is at all times distributed on all said parts in contact with the animal.

1,392,016. HEATER FOR GARAGES AND OTHER USES. OTTO J. KUENHOLD, Cleveland, Ohio. Filed Dec. 13, 1915. Serial No. 66,652. Renewed May 6, 1918. Serial No. 232,980. 18 Claims. (Cl. 126—85.)



1. A heater having a combustion chamber which is sealed and locked to prevent ingress thereto and having an air intake, a flame-passage resisting screen and entrance guard for said air intake, a burner for said chamber, an ignition device for said burner sealed and locked within said chamber, and means to operate said ignition device externally of said chamber.

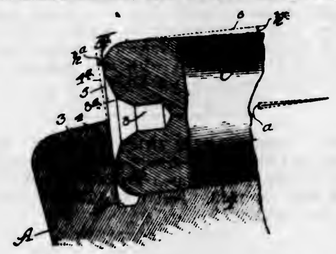
1,392,017. TYPOGRAPHIC MACHINE. FREDERICK W. LETSCH, Baltimore, Md. Filed July 18, 1916. Serial No. 109,955. Renewed Dec. 28, 1920. Serial No. 433,740. 10 Claims. (Cl. 199—13.)



5. In a typographic machine, the combination with a mold having an adjustable body piece, of a keyboard, and

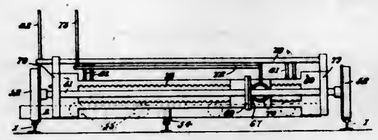
means for adjusting the body piece from the keyboard comprising a universal bar, a stepped block, a ratchet

and pawl device for adjusting said block, and means for causing the block to act as a gage for the body piece.



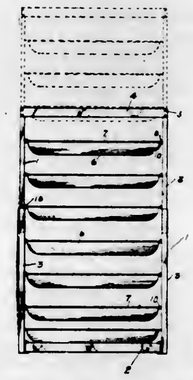
1,392,018. TYPOGRAPHIC MACHINE. FREDERICK W. LETSCH, Baltimore, Md., assignor to J. Norris McFarland, Baltimore, Md. Filed May 22, 1916, Serial No. 99,201. Renewed Dec. 28, 1920. Serial No. 433,741. 27 Claims. (Cl. 199—9.)

4. In a typographic machine, the combination with a rotatable turret, a series of movable pins, and means on the turret for sustaining the movable pins of a composing mechanism comprising a key board in front of the turret and pushers within the turret operated from the key board for moving the pins radially outward, said turret being rotatable to carry the set pins from the composing position to a matrix assembling position, and matrix bars at the latter position adapted to coöperate with projected pins to bring selected characters into line.



1,392,019. ROLLER-BEARING. GEORGE L. MILLER, Canton, Ohio, assignor to The Gilliam Manufacturing Company, Canton, Ohio, a Corporation of Ohio. Filed Aug. 4, 1920. Serial No. 401,216. 8 Claims. (Cl. 64—39.)

8. A roller-bearing comprising an annular race adapted to receive conical rollers, self-righting conical rollers out of contact with each other in said race, said race being provided with an end thrust surface, and each of said rollers having a thrust surface in a plane normal to the axis of the roller and having single point contact with and forming a very slight clearance angle with said first-named surface, said surfaces being adapted to

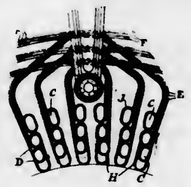


exert corrective reaction on the roller upon a slight deviation of the roller from its true line contact position in the race, whereby the roller is rendered self-righting, and a cage spacing said rollers, said cage having pockets receiving the rollers freely therein and permitting the self righting action of the rollers to occur.

1,392,020. RETORT-CLEANING MACHINE. JOSEPH NIEZNALSKI and JAN BELCZYNSKI, Detroit, Mich. Filed Oct. 7, 1919. Serial No. 329,170. 4 Claims. (Cl. 105—117.)

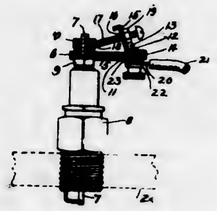
1. A machine of the character described comprising a wheel mounted motor truck, a platform anti-frictionally supported upon said truck, a motor supported on the platform, and operating mechanism connecting the motor with the truck wheels and with the platform whereby the truck is adapted for travel simultaneously with a relative shifting of the platform upon the truck.

1,392,021. GRAIN-SPROUTER. LUCIAN R. OAKES, Tipton, Ind. Filed Aug. 31, 1920. Serial No. 407,216. 5 Claims. (Cl. 47—30.)



1. In a grain sprouting device, a base structure, standards attached to said base structure, each standard

being formed of telescoping sections, grain sprouting pans and means on said standards for supporting said pans, said supporting means limiting the telescoping action of said standard forming sections.



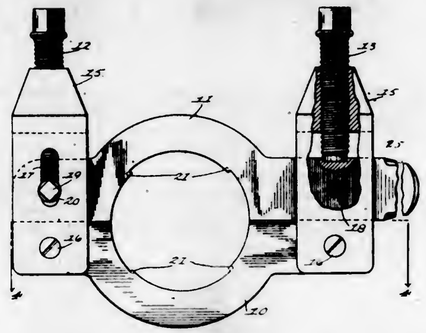
2. In a grain sprouting device, a base, standards arranged on opposite sides of the base, means for increasing the height of said standards, cross bars for connecting the upper ends of the standards, brackets on the inner faces of said standards arranged in series, and grain receiving pans interlocked with said brackets and in spaced relation one above the other.

1,392,022. DYNAMO-ELECTRIC MACHINE. CHARLES ALGERNON PARSONS and JESSEL ROSEN, Newcastle-upon-Tyne, England; said Rosen assignor to said Parsons. Filed Feb. 10, 1919. Serial No. 276,121. 4 Claims. (Cl. 171—206.)

1. A dynamo electric machine having conductors made separately from the end connectors in which, a plurality of joints is provided between each conductor and the corresponding end connector.

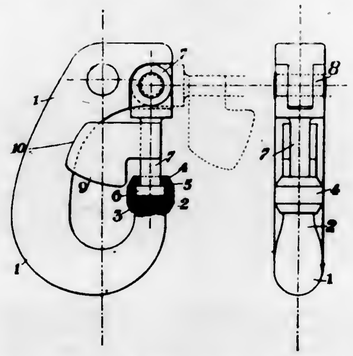
1,392,023. SPARK-PLUG INTENSIFIER. JAMES M. PAUL, Los Angeles, Calif., assignor of one-half to John J. Keller, Los Angeles, Calif. Filed Jan. 12, 1920. Serial No. 350,769. 1 Claim. (Cl. 175—183.)

A device of the class described, comprising a base of insulating material having an opening formed therein, adapted to engage the upper threaded end of a spark plug electrode, a circular nut in screw threaded engagement with the threaded end of the spark plug electrode for immovably securing the base thereto; a contact element adapted to have a conductor connected thereto, a screw mounted thereon, said screw being adjustable to or from the periphery of said circular nut forming a spark gap therebetween, means to lock said screw in an adjusted position, whereby on an accidental loosening of the circular nut no variation of the spark gap will occur.



1,392,024. DROP-DOWN GUN AND RIFLE. HARRY HERBERT PAYNE, Birmingham, England, assignor of two-thirds to John White, Birmingham, England. Filed Aug. 21, 1919. Serial No. 319,025. 4 Claims. (Cl. 42—41.)

1. In a gun adapted to be broken at the breech for loading, a breech piece, a hammer having a bolt mounted for axial movement in the breech piece, a spring on the bolt to cause the hammer to strike, a movable member arranged to compress said spring when said member is moved in one direction, a lever mounted in the breech piece and arranged for movement by the barrel when



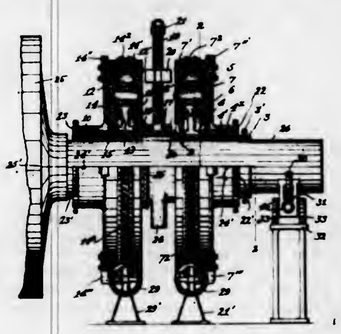
the gun is closed, to cause said movable member to compress said spring, and a second spring to move said movable member to move the hammer to cocked position.

1,392,025. ADJUSTABLE WRENCH FOR MILLING-MACHINES. JACOB PAYUCHECK, Chester, Pa. Filed Aug. 17, 1920. Serial No. 404,073. 4 Claims. (Cl. 29—85.)

1. A tool of the character described comprising two clamp-jaws having their inner edges formed on the arc of a circle, shoulders on said inner edges, means for adjustably clamping said jaws over a rotary cutter head, and means coöperating with said shoulders for binding said cuttter head and tool upon the reverse motion or the cone shaft for said cutter.

1,392,026. BULL-HOOK. ROBERT MILTON STEVENSON, Victoria, British Columbia, Canada. Filed May 17, 1921. Serial No. 470,271. 1 Claim. (Cl. 24—241.)

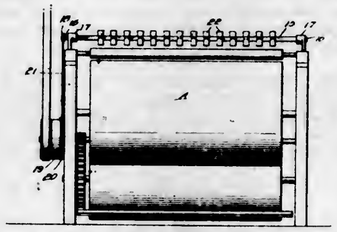
A bull hook with a screw formed upon its point, in combination with a pivotal link having a collar on its end



remote from the pivot, a nut to engage the said screw on the point of the hook, an internal seating ring within said nut to receive the said collar on the said link, a keeper secured to the link and extending across the inclosure formed by the hook, all substantially as explained and described.

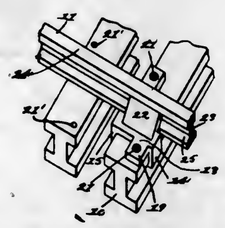
1,392,027. METHOD OF MAKING PISTON-RINGS. HENRY STOFFERS, Newark, N. J. Filed June 5, 1920. Serial No. 386,738. 1 Claim. (Cl. 29—156.6.)

The herein described method of making a piston ring consisting in providing an annular interior groove in the ring having angularly disposed sides, hammering the faces of said groove at an angle to a radial plane of the ring to cause the increase in the density of the metal resulting from the hammering operation to be transmitted at an angle.



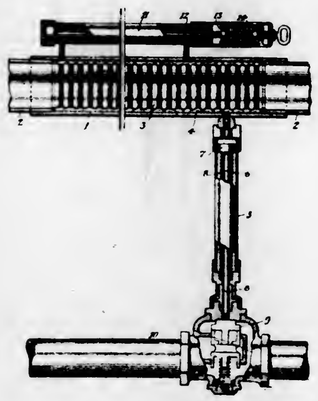
1,392,028. MACHINE FOR DETERMINING THE STATIC AND DYNAMIC UNBALANCE OF ROTATING BODIES. MAYSON WHITE TORBET, Jackson, Mich., assignor to Vibration Specialty Company, Philadelphia, Pa., a Corporation of Delaware. Filed May 29, 1919. Serial No. 300,707. 15 Claims. (Cl. 73—51.)

1. In a balancing machine of the class set forth, a bodily-rotatable mechanism embodying a balancing weight and adjusting devices therefor capable of moving the weight in angular position in either direction and in radial direction either in or out with respect to the axis of rotation of said mechanism while the rotating body to which the mehanism is attached is in motion, said radical adjusting device embodying a rotatable screw on which the weight moves and means for axially rotating this screw during the rotation of the mechanism.



1,392,029. FAN FOR TEXTILE-MILLS. JOSEPH D. TURNER, Huntsville, Ala., assignor, by direct and mesne assignments, of one-fourth to M. A. Shields and one-fourth to Milton C. Giles, Huntsville, Ala. Filed Dec. 1, 1917. Serial No. 204,895. 4 Claims. (Cl. 230—1.)

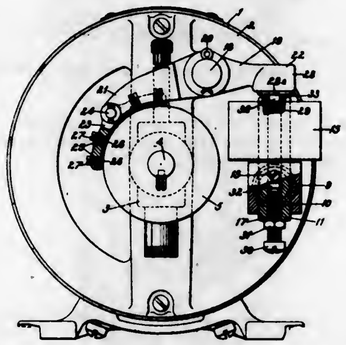
1. The combination of a textile machine, and an exposed fan supported for rotation thereon; said fan being characterized by wings spaced apart throughout the



length of the machine to displace lint and to permit an operative to reach between the wings.

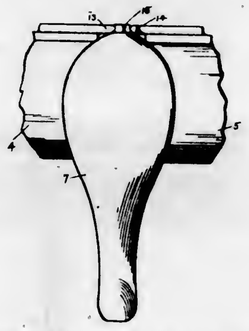
1,392,030. RAIL-CLAMP. FRANK WASCHEK, Hamtramck, Mich. Filed May 4, 1921. Serial No. 466,776. 1 Claim. (Cl. 238—352.)

The combination of a metal railroad tie of I-shaped cross section with clamps adapted to be secured to the tie, one upon each side of a rail, each of said clamps comprising a body member, lateral rectangularly bent flanges on said member adapted to grip under the top beam of the I, a projection perforated for the passage of fastening bolts and a wedge shape element adapted to engage with its upper edge the web of a rail underneath the head thereof and resting with its inclined lower face against the upper face of the rail foot flange the wedge shape element being extended in length to engage the webs of two adjoining rails.



1,392,031. THERMOSTATIC DEVICE. HERBERT J. C. WELLS, New York, N. Y. Filed Sept. 20, 1919. Serial No. 325,091. 3 Claims. (Cl. 236—42.)

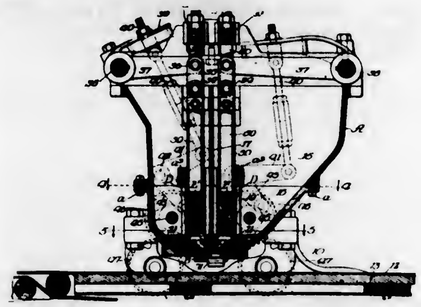
2. The combination in a temperature controller of two concentric tubes, the inner tube being corrugated to in-



crease the exposed surface, said tubes forming a closed annular space which is filled with an expansible medium, of means operated by the expansion and contraction of said medium for actuating a regulating device, and means for passing through the inner corrugated tube the medium of which the temperature is to be controlled.

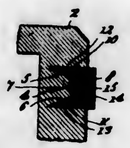
1,392,032. ELECTROMAGNETIC BRAKING DEVICE. CLIFFORD A. M. WEBER, Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Nov. 3, 1916. Serial No. 129,299. 10 Claims. (Cl. 188—171.)

1. In a dynamo-electric machine, the combination with an armature shaft, and a bearing bracket for rotatably supporting said shaft and provided with projections integral therewith, of an electric magnetic braking device for said shaft comprising a braking member, a core member carried by one of said projections and an armature pivotally mounted on another of said projections and adapted to operate said braking member.



1,392,033. STOVE-LEG CONNECTION. ALBERT T. WEISS, Rochester, N. Y., assignor to Phillips & Clark Stove Company, Inc., Geneva, N. Y., a Corporation of New York. Filed Nov. 8, 1920. Serial No. 422,572. 15 Claims. (Cl. 126—304.)

1. A connection between the legs and base of ranges or stoves comprising a support at the back of said leg, said support being adapted to support the head of a bolt with the shank thereof extending rearwardly therefrom and hold it from turning therein, a flange on said base, the shank of said bolt being adapted to pass through said flange and clamp said flange against the back of said leg.



1,392,034. DEPOSITING-MACHINE. FREDERICK WESTERMAN, Chicago, Ill. Filed July 1, 1918. Serial No. 242,713. 19 Claims. (Cl. 107—28.)

1. A depositing machine comprising the combination with a receptacle for material to be deposited having a discharge port at its bottom, of a hollow valve arranged within said receptacle to control the flow of material through said discharge port, a plunger within said hollow valve for forcing the material from the same receptacle the discharge port whereof said hollow valve controls, and means for operating said hollow valve and plunger in timed relation.

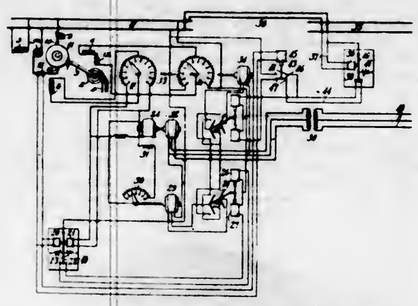
19. A depositing machine comprising the combination of a receptacle for material to be deposited, of a discharge nozzle arranged beneath said receptacle and having channels for the passage therethrough of material, a spreader bar below said discharge nozzle, a tubular conduit connected to said spreader bar, a sprocket wheel wherein said tubular conduit is mounted, said conduit being open at its upper end and provided with a perforation adjacent its lower end for the passage of material into the channels of said discharge nozzle, and means for imparting rotation to said sprocket wheel.

1,392,035. PISTON-PACKING. NOLAN S. WILLIAMS, El Paso, Tex. Filed Oct. 25, 1920. Serial No. 419,323. 3 Claims. (Cl. 74—109.)

1. In combination with a piston having a groove therein, a bead in the groove provided with a trough, and a packing ring fitted in the groove and being expansible therein, said ring having a projection adapted to enter the trough, and ducts in communication with the trough and the outside of the ring respectively, substantially as described.

1,392,036. [WITHDRAWN.]

1,392,037. TALKING-MACHINE HORN. JOSEPH WOLFF, Brooklyn, N. Y., assignor to Sonora Phonograph Corporation, a Corporation of New York. Filed Mar. 19, 1919. Serial No. 283,537. 5 Claims. (Cl. 181—27.)



1. A talking machine horn or resonator, comprising walls of more than three layers of fibrous material and a coating of non-fibrous material.

1,392,038. OUTLET-BOX. WILLIAM HENRY WOOD, Darien, Conn. Filed Jan. 17, 1920. Serial No. 352,199. 3 Claims. (Cl. 247—21.)

3. An outlet box comprising a flat plate having screw receiving openings for attaching the plate against a plastered wall, said plate having a central opening defining an opening to be cut in the wall and the marginal edge of the opening in the plate forming a guide for a cutting tool, and a box body of the configuration of the opening in the plate adapted to fit therein and extend into the opening in the wall when cut, said box body having outstanding portions at its forward edge adapted to overlap the front face of the frame plate and provided with means for securing the projecting portions to the plate.

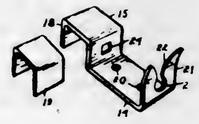
1,392,039. DYNAMO-ELECTRIC MACHINE. JOHN L. MCK. YARDLEY, Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 14, 1913. Serial No. 760,925. 45 Claims. (Cl. 171—123.)

1. The combination with a plurality of dynamo-electric machines mechanically associated and electrically connected in series circuit relation, one of which is of the commutator type, of automatic means mechanically associated with both machines for regulating voltage and securing good commutating conditions on said commutating machine.

43. The method of improving the commutation of a synchronous booster rotary converter of the class described, which consists in maintaining a commutating field having a component which varies both in accordance with the load current of said converter and in accordance with the booster voltage.

1,392,040. LIQUID COATING COMPOSITION. HARRY A. BABIS, Philadelphia, Pa. Filed June 1, 1920. Serial No. 385,609. 3 Claims. (Cl. 134—79.)

2. A liquid composition adapted as a waterproof coating and comprising pine tar, rosin, Burgundy pitch, ether, japan, plaster of Paris, celluloid and acetone.



1,392,041. SAFETY-HOOK FOR GLAZING-MACHINES. JOSEPH G. BAUMANN, Philadelphia, Pa., assignor to Alfred C. Layman, Wilmington, Del. Filed May 8, 1918. Serial No. 233,365. 8 Claims. (Cl. 149—18.)

1. In a glazing machine comprising a fixed track, a resilient support above the track, a rocker head below the track, rods depending from the support to hold the rocker head and a pin in the rocker head with which the rods engage, the novelty which comprises rods and pin so

formed as to prevent relative rotation between them and to provide cylindrical metallic bearings in the rocker head for the pin.

1,392,042. BOBBIN-SHUTTLE. JOHN B. BENTLEY, Jamestown, N. Y. Filed Nov. 8, 1920. Serial No. 422,507. 14 Claims. (Cl. 139—27.)

1. In a shuttle, a holding clip having a key hole shaped open-ended slot in its upturned end, in combination with a resilient split spindle having a shoulder thereon to spring said spindle into holding engagement against said upturned end and into said open-ended slot, and means for holding the butt of said spindle.

1,392,043. PROCESS OF RECOVERING AN ELEMENT CAPABLE OF FORMING A HALOID FROM ORES, MINERALS, &c., CONTAINING THE SAME. HAROLD S. BOOTH and GEORGE G. MARSHALL, Cleveland, Ohio. Filed Nov. 26, 1917. Serial No. 204,002. 12 Claims. (Cl. 23—13.)

1. The process which consists in mixing material containing aluminum with a chlorid which will react with the first mentioned material, having silica present in the mixture, heating the mixture to a temperature at which the reaction proceeds and chlorid of aluminum is formed, and sufficiently high to cause volatization of the chlorid of aluminum, and collecting the volatilized chlorid.

1,392,044. PROCESS OF RECOVERING AN ELEMENT CAPABLE OF FORMING A HALOID FROM ORES, MINERALS, &c., CONTAINING THE SAME. HAROLD S. BOOTH and GEORGE G. MARSHALL, Cleveland, Ohio. Filed Nov. 26, 1917. Serial No. 204,003. 8 Claims. (Cl. 23—13.)

5. The process which consists in mixing a silicate containing aluminum with a haloid capable of reacting with said silicate, having the mixture in anhydrous condition, heating the mixture to a temperature at which reaction proceeds and a haloid of aluminum is formed but short of the temperature at which the haloid of aluminum volatilizes, and leaching the haloid of aluminum formed from the mass produced by the process.

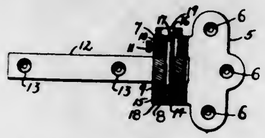
1,392,045. PROCESS OF RECOVERING BERYLLIUM FROM ORES, MINERALS, &c., CONTAINING THE SAME. HAROLD S. BOOTH and GEORGE G. MARSHALL, Cleveland, Ohio. Filed Nov. 26, 1917. Serial No. 204,004. 19 Claims. (Cl. 23—13.)

1. The process for recovering beryllium from its ores which consists in preparing a furnace charge of the material to be treated in crushed form, adding a halogen salt of an alkaline earth metal or alkali metal, heating the same to a temperature at which reaction will proceed, and a haloid of beryllium be formed, and in recovering the said haloid of beryllium.

1,392,046. PROCESS OF RECOVERING BERYLLIUM FROM ORES, MINERALS, AND OTHER MATERIALS. HAROLD S. BOOTH, Ithaca, N. Y., and GEORGE G. MARSHALL, Cleveland, Ohio. Filed Oct. 16, 1918. Serial No. 258,446. 13 Claims. (Cl. 23—13.)

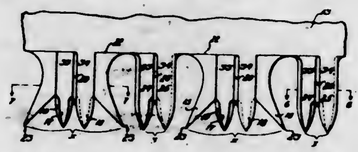
1. The process of recovering beryllium as a salt of beryllium from an ore, mineral or material containing the same, which consists in heating the beryllium containing material to a sufficient temperature and causing the same to react with a halogen, thereby to form a haloid of beryllium, and recovering the beryllium haloid formed.

1,392,047. PROCESS FOR THE PRODUCTION OF HIGH PERCENTAGE SULFITE CELLULOSE. EMILE BRONNERT, Mulhouse, Alsace Lorraine, France. Filed Sept. 13, 1920. Serial No. 409,976. 1 Claim. (Cl. 92—11.)



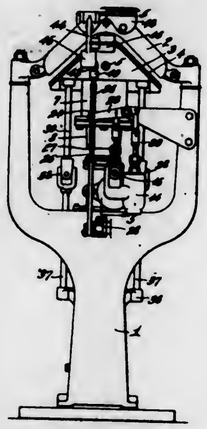
A process for the production of high percentage sulfite cellulose, characterized by the fact that under low pressure an opening up of the material by boiling with diluted, say 1% sulfuric acid, is allowed to precede the usual boiling of the already prepared wood material with calcium bisulfite or magnesium calcium sulfite lye under pressure.

1,392,048. SIGNALING DEVICE. JOSEPH BUTERA and GAETANO SORCE, San Jose, Calif. Filed May 31, 1921. Serial No. 473,621. 5 Claims. (Cl. 116—40.)



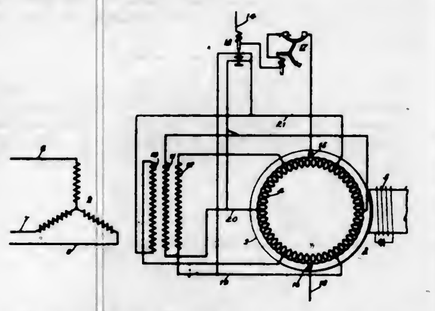
1. A signal comprising a supporting arm, a pantograph bracket mounted thereon, a signal device mounted on said bracket, means for expanding said bracket, and an additional connection between said device and supporting arm whereby said device is caused to rotate about its connection to said bracket upon the expansion thereof.

1,392,049. HINGE. ISHAM S. DICKEN, St. Louis, Mo., assignor of one-half to William T. Miles, St. Louis, Mo. Filed Sept. 29, 1920. Serial No. 413,580. 1 Claim. (Cl. 16—112.)



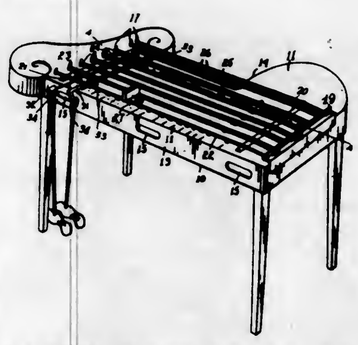
In a hinge, a stationary leaf having knuckles formed integral therewith and a slot formed in one of said knuckles, a counter sunk portion formed in the other of said knuckles, a movable leaf having a knuckle with a hole therethrough, a pintle, said pintle passing through the slot in said stationary leaf, the hole in the knuckle of said movable leaf and into the counter sunk portion of the knuckle of said stationary leaf, a set-screw operatively secured to said slotted knuckle so that a rotation of said set-screw will cause a lateral movement of said pintle in said slotted knuckle and a rotation of the end of said pintle in the counter sunk portion of one of said other knuckles.

1,392,050. SAW. LOUIS DRAGON, Philadelphia, Pa., assignor of one-third to Sam Reh and one-third to Joseph Reible, Philadelphia, Pa. Filed Aug. 2, 1920. Serial No. 400,776. 3 Claims. (Cl. 143—133.)



1. A saw including a blade having opposite faces inclined in opposite directions to a plane extending centrally through the thickness thereof, said blade having knives, in which adjacent knives have opposite surfaces coincident respectively with the opposite surfaces of said blade, said blade having chisel teeth adjacent said knives, said chisel teeth having opposite side surfaces extending substantially parallel to each other; substantially as described.

1,392,051. SAFETY DEVICE FOR PRESSING-MACHINES. ALBERT J. DREHER, Norwood, Ohio, assignor to The American Laundry Machinery Company, Norwood, Ohio, a Corporation of Ohio. Filed Aug. 30, 1919. Serial No. 320,921. 7 Claims. (Cl. 68—9.)

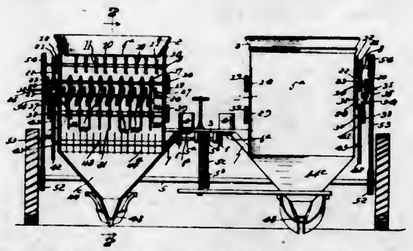


1. A pressing machine, comprising a pressing member and a work supporting member having relative movement from and toward each other for the pressing operation, one of said members being also laterally movable into and out of registering relation with the other member, operator operated means for producing relative movement of the pressing members toward and from each other, power means for producing heavy pressure on the work, and means for preventing operation of said power means except when the members are in registering relation with each other.

1,392,052. FLASH-OVER-SUPPRESSING MEANS FOR ROTARY-CONVERTER SYSTEMS. FREDERIC C. HANKER, Wilkinsburg, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed June 17, 1918. Serial No. 240,284. Renewed Nov. 23, 1920. Serial No. 426,103. 10 Claims. (Cl. 171—228.)

1. The combination with a rotary-converter, of means for supplying n-phase alternating currents thereto, n being an even number greater than 2, a load-circuit connected thereto, and means for interconnecting points in said supply means having currents with a relative phase-displacement of $\frac{720°}{n}$ upon the occurrence of abnormal current flow in said load circuit.

1,392,053. STRINGED MUSICAL INSTRUMENT. EUGENE B. HARRINGTON, Jamestown, N. Y., assignor of one-half to C. Fred Danielson, Jamestown, N. Y. Filed Nov. 15, 1920. Serial No. 424,162. 7 Claims. (Cl. 84—285.)

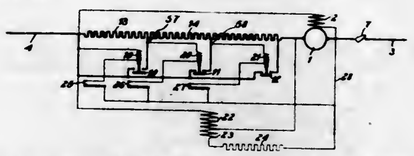


1. In a musical instrument, steel guitar strings, accompaniment strings located alongside said strings and tuned to the same key, and a playing steel of sufficient length to cover both sets of strings while playing the same.

2. In a musical instrument, a set of lead or melody strings and sets of accompaniment strings placed side by side, a plurality of rotatable fret bars arranged to bear against said sets of accompaniment strings to change the key of the same, a bar to receive arm pressure, and link and bell crank connection between said bar and said rotatable fret bars to actuate the same.

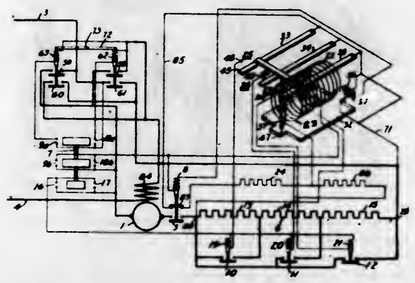
4. In combination with a stringed instrument, a plurality of movable fret bars, a movable member, and means connecting said fret bars to the member whereby upon a certain movement of the member a predetermined one of said bars will be moved to operative position and upon a second movement of said member a second one of said bars will be moved to operative position.

1,392,054. DISINTEGRATOR. JOSEPH A. HERRON, Concord, Tenn. Filed Mar. 9, 1921. Serial No. 450,872. 4 Claims. (Cl. 146—11.)



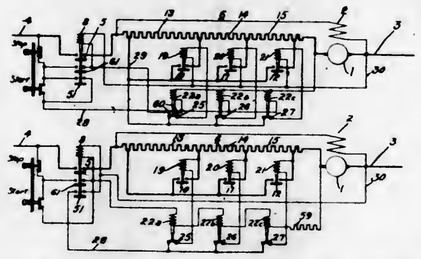
1. In a machine as set forth, a casing having a chamber, a hopper therefor, a plurality of combined feeders and disintegrators arranged in a set adjacent the hopper, upper and lower sets of combined disintegrating and cutter bars mounted in the chamber, opposing revoluble cutting elements mounted in the chamber, said cutting elements having their sharp curved edges overlapping each other at points adjacent certain of the cutting and disintegrating bars, and a plurality of scrapers revolubly mounted below the cutting elements and in positions to scrape the cutting elements, said casing having an outlet chute.

1,392,055. FILING-CABINET. JOHN HERZOG, Saginaw, Mich., assignor to Sonora Phonograph Corporation, a Corporation of New York. Filed June 17, 1919. Serial No. 304,761. 7 Claims. (Cl. 211—16.)



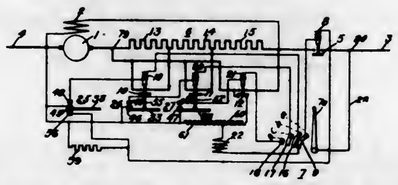
1. A device of the character described, comprising a frame, a clip associated with the frame, a rod engaging the clip, the association between the frame, clip and rod being such that upon a movement of the clip relatively to one of said members, the rod will be released from engagement therewith.

1,392,056. CONTROL SYSTEM. HENRY D. JAMES, Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed May 27, 1918. Serial No. 236,937. 33 Claims. (Cl. 172—179.)



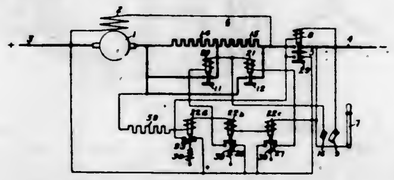
1. In a control system, the combination with a resistor, and means for successively shunting a plurality of portions of said resistor, of means comprising a single coil dependent upon the voltage across said resistor for controlling said shunting means.

1,392,057. CONTROL SYSTEM. HENRY D. JAMES, Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 10, 1918. Serial No. 249,344. 17 Claims. (Cl. 172—179.)



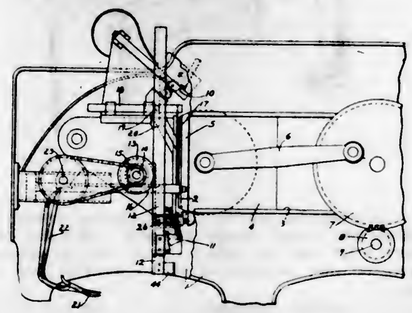
14. The combination with an electric motor having an armature, a resistor in circuit therewith, and a switch for short-circuiting said resistor, said switch having an actuating coil, of means for starting said motor and means for preventing the short-circuiting of said resistor after the reversal of said motor until after the reversal of the magnetism of said coil.

1,392,058. MOTOR-CONTROL SYSTEM. HENRY D. JAMES, Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 8, 1919. Serial No. 270,146. 7 Claims. (Cl. 172—288.)



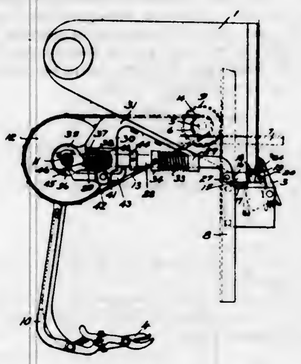
1. The combination with an electric motor having a resistor associated therewith, a switch for controlling said resistor and a normally closed relay for controlling said resistor-controlling switch, of a coil energized in accordance with the voltage across said resistor for controlling said relay.

1,392,059. CONTROL SYSTEM. HENRY D. JAMES, Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 8, 1919. Serial No. 270,148. 4 Claims. (Cl. 172—179.)



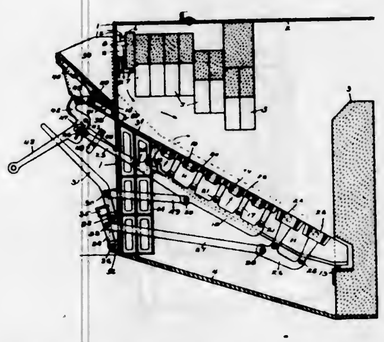
2. The combination with an electric motor having a resistor, a switch for closing the circuit of said motor and having an actuating coil, a switch for controlling said resistor and having a controlling coil in parallel circuit with said resistor and a switch mechanically connected to said controlling switch, of a pair of auxiliary resistors, means for closing the circuit of said actuating coil through said mechanically connected switch and through one of said auxiliary resistors, and means for connecting said controlling coil in circuit with said other auxiliary resistor upon the short-circuiting of said first-named resistor.

1,392,060. CONTROL SYSTEM. HENRY D. JAMES, Edgewood Park, and RAY E. DE CAMP, Wilkinsburg, Pa., assignors to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed May 12, 1919. Serial No. 296,597. 10 Claims. (Cl. 172—179.)



1. The combination with an electric motor having an armature, a resistor in series therewith, a switch for short-circuiting said resistor, a relay for said switch that is biased to closed position and having an opening coil, and a source of energy for said motor, of means whereby the voltage of said source is applied to said coil when said motor is disconnected from said source and whereby said coil is energized in accordance with the drop in potential across said resistor when said motor is connected to said source.

1,392,061. SHEET-SUPPORTING DEVICE. EMERSON P. JENNINGS, Lehighton, Pa. Original application filed Mar. 30, 1916, Serial No. 87,725. Divided and this application filed Nov. 24, 1919. Serial No. 340,153. 24 Claims. (Cl. 101—413.)

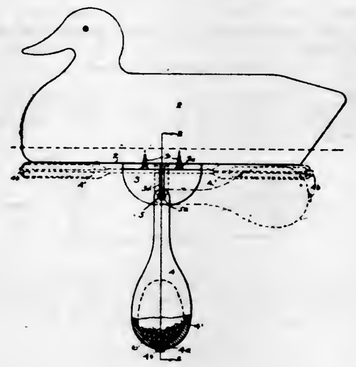


4. The combination with a printing couple, comprising a fixed member and a movable member, of a sheet supporting device arranged near the lower edge of said fixed member and having a part movable into and out of supporting position, and having another part movable into and out of position to engage the face of the sheet near the lower edge thereof, a device connected with said last-mentioned part and arranged in the path of said movable member to move said part into operative position, and an operative connection between said movable member and said sheet supporting device to move both of said parts away from the edge of said fixed member.

1,392,062. SHEET-SUPPORTING DEVICE FOR PRINTING-PRESSES. EMERSON P. JENNINGS, Lehighton, Pa. Filed Nov. 24, 1919. Serial No. 340,154. 21 Claims. (Cl. 101—414.)

4. The combination with a normally stationary member of a printing couple, of a sheet supporting device comprising a bar slidably mounted beneath said stationary member for movement transversely to the plane thereof and a jaw pivotally mounted on said slidable member and yieldably held in a position to clamp the sheet against the face of said stationary member, said stationary member having a part projecting beneath the lower edge of said sheet to engage said jaw and move the same about its axis when rearward movement is imparted to said slidable member.

1,392,063. STOKER FOR FURNACES. GEORGE C. ILLINGWORTH, Cincinnati, Ohio. Filed Apr. 22, 1919. Serial No. 291,986. 4 Claims. (Cl. 110—39.)

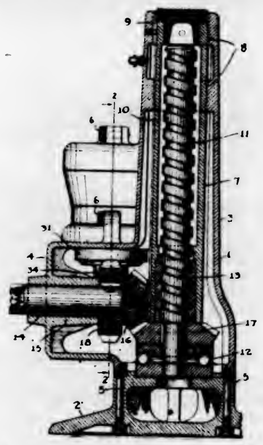


1. In a furnace stoking device, a series of grate bars capable of agitation, means for agitating the grate bars, a coking plate, a ram, means capable of actuation independent of the means for agitating the grate bars, for operating said ram, to feed fuel along the coking plate, and means detachably connecting the ram operating means directly with the grate bars, in order to permit the grate bar agitating means to impart movement to the ram operating means or to permit the ram operating means to actuate the ram independently or jointly with the grate bars.

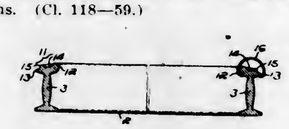
1,392,064. BUCKLE. JULIUS H. KINTZELE and FELIX P. KINTZELE, St. Louis, Mo., assignors to Keo Manufacturing Company, St. Louis, Mo., a Corporation of Missouri. Filed July 5, 1921. Serial No. 482,396. 6 Claims. (Cl. 24—191.)

1. A buckle, comprising a front plate, side flanges on the front plate, a gripper plate pivoted to the side flanges, a member pivoted to the gripper plate and having sliding connections with said flanges, a connecting plate supported by said member for sliding movements, and an expansion spring located between said member and said sliding plate.

1,392,065. COUNTERBALANCE FOR DUCK-DECOYS. GEORGE W. KLOCK, Syracuse, N. Y. Filed Feb. 28, 1921. Serial No. 448,286. 3 Claims. (Cl. 43—3.)



1. In a device of the class described, a pendulum, counter-balance, the top end thereof being perforated, the lower end portion being hollow and adapted to contain more or less ballast for varying the buoyancy of said part, a bracket substantially L-shaped in cross-section, one arm of said bracket adapted to be secured to the bottom of a decoy, the other arm of said bracket disposed vertically, said bracket having a transverse slot which extends partially across both of its arms, the hollow side of said bracket being curved to facilitate the folding of the counter-balance, and a bolt passing loosely through said slot and through the perforation of the counter-balance adapted to be moved from one end of said slot to the other during the folding-up of the counter-balance.

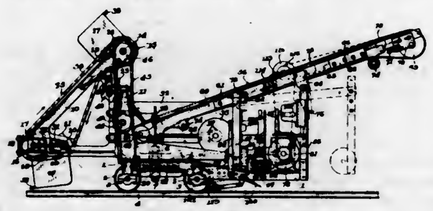


1,392,066. AUTOMATICALLY-CONTROLLED SELF-LOWERING JACK. JOHN C. KOPF, Bellevue, Pa., assignor to The Duff Manufacturing Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Aug. 6, 1920. Serial No. 401,705. 13 Claims. (Cl. 254—103.)

1. A self-lowering jack having an inclosing base frame provided with a standard, a ram vertically guided in said standard, a quick-pitch screw rotatably supported on the base and extending upward within the ram, a horizontal lifting shaft in the base frame geared to the screw, and a worm-wheel on said lifting-shaft, in combination with a shaft journaled vertically in the base frame, a worm

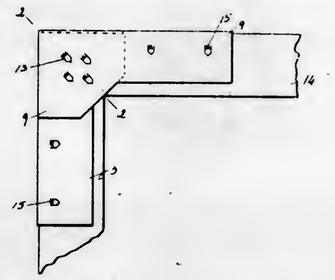
on said vertical shaft meshed by said worm-wheel and adapted to be driven thereby, a manually releasable friction lock on the shaft subject to the end-thrust of the worm, and a speed-controlled brake device also on the vertical axis.

1,392,067. SPINNING-RING. JAMES K. LANNING, Fall River, Mass. Filed Oct. 28, 1915. Serial No. 58,480. 14 Claims. (Cl. 118—59.)



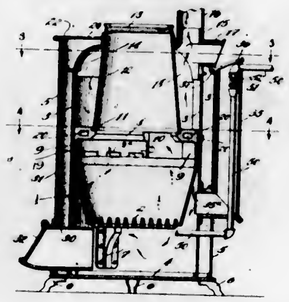
9. A spinning ring provided with a traveler flange, the upper surface of which is concaved and is provided with an annular ridge spaced from the edges of the ring.

1,392,068. METHOD OF PREVENTING FOULING AND COMPOSITION THEREFOR. JOHN ALFRED LILLIE, Liverpool, England, assignor to J. B. Wilkie, Liverpool, England. Filed Oct. 4, 1920. Serial No. 414,643. 3 Claims. (Cl. 134—40.)



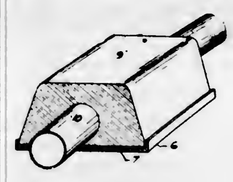
2. A method of preventing fouling on metal surfaces which comprises treating said surfaces with the juice of the Iza, Upa or Ipa berry (*Alchornea cordifolia*, Muell.-Arg.).

1,392,069. SHOVELING-MACHINE. HENRY MCDERMOTT, Iron River, Mich., assignor to McDermott Mechanical Company, Iron Mountain, Mich., a Corporation of Michigan. Filed May 15, 1919. Serial No. 297,219. 14 Claims. (Cl. 37—24.)



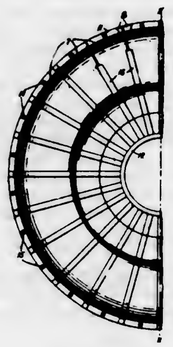
1. In a shoveling machine the combination of a truck, a frame mounted on the truck and provided in the lower and upper parts thereof with transversely alined bearings, shafts mounted in said bearings and provided with belt wheels, belts mounted on said wheels with their upper runs extending obliquely upward and rearward from the lower wheels, guide wheels mounted on said frame below the upper wheels and arranged to direct the lower runs of the belts forwardly from the upper wheels, a scoop connected with the belts and adapted in passing the lower wheels to take up material and in passing over the upper wheels to discharge the material, and a motor for driving the belts and operating the scoop.

1,392,070. ANGLE-JOINT. JOHN MAIERS, Philadelphia, Pa. Filed Dec. 10, 1919, Serial No. 343,894. Renewed Feb. 17, 1921. Serial No. 445,850. 2 Claims. (Cl. 20—92.)



1. As a new article of manufacture an angle joint consisting of a blank having two central sections connected together by a score, wings one set connected to each of the central sections by scorings, each wing having an extension formed therewith, certain of said wings and extensions having rectangular openings formed therethrough, and attaching prongs partially cut from said blank.

1,392,071. HEATING APPLIANCE. HARVEY F. MARANVILLE, Akron, Ohio. Filed May 29, 1916. Serial No. 100,457. 6 Claims. (Cl. 126—107.)

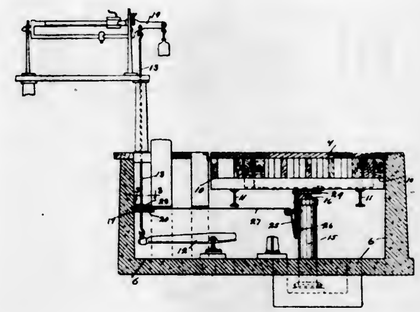


1. In a device of the character described, a hollow upright shell, a firebox supported within said shell intermediate the top and bottom thereof, an annular body supported above said firebox and overhanging the marginal portion of the same, an upright magazine supported upon said body and spaced at all points from said shell, there being an opening through said body at one point, a cover for the annular space between said shell and magazine, an exit for products of combustion from said annular space, and a partition interposed between said exit and the opening in said body whereby the products of combustion are forced to sweep about said annular space.

1,392,072. MOLDING-CORE. THOMAS C. MARSHALL, Mount Savage, Md., assignor to Kelly-Springfield Tire Company, Cumberland, Md., a Corporation of New Jersey. Filed Aug. 8, 1921. Serial No. 490,537. 6 Claims. (Cl. 18—45.)

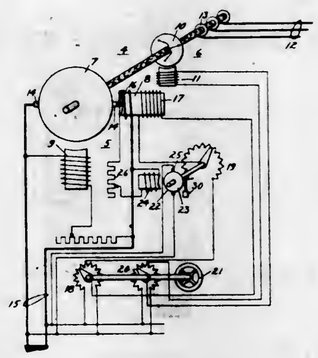
1. A molding support for preserving a void in the interior of an article of manufacture consisting of vulcanizable material, comprising a formed shell-like hollow structure composed of partially vulcanized material and adapted to become brittle and readily destroyed after the article supported is vulcanized.

1,392,073. END BELL. EMIL MATTMAN, Wilkinsburg, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 4, 1916. Serial No. 88,789. 3 Claims. (Cl. 171—252.)



1. An annular end-inclosing structure for dynamo-electric machines comprising a plurality of similar segmental members, rings of different diameters secured to the peripheral portions of said members and radial ribs secured to the abutting edges of said members.

1,392,074. COMPOSITION OF MATTER. WALDO G. MORSE, Yonkers, N. Y. Filed Mar. 12, 1920. Serial No. 365,229. 7 Claims. (Cl. 134—39.)



7. A composition of matter comprising kaolin, marl and a binder.

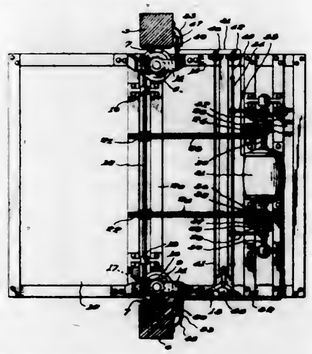
1,392,075. AUTOMATIC LOCK MECHANISM FOR DUMPING-SCALES. CHARLES C. NEALE, Minneapolis, Minn., assignor to Globe Machinery & Supply Company, Des Moines, Iowa, a Corporation of Iowa. Filed Nov. 18, 1920. Serial No. 424,840. 5 Claims. (Cl. 265—71.)

1. The combination with a scale platform having a movable section and a power device normally out of action for moving said section, of a lock operative to lock the scale mechanism and means whereby said lock is automatically brought into action at all times when said power device is caused to act on said movable platform section.

1,392,076. SYSTEM OF EXCITATION FOR SYNCHRONOUS-BOOSTER ROTARY CONVERTERS. FRANK D. NEWBURY, Pittsburgh, and HENRY D. JAMES, Edgewood Park, Pa., assignors to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 13, 1917. Serial No. 206,927. 17 Claims. (Cl. 171—123.)

14. The method of improving the commutation of a synchronous booster rotary converter of the class described, which consists in maintaining a commutating field having a component proportional to the load current of the converter, in maintaining an additional component of commutating field which varies in direction and magnitude in accordance with the adjustments of the voltage of the booster, and in varying said last mentioned component in accordance with both the boosted voltage and the load current of the converter.

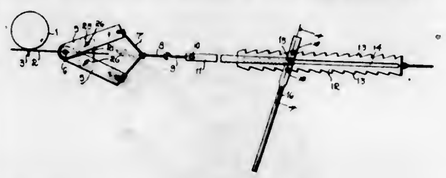
1,392,077. AUTOMATIC STOP. FRANK OBERST, Glendale, N. Y., assignor to Sonora Phonograph Corporation, a Corporation of New York. Filed July 2, 1919. Serial No. 308,131. 6 Claims. (Cl. 192—116.)



1. A device of the character described, comprising a pivoted brake beam, a pivoted lever engaging the brake beam for holding the brake in released or off position, and a piv-

otally mounted member for moving said lever to inoperative position to permit the brake to be applied, the pivots

of the brake beam, the lever and member all being substantially in the same straight line.

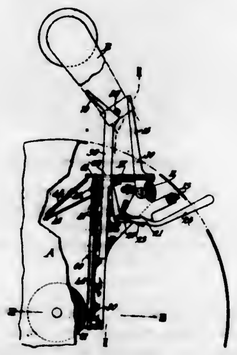


1,392,078. ELEVATOR. CHARLES E. OUILLETT, Lowell, Mass. Filed July 18, 1919. Serial No. 311,751. 4 Claims. (Cl. 187—25.)

1. In an elevator, the combination, of upright beams, racks carried by said beams, a cage, a pair of worms rotatably carried by said cage and meshing with said racks to elevate or lower the cage upon rotation of the worms, an electric motor carried by said cage, a pair of clutches controlling the operative connection of said motor with said worms, a shifting rod connected to said clutches, cables connected to said shifting rod, a lever, said cables connected to said lever and movable parallel with the longitudinal run of the motor whereby said rod may be shifted by the pivotal movement of said lever for establishing operative communication between the motor and the worms.

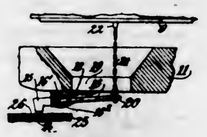
1,392,079. WIRE-STRETCHING APPARATUS. LOGAN A. RIDDLE and LYON R. RIDDLE, New Albany, Ind. Filed Nov. 13, 1919. Serial No. 337,770. 1 Claim. (Cl. 254—83.)

A wire stretcher comprising a pair of jaw structures inclined to one another each comprising hinged members having perforations intermediate the hinge and the extremities, gripping members having beveled ends with trunnions extending longitudinally beyond such beveled ends, said trunnions being seated in the perforations, means retaining the trunnions in the perforations, means



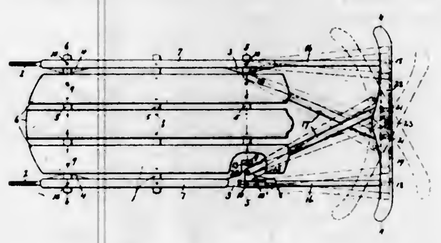
connecting the extremities of the jaw members to exert clamping stress thereon, and means connecting the connecting means to apply such stress simultaneously to both pairs of jaw members.

1,392,080. SUPERHEATER IN STEAM-BOILERS. DAVID RUTHERFORD ROSS, Coburg, Victoria, Australia. Filed June 19, 1920. Serial No. 390,087. 4 Claims. (Cl. 122—464.)



1. A steam super-heater comprising a body member in which there are tiers of compartments, one tier having end compartments and an intermediate compartment, together with a longitudinal compartment adjacent the aforesaid compartments, another tier having end compartments and a central compartment, and a plurality of tubes making connection from the end compartments in the said first tier thereof to the end compartments in the second tier thereof, then from the end compartments in the said second tier to the longitudinal compartment in the first tier, then from the said longitudinal compartment in the first tier to the central compartment in the second tier, and finally from the central compartment in the second tier to the intermediate compartment in the first tier.

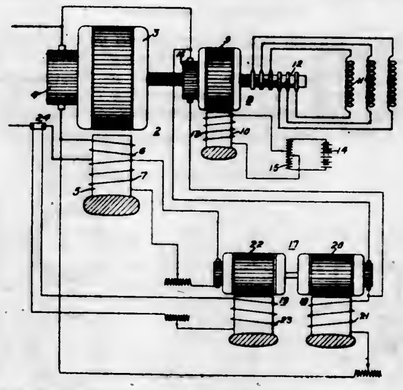
1,392,081. AUTOMATIC STOP FOR TALKING-MACHINES. WILLIAM GENTRY SHELTON, New York, N. Y. Filed Mar. 4, 1920. Serial No. 363,209. 15 Claims. (Cl. 192—116.)



1. A stopping mechanism for talking machines, comprising a stopping device, and means for actuating said stopping device to stop the operation thereof, said means comprising an actuating part, means for moving said actuating part for an indeterminate period, means moved by the reproducer-support for holding said actuating part in engagement with said indeterminate moving means, and means normally tending to move said actuating part out of engagement with said indeterminate moving means, said indeterminate moving means being adapted to move said actuating part away from said holding means and allow said actuating part to move to actuate said stopping device, when said holding means ceases to move by reason of the reproducer ceasing to be moved by the record.

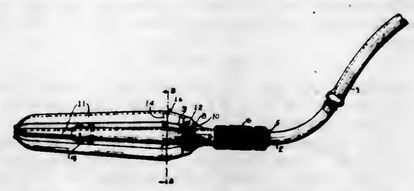
1,392,082. UNIVERSAL REPRODUCER. WILLIAM GENTRY SHELTON, New York, N. Y. Filed Nov. 21, 1917. Serial No. 203,153. Renewed June 6, 1921. Serial No. 475,555. 5 Claims. (Cl. 274—28.)

1. In a sound reproducer, the combination with a diaphragm, of a stylus adapted to traverse the groove of a talking machine record, a support for such stylus mounted to permit the stylus to respond in accordance with undulations at the bottom of the record groove and in accordance with undulations at the sides thereof, and a dual functioning connection between said stylus and diaphragm transmitting movements to said diaphragm which are imparted to said stylus by either said undulations at the sides of the record groove or at the bottom of the record groove.



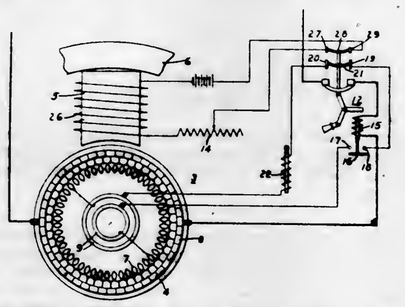
1,392,083. HAND-SLED. WILLIAM E. SHERWOOD, Canastota, N. Y. Filed Feb. 3, 1920. Serial No. 355,975. 4 Claims. (Cl. 280—22.)

1. In a hand-sled, the combination of a platform, braces secured to the platform, runners secured to the braces, and having forwardly upwardly curved front ends, a cross-bar connecting the front ends of the runners, a lever pivotally mounted on the cross-bar, links crossing each other between the lever and platform and having their rear ends connected to the braces and their front ends connected to the lever at opposite sides of its pivot.



1,392,084. FIELD-CONTROL SYSTEM FOR SYNCHRONOUS BOOSTER ROTARY CONVERTERS. MARVIN W. SMITH, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 16, 1919. Serial No. 271,438. 9 Claims. (Cl. 171—123.)

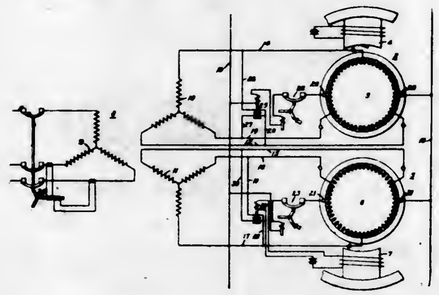
1. The combination with a rotary converter, of a booster electrically associated therewith and means varying in accordance with the voltage of said booster for supplying a direct-current voltage in series with



the direct-current voltage of said converter for deriving a resultant direct-current voltage differing from the direct-current voltage of the converter.

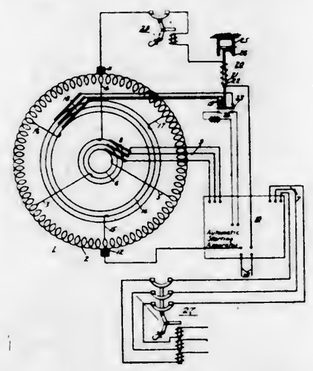
1,392,085. SYRINGE. FREDERICK W. STANTON, Chicago, Ill. Filed Sept. 28, 1920. Serial No. 413,276. 3 Claims. (Cl. 128—244.)

1. A syringe, comprising a conducting tube having a screw-threaded portion and a fulcrum member fixed thereon, a screw sleeve engaged with said screw-threaded portion, a sliding yoke in thrust engagement with said sleeve, dilating fingers engaging said fulcrum member and pivotally-connected with said yoke, a sliding collar engaging said pivoted fingers, and a spring bearing against said collar.



1,392,086. MEANS FOR REDUCING COMMUTATOR-FLASHING. NORMAN W. STORER, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Nov. 23, 1917. Serial No. 203,527. 26 Claims. (Cl. 171—228.)

1. The combination with a dynamo-electric machine of the commutator type, of means for interconnecting



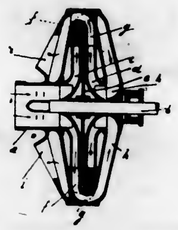
a plurality of points of different potential in the armature winding thereof upon the passage of abnormal current therethrough.

1,392,087. MEANS FOR SUPPRESSING FLASH-OVERS IN ROTARY-CONVERTER SYSTEMS. NORMAN W. STORER, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 25, 1918. Serial No. 246,758. 10 Claims. (Cl. 171—228.)

2. The combination with a rotary converter, of a supply transformer therefor, a load circuit connected thereto, and means for interconnecting at least two supply leads between said transformer and said converter upon the occurrence of abnormal current flow in said load-circuit.

1,392,088. MEANS FOR REDUCING COMMUTATOR-FLASHING IN ROTARY CONVERTERS. NORMAN W. STORER, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Mar. 13, 1918. Serial No. 222,083. Renewed July 9, 1921. Serial No. 483,607. 9 Claims. (Cl. 171—228.)

1. The combination with a rotary converter, of means for automatically interconnecting points in the armature winding thereof upon the flow of abnormal load current therefrom.

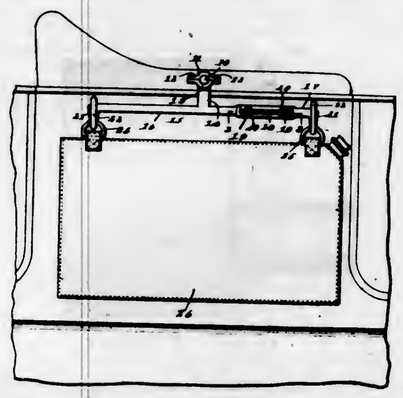


1,392,089. FOUNTAIN-PEN. JOHN STRAKA, Chicago, Ill., assignor of one-half to Joseph R. Lewis, Chicago, Ill. Filed Sept. 25, 1920. Serial No. 412,797. 3 Claims. (Cl. 120—46.)

2. A fountain pen, comprising a tubular handle, and a collapsible fountain pen reservoir contained therein, said handle having an opening in its wall for access to said reservoir, and there being a depressed ledge at the marginal edge of said opening having a portion located beyond a plane passing through the axis of the handle,

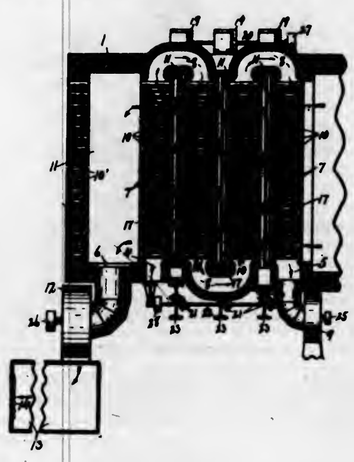
and a resilient cover for said opening conforming to the shape thereof, and gripping said ledge, said cover being flush with said handle.

1,392,090. ROTARY PUMP. MARIO TAMINI, Milan, Italy. Filed June 23, 1920. Serial No. 391,126. 2 Claims. (Cl. 253—188.)



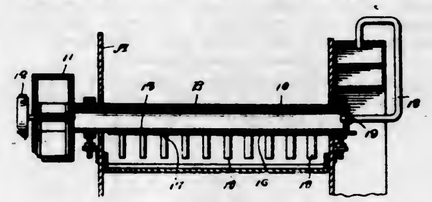
1. A multiple rotary pump comprising an impeller with two groups of blades arranged one on each side of a central web, a peripheral distributer comprising two sets of passages, one set leading from the outlets of the first blade group to the inlets of the second blade group, and the other set from the outlets of the second blade group to the discharge, these sets of passages being so arranged that the fluid flows alternately in opposite directions in the two sets and that parts of said passages lying parallel to the axis of the impeller are located at equal distances from the said axis.

1,392,091. ELECTRIC FITTING. GEORGE B. THOMAS, Bridgeport, Conn., assignor to The Bryant Electric Company, Bridgeport, Conn., a Corporation of Connecticut. Filed Dec. 4, 1918. Serial No. 265,254. 7 Claims. (Cl. 173—334.)



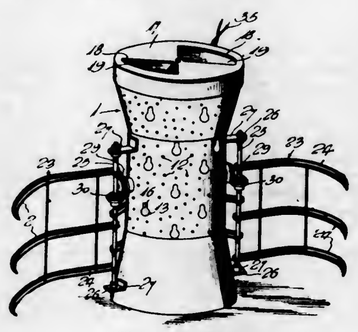
1. An electric fitting having independent insulating blocks, wire terminals carried by one of said blocks, lamp terminals carried by the other of said blocks, and means for mechanically securing said blocks together and for establishing electric connection between the respective wire and lamp terminals thereon to form a complete, self-contained lamp socket, in combination with an insulating button adapted to be interposed between said base and socket body and having conductors cooperating with the conductors thereof together with receptacle contacts electrically connected to said conductors and marginal passage means opening to said receptacle contacts and adapted to form guide means for the coöperating contacts of an attaching plug.

1,392,092. AUTOMOBILE-WATER-BAG HOLDER. LOYD E. THOMPSON, Island City, Oreg. Filed Feb. 24, 1919. Serial No. 278,791. 2 Claims. (Cl. 224—29.)



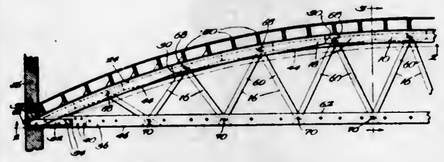
2. A bracket comprising a longitudinally extensible arm, means for removably securing the arms to a support, hooks located at each end of said arm, said hooks including a laterally disposed seat formed by bending the hooks to provide a substantially straight slot and an open offset mouth providing an entrance to said slot.

1,392,093. SMOKE-PURIFYING ATTACHMENT FOR FUEL-BURNING HEATERS. ODEON H. TITUS, Jamesville, N. Y. Filed Mar. 29, 1919. Serial No. 286,206. 10 Claims. (Cl. 257—240.)



1. In a smoke purifying apparatus, the combination with a fuel burning heater having an outlet for the products of combustion, of a horizontally extending casing communicating at one end with said outlet, and a plurality of hollow partitions extending across the interior of the casing in parallel spaced relation lengthwise of the casing to form intervening collecting chambers for solid products of combustion, each hollow partition having a series of relatively small tubes extending therethrough lengthwise of the casing for conducting the products of combustion from the outlet of the heater to the several collecting chambers in sequence.

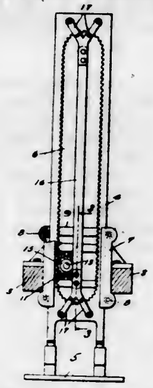
1,392,094. ATTACHMENT FOR GRAIN-SEPARATORS. WILLIAM E. TOLER, Pawnee, Okla. Filed Feb. 10, 1920. Serial No. 357,743. 1 Claim. (Cl. 130—24.)



An attachment for grain separators comprising a pipe extended transversely of the machine in front of the riddles thereof, said pipe having perforations along the underside and successively increasing in size from one end of the pipe to the other, guide flanges secured to the pipe longitudinally thereof, a plate slidably fitted between said guide and having a longitudinal series of openings adapted to be moved across the perforations of said pipe, a plurality of small depending pipes projecting from the openings of said plate for the purpose specified.

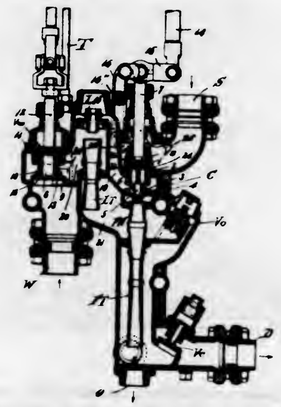
1,392,095. MAN-CATCHING TANK. STANLEY VALINSKI, Homestead, Pa. Filed Jan. 20, 1921. Serial No. 438,807. 5 Claims. (Cl. 43—59.)

1. A device of the class described comprising a portable armored watch-box for the watchman, a man-catching and holding device arranged on the exterior thereof, and means on the interior of the box for operating said catching device.



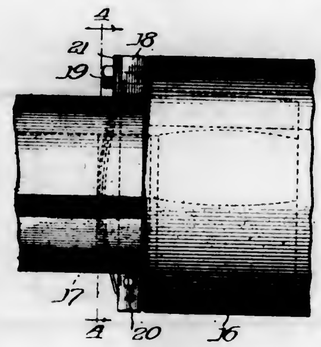
1,392,096. ROOF-TRUSS. NICHOLAS J. WAGNER, Chicago, Ill. Filed Jan. 10, 1920. Serial No. 350,628. 6 Claims. (Cl. 108—23.)

1. A roof truss comprising a curved upper chord connected from end to end by a lower chord, the two chords connected together intermediate of their ends by lattice members, the upper chord being a laminated structure composed of a plurality of layers of boards placed side by side in direct contact with each other throughout the truss length, each layer being made up of a plurality of



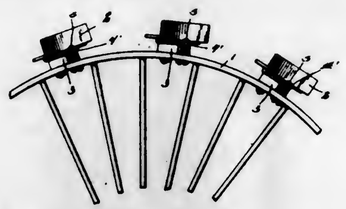
abutting boards placed on edge and staggered with reference to each other, the upper edge of each board being curved to the curvature of the truss; the successive boards being all alike so that the whole truss can be produced by using multiples of one board and definite fractions thereof at the extreme ends of the truss.

1,392,097. COTTON-PACKER. FRENCH B. WILLIAMS, Dallas, Tex. Filed May 11, 1920. Serial No. 380,506. 1 Claim. (Cl. 100—25.)



In an apparatus of the class described having a reciprocating member, a continuous rack on said member composed of parallel side portions and curved end portions connecting the side portions, a drive shaft, a pinion thereon engaging the rack, a guide bar carried by the reciprocating member and a roller carried by the shaft and engaging said bar for holding the pinion in engagement with the rack at all times, the combination of a horizontally movable carriage supporting the pinion end of the shaft and a track for said carriage.

1,392,098. BOILER-FEEDING INJECTOR. BELVIN T. WILLISTON, Somerville, Mass., assignor to Manning Maxwell and Moore, Inc., New York, N. Y., a Corporation of New Jersey. Filed Aug. 12, 1919. Serial No. 317,023. 16 Claims. (Cl. 162—1.)

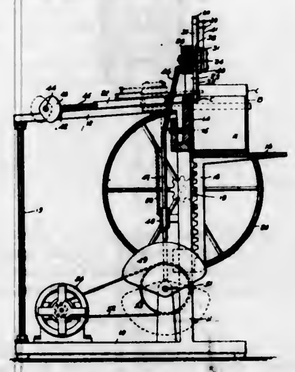


1. An injector device comprising a steam valve, a seat therefor, means for lifting said valve from its seat to a predetermined amount, and means for permitting the passage of steam in minute quantities only through said valve when so raised.

1,392,099. COUPLING-KEEPER. HENRY W. WILSON, Duluth, Minn. Filed Nov. 29, 1920. Serial No. 427,028. 10 Claims. (Cl. 64—91.)

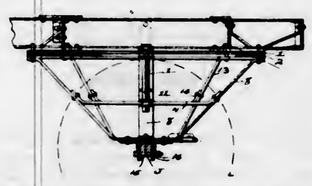
10. A shaft, a coupling associated therewith, a transverse slot in the shaft, a leaf spring and a bar carried by the shaft and extending through the slot in the shaft, the spring being adapted to engage a side of the slot and the bar coupling adjacent the opposite side of the slot whereby the parts are resiliently urged relative to each other by the spring, their relative movement being limited by the bar.

1,392,100. TRACTOR-LUG. DON S. WOLVERTON, Doland, S. D. Filed May 22, 1920. Serial No. 383,470. 2 Claims. (Cl. 305—18.)



2. In combination with a rim of a vehicle wheel, a plurality of lugs arranged about said rim, blocks bolted to the rim and having semi-circular grooves formed therein, a semi-circular bearing provided on each lug and adapted to be seated in the grooves formed in the blocks, a pin passing through said bearing and secured to the rim.

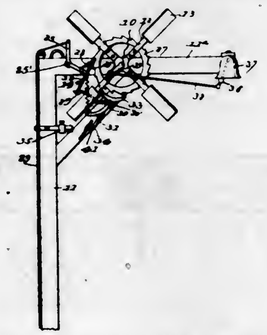
1,392,101. ABDOMINAL BELT. FREDERIC GEORGES BAUGATZ, Paris, France. Filed May 20, 1918. Serial No. 235,563. 2 Claims. (Cl. 2—188.)



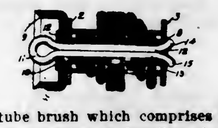
1. A maternity band comprising a flat front part of elastic fabric expansible in the direction of the length of said band having the elasticity of the upper portion unimpeded throughout the length thereof, non-elastic elements arranged at intervals on the lower portion of said front part and secured to it so as to substantially reduce the elasticity of said lower portion, a non-elastic border secured to said front part around its lower edge and a belt secured to said border and adapted to coöperate with the back of the wearer to support said front part in such a way that the supporting thrust is taken solely by the portion of the reduced elasticity leaving the part of greatest elasticity freely expansible.

1,392,102. BOX-FINISHING MACHINE. ARTHUR BELL, Ridgefield Park, N. J. Filed Apr. 13, 1921. Serial No. 461,056. 10 Claims. (Cl. 93—54.)

1. In a box finishing machine, a base plate against which the box sides are adapted to be successively held, means for registering the edge of its mouth with the edge of the plate and means slidable over said registered edges and swingable downward within the mouth of the box, said means adapted to coact with the extended portion of the box covering to turn the same within the box mouth and press the same thereagainst to paste it thereto.



1,392,103. TRUCK. ALEXANDER M. BELLONY, U. S. Army. Filed May 7, 1919. Serial No. 295,467. 1 Claim. (Cl. 280—114.) (Filed under the act of Mar. 3, 1883, 22 Stat. L., 625.)

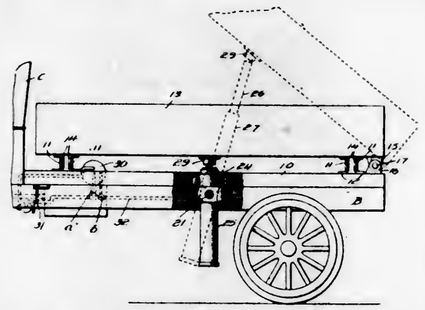


In a vehicle truck the combination with an axle boxing including two elongated members between which an axle is disposable; of a bearing ring, a support for such ring mounted on the axle housing and embodying a trio of inverted V-shaped brackets one of the latter being located in a plane at right angles to the other two and a plurality of intersectioning cross bars interconnecting the free extremities of the several brackets.

1,392,104. RAILROAD-CROSSING SIGNAL. ANTON BERG, Rolla, Mo. Filed May 27, 1920. Serial No. 384,626. 4 Claim. (Cl. 246—294.)

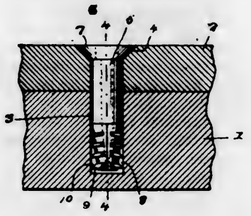
A railroad signaling apparatus having a rotary blade or flag carrying shaft, a wheel operated trip or treadle mechanism, means for communicating motion from the trip or treadle to said shaft, the same including a ratchet wheel on the shaft, a bell-crank lever operatively connected with the treadle and carrying a ratchet engaging pawl, a fixed bell-crank lever having one arm arranged in the path of the tail of said pawl to act as a stop for the same and for the first bell-crank lever on the return oscillations of the same, a spring tensioned between the other arm of the fixed bell-crank lever and the first said bell-crank lever, and an escapement yoke having its terminals in operative relation with the teeth of the ratchet wheel and provided with an arm equipped with an adjustable stop for contact with one of the arms of the fixed bell-crank lever for the purpose specified.

1,392,105. BOILER-TUBE BRUSH. JOHN BERGESEN, Sr., Brooklyn, N. Y., assignor of one-half to Junius Bergesen, Brooklyn, N. Y. Filed May 13, 1921. Serial No. 469,231. 3 Claims. (Cl. 83—64.)



1. A boiler tube brush which comprises a hollow cylindrical body portion having a plurality of apertures in its surface, an apertured plate disposed at each end of the body portion, a plurality of bristles extending in different directions from the body portion and passing through the apertures, and means extending through and within the body portion to clamp the bristles between itself and the inner surface of the body portion, said clamping means at its ends passing through and engaging the outer surface of said plates to hold the plates in proper relation with respect to the body portion.

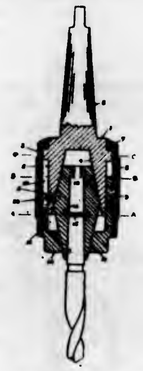
1,392,106. REMOVABLE COVER FOR UMBRELLAS. WILLIAM BERGFIELD, New York, N. Y. Filed Nov. 23, 1920. Serial No. 425,948. 1 Claim. (Cl. 135—34.)



An umbrella cover of pliable material, and a head therefor composed of an inner and an outer tapered member with their adjacent ends overlapped with the cover secured to the inner member and the outer member adapted to closely embrace the umbrella stick, means securing said overlapped ends together, and a reinforcing ferrule upon the inner face of the inner member and receiving the said securing means.

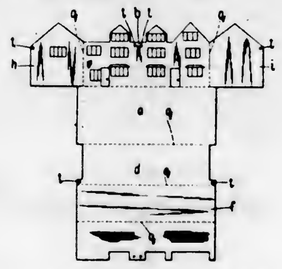
1,392,107. TILTING MECHANISM FOR DUMPING-BODIES. GEORGE W. BERRY, Kane, Pa. Filed Apr. 3, 1920. Serial No. 371,045. 8 Claims. (Cl. 298—22.)

8. The combination with a hoisting jack adapted to be connected with a superposed body, the latter being adapted to be superimposed upon a wheeled truck, of means for supporting the jack and located intermediate the ends of the vehicle chassis for permitting lateral and longitudinal swinging movement of said jack for the side and end dumping of the body.



1,392,108. EXPANSIBLE SCREW. JOHN A. BILTEMAN, Albia, Iowa. Filed Dec. 13, 1920. Serial No. 430,330. 2 Claims. (Cl. 85—2.)

1. A wood screw designed to be received in an opening bored through plates to be connected, including a shank which is snugly received in the opening, a head on the one end of the shank, and an inwardly flared portion on the opposite end of said shank, said flared portion being slotted longitudinally and provided with spaced teeth all of an equal diameter and all beveled from their inner to their outer edges upon the inner faces thereof, said shank having a bore therethrough which is flared inwardly at the flared portion of the shank, and a spreader key designed to be inserted into the bore and forced against the flared portion thereof to spread the segmental sections at the end of the shank against the wall of the opening, and to also cause the teeth thereto to enter the said wall and incident to the formation of the said teeth to exert a longitudinal movement on the shank to bring the head thereof in tight engagement with the outer plate.

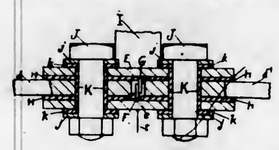


1,392,109. CHUCK. DAVID LOGAN BISSET, Montreal, Quebec, Canada. Filed Jan. 17, 1920. Serial No. 352,157. 1 Claim. (Cl. 279—56.)

In a chuck, in combination, a jaw socket member having a tapered recess in the cylindrical body portion, and an annular flange adjacent to the inner end of said body, a plurality of jaw members together forming a double cone-shaped shank holder tapering from the central portion to the ends, one tapered portion being inserted in said jaw recess and the other projecting outwardly therefrom and spring-held apart, a chuck head forming a jaw-contracting member, having a tapered mouth engaging said outwardly projecting tapered portion, and a barrel

extension slidably and non-rotatably arranged on said body and externally threaded, and an operating sleeve internally threaded and engaging said barrel extension of the chuck head and rotatable on said annular flange.

1,392,110. COLLAPSIBLE HUT AND OTHER COLLAPSIBLE STRUCTURE. JOSEPH BLASCHECK, Westcliff-on-Sea, England, assignor to Blascheck Patents Limited, London, England, a Company of the United Kingdom of Great Britain and Ireland. Filed Mar. 21, 1921. Serial No. 454,215. 3 Claims. (Cl. 20—2.)

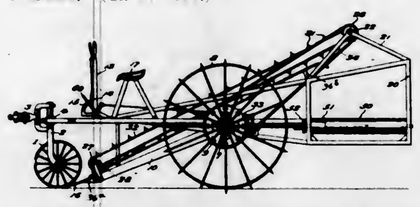


1. A collapsible structure comprising a floor part, opposite walls hinged to the corresponding edges of said floor part, walls extending between the ends of the aforesaid walls hinged to the vertical edges of one of them, a roof hinged to the upper edge of the wall opposite the one to which the end walls are hinged and across which it extends, holes near the top of the wall adjacent to the outer edge of the roof also near the outer edge of the end walls and in that part of the wall adjacent to the outer edge of said end walls when in their erected positions, and cords attached to the outer edge of the roof passing successively through one of the holes in the adjacent wall and afterward through the hole in one of the end walls to which it is attached and finally through the hole in the wall adjacent thereto when the structure is in its erected position substantially as set forth.

1,392,111. RAMP-RAIL INSTALLATION. ANDREW J. BROOKINS, Chicago, Ill. Filed Oct. 18, 1920. Serial No. 417,705. 10 Claims. (Cl. 246—49.)

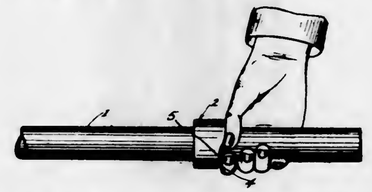
7. A ramp rail comprising a plurality of sections, tie members to join said sections and insulated therefrom, an electric conducting member to electrically connect said

tie members to a rail of a trackway, means to selectively energize a predetermined one of said sections, said means having as elements thereof a source of electrical energy, a conductor from said source to said predetermined sec-



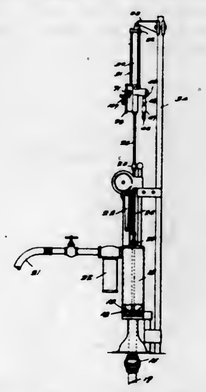
tion and an additional conductor from said source to said tie members; and said means adapted to form a closed and energized electric circuit upon the breaking down of said insulating means.

1,392,112. VALVE AND GRINDING MECHANISM THEREFOR. HUGH C. BROWN, Philadelphia, Pa. Filed Oct. 9, 1920. Serial No. 415,771. 2 Claims. (Cl. 51—29.)



1. A valve grinding tool, comprising a shank, a curved fixed jaw forming an extension of one end of the shank, a movable jaw shaped in conformity with the fixed jaw and pivoted to the shank at the inner end of the fixed jaw, said movable jaw including an integral finger receiving extension, an expansion spring interposed between the extension and the shank tending to close the jaws, and means limiting the action of the spring.

1,392,113. BEAN-HARVESTER. GLENN D. CARR, Cambridge, Nebr. Filed June 15, 1920. Serial No. 389,152. 4 Claims. (Cl. 56—153.)

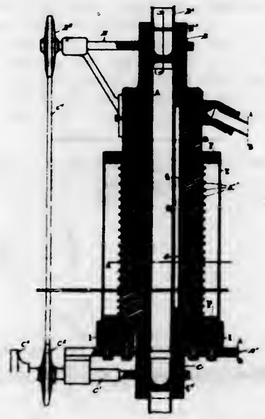


1. In a bean harvester, the combination of a wheeled main frame, a buncher frame carried at the rear of the main frame, spaced longitudinal and vertical swinging beams connected with the main frame and extending downwardly and forwardly from the points of connection, ways supported on the main frame and extending rearwardly and upwardly beyond the same and adapted to discharge into the buncher frame, a transverse shaft supported above the buncher frame, idlers supported above the forward portions of the beams, elevator aprons mounted upon and connected with said shaft and idlers, knives with inner, rearwardly converged cutting edges, carried at the forward ends of the beams, a driving connection intermediate one of the ground wheels and the transverse shaft above the buncher frame, means for discharging beans from said buncher frame, and means for adjustably fixing the beams with respect to the main frame.

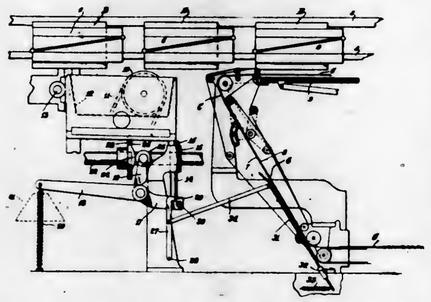
1,392,114. WHEELBARROW-HANDLE. HERBERT M. CASWELL, Kingman, Ariz. Filed Sept. 3, 1920. Serial No. 407,967. 1 Claim. (Cl. 280—52.)

A wheel barrow having abutment elements on the handles thereof, said abutment elements having concavities in the rear edges of said elements at the bases of the same.

1,392,115. METERING-MOTOR. HERBERT W. CHENEY, Milwaukee, Wis. Filed Mar. 29, 1917. Serial No. 158,294. 15 Claims. (Cl. 221—103.)



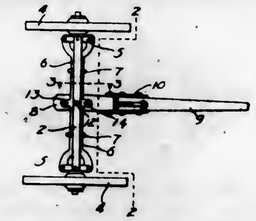
1. In combination, a reciprocating fluid pressure motor, a direction-controlling valve operated by said motor at the ends of the strokes thereof for reversing the direction of movement, a main valve controlling the supply of fluid pressure to said motor, setting means adjustable for different numbers of motor strokes and operating to shut the main valve at the end of a number of strokes corresponding to such setting, and interlocking means for preventing the operation of said setting means save when said main valve is shut.



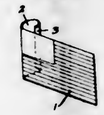
1,392,116. AUTOMATIC INDICATOR OF THE PROPORTION OF MOISTURE. MARCEL CHOPIN, Nancy, France, assignor to himself and LA SOCIETE ANONYME des Grands Moulins de Vilgrain, Nancy, France. Filed Aug. 7, 1920. Serial No. 401,995. 9 Claims. (Cl. 73—51.)

1. The method of automatically and continuously determining the percentage of water contained in pulverulent

or granular material, consisting in passing the material through a chamber while maintaining a constant quantity therein, which chamber is heated to a temperature sufficiently high to convert approximately the entire moisture content of the material into steam; and then measuring the quantity of steam given off per unit of time.

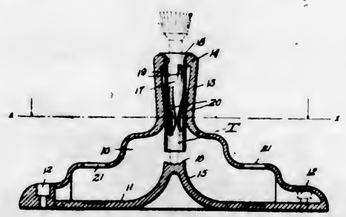


1,392,117. DETECTOR-CONTROLLED GLUING MECHANISM. LE GRAND L. CLARK, New York, N. Y., assignor of one-half to The Sheridan Iron Works, a Corporation of New York, and one-half to T. W. & C. B. Sheridan Company, a Corporation of New York. Filed Nov. 14, 1919. Serial No. 338,021. 2 Claims. (Cl. 91—51.)



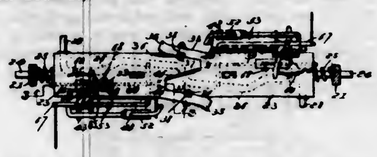
1. In combination, means for conveying books or analogous articles with the under surface thereof exposed, means for applying covers or sheets to the exposed under surfaces of the articles, means for conducting the sheets successively to the point of application, a glue applying device adapted to apply glue to the under side of each article before the application of a sheet thereto, the same adapted to rise to the article to be glued and to descend to an inoperative position, a yielding means tending to lift the glue device to operative position, timed connections acting after each gluing operation for causing the glue device to descend to inoperative position and allowing it to rise for the next operation, a normally inoperative lock device adapted to act when the gluing device is in its lowered position for holding it down against the lifting tendency of said yielding means, and detector-actuated connections, controlled by the presence of the sheets in said sheet conducting means, adapted for rendering operative said lock device, and thereby preventing the application of glue to the article when the corresponding sheet is missing, without stopping the machine.

1,392,118. VEHICLE RUNNING-GEAR. WILLIAM CONWAY, Soo, Ontario, Canada. Filed Mar. 1, 1920. Serial No. 362,183. 1 Claim. (Cl. 280—103.)



A wagon gear comprising a front axle, straps secured to the upper and lower faces of said axle and having their ends projecting beyond the ends of the axle, spindle knuckles pivoted between the said ends, arms projecting from the front and rear of each knuckle, rods slidably mounted on the front and rear faces of the axle and having their ends curved outwardly and pivotally connected with the arms, a tongue pivoted to the axle and having a rear part extending beyond the axle, a slotted offset part at the center of each sliding rod and bolts in the tongue and engaging the slots in said offset parts.

1,392,119. CLIP. HERBERT H. CORBIN and PETER VELLEMA, Grand Rapids, Mich. Filed Aug. 9, 1917. Serial No. 185,325. 1 Claim. (Cl. 24—259.)

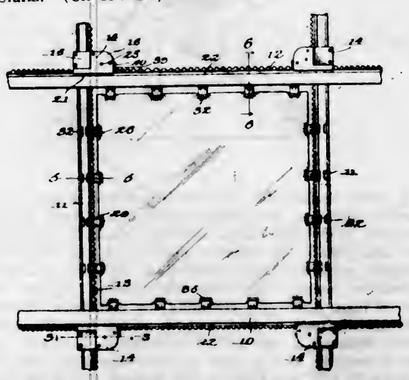


A clip comprising a body having an inner surface, and an outer display surface, one end of the body being curved backwardly to define a flat tongue which is approximately parallel to the body, the extremity of the tongue being convexed and having a gripping edge disposed obliquely with respect to the length of the body and pressed yieldingly against the inner surface of the body, the extremity of the tongue being disposed at an angle to the inner surface of the body to form an entering throat, the tongue being offset to project beyond one longitudinal edge of the body, for the convenient manipulation of the tongue.

1,392,120. UMBRELLA-HOLDER. CHARLES A. COOPER, New York, N. Y. Filed Aug. 13, 1920. Serial No. 403,310. 1 Claim. (Cl. 45—33.)

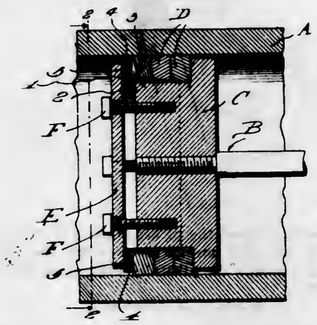
An umbrella stand comprising a closed hollow base constituting a receptacle for drip water, an upstanding tubular socket on the upper wall of said receptacle having communication with the interior, an interior upstanding pedestal provided on the bottom wall of the receptacle in vertical alinement with the socket for supporting an umbrella tip inserted therein, and means within said socket for holding the umbrella tip in spaced relation thereto to permit the drip water to freely drain from the umbrella into the receptacle.

1,392,121. AUTOMATIC TRAIN-PIPE CONNECTOR. TONY CRAVELONE and CARL MARTELLO, Anaconda, Mont. Filed Feb. 10, 1920. Serial No. 357,654. 10 Claims. (Cl. 284—9.)



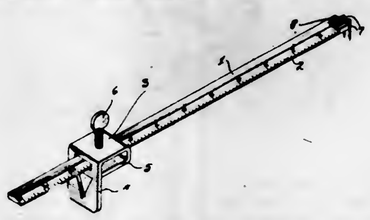
1. A train pipe connector having complemental heads provided with interlocking jaws, each head having an air passage in communication with the train pipe and terminating at the face of one of the jaws for registration with the terminal of the corresponding air passage of the complemental head, a main valve for controlling said air passage, means operable upon the engagement of the two heads to effect a partial opening of the said main valve, and means for completing the opening movement of said valves subsequent to the completion of the coupling operation of the heads.

1,392,122. RAZOR-BLADE HOLDER. JOSEPH P. CADISE, Chicago, Ill. Filed Oct. 23, 1920. Serial No. 418,962. 5 Claims. (Cl. 30—25.)



1. A razor blade holder comprising a handle, gripping plates carried by the handle, each comprising a curved member having a resiliency whereby the gripping portions of the plates tend to spring toward each other, a manually operated screw extending into the space between the said gripping plates, and means carried by the screw and connected to the plates whereby the said gripping plates may be drawn toward each other when the screw is manually operated to be drawn outwardly of the space between the said plates.

1,392,123. EMBROIDERY-FRAME. VITO DANISI, New York, N. Y. Filed Oct. 31, 1919. Serial No. 334,655. 1 Claim. (Cl. 45—24.)

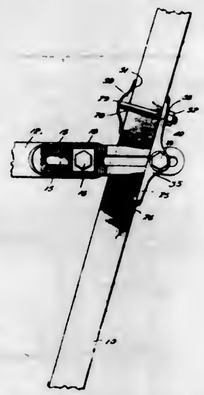


In an embroidery frame, a plurality of relatively adjustable rails constituting a work supporting frame, connecting and actuating devices carried by said rails and co-acting therewith for effecting relative adjustments of the same with respect to each other, clamping elements carried by said rails, and receiving portions formed in said rails adjacent said clamping elements for the reception of the same when thrown to an inactive position.

1,392,124. COMBINED FOLLOWER AND EXPANDER FOR PACKING-RINGS. LLOYD H. DONKEL, Macon, Ga., assignor of one-half to Samuel G. Pate, Macon, Ga. Filed Jan. 17, 1921. Serial No. 437,880. 3 Claims. (Cl. 74—109.)

1. In combination, a piston head, a compressible packing ring arranged thereon, a self-actuated split radially expansible expander disposed between the head and packing ring, and an actuator for moving the expander toward the inner end of the piston, said expander being normally expanded but becoming more and more contracted when moved inwardly by said actuator thus the inherent resiliency of the expander causing it to resist such contraction and permitting it to function as an expander to compress the packing ring.

1,392,125. GAGE FOR LOOMS. JACOB DUDASH and ISIDORE DUDASH, Lawrence, Mass. Filed Sept. 1, 1920. Serial No. 407,426. 1 Claim. (Cl. 33—42.)

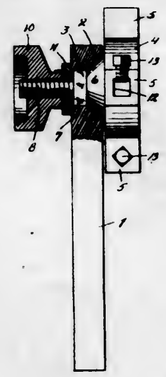


A cloth weaver's gage comprising a graduated bar, a pair of spaced prongs fixed at right angles to one end of said bar, said prongs being adapted to enter between the threads of the warp, a slide movable on said bar, means for clamping said slide in adjustment, and a plate extension on said slide adapted to engage over the breast of a loom.

1,392,126. LOOM ATTACHMENT. WILLIAM H. DUMAS, Lebanon, N. H., assignor of one-half to Joseph Moore, Lebanon, N. H. Filed July 11, 1918. Serial No. 244,453. 1 Claim. (Cl. 139—48.)

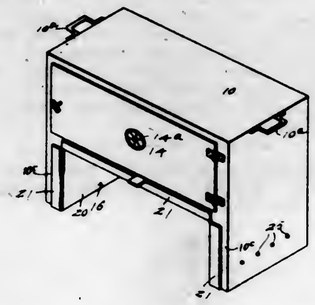
In a device of the class described, a picker stick, a sweep stick, a plate mounted on one side of the picker stick and provided with slots extending longitudinally of the picker stick and also provided with apertures in ap-

proximate alinement with the slots, slotted straps extending on opposite sides of the sweep stick and passing respectively through the slots in the plate, and a staple



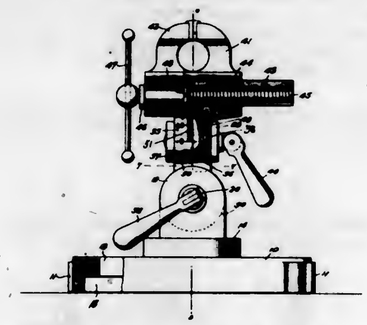
member passing around the picker stick, and through the apertures in the plate, means for securing the staple to the plate, and means for pivotally connecting the straps with the plate.

1,392,127. INSULATING AND BUILDING MATERIAL AND METHOD OF PRODUCING SAME. TORGNY ALBIN EKLUND, Stockholm, and CARL GÖSTA LÖFVEBERG, Visby, Sweden. Filed Mar. 11, 1920. Serial No. 365,053. 2 Claims. (Cl. 106—18.)



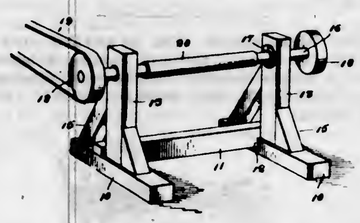
2. An insulating and building material consisting of a mixture of marl and cellulosic fiber.

1,392,128. TURRET TOOL-HOLDER. FRED EKMAN, Honolulu, Hawaii. Filed Apr. 3, 1918. Serial No. 226,448. 1 Claim. (Cl. 29—49.)



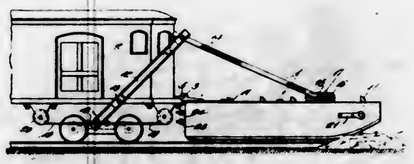
The combination with a standard provided with a frusto-conical recess and having a polygonal recess communicating with the converging end of said frusto-conical recess, of a circular head provided with a central opening and having a plurality of transverse openings therein communicating with said central opening, a plurality of tool holding arms formed integrally upon diametrically opposite sides of said head, provided with longitudinal openings therethrough communicating with the transverse openings in said head and having transverse threaded openings therein communicating with said longitudinal openings, a frusto-conical projection formed integrally on said head and engaging said frusto-conical recess, a polygonal projection formed integrally with said frusto-conical projection and engaging said polygonal recess, a stem formed integrally with said polygonal projection and exteriorly threaded throughout its length, a knurled lock nut engaging said threaded stem, a washer disposed on said stem between said nut and polygonal projection and engaging said standard, and set screws engaging the threaded openings in said tool holding arms.

1,392,129. OVEN AND WARMING-CLOSET. ANNIE E. ENGLAND, Calvert, Md. Filed Dec. 8, 1920. Serial No. 429,122. 6 Claims. (Cl. 126—275.)



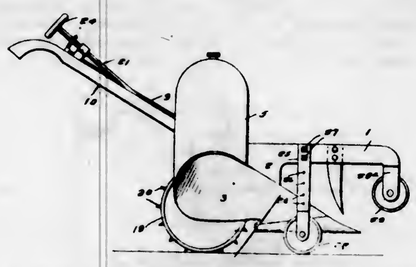
1. A convertible oven and warming closet having interior shelves and a door for giving access to the interior, and having one of its sides cut away near the bottom to form an opening, and interchangeable members for closing said opening, one of said members consisting of an interiorly accessible box for partitioning the interior of the casing.

1,392,130. VISE. OTTO L. ENGSTROM and HERMAN C. NELSON, South Bend, Ind. Filed May 23, 1921. Serial No. 471,742. 6 Claims. (Cl. 81—41.)



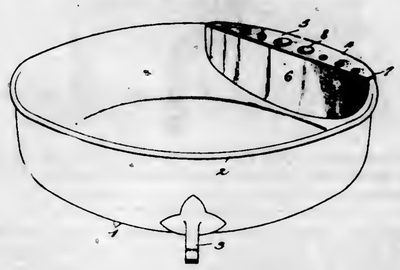
1. In an apparatus of the class described, a foundation member having a longitudinal guide slot, a base member rotative on the foundation member, means for clamping the base member in adjusted position on the foundation member, perforated lugs rising from the base member, a cylindrical member disposed for rotation between the spaced lugs, means for clamping the cylindrical member between the lugs, a cheek member rising from the cylindrical member, a vise device including a stationary jaw and a movable jaw, a cheek member depending from the stationary vise jaw and bearing against the cheek member of the cylindrical member, and means for clamping the cheek members in adjusted position.

1,392,131. POWER-TRANSMITTING APPARATUS. LEON ESSNER, Benton, Mo. Filed Apr. 17, 1920. Serial No. 374,737. 1 Claim. (Cl. 74—106.)



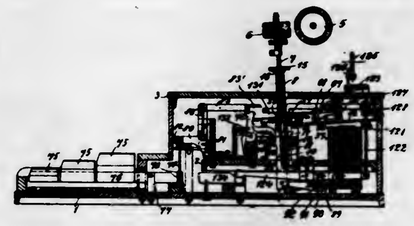
A power transmitting apparatus for motor operated vehicles, comprising spaced parallel members constituting a base, a transverse member connecting the parallel members and forming part of said base, standards rising from each of the parallel members, reinforcing elements arranged at the opposite sides of each standard and connecting the latter with the base, a shaft journaled between said standards, pulleys carried by the shaft beyond said standards, a sleeve of relatively soft material fitted on said shaft and substantially co-extensive in length with that portion of the shaft positioned between said standards, said sleeve being arranged in contacting cogagement with the rear portion of one of the drive wheels of the vehicle when said wheel is spaced from the ground.

1,392,132. SNOWPLOW. WILLIAM A. EVERITT, Portland, Oreg. Filed Sept. 16, 1920. Serial No. 410,661. 6 Claims. (Cl. 37—60.)



1. A snow plow adapted for hinged connection with a car for vertical swinging movement, beams adapted to be connected with a car for vertical swinging movement, arms loosely connected with the beams and pivotally and slidably connected with the plow adjacent the forward end thereof and means for swinging the beams to raise and lower the plow.

1,392,133. PLOW. JENNIE FAIRFIELD, Detroit, Mich. Filed May 16, 1919. Serial No. 297,473. 1 Claim. (Cl. 180—19.)



A tractor having a motor, a shaft, a rotatable member journaled on the shaft driven from the motor, a second shaft, a sprocket chain passing over said rotatable member, a sprocket wheel on the second shaft over which the chain passes, a frame, supporting means on the frame for the motor, a supporting wheel structure adjustable from the frame, a bearing on the frame for the first shaft, arms rigid with the first shaft journaling the second shaft, a traction means on the second shaft, a worm wheel on the first shaft, and an adjusting rod having a worm in mesh with the worm wheel.

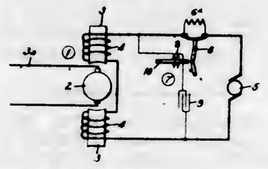
1,392,134. NUT-BOWL. LOUIS FARBER and HARRY FARBER, New York, N. Y. Filed June 25, 1920. Serial No. 391,706. 1 Claim. (Cl. 65—15.)

A device of the class described comprising an instrument receiving portion having a curvilinear edge rolled to grasp the beaded edge of a curved dish and an apron portion bent at an acute angle and having a curvilinear lower edge to be seated against the curved inner surface of said dish so as to set up a binding action against removal of the device from the dish.

1,392,135. TYPEWRITING-MACHINE. OSKAR FISCHER, Berlin-Wilmersdorf, Germany. Filed Mar. 19, 1914. Serial No. 825,776. 35 Claims. (Cl. 197—12.)

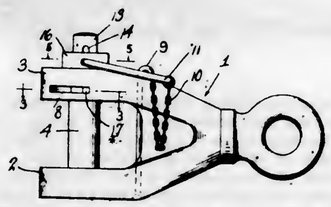
1. In a typewriting machine, the combination with the platen, and a rotatable type carrier having circumferentially arranged types, of means for turning the type carrier with one of the types in printing position, means for throwing the type carrier toward the platen, means for operating the turning means, means controlled by said turning means for operating the throwing means, means for simultaneously throwing said turning and throwing means out of operation, and means to return the type carrier into initial position.

1,392,136. ELECTRIC LUG. EDWIN VERNE FOAD, Galena, Kans. Filed Jan. 23, 1920. Serial No. 353,555. 1 Claim. (Cl. 287—82.)



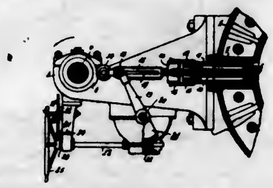
A connecting device comprising a hollow member having an opening in one end thereof, a pair of separate complementary gripping members located within the hollow member and each having a longitudinally extending groove in its opposed face for the reception of the end of a wire.

a spring connecting the members at one end and tapered extremities provided at the opposite end of said members



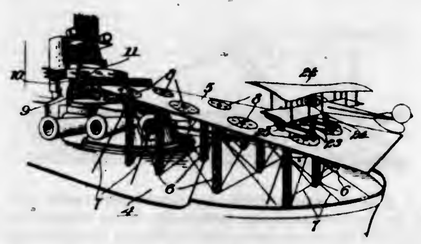
for engagement with the walls of the opening in the hollow member to force the complementary members to grip the wire.

1,392,137. CIRCUIT-INTERRUPTER. CHARLES LEG. FORTESCUE, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Oct. 6, 1916. Serial No. 124,054. 11 Claims. (Cl. 175—294.)



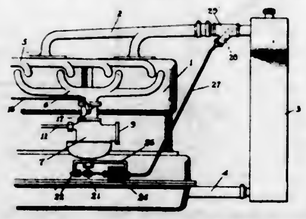
6. The combination with a dynamo-electric machine, of actuating means for a circuit interrupter electrically connected to the field-magnet winding only and adapted to be traversed by current only when a disturbance occurs on the armature of the machine.

1,392,138. CLEVIS. WILLIAM R. FREEMAN and JAMES M. FREEMAN, Washoe, Mont. Filed Feb. 7, 1921. Serial No. 443,269. 2 Claims. (Cl. 97—4.)



2. In combination with a clevis or coupling having spaced open jaws provided with alining round openings, the upper jaw having a square depression forming a pocket that surrounds the opening therein and the lower wall of the pocket having a notch and the side wall of the jaw having a slot communicating with the notch, a coupling pin movable through the openings in the jaws, a lug thereon designed to be received in the notch and to enter the slot, when the pin is turned on the clevis or coupling, said pin having a square extension provided with a key hole slot, a block slidable on said extension and designed to be received in the pocket, and a ring member having a bit portion passing transversely through the block and through the key hole slot in the pin and designed, when the block is in the pocket to be turned to bring the bit thereof transversely in the widened passage of the key hole slot in a position to bridge the restricted passage of the said slot.

1,392,139. MECHANISM FOR STARTING GAS-ENGINES. TOUSSAINT GENDARME, Séraing, Belgium, assignor to Societe Anonyme, John Cockerill, Seraing, Belgium. Filed Oct. 27, 1919. Serial No. 333,694. 3 Claims. (Cl. 60—16.)

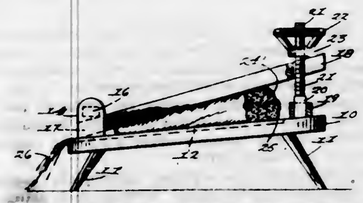


1. In a mechanism of the kind described in combination with the starting valves of a gas engine and with their actuating cams, a lever pivoted to the rod of each starting cam, a hand wheel and actuating means between said hand-wheel and lever whereby this lever can be maintained in the position in which it is acted upon by its cam or can be disengaged from said cam or be pushed so as to open the starting valve.

1,392,140. APPARATUS FOR LANDING FLYING-MACHINES. HUGO GERNSBACK, New York, N. Y. Filed May 20, 1918. Serial No. 235,675. 2 Claims. (Cl. 244—2.)

1. Landing apparatus having a platform of glass provided with a recess, an electromagnet disposed in said recess with its upper surface flush with the upper surface of the platform, means to support the platform, means to energize said electro-magnets including wires, and means embedded in the platform through which the wires pass to the magnets.

1,392,141. CARBURETER. JEAN V. GIESLER, Knoxville, Tenn., assignor to The Fulton Company, Knoxville, Tenn., a Corporation of Maine. Filed Sept. 25, 1916. Serial No. 122,122. 29 Claims. (Cl. 123—122.)

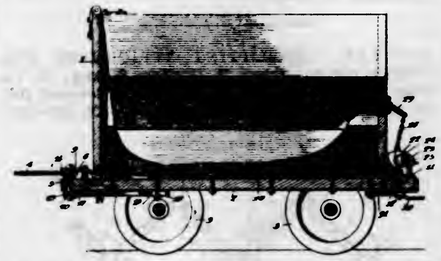


1. In an internal-combustion engine, in combination with a carbureter comprising a fuel-regulating valve and an air inlet coöperating therewith, means to vary the proportion of fuel to air delivered by said carbureter, means for circulating a cooling medium in operative relation to the engine, and means automatically and solely controlled by the temperature of said cooling medium at substantially the temperature at which it leaves said engine for controlling said proportion-varying means.

1,392,142. SPORTING-SHOE. DANIEL J. GOLDEN, Brockton, Mass. Filed June 14, 1921. Serial No. 477,379. 1 Claim. (Cl. 36—17.)

A shoe of the character stated, comprising an inner sole, an upper, a welt, a flexible casing strip, said parts being united by inseam stitches, a middle sole united to the welt, and an elastic outer sole cemented to the outer face of the middle sole and to a portion of the confining strip, said strip being wider than the welt, and its outer edge portion being formed and arranged to cover the margins of the middle and outer soles.

1,392,143. CHEESE-PRESS. JOHN GORA, Johnsonburg, Pa. Filed Oct. 12, 1920. Serial No. 416,502. 1 Claim. (Cl. 100—55.)

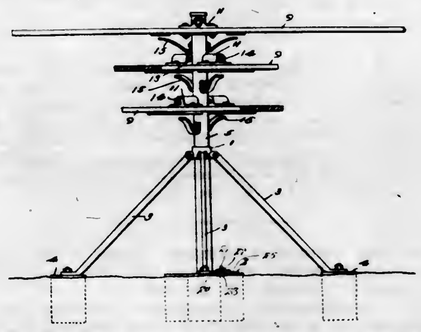


A cheese press of the character described comprising two presser boards, a reduced tail end on the upper board, the lower board provided with a groove in its upper face for the removal of the liquid, four legs secured to said lower board, two guide pieces on the lower board connected by a cross-piece near their upper ends providing a means for removably holding the tail piece of the upper board under the cross-piece, a screw-socket on the opposite end of the lower board, a screw bolt resting with its lower end in said socket, and a hand wheel upon the upper end of said screw bolt above the upper board resting with a collar against the upper face of said upper board, substantially as described and for the purpose set forth.

1,392,144. PORTABLE CAMERA-SUPPORT. SAMUEL R. GRAY, Germantown, Pa. Filed June 2, 1921. Serial No. 474,354. 4 Claims. (Cl. 248—43.)

1. In a portable camera support the combination with a guide block, of legs pivotally connected thereto, engaging means on the legs, and a rigid plate adapted for direct removable connection with said engaging means for forming a rigid and inflexible support.

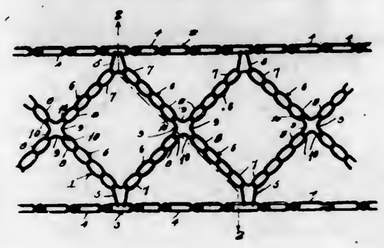
1,392,145. AUTOMATIC COUPLING FOR MINE-CARS. GEORGE T. GREGORY, New Kensington, and HENRY W. BURKET, Arnold, Pa. Filed May 16, 1919. Serial No. 297,519. 4 Claims. (Cl. 213—50.)



1. A car coupling comprising a coupling pin and link, the link having a collar formed with a seat and the pin formed with a key to fit in the seat to connect one to the other to be rotatable together and non-rotatable one relatively to the other, and means coöperating with the pin for normally holding the link in a forwardly projected position.

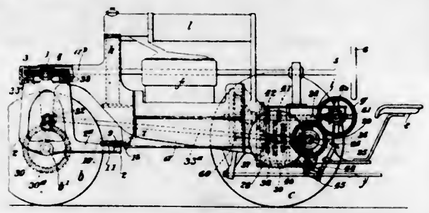
1,392,146. TIE. ROSCOE M. GRIZZLE and AARON H. THACKER, Terre Haute, Ind. Filed Mar. 30, 1921. Serial No. 457,004. 7 Claims. (Cl. 238—76.)

1. In a device for the purpose set forth, a metallic tie and rails resting thereon, clamps carried by the tie for holding the rails on said tie, said clamps including respectively a longitudinally disposed member having a hooked end for engaging the outer flange of the rail, and a swinging member having a hooked end for engaging the inner edge of the rail, and independent spring means influencing each member for holding the same in rail engaging position.



1,392,147. COMBINED TEETER AND ROUNDABOUT. EDMUND DAVIS GROVE, Oakland, Calif. Filed May 17, 1920, Serial No. 382,108. Renewed May 19, 1921. Serial No. 470,951. 3 Claims. (Cl. 46—27.)

2. In a combined teeter and roundabout, the combination of an upright revolvible post, means supporting the



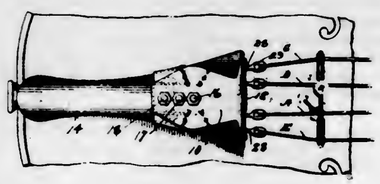
same, a teeter fulcrumed on and extending in opposite directions from the post, a bolt movable rectilinearly into and out of engagement with the post and having an upturned outer arm terminating in an eye, and a hinge including a fixed member and a vertically swinging member having claws adapted to rest at opposite sides of the bolt arm below the eye thereon, whereby when a lock is secured in the eye the post and the parts carried thereby will be locked against rotation.

1,392,148. ANTISLIPPING ATTACHMENT FOR WHEEL-TIRES. BERTA B. GUNNOE, Beckley, W. Va. Filed Jan. 8, 1918, Serial No. 210,932. Renewed Dec. 23, 1920. Serial No. 432,862. 1 Claim. (Cl. 152—14.)

A tire chain comprising cruciform central links each having its arms arranged diagonally with relation to the tire and angularly with relation to the plane of the link, side chains, and diagonally arranged cross chains connected to the arms of the central links and to the side chains, the angular arrangement of the arms of the central links serving to present a maximum of tread surface of the central and adjacent links whereby lateral and circumferential skidding is prevented.

1,392,149. MOTOR-TRACTOR FOR AGRICULTURAL WORK. WILLIAM GUTHRIE, Motherwell, Scotland, assignor of one-half to Duncan McNaughton Wallace, Glasgow, Scotland. Filed Apr. 7, 1920. Serial No. 371,875. 12 Claims. (Cl. 180—18.)

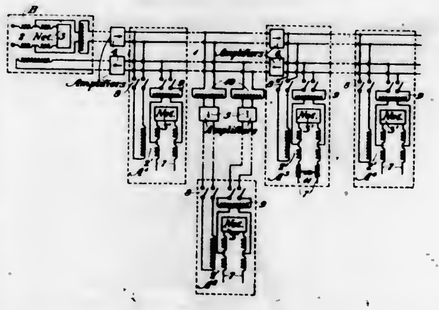
1. A tractor for agricultural and other work having two rear driving wheels and a combined driving and steering wheel intermediately disposed in front of the two rear wheels, means whereby all three wheels are positively driven in conjunction when the tractor is traveling straight forward and means whereby the front wheel and one of the rear wheels work together when the tractor is turning while the other back wheel runs free.



1,392,150. SHOCK-ABSORBER. PETER F. HALFERTY, Aberdeen, Wash. Filed June 10, 1920. Serial No. 387,917. 2 Claims. (Cl. 267—8.)

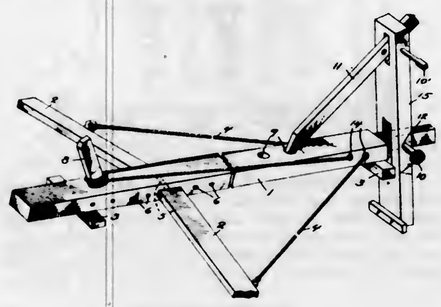
1. A shock absorber, comprising a cylindrical casing, rods movable in the ends of the casing, elastic pistons on the rods, nuts on the rods at opposite sides of the pistons adapted when moved toward and away from each other to adjust the diameter of the pistons, said pistons snugly fitting the casing, coiled springs on the rods between the

ends of the casing and said pistons, and an outwardly opening manually operated valve controlling a port in the intermediate portion of the casing between the pistons.



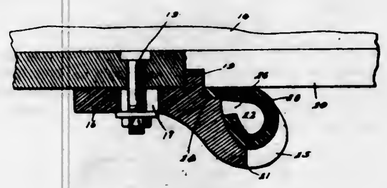
1,392,151. TONE-INDICATING DEVICE FOR VIOLINS. WILLIAM F. HAMES, Providence, R. I. Filed Oct. 4, 1920. Serial No. 414,595. 10 Claims. (Cl. 84—297.)

3. A tone-indicator attachment for stringed instruments comprising a frame supported on the tail-piece of an instrument, a set of spring arms carried by said frame and to which the strings of the instrument are to be connected, means for readily securing the frame to the tail-piece, and means on said frame for visibly indicating by the position of each spring member when the tension of its string is at concert pitch.



9. A tone-indicator for stringed instruments comprising upper and lower plates, posts between said plates and maintained in position thereby, spring arms extending laterally from said posts to each of which a string of said instrument may be connected, setting points on the top plate, and means on the arms to coöperate with the setting points.

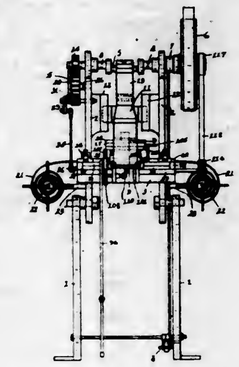
1,392,152. MULTIPLE-STATION TRANSMISSION-CIRCUITS. WILLIAM H. HARDEN, Brooklyn, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Dec. 13, 1918. Serial No. 266,636. 8 Claims. (Cl. 178—44.)



1. In combination, a circuit comprising a section having separate lines for transmitting signals in opposite directions respectively, a plurality of stations some of which are bridged across said section of the circuit at various points and means associated with the circuit for substantially equalizing the transmission from a selected one of said stations to each of the others.

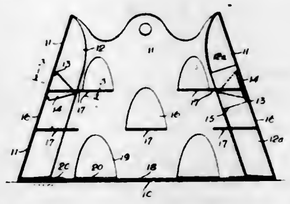
1,392,153. ROOFING-SCAFFOLD. SAM HAWKINS, Centralia, Ill. Filed Apr. 8, 1920. Serial No. 372,416. 2 Claims. (Cl. 304—23.)

1. A roofing scaffold comprising a main timber, adapted to extend from the ridge to a point adjacent the eaves ridge-engaging means carried by the upper end of the timber, footpieces each having one terminal provided with a spike, the main timber being provided on its lateral faces with spaced apertures adapted to selectively receive said spikes, whereby said foot-pieces may be removably secured to said timber in adjusted position, and flexible means connecting the outer ends of said foot-pieces with said timber.



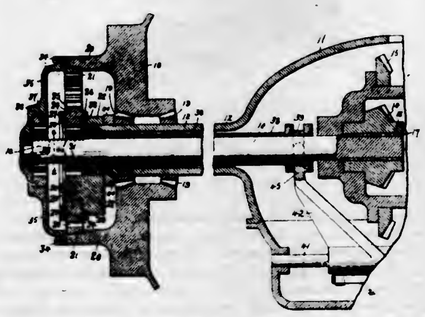
1,392,154. PICKER-STICK-CUSHIONING MEANS. THOMAS PARKINSON HAYDOCK, New Bedford, Mass. Filed June 8, 1921. Serial No. 475,982. 4 Claims. (Cl. 139—22.)

3. Picker stick cushioning means comprising a body in which is a pocket open at its upper side to confine a cushion against an opposed loom portion, the end of said pocket being bifurcated to enable a picker stick to act against the cushion, and the inner and upper portion of the pocket being shouldered.



1,392,155. APPARATUS FOR FITTING INSERTS IN SEPARATORS. CLARENCE W. HAZELETT, Lakewood, and FRANCIS A. HOLT, Cleveland, Ohio, assignors to National Carbon Company, Inc., a Corporation of New York. Filed Oct. 29, 1918. Serial No. 260,091. 25 Claims. (Cl. 144—196.)

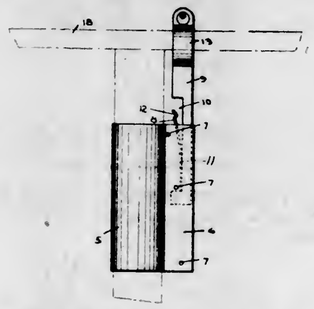
1. In apparatus of the kind described, the combination of a die, strip feeding mechanism adapted to deliver a strip thereto, a support for a blank to be operated upon, a reciprocating punch and means coöperating therewith adapted to relatively adjust the support and



punch on alternate cutting strokes for the purpose set forth.

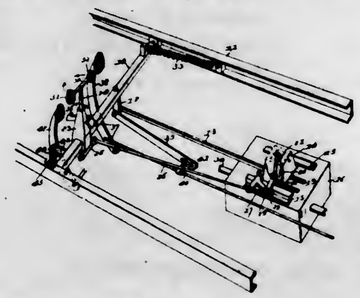
1,392,156. SANITARY FLYTRAP. ALFRED B. HELLER, Hamburg, Pa. Filed Apr. 8, 1921. Serial No. 459,620. 2 Claims. (Cl. 43—115.)

1. A fly trap having a bottom and sides of sheet material, said sides being foldable into the plane of the bottom or set-up to give the trap a box-like form, said sides being formed with flanges along their side edges and bent to extend laterally inward at the interior of the trap at the corners and with adjacent flanges lying against each other, certain of said flanges having portions in the form of locking tongues and the adjacent flanges having slots through which said tongues may extend.



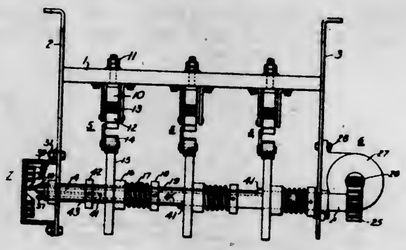
1,392,157. CHANGE-SPEED GEARING. LEO HERMAN and FRANK J. KARG, Akron, Ohio. Filed Nov. 26, 1920. Serial No. 426,640. 1 Claim. (Cl. 74—34.)

A device of the class described comprising a shaft mounted for rotation, an outer sleeve inclosing the



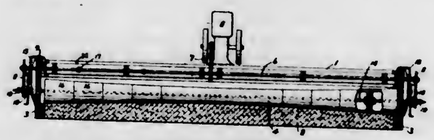
shaft, a member rotative on the outer sleeve, an outer ring gear carried by the rotative member, a pinion slidable on the shaft, an inner sleeve connected to the pinion, a holding element carried by the outer sleeve, an inner ring gear rotative on the holding element and having outer teeth engaging the outer ring gear and inner teeth engaging the pinion when the same is in inner position, a clutch element carried by the rotative member and engaged by the pinion when the pinion is in outer position, and means for shifting the inner sleeve to change the position of the pinion.

1,392,158. AUTOMOBILE-LOCK. EMIL WILLIAM HESSEL, Granite City, Ill. Filed June 30, 1920. Serial No. 393,024. 1 Claim. (Cl. 70—129.)



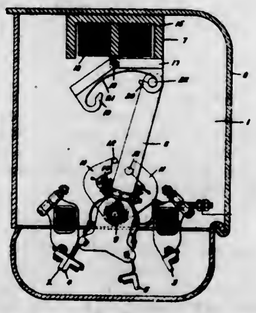
In combination with a steering column, and the steering wheel supported at one end thereof, a locking device including a tubular body portion having flanges, means extending through the flanges for securing the flanges together to provide a housing, a locking arm disposed within the housing and having a cut out portion providing a pocket, a leaf spring disposed within the pocket and having one extremity thereof extending toward the tubular portion of the locking device, said extended portion of the spring having an offset portion, designed to engage the flange securing means, and locking means disposed at one end of the locking arm for locking the wheel against rotation.

1,392,159. GEAR-SHIFTER. ERNEST C. HICKS, Waynesville, Mo. Filed Nov. 13, 1920. Serial No. 423,781. 6 Claims. (Cl. 74—58.)



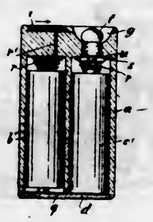
1. A gear shifting mechanism for motor driven vehicles having a pedal actuated rocker, a slide operatively connected with the rocker, a selector movable transversely to the path of the slide for respective engagement with the gear shifting yokes, and a selector actuating spindle movable in opposite directions from a neutral position and axially arranged in radial relation with the rocker, said spindle having a cross arm carrying opposite pedal plates.

1,392,160. CONTROL APPARATUS. OLIVER P. HIPPLE, Wilkins township, Allegheny county, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 6, 1917. Serial No. 178,909. 9 Claims. (Cl. 200—17.)



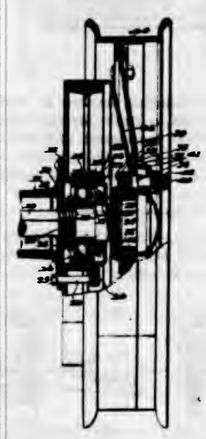
1. Control apparatus comprising a plurality of sets of stationary and movable contact members, means for actuating said movable contact members in a certain direction, and means for selectively effecting disengagement of said contact members by moving said actuating means in a direction transverse to said certain direction.

1,392,161. FINISHING-MACHINE FOR ROADS AND THE LIKE. HAROLD E. HILTS, Philadelphia, Pa. Filed Feb. 9, 1921. Serial No. 443,539. 8 Claims. (Cl. 94—45.)



1. A finishing machine for roads comprising the combination of side-forms, a carriage movable on the side-forms, a roller tapering toward its center and carried by the carriage, means for rotating the roller in a direction opposite to the movement of the carriage, and mechanism for, at the same time, imparting a transverse motion to the roller.

1,392,162. CIRCUIT-INTERRUPTER. CHARLES H. HODGKINS, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Mar. 14, 1918. Serial No. 222,474. 9 Claims. (Cl. 200—94.)



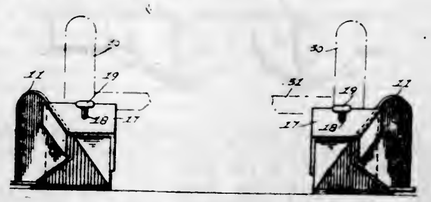
3. In a double-throw switch, the combination with an operating lever, of a single electromagnet, and a double-throw armature therefor having means coöperating with the lever by which the armature is moved toward its coöperating positions with respect to the magnet.

1,392,163. ELECTRIC POCKET-LAMP. OSCAR HOFFMANN, Stuttgart, Germany. Filed Jan. 11, 1921. Serial No. 436,629. 5 Claims. (Cl. 240—8.5.)

1. In an electric pocket lamp, a casing, cell compartments, contacts adapted to engage with the terminals of electric cells located in said compartments, sliding lid for closing the said compartments, a spring permanently fixed at the end of each said compartment, a lamp engaging spring contact member electrically connected with one of the springs, a sliding circuit closer electrically connected with the other of the said springs, the said springs being arranged to exert pressure upon cells located in the compartments whereby the latter are actuated to hold the said lid in closed position, and an electrically connected member in the lid for interconnecting the said cells, said lid and circuit closer being arranged substantially flush with the outer surface of the casing.

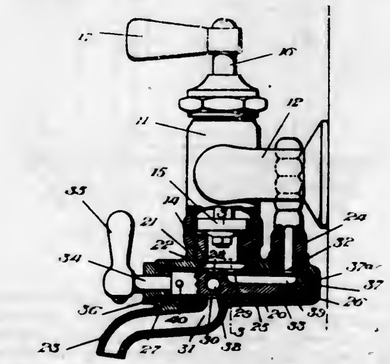
1,392,164. VEHICLE-WHEEL. ORMOND E. HUNT, Detroit, Mich., assignor to Packard Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed Nov. 14, 1919. Serial No. 337,954. 6 Claims. (Cl. 301—6.)

1. In combination, an axle, a brake drum, means for securing said brake drum to said axle, a wheel, and means for securing said wheel to said axle in such a manner that the wheel may be demounted from the axle without demounting the brake drum.



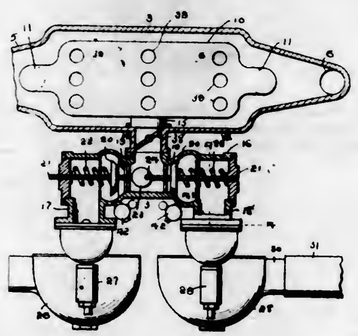
1,392,165. FLASHLIGHT. ROBERT L. HUNTER, Norfolk, Va. Filed Feb. 18, 1921. Serial No. 445,922. 2 Claims. (Cl. 245—8.5.)

2. Means for changing the focus of the light of a flashlight, comprising a flashlight case, a cap for said case, means adapted to permit said cap to travel on the said case, and means attached to said case and coöperating with said cap to stop automatically the outward



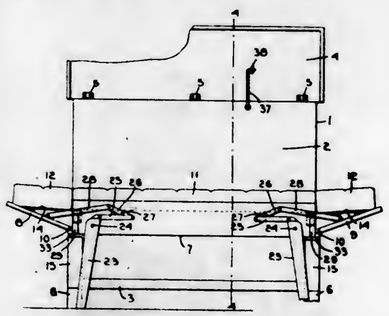
travel of said cap, said means being further adapted to be manually operated to be moved to a non stop position to allow separation of said cap from said case.

1,392,166. ROAD-CLEARER. SZCZEPAN IMMER, New York, N. Y. Filed July 31, 1920. Serial No. 400,405. 3 Claims. (Cl. 37—57.)



1. A device of the character described comprising a plow adapted to be secured to the front part of a vehicle, a triangular bottom plate having its rear end spaced from the plow bottom, a screw-bolt and hand wheel for regulating the distance between said plate and the ground, and means for securing said device to the vehicle.

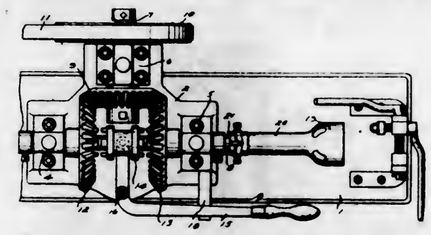
1,392,167. DUPLEX FAUCET. JACOB T. JOHNSON, Atlanta, Ga. Filed Dec. 27, 1920. Serial No. 433,320. 4 Claims. (Cl. 251—109.)



1. A duplex faucet comprising a horizontal body to be disposed below another faucet and having an upper inlet portion between its ends attachable to such other faucet, the body having a delivery spout leading downwardly from between its ends and a nipple extending upwardly from the body at a point spaced longitudinally from said inlet portion and spout to be disposed behind said other faucet, and a longitudinal valve in said body having an operating handle beyond the forward end of the body and having a passage to establish communication between said inlet portion and spout and a longitudinal channel to establish communication between said inlet portion and nipple, said passage and channel being arranged for the alternate flow from the inlet portion into said spout and nipple.

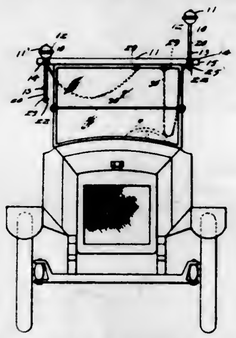
1,392,168. EXPLOSIVE-ENGINE MANIFOLD. LESTER E. JOHNSON, Coffeyville, Kans., assignor to John Higbee Johnson, Coffeyville, Kans. Filed Dec. 2, 1916. Serial No. 134,697. 1 Claim. (Cl. 123—122.)

In an explosive engine, an exhaust manifold having inlet and outlet ports, an inlet manifold arranged within the exhaust manifold and having pairs of openings in the front and rear walls thereof, fire tubes connecting said openings, and enlargements formed on the intake manifold and arranged opposite to some of the exhaust ports of the exhaust manifold to deflect the exhaust of the engine toward the fire tubes.



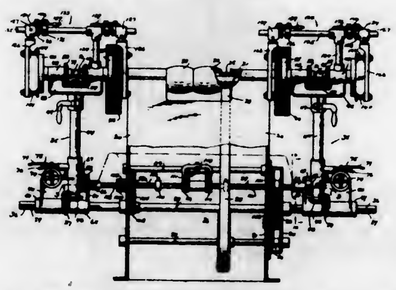
1,392,169. FOLDING BED. JOSEPH JOHNSYN, Dorchester, Mass. Filed Jan. 27, 1921. Serial No. 440,425. 5 Claims. (Cl. 5—18.)

1. In a folding bed, in combination, a cabinet element and a bed bottom element hinged thereto to fold about an axis extending longitudinally of the bed, said bed bottom element comprising a central section and two end sections hinged thereto, said central section forming the front of the cabinet and the end sections forming the ends of the cabinet when the bed is folded.



1,392,170. THREAD CUTTING AND TAPPING MACHINE. ELI JONES, Luverne, Minn. Filed Mar. 11, 1920. Serial No. 364,998. 3 Claims. (Cl. 10—137.)

3. A machine of the character stated, comprising a support, a horizontal shaft on the support, means for turning the shaft in either direction, a chuck on the shaft, a pair of brackets on the shaft, a transversely positioned rod connecting the brackets, a pair of transversely movable vise members mounted on the rod, a second rod having right and left hand screw threads engaging the respective vise members, a third vise member movable longitudinally of the support, a spring exerting pressure



on the last-mentioned vise member tending to move it in one direction, and a screw engaging the last-mentioned vise member adapted to move it in the opposite direction.

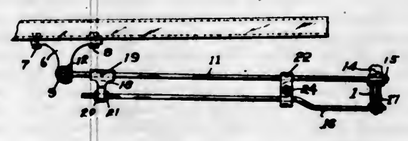
1,392,171. DIRECTION-INDICATOR FOR VEHICLES. WILSON E. JURY, Freeport, Ill. Filed Apr. 16, 1921. Serial No. 461,790. 2 Claims. (Cl. 116—50.)

1. A direction indicator having a signaling element provided with a stem, a guide for directing the stem for substantially vertical movement and an operating cord connected with said stem, the guiding means for the stem consisting of a clip adapted for attachment to a vehicle top bow.

1,392,172. BUFFING-MACHINE. JOSEPH KELLER, Buffalo, N. Y. Filed May 24, 1919. Serial No. 299,585. 21 Claims. (Cl. 51—91.)

1. A buffing machine, comprising a spindle, a buffing wheel carried by the spindle, a plurality of work-piece chucks, releasing means for the chucks, means, controlled by the releasing means, for alternately placing the chucks, one at a time, into working position, means for rotating the chucks, and means for reciprocating the chucks.

1,392,173. COMPOSITE MOLDING. WILLARD H. KEMPTON, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed July 25, 1918. Serial No. 246,763. 7 Claims. (Cl. 64—19.)

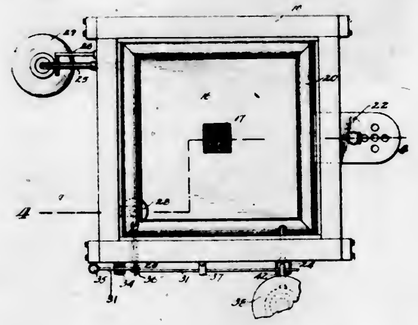


1. A composite molded article comprising a body portion composed of insulating material impregnated with a hardened binder and an insert of similar material containing a lubricant.

1,392,174. COMPOSITE MOLDING. WILLARD H. KEMPTON, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Original application filed July 25, 1918, Serial No. 246,763. Divided and this application filed Apr. 4, 1919, Serial No. 287,580. Renewed Apr. 7, 1921. Serial No. 459,309. 8 Claims. (Cl. 18—59.)

4. A method of molding composite articles that comprises separately disposing substantially tubular bodies of different moldable compositions in a substantially annular mold chamber, with one body surrounding another, and applying axial pressure against the bodies, together with heat, to compact and cure the compositions, whereby a unitary composite article is formed.

1,392,175. FRONT-AXLE RADIUS-ROD. GEORGE S. KING, South Berkeley, Calif. Filed Jan. 12, 1920. Serial No. 350,911. 2 Claims. (Cl. 267—66.)

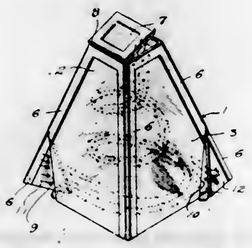


1. A radius rod for the front axles of vehicles comprising a long rod having a ball at one end, a shorter rod having one end threaded, clamps for connecting the two rods at their middle portion, a depending bracket secured to the longer rod adjacent the ball and to which the threaded end of the shorter rod is adjustably connected and a depending bracket adapted to be connected to the frame of a vehicle to which the longer rod is connected by means of said ball, both of said rods being adapted to be connected at their other ends to the vehicle axle.

1,392,176. DUPLEX LAMP-SOCKET. WILLIAM J. KOENIG, Brooklyn, N. Y.; Annie Allen, administratrix of said William J. Koenig, deceased, assignor to Ralph J. De Ross, Brooklyn, N. Y. Filed Jan. 20, 1920. Serial No. 352,887. 2 Claims. (Cl. 173—344.)

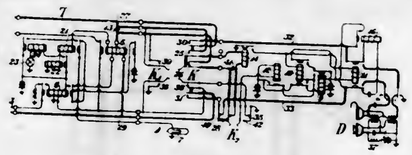
1. The herein described lamp socket comprising a shell, an abutment member fixed in the shell and having a guide hole therethrough, a floating contact carrier within the shell spaced from the abutment but movable toward the abutment on the introduction of a lamp, resilient means between the abutment and the carrier normally supporting the carrier spaced from the abutment, and a contact member carried by the carrier and projecting through the hole in the abutment, the said contact member being composed of a flat piece of metal of uniform width and bent upon itself near its center to form a loop, and which after the ends are passed through the carrier are bent apart upon the contact surface of the carrier.

1,392,177. INCUBATOR. JOE KOVAR, Coupland, Tex. Filed Oct. 25, 1920. Serial No. 419,359. 2 Claims. (Cl. 236—4.)



2. In a heating system, a liquid conduit, means for heating the liquid of the conduit, an intake trough communicating with the conduit, a cold water receptacle having a flexible tube extending above said trough, a thermostat, a pivoted lever operated by the thermostat, an adjustable support, a second lever pivoted intermediate of its ends in the said support and with which the free end of the first lever has a loose connection adjacent its pivot, one end of the second lever having a weight thereon and its other end extending below and in engagement with the pipe of the receptacle, and means for limiting the upward movement of said second lever.

1,392,178. COLLAPSIBLE AND VENTILATING BELL OR FORCING-GLASS. OTTO C. KUEBLER, Yonkers, N. Y. Filed Apr. 16, 1919. Serial No. 290,377. 1 Claim. (Cl. 47—22.)

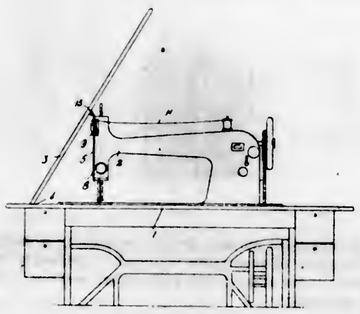


A plant forcing device comprising a body consisting of pairs of side walls hinged together and forming an open-

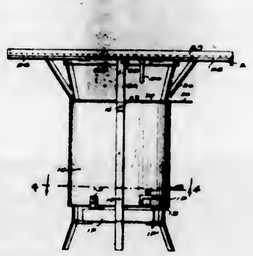
ing at their upper ends, a hinge cover for said opening, some of said walls having openings at their lower ends and located opposite to each other, and hinged doors for the last named openings, and one of said doors adapted to

open inwardly of the side walls and the other door open outwardly thereof, said doors when in an open position adapted to cause an air current to pass through the device and outwardly of the first opening in a spiral path.

1,392,179. OPERATOR'S TRUNK-CIRCUIT. GEORGE W. KUHN, Brooklyn, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Sept. 5, 1918. Serial No. 252,765. 14 Claims. (Cl. 179—41.)



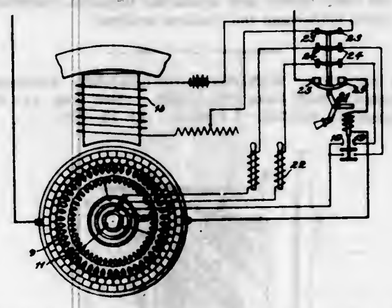
5. In a signaling system, a subscriber's station, a common battery link circuit for establishing connections from said subscriber's station, a trunk for extending connections from said subscriber's station through said link circuit to another station, a bridge across said trunk including an inductance and a condenser, and single switching means for connecting said trunk to said other station and for shunting a winding about said condenser.



12. In a signaling system, a trunk leading to a special operator's desk, an operator's telephone apparatus at said position, switching means associated with said trunk for connecting said operator's telephone apparatus thereto, a signal responsive relay associated with said trunk, a signal controlled by said relay and responsive to the actuation of said relay by signaling current, and a second relay associated with said trunk responsive to the actuation of said switching means to alter the responsive condition of said signal, and a plurality of terminals and connections for said relays and switching means whereby the trunk may be adapted for either common battery signal or ring-down signaling by a simple change in wiring.

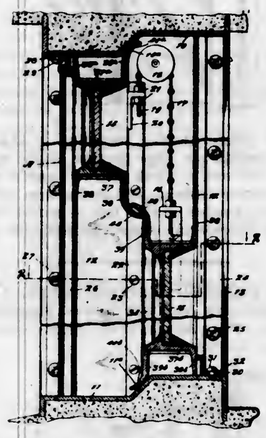
1,392,180. SEWING-MACHINE ATTACHMENT. DOIN KWON, Honolulu, Hawaii. Filed Sept. 14, 1920. Serial No. 410,297. 2 Claims. (Cl. 112—218.)

1. A buffer plate of the character described, adapted to be used with a hinged extension board or leaf of a sewing machine, said plate having screw receiving openings therein, whereby said plate is secured to the outer face of the sewing machine head, said plate having a slot therein and a thread guiding notch therein, and an upwardly and outwardly projecting cushion tongue on the plate to receive the hinged extension board thereagainst and prevent contact of the board with the head of the machine.



1,392,181. PLASTIC-MATERIAL FURNACE. CHARLES G. LACY, deceased, Alliance, Ohio; by Lydia Lacy, administratrix, Alliance, Ohio. Filed Oct. 7, 1920. Serial No. 415,427. 1 Claim. (Cl. 126—33.)

In apparatus of the character described, an upstanding fire-box shell, upstanding strap-legs secured thereto and extending upwardly and downwardly beyond the same and having their upper ends bent to form substantially triangular open heads embodying horizontal portions, a tray adapted to be arranged upon the horizontal portions of the triangular open heads, straps crossing each other and diagonally arranged upon the lower surface of the tray and rigidly secured thereto for engagement with the triangular heads, said straps having sockets formed therein, and a shifting ring mounted within the sockets and carrying laterally extending bolts adapted to enter the triangular heads for engagement with the horizontal portions thereof.

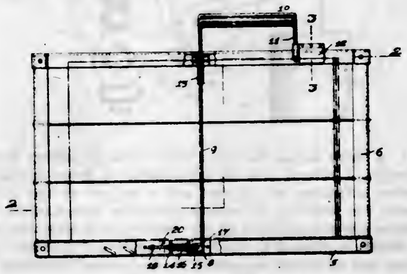


1,392,182. MEANS FOR PREVENTING COMMUTATOR-FLASHING. BENJAMIN G. LAMME, Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed June 17, 1918, Serial No. 240,422. Renewed July 9, 1921. Serial No. 483,610. 11 Claims. (Cl. 171—228.)

1. The combination with a dynamo-electric machine of the commutator type provided with a main armature winding connected to the commutator and an auxiliary armature winding, of means for interconnecting a plurality of points of different poteatial in said auxiliary winding

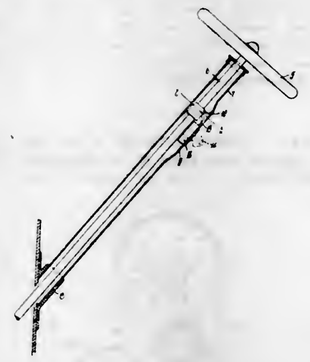
upon the passage of abnormal current through said main winding.

1,392,183. WINDOW. LOUIS LANE, Habana, Cuba. Filed Sept. 18, 1919. Serial No. 324,522. 15 Claims. (Cl. 189—72.)



1. A window including a window frame and a sliding sash therein having its frame formed of channel bars, presenting side flanges of unequal width, said window frame having guide means for the narrower flanges of the sash and with which said narrower flanges contact at their outer surfaces, the end edges of said narrow flanges being disposed toward the opposed vertical surface of the frame; and said frame presenting channels receiving the edge portions of the wider flanges of the sash.

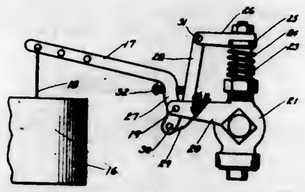
1,392,184. CHAIN-HOOK. BERTIE J. LONG, West Brooklyn, Ill. Filed Apr. 26, 1921. Serial No. 464,652. 1 Claim. (Cl. 24—241.)



A hook for the purpose described comprising side by side members corresponding in outline and having forward ends that describe an arc of a circle; one of the said members having in its forward portion a curvilinear slot that reaches upwardly from its lower edge and then downwardly and also having an upstanding tongue between said slot portions, and the other member having a slot in its forward portion that reaches downwardly from its upper edge and then upwardly, and also having a comparatively wide pendent tongue between said slot portions, and the forward walls of the forward slot portions being arranged to describe an arc of a circle concentric with the forward ends of the members.

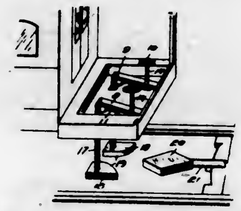
1,392,185. SHEET-TURNER. WILLIAM A. LUCKE, New York, N. Y. Filed Oct. 21, 1920. Serial No. 418,403. 3 Claims. (Cl. 84—493.)

3. A sheet turner, including pairs of spaced bars, cross bars extending between said pairs of bars, shafts rotatably mounted within said cross bars, and having their upper ends extending outwardly beyond the same, a spring for each of said shafts, said spring having one of its ends secured thereto, its body encircling the same, and having its opposite end secured to said cross bars, whereby to effect a turning of said shaft, plungers slidably secured to the second of said cross bars, springs for normally projecting said plungers to permit of their engagement with the stop secured to each of said shafts for preventing a rotation of the same, crank shafts rotatably mounted between one of the pairs of bars, connecting rods extending between said crank shaft and the rear ends of said plungers, said crank shafts being each provided with finger pieces to permit a rotation of the same.



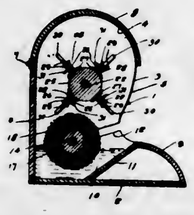
1,392,186. LOCK FOR STEERING-POSTS. JEROME E. LYNCH, Newton Center, and JAMES W. WOODWARD, Brookline, Mass. Filed Apr. 28, 1920. Serial No. 377,246. 3 Claims. (Cl. 70—90.)

2. In combination, a steering post provided with an enlarged portion formed integral therewith, a steering wheel attached to said steering post, a casing surrounding said steering post and a lock attached to said casing upon the



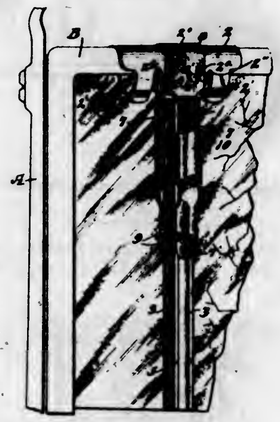
interior thereof and provided with a bolt adapted to be moved by a key into locking engagement with said enlarged portion and thereby to prevent the rotation of said steering post.

1,392,187. OIL-BURNER. GEORGE H. MAHAN, Kansas City, Mo. Filed Feb. 16, 1920. Serial No. 359,065. 3 Claims. (Cl. 158—36.)



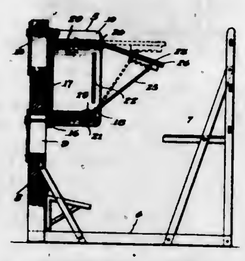
1. A valve casing having a valve stem projecting therethrough, a lateral arm on said casing, a lever having a curved extension at one end and a weight at the other, means for pivoting the curved extension intermediate its ends to the arm, an arm on the valve stem, a link, one end of which is pivoted to the second mentioned arm and the other end of which is pivoted to the curved extension of the lever at one side of the pivotal connection between the lever and the first named arm, and means normally urging the valve to open position.

1,392,188. SWITCH-OPERATOR. OTTO MAKI and KAAL ARLIN, Palmer, Mass. Filed Apr. 7, 1921. Serial No. 459,460. 3 Claims. (Cl. 246—323.)



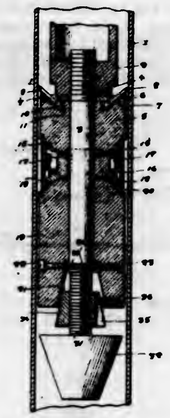
1. A switch operating mechanism comprising a pair of bent levers adapted to be pivotally connected beneath the front platform of a car, each of said levers having a vertical arm extending below the platform and supporting a switch point operating shoe at its terminal, a foot pedal for depressing said shoe to its operative position and resilient means for maintaining said shoes in their raised, normally inoperative position.

1,392,189. COMB CLEANER AND DISINFECTOR. HAYATO MAKIE, New York, N. Y. Filed Sept. 14, 1920. Serial No. 410,347. 6 Claims. (Cl. 15—25.)



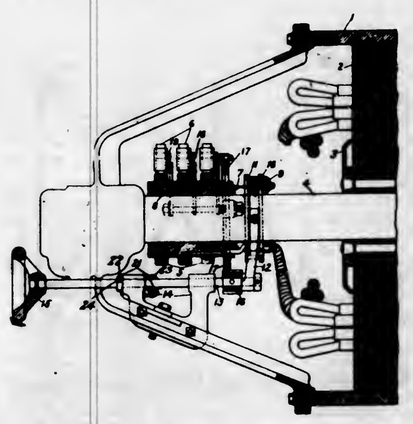
1. A comb cleaner and disinfector comprising a casing, a comb holder rotatably mounted in said casing, a cleaning medium rotatably mounted in said casing and adapted to remove foreign matter from and disinfect combs carried by the comb holder, and means for imparting rotation to the comb holder and the cleaning medium.

1,392,190. WINDSHIELD-CLEANER. BESHARA I. MALOUF, Salt Lake City, Utah. Filed Aug. 11, 1920. Serial No. 402,769. 5 Claims. (Cl. 15—59.)



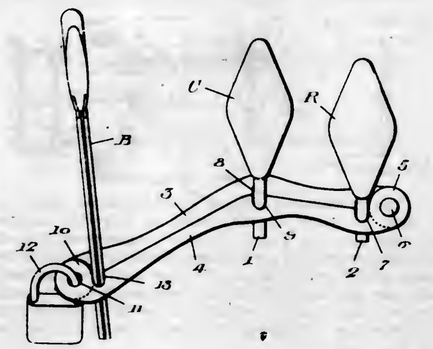
1. A wind shield cleaner including a U-shaped clip adapted to straddle an edge portion of the wind shield and to slide thereon, a wiper element, and a spring arm carrying the wiper element, said spring arm being formed with a looped portion which has a quickly detachable spring acting interlocking connection with the clip.

1,392,191. COMBINED WRITING-DESK AND CABINET. VADAKKATH RAMUNNI MENON, Singapore, Straits Settlements. Filed Apr. 3, 1920. Serial No. 371,055. 1 Claim. (Cl. 45—6.)



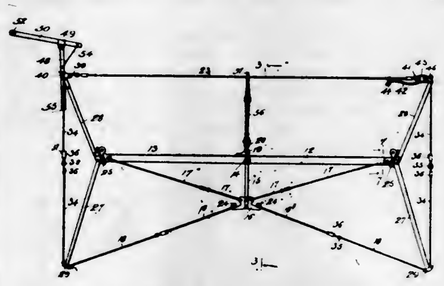
A device of the class described comprising a pair of spaced uprights provided with a plurality of alined slots, rectangular plates secured to said uprights, provided with longitudinal slots in alinement with the slots in said uprights and having a plurality of transverse grooves formed in the outer face thereof, a cabinet, flanges formed on a rear wall of said cabinet and provided with openings, T-shaped bolts extending through said openings and slots aforesaid and provided with serrated inner faces engaging the transverse grooves of said plates, thumb nuts mounted on said bolts and engaging said flanges, a cover hingedly connected to the top wall of said cabinet, a notched plate secured to the inner face of said cover, a hinge pivotally secured to one wall of said cabinet, and a prop secured to said hinge and adapted to engage the notched plate secured to said cover.

1,392,192. PIPE-CUTTER. GEORGE W. MILLER, Mansfield, Mo. Filed June 22, 1920. Serial No. 390,932. 6 Claims. (Cl. 81—194.)



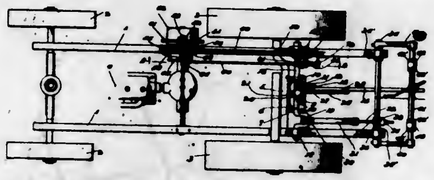
1. In a cutting device for well casings, a body carrying laterally disposed cutters, and a head, means carried by the latter for engaging with the casing to hold the head against turning, latching means for said holding means, releasing means for said holding means, means for revolving the body, means for advancing the cutters to their work with the turning of the body, and means for normally holding the cutters against such advancement.

1,392,193. SHORT-CIRCUITING AND BRUSH-LIFTING DEVICE FOR DYNAMO-ELECTRIC MACHINES. CHESTER B. MILLS, East McKeesport, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 9, 1918. Serial No. 227,416. 4 Claims. (Cl. 172—120.)



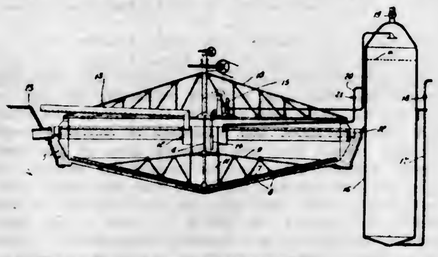
1. In a dynamo-electric machine, the combination with a plurality of collector rings, and current-collecting devices in engagement therewith, each of said devices being provided with a projection, of a semi-annular ring member provided with a cam-shape surface mounted adjacent each of said devices so as to engage said projection, all of said ring members being connected into a unitary structure, and means for rotating said structure.

1,392,194. AUTOMOBILE-LOCK. JAMES FRANKLIN MILLS, Uvalda, Ga. Filed Apr. 17, 1919, Serial No. 290,730. Renewed Apr. 26, 1921. Serial No. 464,537. 1 Claim. (Cl. 70—126.)



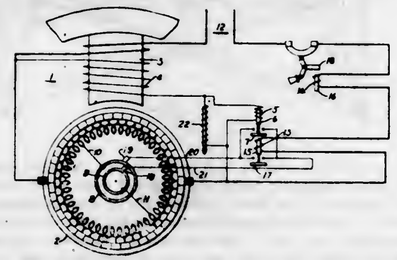
An automobile locking device for retaining a brake, and high speed lever in forward high speed position, a reverse pedal lever in forward reverse position and a clutch pedal lever in rear open position, comprising a pair of arms each being of obtuse angled form, one arm to extend across said levers in front thereof and the other to extend across the levers in rear thereof, said arms being adapted to fit snugly together, the rear arm within the angle of the forward arm, each arm being provided with ears at its opposite ends extending toward the other arm, a pivot connecting the ears at one end in overlapping relation, the ears at the other end being apertured, and a padlock to engage through the last named ears, the adjacent sides of the arms having complementary notches immediately adjacent to said ears for receiving the brake and high speed lever and reverse pedal lever with the ears adjacent to said levers, the forward arm having a recess at the angle thereof, and the rear arm having a complementary recess at the elbow thereof for receiving the clutch pedal lever.

1,392,195. FOLDABLE COT. GEORGES MISSOGENIS, Edgewater, N. J., assignor, by mesne assignments, to Plato Guimes, Palisade, N. J. Filed Aug. 6, 1918, Serial No. 248,543. Renewed Aug. 24, 1921. Serial No. 494,922. 1 Claim. (Cl. 5—5.)



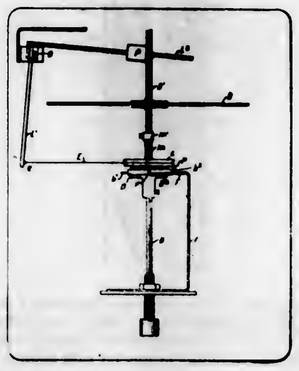
In a foldable cot or bed structure, a foldable head rest frame including vertically disposed arms, and means for supporting the same, horizontally disposed members pivotally connected to said vertical arms, rods detachably connecting one end of said horizontal members to said vertical arms, and a rod pivotally connected to the free end of one of said members and having detachable connection with the free end of the other of said members.

1,392,196. PLOW-LIFTING MECHANISM. ALEXANDER MITCHELL, Pueblo, Colo., assignor to The Alex Mitchell Motor Plow Company, a Corporation of Colorado. Filed Feb. 24, 1920. Serial No. 360,747. 9 Claims. (Cl. 97—30.)



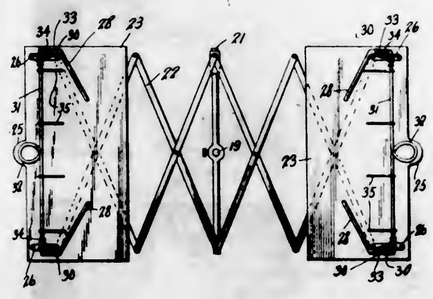
1. The combination with a wheel-supported frame, of a plow, a motor on the frame, a rotatable member mounted upon the frame, operative connections between said member and the plow, means driven by the motor for rotating said member in one direction, and means movable with said last-mentioned means for interrupting the rotation of said member whereby a partial rotation will raise the plow and further rotation in the same direction will lower the plow.

1,392,197. SEWAGE TREATMENT. HOWARD WALL MORGAN, North Tarrytown, N. Y., assignor to The Dorr Company, a Corporation of Delaware. Filed Nov. 10, 1920. Serial No. 423,009. 7 Claims. (Cl. 210—2.)



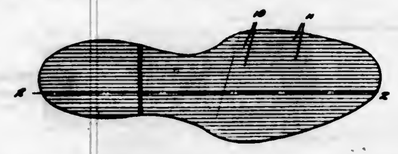
1. The method of treating sewage which comprises, subjecting the sewage to sedimentation and decantation in an appropriate basin having a sludge discharge outlet in communication with the bottom thereof, mechanically working material settling on the bottom of said basin toward said outlet, withdrawing settled material through said outlet in the form of sludge, and supplying such withdrawn sludge to a relatively deep body of similarly obtained sludge undergoing biological digestion.

1,392,198. PROTECTIVE APPARATUS FOR DYNAMO-ELECTRIC MACHINES. CHARLES MCL. MOSS, Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed June 29, 1918. Serial No. 242,623. Renewed Nov. 23, 1920. Serial No. 426,106. 15 Claims. (Cl. 171—228.)



1. The combination with a dynamo-electric machine of the commutator type, of means for interconnecting a plurality of points of different potentials in the armature winding thereof, upon an abnormal change in the field flux of said dynamo-electric machine.

1,392,199. ELECTRICAL MEASURING INSTRUMENT. ALFREDO MURATORI, Rome, Italy, assignor to The British Westinghouse Electric and Manufacturing Company Limited, a Corporation of Great Britain. Filed Dec. 9, 1916. Serial No. 136,061. 7 Claims. (Cl. 171—34.)

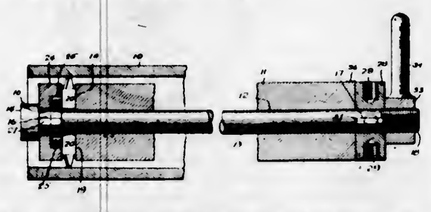


1. In an excess-demand meter, the combination with a rotatable member, of a single weighted bell-crank lever, a pulley loosely mounted on the rotatable member, means for connecting the lever to the pulley, and means for recurrently connecting the pulley to the rotatable member.

1,392,200. BOOK-HOLDER. JOHN A. NAKONEY, Marysville, Mich. Filed Jan. 11, 1921. Serial No. 436,476. 3 Claims. (Cl. 45—82.)

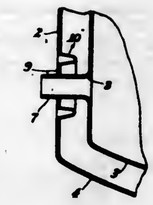
2. A device of the character described comprising a supporting standard, an elongatable book support proper carried by said standard, clamping means carried by said book support engageable with the covers of a book disposed thereon, and clamping means engageable with the exposed pages of the book when the latter is in open position, said last named clamping means being operable independently of the first named clamping means, and both clamping means being simultaneously released when the first named clamping means is released.

1,392,201. COMPOSITE BOOT AND SHOE SOLE. ABLE D. NEARON, Muncie, Ind. Filed July 21, 1919. Serial No. 312,199. 1 Claim. (Cl. 36—30.)



A composite sole for shoes composed of longitudinally disposed alternating strips of rubber and textile material, the strips being united by vulcanizing and set on edge and continuous from end to end and extending from edge to edge of the sole.

1,392,202. FLUE-CLEANER. WENCIL NECHVILLE, Cedar Rapids, Iowa. Filed Mar. 26, 1920. Serial No. 368,924. 3 Claims. (Cl. 15—41.)



1. A flue cleaner, including a pair of arms hingedly secured together adjacent one of their ends, a pair of yoke links pivotally secured together at one of their ends and being pivotally attached to the inner faces of said arms, and a spring extending between the point of pivotal connection of said yoke links one to the other, and having its opposite end secured to said arms at their point of hinged connection, one with the other, and flue cleaning means secured to the outer ends of said arms.

1,392,203. ADJUSTABLE BORING-TOOL. OLOF NELSON, Belmont, Mass. Filed Aug. 7, 1919. Serial No. 315,998. 3 Claims. (Cl. 10—142.) (Filed under act of Mar. 3, 1883, 22 Stat. L., 625.)

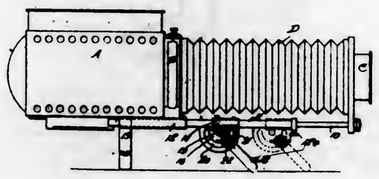
3. A boring tool, including a hollow bar, a cutting tool mounted for radial movement in one end of the bar, a shaft extending through the bar, a cam secured to one end of the shaft and engaging the cutting tool for adjusting it by the rotary movement of the shaft, a collar secured to the other end of the shaft, an indicator on the bar and graduations on the collar to indicate the angular displacement of the collar and shaft.

1,392,204. OUTLET FOR JACKETED VESSELS. EDGAR B. NICHOLS, Rochester, N. Y., assignor to the Pfaudler Company, Rochester, N. Y. Filed Dec. 30, 1920. Serial No. 434,068. 3 Claims. (Cl. 220—14.)

1. An outlet for jacketed vessels comprising a nipple extending from the vessel; an annular collar on said nipple, and a ring of substantially U-shaped cross-section, the inner edge of the ring being welded to said collar and the outer edge of the ring being welded to the jacket of the vessel.

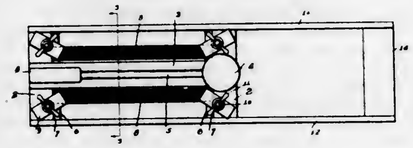
1,392,205. SIGHT-FEED DEVICE. OSCAR CARL NORTON, Roodhouse, Ill. Filed May 7, 1920. Serial No. 379,605. 3 Claims. (Cl. 123—25.)

1. In a sight feed device, the combination with a body provided with upper and lower spaced branches having valve seats, upper and lower needle valves threaded longitudinally into said branches and engaging the valve seats of the same, said body being provided with inlet means in communication with said upper branch and with discharge means in communication with said lower branch, said lower branch being provided with an open bowl extending below said lower needle valve and the valve seat of the same, the space between said upper and lower branches being entirely unobstructed to permit a priming fluid to be introduced into said bowl.



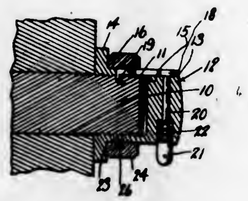
1,392,206. STAKE. ERIK OLSON, Great Falls, Mont. Filed Jan. 22, 1921. Serial No. 439,145. 1 Claim. (Cl. 280—147.)

A stake, a metal ferrule encircling the lower end of the stake, said stake having a tapering recess therein, an extension on the ferrule concealing said recess, a spring strip



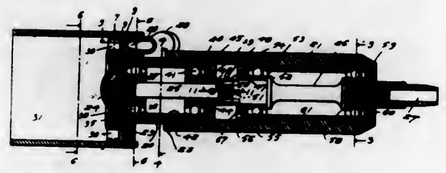
located in the recess and having its upper end secured to the inner face of the extension, said strip terminating in an integral locking dog located below the ferrule and engageable under the lower end of a stake pocket to prevent accidental withdrawal of a stake therefrom.

1,392,207. PROJECTION APPARATUS. HARVEY N. OTT, Buffalo, N. Y., assignor to Spencer Lens Company, Buffalo, N. Y. Filed Aug. 11, 1920. Serial No. 402,850. 10 Claims. (Cl. 88—24.)



4. In projection apparatus, the combination with a lamp box, a projection objective, and extensible members connecting said projection objective and said lamp box, of a support for one end of the apparatus, said support comprising sleeves surrounding said extensible members and supporting legs angularly adjustable relatively thereto.

1,392,208. BEARING-DRESSING DEVICE. CHARLES S. OVERMAN, Detroit, Mich. Filed Aug. 14, 1920. Serial No. 403,540. 3 Claims. (Cl. 29—80.)

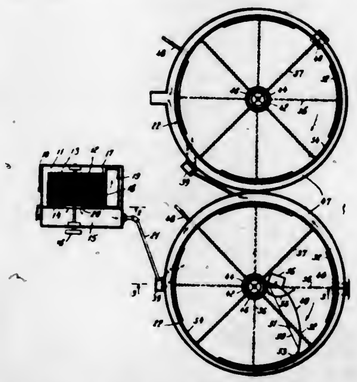


1. A device of the class described comprising a frame consisting of a pair of cross pieces and a longitudinally extending connecting piece, a file on each side of said connecting piece and means for clamping the files to the cross pieces.

1,392,209. NUT-LOCK. STEPHEN PAJEWSKI, Natrona, Pa. Filed Feb. 23, 1921. Serial No. 447,117. 2 Claims. (Cl. 151—6.)

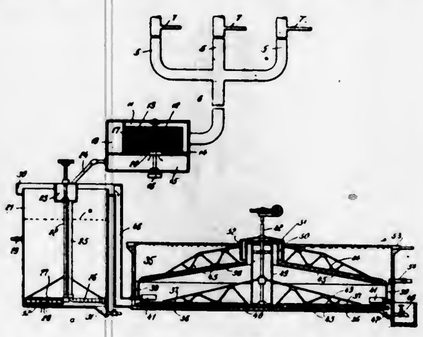
1. The combination with a bolt having an opening therein, of a nut threaded thereon, a dog carried by and movable transversely of the nut for removable engagement in said opening, said dog operating in an elongated longitudinally disposed opening provided in the nut, whereby said dog may be engaged in the bolt opening and movable means for holding the dog in engaged position.

1,392,210. HIGH-SPEED SPINDLE. JOHN W. PARKER, Detroit, Mich. Filed May 5, 1920. Serial No. 379,118. 8 Claims. (Cl. 253—3.)



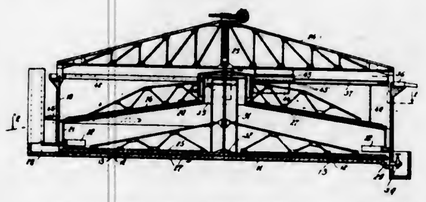
1. A high speed spindle having a casing consisting of terminally telescoping tubular body and sleeve members, of which the former is provided with a head, an exhaust tube or cylinder carried by said head, a propeller having a drive shaft mounted in bearings in the body member of the casing and provided with peripheral blades or buckets, and a fluid pressure nozzle attached to said head, the latter being provided with a plurality of tapered jet passages for directing the fluid pressure upon the blades or buckets of the propeller.

1,392,211. PROCESS OF SEWAGE TREATMENT. CHARLES LEE PECK, New York, N. Y., assignor to The Dorr Company, a Corporation of Delaware. Filed Mar. 27, 1920. Serial No. 369,201. 16 Claims. (Cl. 71—8.)



5. The method of treating sewage and simultaneously fixing atmospheric nitrogen and absorbing the products of fixation in the sewage which comprises subjecting the sewage to the action of an organism favorable to the clarification of the sewage and simultaneously forcing air through the sewage in the presence of a compound of iron.

1,392,212. TREATMENT OF SEWAGE. CHARLES LEE PECK, New York, N. Y., assignor to The Dorr Company, a Corporation of Delaware. Filed Mar. 27, 1920. Serial No. 369,202. 19 Claims. (Cl. 210—2.)

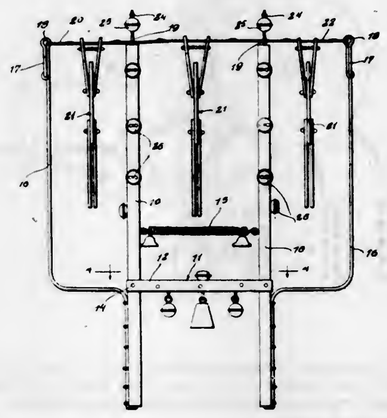


1. The method of treating sewage and similar liquors containing nitrogen-rich and nitrogen-poor solid matters, which comprises comminuting the nitrogen-rich solid matter contained in the liquor into particles of a smaller size than the nitrogen-poor solid matter, subjecting the liquor to a screening operation in the course of which the bulk of the liquor together with the major part of the nitrogen-rich solid matter passes through the screen, removing from the liquor during the screening operation solid matter poor in nitrogen, and subjecting the screened liquor containing the comminuted nitrogen-rich solid matter to biological clarification.

1,392,213. TREATMENT OF SEWAGE. CHARLES LEE PECK, New York, N. Y., assignor to The Dorr Company, a Corporation of Delaware. Filed July 31, 1920. Serial No. 400,480. 27 Claims. (Cl. 210—2.)

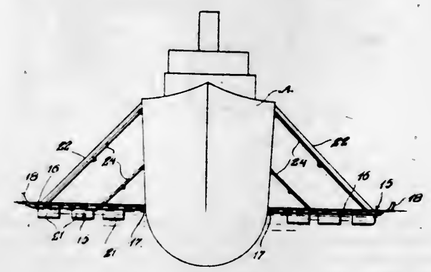
1. The method of treating sewage which comprises subjecting the sewage to biological action in the presence of biological growths favorable to the clarification of the sewage, adjusting the hydroxyl-ion concentration of the sewage to a value between about 1×10^{-3} and 1×10^{-4} and maintaining within the sewage a favorable environment for such biological action by introducing into the sewage undergoing treatment one or more agents conducive to the development of said favorable environment.

1,392,214. APPARATUS FOR TREATING SEWAGE. CHARLES LEE PECK, New York, N. Y., assignor to The Dorr Company, New York, N. Y., a Corporation of Delaware. Filed Oct. 14, 1920. Serial No. 416,872. 31 Claims. (Cl. 210—8.)



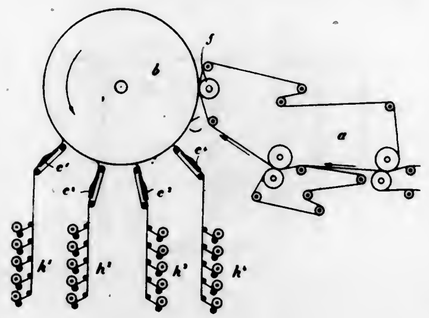
1. An apparatus of the character described, comprising a receptacle divided by a transverse tray into a lower chamber and a superposed settling chamber, said tray having openings near its periphery by which communication is provided between the two chambers, and a positively actuated mechanical mechanism operatively mounted in proximity to the upper surface of said tray for working material settling on the tray toward the periphery thereof.

1,392,215. GAGE. HENRI CIPRIEN PELAMORGUE, Grand Montrouge, France, assignor of one-half to Morton B. Connelly, Philadelphia, Pa. Filed Oct. 19, 1920. Serial No. 418,126. 5 Claims. (Cl. 33—147.)



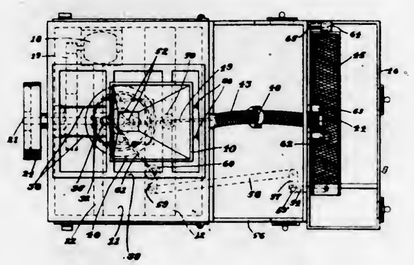
1. A gage comprising a bed, spaced ears upstanding from the bed, a roller positioned in parallelism with the bed and adapted to rotate on an eccentric journal, and a scale embodying means to register the point at which the rotation of the roller is interrupted.

1,392,216. MOVING AND SOUNDING TOY. GUIDO PITONI, Rochester, N. Y. Filed May 29, 1920, Serial No. 385,254. Renewed Aug. 5, 1921. Serial No. 490,108. 2 Claims. (Cl. 46—40.)



1. A toy comprising spaced substantially parallel relatively movable arms, a spacing bar, means for pivotally connecting the arms to the bar, spring arms carried by and spaced from the movable arms, a spring connecting said movable arms, a flexible element connecting both the movable and spring arms and jointed figures carried by the flexible element.

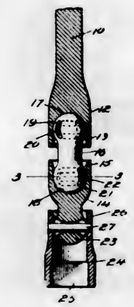
1,392,217. UNSINKABLE BOAT. SALVATORE PONZIO, Syracuse, N. Y. Filed Mar. 1, 1920. Serial No. 362,254. 1 Claim. (Cl. 114—68.)



In combination with the hull of a ship, a buoying device comprising a plurality of frames pivoted upon the hull adjacent the water line, a plurality of floats carried by each frame, windlasses mounted upon the deck of the ship, flexible members trained about said windlasses and connected with said frames whereby said frames may be elevated, and a plurality of diagonally disposed brace bars pivotally connected with the hull of the ship near the deck line and pivotally connected with the frame, each of said brace bars being jointed intermediate its ends by means of a rule joint, the function of said brace bars being to hold said frame in substantially horizontal position when in use.

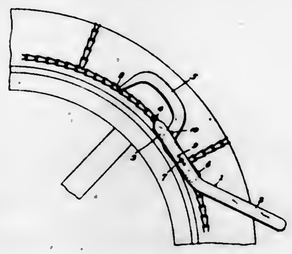
1,392,218. MACHINE FOR PRODUCING NARROW PAPER STRIPS. FRIEDRICH PAUL PRIEM, Heidenheim, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc., a Corporation of Delaware. Filed Apr. 15, 1919. Serial No. 290,362. 6 Claims. (Cl. 92—39.)

1. Machine for producing narrower paper strips comprising the combination of strip producing means and folding means for longitudinally folding the strips produced by the first named means.



1,392,219. MILL FOR GRINDING GRAIN. THOMAS PROKOPOWICZ, St. Louis, Mo. Filed June 20, 1919. Serial No. 305,587. 1 Claim. (Cl. 83—7.)

In a mill for grinding grain of the character described, the combination of a movable hopper having a downwardly extending projection with a rigid casing, a grinding wheel in said casing having a plurality of conical openings in its bottom element, a rim forming an annular space in said wheel upon said openings and a plurality of inwardly extending vertical lugs adapted to make contact with said projection during the rotation of said wheel, substantially as described and for the purpose set forth.

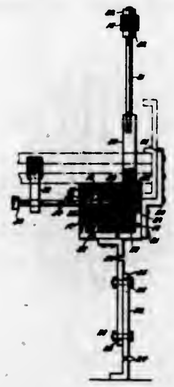


1,392,220. SOCKET-WRENCH. MICHAEL QUINT, Hays, Kans. Filed Dec. 17, 1920. Serial No. 431,450. 1 Claim. (Cl. 81—121.)

An implement of the class described comprising a stock member having a semi-globular socket in one end, a nut engaging portion having a semi-globular socket in one end, pins extending respectively through the sockets, and a link member having semi-globular terminals engaging in said sockets, said link member having transverse slots

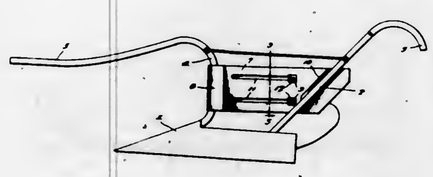
at reverse angles to the longitudinal axis of the link and through which the pins extend.

1,392,221. CHAIN-TIGHTENER. PETER MILLER QUINT, Hays, Kans. Filed May 10, 1921. Serial No. 468,459. 2 Claims. (Cl. 254—78.)



1. A chain tightener comprising an obtuse angled bar and a U-shaped bar, the latter having a substantially right angled longitudinal extension at the end of one arm, said extension and the front portion of the obtuse angled bar being pivotally connected intermediate their ends, said arm and the free end of the other arm of the U-shaped bar having opposed hooks at their terminals, and a stop on one of said members for engagement with the other to lock them at a predetermined point.

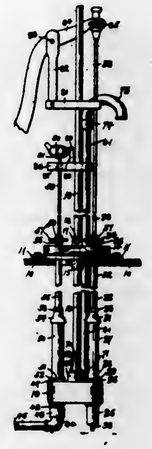
1,392,222. CLAMPING ATTACHMENT FOR NAILING-MACHINES. RUDOLPH C. RASMUSSEN, Philadelphia, Pa. Filed Oct. 31, 1919. Serial No. 334,647. 1 Claim. (Cl. 1—15.)



A clamping attachment for nailing machines comprising a rectangular casing equipped for attachment to a stationary part of the machine, a slidable block in said housing and having an inclined face, said slidable block having an element extending through a wall of the casing and being adapted for movement in opposition to compression means for clamping the part to be nailed in proper position, the said compression means interposed between the block and said wall of the casing and a depending plunger adapted to be attached

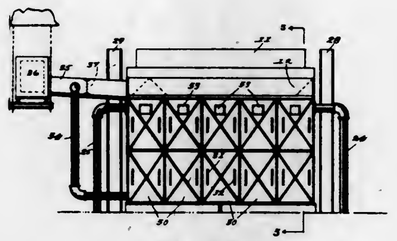
to and carried by the driving head and having an inclined portion at its lower part for coöperation with the

aforesaid inclined face of the movable member to actuate the latter in advance of an actual nailing operation.



1,392,223. FENDER. JAMES A. RINGLE, Hoxie, Ark. Filed Dec. 13, 1920. Serial No. 430,400. 1 Claim. (Cl. 97—18.)

A fender for plows, for the purpose set forth, comprising two plates arranged in contacting relation, the outer plate having one of its ends rounded upon itself to provide a lip to engage with a portion of the plow, said outer member having spaced inwardly projecting threaded elements, the innner member having one of its ends bent upon itself to provide an angle lip to engage with a part of the plow, said inner member having elongated slots through which the threaded elements pass, and nuts on said threaded elements contacting the inner member and binding the same against the outer member.

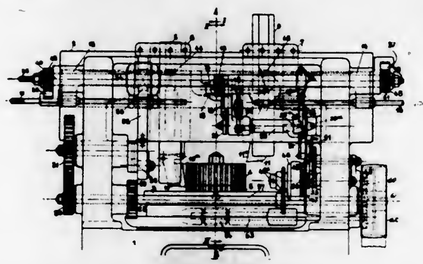


1,392,224. PUMP-OPERATNG APPARATUS. DOMINICK ROHEN, Evart, Mich. Filed Jan. 13, 1921. Serial No. 436,942. 5 Claims. (Cl. 103—79.)

3. In an apparatus of the class described, a casing adapted to be connected to a pump device, a tubular pump rod guide detachably connected to said casing, a discharge conductor leading from said casing, a tubular guide for a cutoff rod detachably coupled to said casing, a support having a plurality of relatively large openings through which the discharge conductor and the tubular guides extend, and means operative on said sup

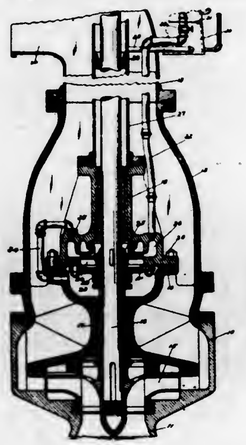
port for detachably clamping said guide devices to the support.

1,392,225. CHARCOAL DRIER AND CLEANER. THOMAS SAROCKIN and JOHN MAGIELDA, Crockett, Calif. Filed May 3, 1920. Serial No. 378,617. 20 Claims. (Cl. 34—34.)



1. An apparatus for treating charcoal of the character described comprising a tower, consisting of three superposed floors, a preliminary drying chamber on the upper floor, heating retorts and a fire box in the central floor, and cleaning, cooling and delivery means on the ground floor, means for regulating the draft, means for visibly indicating the degree of the draft regulation, means for supplying charcoal to said tower, and means for supplying fuel to the same.

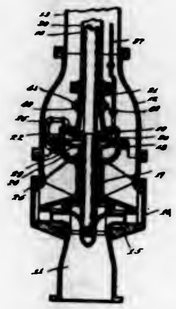
1,392,226. GEAR-SLOTTING MACHINE. OTTO SCHAEBER, Basel, Switzerland. Filed June 29, 1920. Serial No. 392,675. 6 Claims. (Cl. 90—8.)



2. In a gear slottting machine, the combination of a rotary table adapted to hold the blank coaxially to the table, two tool rams arranged diametrically opposite each other with regard to the axis of the blank, a driving shaft, means to convert the rotary motion of the driving shaft into a reciprocating motion of the tool rams and to actuate same alternately so that one ram is

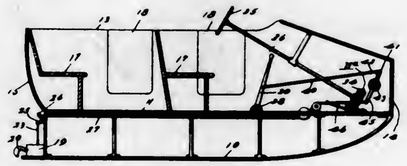
performing its working stroke while the other is performing its return stroke whereby a uniform consumption

of power is atttained, and a feed mechanism for imparting to each tool ram a uniform feed motion in a radial direction with regard to the blank.



1,392,227. DEEP-WELL-PUMP-LUBRICATION SYSTEM. VICTOR SCHLEYER, Anderson, Ind., assignor to Midwest Engine Company, Indianapolis, Ind., a Corporation of Indiana. Filed Oct. 30, 1920. Serial No. 420,694. 9 Claims. (Cl. 253—199.)

1. In a deep-well pump, the combination of a shaft extending down into the well, a rotary pump in the well and having a runner connected to said shaft, a water-discharge pipe extending up from said pump around said shaft, a main pump bearing above the runner on said shaft, a lubricant-pump having a runner above said main pump bearing, a lubricant-conducting pipe surrounding said shaft and extending upward from the inlet of said lubricant pump, and a connection from the discharge of said lubricant pump to said main bearing.

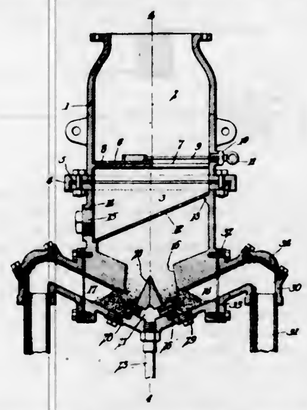


1,392,228. SELF-MAINTAINING LUBRICATING SYSTEM FOR DEEP-WELL PUMPS. VICTOR SCHLEYER, Anderson, Ind., assignor to Midwest Engine Company, Indianapolis, Ind., a Corporation of Indiana. Filed Nov. 8, 1920. Serial No. 422,493. 12 Claims. (Cl. 253—199.)

1. In a deep-well pump, the combination of a shaft extending down into the well, a rotary pump in the well and having a runner connected to said shaft, a water-discharge pipe extending up from said pump around said shaft, a lubricant pump also located in the well and having a runner connected to said shaft, a lubricant-conducting pipe surrounding said shaft and extending upward from the inlet of said lubricant pump, a tank connected to the upper end of said lubricant-conducting

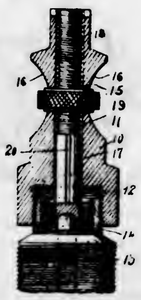
pipe, a second lubricant-conducting pipe extending upward from the discharge of said lubricant-pump to said tank, said tank being arranged to provide a serpentine course between said two pipes to permit settling from the lubricant of any sand and dirt carried thereby, and a water-admission conduit provided with a filter and connecting the inlet of said lubricant pump with the water in the well.

1,392,229. SLEIGH-BRAKE. MARTIN WILHELM SEIFERT, Murray, Utah. Filed May 8, 1920. Serial No. 379,861. 4 Claims. (Cl. 188—8.)



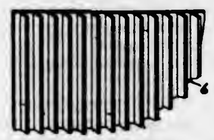
1. The combination with a sleigh, of shoes pivotally mounted upon each of the runners and normally disposed above the lower surface thereof, toothed segments mounted upon each side of the center of the sleigh and flexibly connected with the shoes, a manually operated gear engaging both segments to depress the shoes independently to provide a steering mechanism, means connected to the steering mechanism to depress the shoes simultaneously to provide a braking mechanism and means for normally holding the shoes in elevated position.

1,392,230. TRACK-SANDER. HOWARD M. SHADE, Conemaugh, Pa. Filed Mar. 7, 1921. Serial No. 450,212. 2 Claims. (Cl. 291—5.)



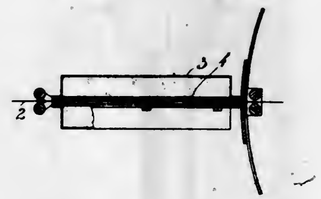
2. A device of the class described comprising a bracket having a discharge opening in its bottom, a deflector extending into said opening, said bottom having three outlet ports therein communicating with the opening and the deflector having a T-shaped port therein and an L-shaped port therein, a pair of nozzles adjustably mounted in the T-shaped port, a nozzle adjustably

mounted in the L-shaped port, said nozzles being arranged to discharge into the three ports above mentioned,



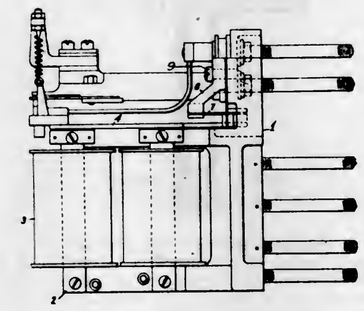
means for supplying compressed air to the T and L-shaped ports and delivery pipes connected with the three ports above mentioned.

1,392,231. TIRE-DEFLATOR. MASAO SHIMADA, Kahului, Hawaii. Filed Oct. 7, 1920. Serial No. 415,350. 1 Claim. (Cl. 152—12.)



A device of the class described comprising a body having a longitudinal bore and a transverse opening, a threaded rod movable in said bore and adapted to engage a valve stem, and a nut engaging said threaded rod and operative through said opening.

1,392,232. SECONDARY OR STORAGE BATTERY. EDWARD WANTON SMITH, Philadelphia, Pa. Filed Sept. 4, 1915, Serial No. 49,005. Renewed July 15, 1921. Serial No. 485,036. 6 Claims. (Cl. 204—29.)

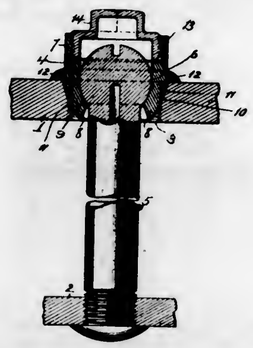


1. A separator consisting of the combination of wood and a gelatinous substance filling the interstices of the wood and adapted to protect the same from destructive action.

1,392,233. FILM-FIRE EXTINGUISHER. ERICH STROHBACH, Vienna, Austria. Filed Aug. 1, 1914. Serial No. 854,600. 4 Claims. (Cl. 169—2.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

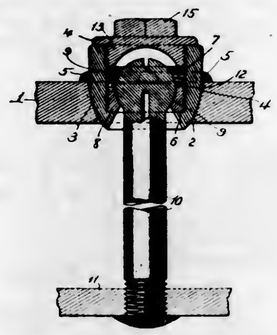
1. An apparatus for use in preventing flames from spreading along celluloid films or the like, comprising a substance adapted to liberate inert gases upon being heated by the combustion of a film to suppress combustion, and a good heat conductor at one side of said substance, so that the apparatus may be located with the heat conductor between said substance and the film, said conductor being adapted to extract heat from said film and transmit it to said substance.

1,392,234. PIVOTAL MOUNTING. ALLEN A. TIRRILL, Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 11, 1917. Serial No. 185,793. 8 Claims. (Cl. 175—336.)



8. In an electromagnet, the combination with an armature, of a pivotal mounting therefor comprising plate springs arranged with their planes intersecting each other and each having one end attached to the armature, and a frame to which the other ends of the springs are attached.

1,392,235. STAYBOLT STRUCTURE. BENJAMIN E. D. STAFFORD and ETHAN I. DODDS, Pittsburgh, Pa., assignors to Flannery Bolt Company, Pittsburgh, Pa. Filed Sept. 10, 1919. Serial No. 322,879. 1 Claim. (Cl. 85—1.5.)

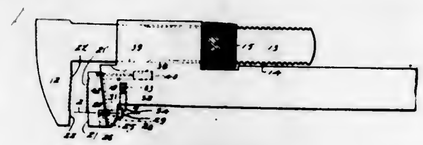


In a staybolt structure, the combination of a boiler sheet having an opening, a part of the wall of which is reamed forming an enlarged tapering portion, a bearing sleeve having a tapering portion entering said opening and bearing on the enlarged tapering portion thereof, the inner end of said bearing sleeve terminating in the contracted inner end portion of the opening in the boiler sheet and the outer part of said bearing sleeve projecting outwardly beyond

the outer face of the boiler sheet, a staybolt having a head mounted in said bearing sleeve, and a weld surrounding

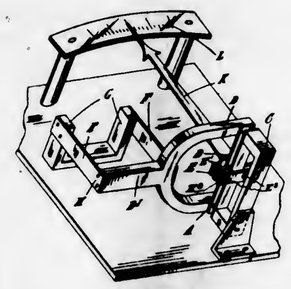
the outwardly projecting part of the bearing sleeve and uniting the latter to the boiler sheet.

1,392,236. STAYBOLT STRUCTURE. BENJAMIN E. D. STAFFORD and ETHAN I. DODDS, Pittsburgh, Pa., assignors to Flannery Bolt Company, Pittsburgh, Pa. Filed Sept. 12, 1919. Serial No. 323,364. 2 Claims. (Cl. 85—1.5.)



1. In a staybolt structure, the combination with a boiler sheet having an opening, of a bearing sleeve having a threaded interior portion and an internal shoulder near its lower end, a bearing ring located in said bearing sleeve over said internal shoulder and threaded to mesh with the threads in the sleeve, said ring having a seat for the head of a staybolt, a staybolt, having a head seated on said bearing ring, and means closing the outer end of said sleeve.

1,392,237. GARMENT SUPPORTER. MARY STARMER, Newport News, Va. Filed July 8, 1920. Serial No. 394,618. 3 Claims. (Cl. 24—188.)



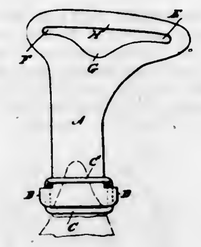
1. The combination with an adjusting buckle having a rear bar formed with spurs and upper and lower front bars forming a loop, of a web slidable in said loop with its extremity passed around said rear bar and punctured by said spurs, retaining prongs on the front bars to engage the web, and a locking lever on said front bars.

1,392,238. WRENCH. CHARLES C. STEWART, Stoddard, Ariz. Filed May 5, 1920. Serial No. 379,115. 3 Claims. (Cl. 81—177.)

1. In a device of the class described, a stationary jaw, a movable jaw, a working block slidable along the face of the stationary jaw, and having tongue and groove connection therewith, said block having an opening therein and a slot communicating with the opening, a stop pin passing through the stationary jaw and entering said opening, said pin having a reduced end portion, the reduced portion coöperating with the opening and slot and being adapted to retain the block against slidable movement and at times to permit of limited slidable movement, and a key for retaining said pin in position to perform either of said functions.

1,392,239. MEANS FOR PRODUCING MAGNIFICATIONS OF MINUTE MOVEMENTS. JAMES GIBB STEWART, Dundee, Scotland. Filed Apr. 2, 1920. Serial No. 370,840. 4 Claims. (Cl. 33—172.)

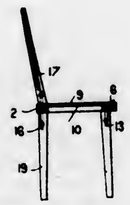
1. An instrument consisting of two flexible members each narrow in comparison with its length and thin according to the flexibility required, arranged opposite one another with their longitudinal axes contained in a plane normal or approximately so to their surfaces, a connector by which the two flexible members are rigidly connected together at a position between their ends, a stationary support to which the ends of one member are fixed, a movable frame to which the ends of the other member are fixed, a lateral guide for the movable frame, and means to which the angular movements of the connector are imparted, for the purposes set forth.



1,392,240. RUBBER COMPOSITION AND METHOD OF MAKING THE SAME. NICOLAS WALCH, Newton Highlands, Mass., assignor to Erwa Chemical Manufacturing Company, Needham, Mass., a Corporation of Massachusetts. Filed Mar. 30, 1918. Serial No. 225,656. 14 Claims. (Cl. 106—23.)

1. A composition composed essentially of rubber and celluloid.

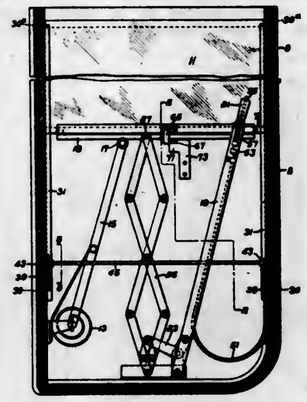
1,392,241. TROUSERS-SUPPORTER. LEONARD WOODS, St. Louis, Mo. Filed Aug. 9, 1919. Serial No. 316,393. 4 Claims. (Cl. 24—81.)



2. A device of the character described comprising a plate body having laterally projecting shoulders near the bottom end, and a rectangular lever frame having parallel

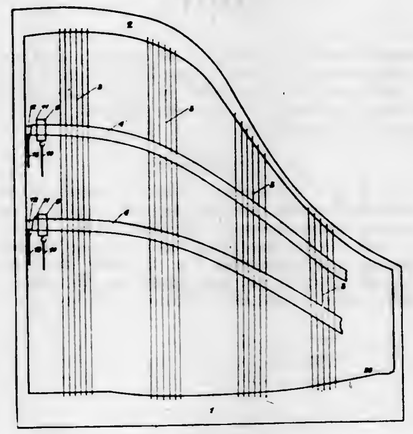
cross bars on opposite sides of said body and connecting curved lever bars adjustably fulcrumed on said shoulders so as to locate one bar adjacent to the bottom end of the body and slide it toward and away from said bottom end and the other bar adjustably mounted above the shoul-

ders on the back side of the body, and slidable to and from said shoulders, the slidable mounting of the frame on said shoulders allowing of either cross bar being used with the bottom end of the body for reversing the device, substantially as described.



1,392,242. SEPARABLE CHAIR. BERNARDO ALBERGOLI, Las Rosas, Argentina. Filed Mar. 22, 1920. Serial No. 367,976. 2 Claims. (Cl. 155—178.)

1. A demountable chair comprising in combination, a seat frame the side members of which are formed with grooves and the front member of which has its top slightly below the level of said grooves, a bar fitting on the top of said front member and having its upper face flush with the upper level of the side members, front legs each made in a single piece, a relatively short bolt securing each front leg to the seat frame, each bolt extending vertically through and having its head in engagement with the front member of the frame, said bolt also extending vertically into the upper end portion of the leg and having its screw-threaded end in engagement with a nut located in an opening in said leg, a seat comprising slats arranged transversely of said seat frame and having their ends located in said grooves, said bar covering the heads of said bolts and maintaining said slats against removal, and rear legs and a back rest secured to said seat frame.

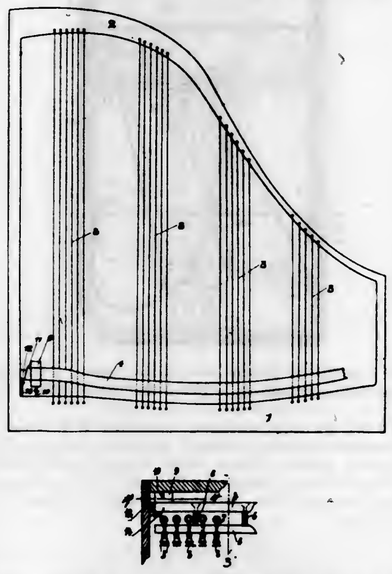


1,392,243. WINDOW CONSTRUCTION. DAVID BOURQUE, Amesbury, Mass., assignor to G. W. J. Murphy Company, Amesbury, Mass., a Corporation of Massachusetts. Filed May 29, 1918. Serial No. 237,332. 19 Claims. (Cl. 268—4.)

1. In a window construction, a light, fixed angle bars each having a flange presented to one side of the light to guide the same, angle bars having flanges connected to other flanges of said fixed bars for relative diagonal move-

ment whereby to provide spreadable channel guides and means for longitudinally shifting said latter bars.

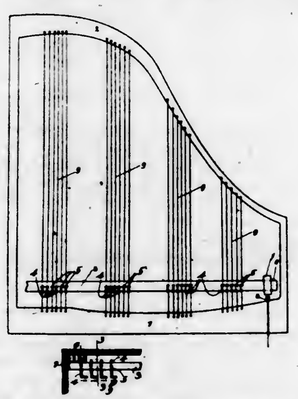
1,392,244. HARMONIC DAMPER FOR PIANOS. GEORGES CLOETENS, Brussels, Belgium, assignor of one-third to Georges Laloux, Liege, Belgium, and one-third to Louis Van Der Heyden a Hauzeur, Brussels, Belgium. Filed Jan. 19, 1920. Serial No. 352,345. 1 Claim. (Cl. 84—234.)



In a stringed musical instrument, the combination with the strings, of a plurality of pressers located to produce harmonics of the strings when moved thereagainst, a bar supporting said pressers, means located to move said bar toward said strings, and means located to move said bar longitudinally in order that the pressers may be applied only against certain of the strings in each note when said bar is moved toward said strings.

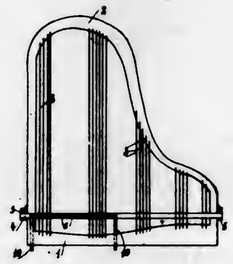
1,392,245. STRINGED MUSICAL INSTRUMENT. GEORGES CLOETENS, Brussels, Belgium, assignor of one-third to Georges Laloux, Liege, Belgium, and one-third to Louis Van Der Heyden a Hauzeur, Brussels, Belgium. Original application filed Jan. 19, 1920. Serial No. 352,345. Divided and this application filed Mar. 7, 1921. Serial No. 450,496. 3 Claims. (Cl. 84—216.)

2. A stringed musical instrument, comprising a plurality of pressers located to be applied against the strings



near the ends thereof, a support common to said pressers, and means for moving said support toward said strings.

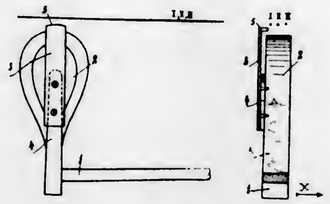
3. A stringed musical instrument, comprising a plurality of pressers located to be applied against the strings near the ends thereof, a support common to said



pressers, means for moving said support toward said strings, and means for moving said support longitudinally in order that the pressers may be applied only against certain of the strings of each note when the support is moved toward said strings.

1,392,246. STRINGED MUSICAL INSTRUMENT. GEORGES CLOETENS, Brussels, Belgium, assignor of one-third to Georges Laloux, Liege, Belgium, and one-third to Louis Van Der Heyden a Hauzeur, Brussels, Belgium. Original application filed Jan. 19, 1920, Serial No. 352,345. Divided and this application filed Mar. 7, 1921. Serial No. 450,497. 2 Claims. (Cl. 84—216.)

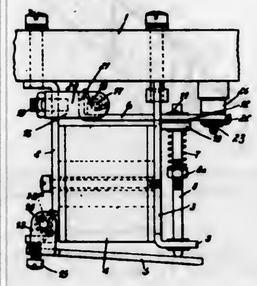
2. A stringed musical instrument played by hammers, having a bar positioned transversely above the strings in proximity to the hammer line, adjustable rods carried by said bar bent at their lower ends to form hard pieces extending transversely above the strings of the several notes, and means for moving said bar toward said strings, to position said hard pieces to be struck by said strings only when the latter vibrate.



1,392,247. PIANISSIMO DEVICE OF THE CURTAIN TYPE. GEORGES CLOETENS, Brussels, Belgium, assignor of one-third to Georges Laloux, Liege, Belgium, and one-third to Louis Van Der Heyden a Hauzeur, Brussels, Belgium. Original application filed Jan. 19, 1920, Serial No. 352,345. Divided and this application filed Mar. 7, 1921. Serial No. 450,498. 4 Claims. (Cl. 84—220.)

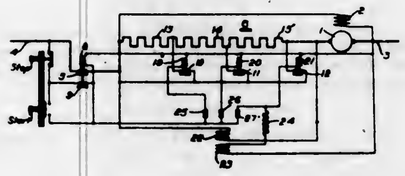
1. A stringed musical instrument played by hammers, and having a band of felt or the like supported in proximity to a side of the instrument for insertion between the strings and the hammers by a movement at right angles to the strings and in a plane substantially parallel to the plane of the strings.

4. In a stringed instrument played by hammers, two guiding ribbons stretched transversely between the hammers and the strings, reels at the ends of said ribbons and under the instrument, and bands of felt or the like led on said ribbons and reels.



1,392,248. MANDOLIN ATTACHMENT FOR PIANOS. GEORGES CLOETENS, Brussels, Belgium. Filed Mar. 7, 1921. Serial No. 450,499. 2 Claims. (Cl. 94—254.)

1. In a stringed instrument played by means of hammers means for producing the effect of plucked strings comprising hard pieces fixed on a portion of the hammers which does not strike the strings during the ordinary play, and projecting beyond the surface of the hammers, so as to strike one or more of the strings of each note when the hammers are moved laterally.

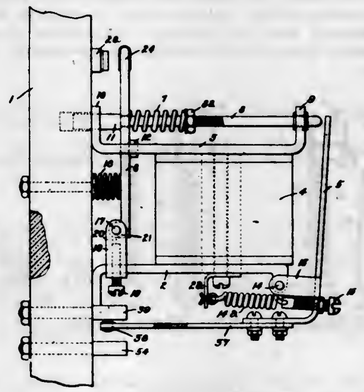


1,392,249. CURRENT-LIMIT RELAY. RAY E. DE CAMP, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 21, 1918. Serial No. 241,259. 10 Claims. (Cl. 200—94.)

2. In a switch mechanism, the combination with means for creating a magnetic field, and a plurality of armatures controlled by said field, of means for successively actuating said armatures in opposition to said magnetic

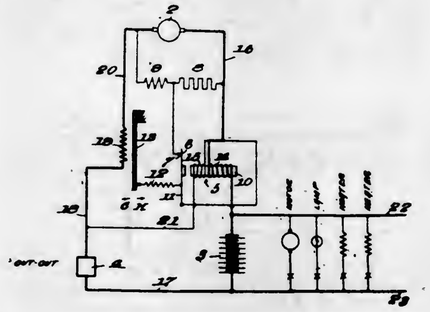
field, and means for preventing the operation of a plurality of said armatures until one of said armatures has operated.

1,392,250. CONTROL SYSTEM. RAY E. DE CAMP, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 26, 1918. Serial No. 251,429. 9 Claims. (Cl. 172—288.)



1. In a motor-control system, the combination with an electric circuit including a resistor, of a circuit comprising a switch for short-circuiting said resistor, and means for maintaining said resistor short-circuited, said means comprising a relay member for controlling said switch and a coil energized in accordance with the position of said relay member.

2. In a motor-control system, the combination with an electric circuit including a resistor, of a circuit comprising a circuit-controlling device for effecting the shunting of said resistor, an actuating coil for said device in parallel relation to said resistor, and means controlled by the closing of said device for maintaining the latter closed.



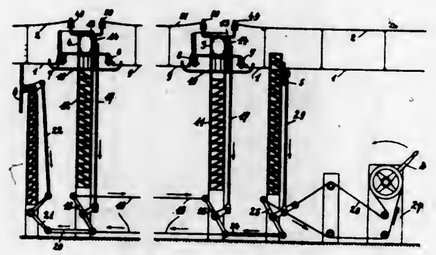
1,392,251. RELAY. RAY E. DE CAMP, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 26, 1918. Serial No. 251,430. 6 Claims. (Cl. 200—94.)

4. The combination with a switch member and a relatively weak spring tending to retain said member in its inoperative position, of a coil for retaining said member in its inoperative position so long as said coil is energized above a predetermined degree, an armature member controlled by said coil, and a relatively strong spring con-

trolled by said armature member to actuate said switch member.

1,392,252. SYSTEM OF ELECTRICAL DISTRIBUTION. JAMES KENDALL DELANO, New York, N. Y. Filed July 21, 1920. Serial No. 397,963. 9 Claims. (Cl. 171—313.)

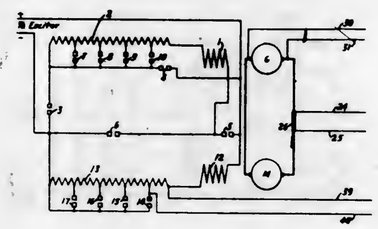
1. In a system of electrical distribution, the combination, with a generator and an adjustable automatic current regulator therefor, of thermostatic means for varying the adjustment of said regulator, and timing means operable by the regulated current to vary the time period of operation of said thermostatic means.



1,392,253. PREPARED FISH-EGGS. RAY GAMBLE and EGBERT J. SLITER, Tacoma, Wash. Filed Mar. 22, 1920. Serial No. 367,686. 2 Claims. (Cl. 99—8.)

2. A preserved fish egg having its contents partially solidified, coated with powdered lycopodium.

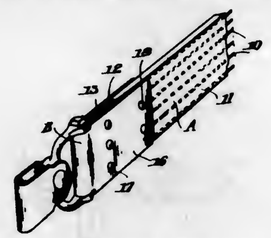
1,392,254. BLOCK-SIGNAL SYSTEM. FRITZ GRÜNIG, Thun, Switzerland. Filed Feb. 3, 1921. Serial No. 442,290. 6 Claims. (Cl. 246—4.)



1. In a signaling arrangement for preventing accidents on electrically operated rail roads where the electric locomotive is attended by one man, and in combination, two circuit breakers 13, 14, the one connected with the usual distant or advance signal 6 and the other connected with the usual home or main signal 5, an inter-

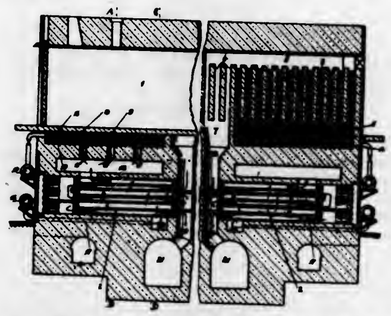
locking plant adapted to transmit motion from the usual locking frame located at the station to the circuit breakers, so as to operate the latter simultaneously with the signals, at least one danger signal actuated by a storage battery and controlled by a circuit closer both situated upon the locomotive and adapted to warn the engine driver and provided on the locomotive with

means for closing its circuit in case the locomotive has overrun the stop signal, a danger signal upon the locomotive adapted to warn the train staff of the inattention of the engine driver, a clockwork for operating the danger signal for the train staff and a hand operated circuit breaker for controlling the operating of the last said signal substantially as shown and described and for the purpose set forth.



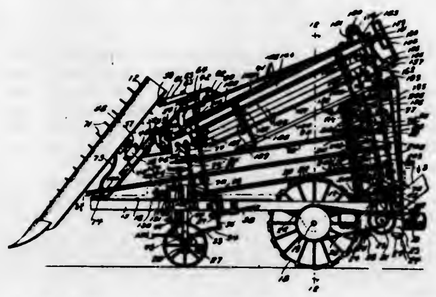
1,392,255. MOTOR-CONTROL SYSTEM. EDWIN S. LAMMERS, Jr., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 13, 1917. Serial No. 174,439. 21 Claims. (Cl. 172—288.)

1. In a motor-control system, the combination with a generator and a motor in series circuit relation, each of said dynamo-electric machines having a field-magnet winding, and a resistor in circuit with each of said field-magnet windings, of means for controlling said resistors, said means comprising a plurality of electromagnetically operable switches each of which is provided with a pair of magnet coils both of which must be energized to close the corresponding switch, and means for insuring the energization of one member of each pair of coils in a definite sequence.



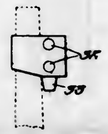
1,392,256. BELT OR STRAP. DUNCAN ALFRED MACARTHUR, Ottawa, Ontario, Canada, assignor to The Goodyear Tire & Rubber Company of Canada Limited, Toronto, Ontario, Canada. Filed July 2, 1917. Serial No. 178,312. 2 Claims. (Cl. 54—52.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

1. A belt comprising a plurality of equi-distantly spaced wires, fabric covering the said wires and vulcanized thereto, part of the fabric being cut away to form a recess at the end of the belt and expose the wires, a plate having a plurality of holes, fitting the said recess,



the free ends of the wires being passed through the holes and bent backwardly, and a fitting secured to the said plate.

1,392,257. COKE-OVEN. MAURICE MATHY, Liege, Belgium. Filed July 17, 1919. Serial No. 311,609. 2 Claims. (Cl. 202—9.)



1. A coke oven comprising retorts, flues on each side of said retorts, filled with porous and refractory materials and means for conveying a mixture of air and gas for surface combustion inside said flues.

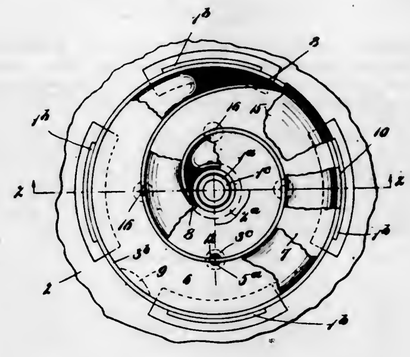
1,392,258. CANE-HARVESTING MACHINE. RUDOLPH A. MAYER, Pecan Island, La. Filed Mar. 31, 1919. Serial No. 286,543. 25 Claims. (Cl. 56—17.)

1. In a machine of the class described, a frame structure comprising two side members and means whereby said side members are adjustably connected together, each side member being provided with a ground wheel and a steering wheel, and each side member having an independent superstructure; in combination with a frame bar, obliquely disposed and connected at its front end with the superstructure of one side member and at its rear end with the superstructure of the other side member of the frame.

1,392,259. MACHINE FOR MAKING PICKERS. WILLIAM A. PARMENTER, Brockton, Mass., assignor to C. S. Pierce Company, Brockton, Mass, a Corporation of Massachusetts. Filed Nov. 4, 1920. Serial No. 421,798. 9 Claims. (Cl. 69—1.)

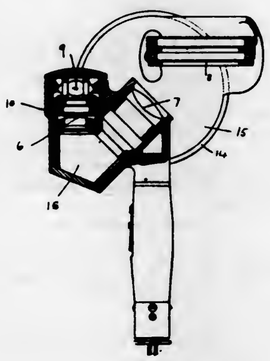
1. A machine of the character described comprising a mandrel on which the strip is to be wound, a crossbar, a plurality of guide members projecting from said crossbar, a crosshead slidably mounted on said guide members so as to slide toward and from said crossbar, a pressure roller rotatably mounted on a shaft projecting laterally from said slidable crosshead, and a spring which exerts pressure on said crosshead to hold said roller in yielding engagement with the strip being wound on the mandrel.

1,392,260. RETAINING AND RELEASING DEVICE FOR ROPES, CORDAGE, AND THE LIKE. PERCY WILLIAM SCHOLLAR, London, England, assignor to E. R. Calthrop's Aerial Patents Limited, London, England. Filed Sept. 8, 1919. Serial No. 322,544. 3 Claims. (Cl. 24—241.)



2. A device for detachably connecting ropes comprising a block having an eye for the attachment of a rope thereto, an aperture in said block, a member rotatably mounted in said block and having a recess therein adapted in one position of the member to register with the said aperture, a pair of spring controlled buttons one of which is movable within the other and which are normally pressed in opposite directions to lock said rotatable member and can be pressed together to release said member to permit of partial rotation thereof, and means in said block for limiting the movement of said buttons.

1,392,261. SAW-FITTING TOOL. GUSTAF ANDERSON, Atlin, British Columbia, Canada. Filed Apr. 20, 1920. Serial No. 375,234. 10 Claims. (Cl. 76—46.)



1. In a saw jointer and gage, a frame having parallel saw engaging side planes and longitudinally spaced apart top surfaces at right angles to the side planes, cap plates in spaced relation carried thereby, a horizontal swage gage support, integral with the frame, in the space between the cap plates and beneath the plane thereof, and a resilient swage gage member adjustably clamped to said support, and provided with laterally projecting gaging portions within close proximity of each other and out of registry with the two points of a raker tooth of a saw, to prevent their simultaneous contact therewith, and means for shifting said gage member from a horizontal position to a longitudinally inclined position of the gage member, for the purpose described.

1,392,262. RESILIENT WHEEL. W. EDMANDS BABBITT, Portsmouth, N. H., assignor of two-fifths to Ralph W. Foster, Boston, Mass. Filed Jan. 7, 1919. Serial No. 269,998. 4 Claims. (Cl. 152—46.)

3. A resilient wheel comprising two concentric disks of different diameters slidable one on the other and furnished with walls so disposed as to form an expansible and contractible spiral chamber.

1,392,263. APPARATUS FOR DETERMINING ANGULAR ELEVATION OR DEPRESSION OF DISTANT OBJECTS. LIONEL BARTON BOOTH, Northwood, England. Filed Dec. 9, 1920. Serial No. 429,525. 7 Claims. (Cl. 88—2.4.)

1. An apparatus for determining the angle of elevation or depression of a distant object using a bubble as a point

of reference in lieu of a natural horizon, comprising in combination a curved bubble container, a reflector having a transparent portion through which the distant object may be viewed directly, a collimating lens system by which the image of the bubble is thrown on the reflector to be viewed by the observer and having a focal length sensibly equal to the radius of curvature of the bubble container, and means coöperating with the reflector for bringing the bubble image into coincidence with the directly observed distant object.

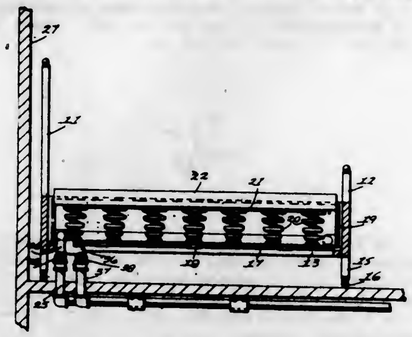
1,392,264. COTTON FABRIC. GEORGES HEBERLEIN, Wattwil, Switzerland. Filed Mar. 18, 1921. Serial No. 453,488. 10 Claims. (Cl. 8—20.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

1. A cotton fabric in which the fibers have undergone a permanent structural change to produce a closer mesh fabric, with a dull, crape-like effect, like fine thin woolen fabric.

1,392,265. COTTON FABRIC. GEORGES HEBERLEIN, Wattwil, Switzerland. Filed Mar. 18, 1921. Serial No. 453,489. 12 Claims. (Cl. 8—20.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

1. A cotton fabric having pattern effects, *i. e.*, background portions and design portions, and in which one has the physical characteristic of mercerized fabric, *i. e.*, soft and glossy, and the other has the physical characteristic of organdie, the contrast between said portions being such as to clearly define the desired pattern.

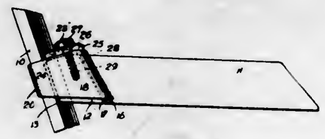
1,392,266. PROCESS FOR THE MANUFACTURE OF CARBON ELECTRODES OR OF PURE RETORT-CARBON. EMERICH SZARVASY, Budapest, Hungary. Filed June 3, 1920. Serial No. 386,410. 3 Claims. (Cl. 204—65.)



1. A process for the manufacture of entirely pure retort carbon by the dissociation of methane, said process consisting in conducting methane through a decomposing chamber heated by external heating above the dissociation temperature of methane and composed, at the parts heated to said temperature, of pure retort carbon previously produced by the same process, whereby carbon proceeding from the decomposition of methane is deposed on the inner surface of the carbon walls of the decomposing chamber, crushing the carbon deposit together with the carbon walls of the decomposing chamber and using a part of the carbon for manufacturing further carbon decomposing chambers.

1,392,267. PROCESS FOR THE MANUFACTURE OF CARBON ELECTRODES. EMERICH SZARVASY, Budapest, Hungary. Filed June 3, 1920. Serial No. 386,409. 2 Claims. (Cl. 204—65.)

1. A process for the manufacture of carbon electrodes, which consists in subjecting natural gas to a cracking operation by heat in a continuous flow in a decomposing vessel, in such a manner, as to produce a mixture of soot and tar, removing the mixture, and molding and burning it in the usual way.



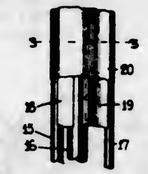
1,392,268. DEVICE FOR HEATING AND COOLING MATTRESSES. MARK S. MARUDA, Chicago, Ill. Filed Sept. 1, 1920. Serial No. 407,334. 2 Claims. (Cl. 126—205.)

1. Device of the character described comprising in combination with a bedstead and mattress therefor, a flanged support plate, means for supporting said plate on the bedstead-bottom, a plurality of coiled springs supported and fastened with their lower ends on said plate, a pipe conduit consisting of a plurality of convolutions secured to said plate between the single rows of springs, connections for said pipe conduit with a source of water and steam,

and valves for controlling the supply and exhaust of said water and steam.

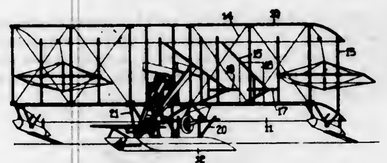
1,392,269. TOOL-HOLDER. BENJAMIN T. CARSON, Rensselaer, N. Y. Filed Mar. 22, 1921. Serial No. 454,366. 7 Claims. (Cl. 29—100.)

1. The combination with a tool holder including a shank, an angular outer end provided with a vertical groove, a yoke member adapted to be supported from said end of the shank to constitute a tool receiving socket and means formed respectively on the yoke and the side faces of said shank end adapted to co-act upon relative vertical adjustments to vary the size of the tool receiving socket, of means for positively locking the yoke to the shank.



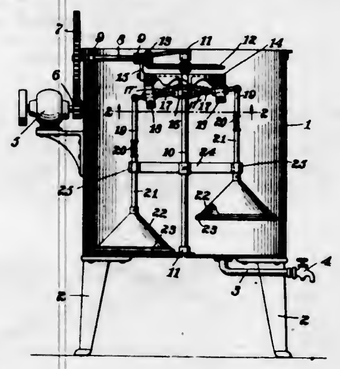
1,392,270. SHOE-LACE TIP. JOHN CHRISTIAN, Cleveland, Ohio. Filed June 23, 1921. Serial No. 479,744. 5 Claims. (Cl. 24—143.)

1. A shoe lace tip comprising a blank of substantially rectangular form having an opening therein near one end through which the end of a shoe lace is inserted, said lace being turned back over the edge of the blank so as to overlie and rest upon said inserted end, and the body of the blank bent over and around one of its longitudinal edges so as to clasp the inserted end and overlying body portion of the lace between the overturned or folded portions of the blank and form a round tip.



1,392,271. STREAM-LINE WIRING FOR AIRPLANES. GLENN H. CURTISS, Garden City, N. Y., assignor to Curtiss Aeroplane and Motor Corporation, a Corporation of New York. Filed May 4, 1918. Serial No. 232,487. 5 Claims. (Cl. 244—31.)

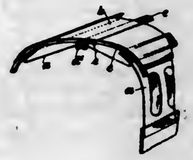
1. Airplane wiring including two wires of different gage, the wires being arranged one behind the other with the wire of larger gage in front, and fairing between the wires for spacing them, the fore and aft longitudinal edges of



the fairing being grooved to complement the wires and the cross sectional shape of the fairing being such that the wires and fairing together approximate a streamline form.

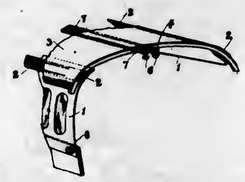
1,392,272. AIRPLANE LANDING-GEAR. GLENN H. CURTISS, Garden City, N. Y., assignor to Curtiss Aeroplane and Motor Corporation, a Corporation of New York. Original application filed Aug. 22, 1911, Serial No. 645,340. Divided and this application filed May 13, 1918. Serial No. 234,250. 2 Claims. (Cl. 244—2.)

1. A landing gear for aircraft including a plurality of landing gear struts arranged in pairs, one pair of struts being located at one side of the longitudinal vertical plane of the fore and aft axis of the craft and another pair at the opposite side thereof, a flotation base, the pairs of struts in each instance being substantially vertically disposed to support the flotation base at points respectively fore and aft, and the struts in each instance comprising laterally divergent strut legs which extend at an angle to each other.



1,392,273. WASHING-MACHINE. EMMET B. DIGBY, Atlanta, Ga. Filed Sept. 7, 1920. Serial No. 408,517. 2 Claims. (Cl. 259—99.)

1. A washing machine comprising a tank, a central shaft vertical throughout its length located therein, a bevel gear mounted on said shaft near its upper end, a cam member mounted on said shaft and held against rotation, two arms pivotally mounted beneath said cam member and provided with rollers thereon for contacting with said cam

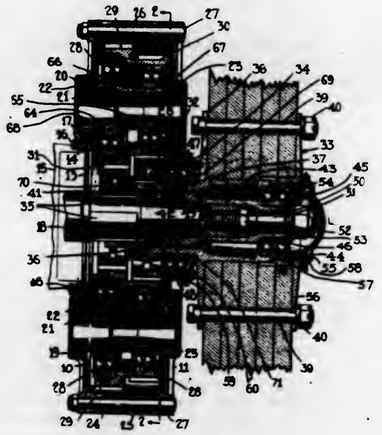


member, vertical arms pivotally mounted on said aforementioned arms and provided with a cone member on their ends, a cross arm secured to said central shaft the ends of which form bearings for said arms having the cone members on their ends, and means for rotating said central shaft to thereby impart a rotary and reciprocatory motion to said cone members.

1,392,274. VEHICLE-TOP. FREDERICK HAROLD HALL, Holford, near Bridgewater, England. Filed Jan. 10, 1921. Serial No. 436,272. 2 Claims. (Cl. 296—141.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

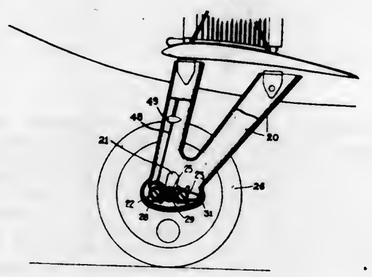
1. A folding vehicle top, comprising a collapsible roof portion, side curtains secured at their upper ends to the roof portion, transversely extending sticks carrying said roof portion, longitudinal flexible means lying beneath the middle of the roof portion and secured solely to the sticks, and means carried by the said flexible means for detachably securing the lower portions of the curtains to said flexible means to relieve the roof portion of the weight of the curtains and permit the latter to be folded with the roof portion in a zigzag manner while attached to the said flexible means.

1,392,275. VEHICLE-TOP. FREDERICK HAROLD HALL, Holford, near Bridgewater, England. Filed Jan. 10, 1921. Serial No. 436,272. 1 Claim. (Cl. 296—141.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)



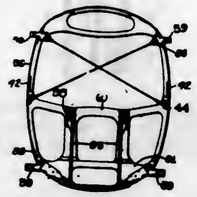
A foldable vehicle top comprising a collapsible roof covering, cross sticks carrying said covering, longitudinal flexible members beneath the opposite side portions of the roof covering and secured solely to the sticks, longitudinal central flexible means secured solely to the sticks below the roof covering, side curtains secured against movement at their upper edges to the flexible members beneath the opposite side portions of the covering, and means for detachably securing the lower portions of the curtains to the said central longitudinal flexible means to relieve the covering of the vehicle top of all weight of the curtains and permitting the curtains to fold and unfold with the said roof covering and the sticks.

1,392,276. REDUCTION-GEARING. CHARLES B. KIRKHAM, Buffalo, N. Y., assignor to Curtiss Aeroplane and Motor Corporation, a Corporation of New York. Filed Feb. 28, 1917. Serial No. 151,511. 10 Claims. (Cl. 74—7.)



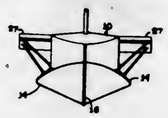
1. A driving connection for aeronautical propellers, including a crank case and stub shaft projecting therefrom,

an extension for said stub shaft comprising a sleeve insertible axially thereon and overhanging the outer end thereof, a driving connection between said extension and said stub shaft, means for retaining the extension on the stub shaft, a propeller hub bearings for carrying the pro-



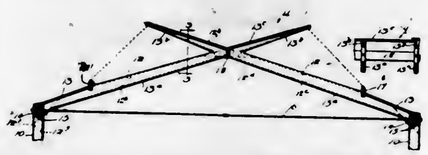
peller hub and located respectively on the overhanging and inner ends of said extension, and a means interposed between said propeller hub and said stub shaft to produce relatively different rotative speeds of said stub shaft and said propeller.

1,392,277. AIRPLANE LANDING-GEAR. CHARLES B. KIRKHAM, Garden City, and ARTHUR L. THURSTON, Hempstead, N. Y., assignors to Curtiss Aeroplane and Motor Corporation, a Corporation of New York. Filed Oct. 7, 1918. Serial No. 257,275. 29 Claims. (Cl. 244—2.)



1. An aeroplane landing gear including landing gear struts, a non-rigid axle member comprising independently movable axle sections having pivot axes sufficiently removed one from the other to locate one of said axes nearer to one of said struts and the other of said axes nearer to the other of said struts than to the longitudinal vertical plane of the fore and aft axis of the craft, means extending between the landing gear struts to support both pivot axes, wheels mounted upon the outer ends of the axle sections, and means for yieldingly resisting the displacement of the wheels and axle sections.

1,392,278. FUSELAGE. CHARLES B. KIRKHAM, Garden City, and ARTHUR L. THURSTON, Hempstead, N. Y., assignors to Curtiss Aeroplane and Motor Corporation, a Corporation of New York. Filed Oct. 14, 1918. Serial No. 258,102. 20 Claims. (Cl. 244—30.)

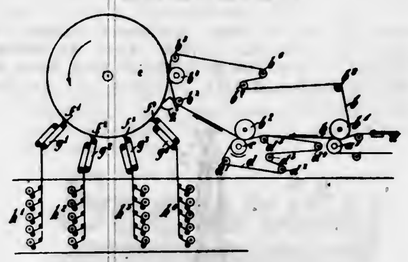


1. A fuselage for airplanes including a transverse diaphragm provided with integral lugs which serve as anchorages for the airplane wings.

1,392,279. FLYING-BOAT HULL. HENRY KLECKLER, Garden City, N. Y., assignor to Curtiss Aeroplane and Motor Corporation, Buffalo, N. Y., a Corporation of New York. Filed Dec. 23, 1918. Serial No. 267,998. 8 Claims. (Cl. 244—2.)

1. In a hull for flying boats, the combination with an airplane wing including a wing beam extended into the hull, of a plurality of braces inclosed in the hull and connecting with the wing beam, the arrangement of the braces being such that the airplane wing is effectually braced in a fore and aft direction, the braces radiating from the wing beam and connecting with the bottom of the hull at its chines to directly carry the hydroplaning stresses (while hydroplaning) to the airplane wing and to distribute the stresses due to the weight mass of the hull (while flying) over substantially the entire fore and aft extent of the hull bottom, at least one of the braces at its forward end terminating at a point nearer to the bow end of the hull than to the transverse vertical plane of the wing beam.

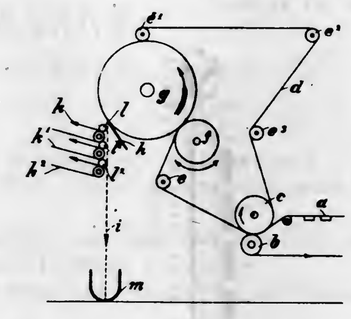
1,392,280. SYSTEM OF INTEGRALLY-CAST REINFORCED-CONCRETE PITCHED-ROOF CONSTRUCTION FOR BUILDINGS. EDGAR D. MARTIN, Chicago, Ill., assignor of one-half to Richard E. Schmidt, Chicago, Ill. Filed Dec. 19, 1918. Serial No. 267,448. 27 Claims. (Cl. 108—1.)



23. A roof, comprising reinforced concrete girders, a series of concrete upwardly inclined and intersecting roof supporting members, extending up therefrom, the free ends outside of the intersections acting as cantalivers supporting a middle concrete roof slab.

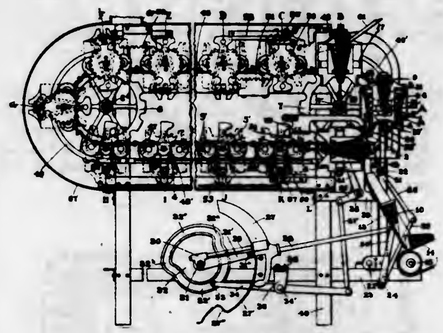
1,392,281. SNAP-FASTENER. WILLIAM W. PENFIELD, Stamford, Conn., assignor to William W. Penfield, Inc., Stamford, Conn. Filed Feb. 25, 1921. Serial No. 447,671. 2 Claims. (Cl. 24—220.)

2. A socket member for a snap fastener having an exterior shell, an integral double flanged interior shell, a continuous and imperforate reinforcing member between them, supported at its edge by the outer flange of the interior shell, and a collet having an annular internally projecting rib at its base and a solid top and perforated sides.



1,392,282. MACHINE FOR PRODUCING ROVINGS FROM PAPER-PULP. FRIEDRICH PAUL PRIEM, Heidenheim-on-the-Brenz, Germany, assignor to Turk Gesellschaft M. B. H., Hamburg, Germany. Filed Mar. 26, 1918. Serial No. 224,873. 3 Claims. (Cl. 92—39.)

1. In a machine of the character described the combination with means for forming and conveying strips of wet paper stock; of a distributing drum of large diameter and a plurality of rubbing devices to roll said strips into rovings, said drum presenting a circumference large enough to maintain said rubbing devices spaced sufficiently for access between them of workmen.



1,392,283. DEVICE FOR LEADING AWAY AND DISTRIBUTING FIBER STRIPS IN MANUFACTURING ROVINGS FROM PAPER-PULP AND THE LIKE. FRIEDRICH PAUL PRIEM, Heidenheim-on-the-Brenz, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc., a Corporation of Delaware. Filed July 7, 1919. Serial No. 309,148. 4 Claims. (Cl. 92—39.)

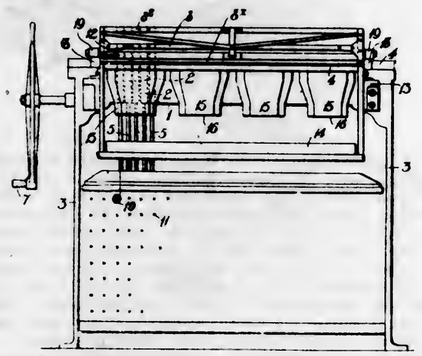
4. A device for leading away and distributing fiber strips from a movable carrier surface which comprises a series of transporting means consisting of a guide member and a conveying member, said series of transporting means being arranged one above the other below the point at which the fiber strip leaves the carrier and the said series of transporting means being disposed so that the front

thereof is vertical with respect to the line of delivery from the carrier surface.

1,392,284. AUTOMATIC CONE-MAKING MACHINE. WEBSTER M. ROBERTS and PARK D. ROBERTS, St. Joseph, Mo. Filed Aug. 11, 1916. Serial No. 114,895. 34 Claims. (Cl. 107—58.)

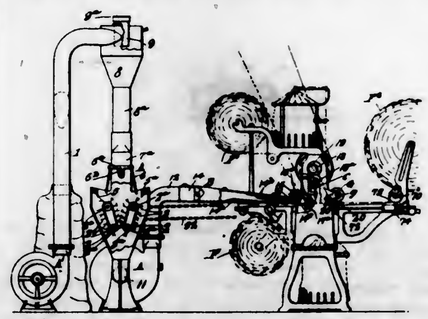
14. In a machine of the character described, the combination, with an endless chainlike carrier, a plurality of mold units secured thereto and adapted to be moved through a fixed path thereby, said mold units comprising a sectional mold having a plurality of mold cavities therein and a corresponding plurality of forming cores, means to raise the cores in the mold cavities to permit batter to be supplied thereto, means to heat the mold units to bake the product therein, means to raise the cores in the molds to release the baked product from the cores, and means to remove the said product from the molds.

29. In a machine of the character described, a main frame, an endless chain-like carrier mounted therein on drums spaced apart, a plurality of separable mold sections carried by said carrier, each having cavities in their adjacent faces, said sections and cores adapted to travel over said drums, said sections and cores inverting at times and reverting at other times, and positive mechanical core-supporting means for holding said cores in said molds when said mold sections are in an inverted position.



33. In a machine of the character described, the combination, with a mold comprising separable halves, of opening and closing devices comprising slidable means having cam surfaces adapted to engage the mold halves to open and close them.

1,392,285. TOOTHBRUSH. SIDNEY SPRAGUE, Ossining, N. Y., assignor of one-half to Walter V. Scott, Ossining, N. Y. Filed Aug. 17, 1920. Serial No. 404,283. 4 Claims. (Cl. 15—39.)



1. A tooth brush comprising a plurality of pivotally connected bristle carrying sections adapted to be folded into parallel relation with respect to each other and handle sections pivoted to the free outer end of the outermost bristle sections at a right angle to the axis of the pivotal connection between the bristle carrying sections.

1,392,286. APPARATUS FOR MANUFACTURING AND PACKING CANDLES, NIGHT-LIGHTS, AND SUCH LIKE ARTICLES. ERNEST WALLS, Bristol, England. Filed Dec. 24, 1918. Serial No. 268,199. 6 Claims. (Cl. 18—27.) (Granted under the provisions of the act of Mar. 3, 1921, 41 Stat. L., 1313.)

1. In an apparatus for manufacturing and packing candles or the like, comprising in combination groups of candle molds, the molds in each group corresponding in position and number to the finished candles in the package; and a candle clamp for receiving the finished candles from the molds, said clamp being provided with candle holes corresponding in position and number to said candle molds, whereby the candles, upon release from said clamp, are positioned in the packages without intermediate sorting or counting.

1,392,287. MACHINE FOR MAKING LAYER FABRICS. FRITZ WEVER, Stuttgart, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc., a Corporation of Delaware. Filed Oct. 29, 1918. Serial No. 260,214. 27 Claims. (Cl. 154—27.)

1. In an apparatus for making composite fabric, a receptacle for feathers and means arranged in connection with the same for loosening and separating the feathers, in combination with means for feeding a fabric layer and a device for spreading the feathers in an even layer onto the fabric layer, a blast for transferring the feathers from the loosening and separating device to the spreading device and means for connecting the feathers to the fabric layer arranged in advance of the spreading device.

REISSUES.

15,202. SOLDERING-IRON. RAYMOND C. PARENT, Chicago, Ill. Filed June 1, 1920. Serial No. 385,851. Original No. 1,303,716, dated May 13, 1919, Serial No. 268,527, filed Dec. 27, 1918. 12 Claims. (Cl. 158—27.)

1. A self-heating implement for the purposes set forth comprising a reservoir-handle, a yoke connected thereto and having openings in its sides, a burner including a needle valve secured within the yoke and accessible through openings therein for adjusting the needle-valve, feed pipes extending from the reservoir-handle to the burner, a fiber packing in the lower end of the reservoir into which the feed pipe extends, and a leather disk on top of the packing through which the liquid fuel permeates to said packing.

TRADE-MARKS

OFFICIAL GAZETTE, SEPTEMBER 27, 1921.

[PUBLISHED OCTOBER 6, 1921.]

The following trade-marks are published in compliance with section 6 of the act of February 20, 1905, as amended March 2, 1907. Notice of opposition must be filed within thirty days of this publication.

Marks applied for "under the ten-year proviso" are registrable under the provision in clause (b) of section 5 of said act as amended February 18, 1911.

As provided by section 14 of said act, a fee of ten dollars must accompany each notice of opposition.

Ser. No. 93,491. (CLASS 25. LOCKS AND SAFES.) FIRE-PROOF FURNITURE AND CONSTRUCTION COMPANY, New York, N. Y., and Miamisburg, Ohio. Filed Mar. 13, 1916.

Security

Particular description of goods.—Safes and Office-Safes Made Wholly or Partly of Sheet Metal.
Claims use since June, 1911.

Ser. No. 93,492. (CLASS 32. FURNITURE AND UPHOLSTERY.) FIRE-PROOF FURNITURE AND CONSTRUCTION COMPANY, New York, N. Y., and Miamisburg, Ohio. Filed Mar. 13, 1916.

Security

Particular description of goods.—Filing Cases, Cabinets, and Stacks, in Both Solid and Sectional Constructions, and Files, Drawers, Units and Transfer-Boxes, Wholly or Partly of Metal or Wood, Therefor; Counters and Desks, Tables, and Chairs as Articles of Household and Office Furniture; Bath-Room, Towel, and Medicine Cabinets; Wardrobes, Cupboards, Lockers, and Bookcases; Roller-Shelving, and Units and Cases, Wholly or Partly of Metal or Wood, Therefor; Plain Shelving, Book-Stacks, and Merchandise-Stacks, and Merchandise-Bins, Therefor.
Claims use since June, 1911.

Ser. No. 111,376. (CLASS 23. CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF.) CHEMICAL CONSTRUCTION COMPANY, Charlotte, N. C. Filed June 5, 1918.

CHEMICO

Particular description of goods.—Acid-Concentrators.
Claims use since about Jan. 1, 1916.

Ser. No. 119,814. (CLASS 16. PAINTS AND PAINTERS' MATERIALS.) L. REUSCHE & CO., New York, N. Y. Filed June 20, 1919.

ELARCO

Particular description of goods.—Glassware, China, and Pottery; Decorators' Materials—Namely, Silver and Gold Paint Prepared in Paste and Liquid Form, Thinning-Oils for Paints, Colored Enamels for Flat and High-Relief Decoration of Glass, Colors, Both Opaque and Transparent, Drying-in Powders, Antitarnish-Lacquers to be Applied over Silver Decorations, Liquid Luster Colors for Glass Decoration, Decalcomania-Varnish, Dry Colors, and Sulfur Paint.
Claims use since Apr. 1, 1906.

Ser. No. 125,142. (CLASS 45. BEVERAGES, NON ALCOHOLIC.) ARTHUR WHITTAKER, Manchester, England. Filed Nov. 20, 1919.

Sesquito

Particular description of goods.—Non-Alcoholic, Non-Cereal, Maltless Extracts, Essences, and Prepared Syrups Used in and for Carbonated and Still Drinks and for Non-Intoxicating Carbonated and Still Beverages Sold as Soft Drinks.
Claims use since 1908.

Ser. No. 128,212. (CLASS 16. PAINTS AND PAINTERS' MATERIALS.) THE KLEIN MANUFACTURING COMPANY, Cleveland, Ohio. Filed Feb. 10, 1920.

LINSOLIFE

Particular description of goods.—Paints for Wood, Iron, Tin, or Steel, Structural Iron of Every Description, Telephone-Poles, Tanks, Silos, &c.
Claims use since June 1, 1908.

Ser. No. 130,632. (CLASS 39. CLOTHING.) WACHUSETT SHIRT CO., Leominster, Mass. Filed Apr. 3, 1920. Under ten-year proviso.

Wachusett

Particular description of goods.—Men's Shirts—Namely, Stiff-Bosom, Negligée, Work, and Sport Shirts, Night-Robes and Pajamas.
Claims use since 1889.

Ser. No. 131,389. (CLASS 39. CLOTHING.) MARY E. HEWETT, San Francisco, Calif. Filed Apr. 20, 1920.

The same being a fanciful figure.
Particular description of goods.—Misses' and Children's Outer Garments, Rompers, and Dresses.
Claims use since July 1, 1919.

Ser. No. 132,807. (CLASS 23. CUTLERY, MACHINERY, AND TOOLS AND PARTS THEREOF.) THE TURBINE AIR TOOL COMPANY, Cleveland, Ohio. Filed May 24, 1920.

No claim is made to the words "Air Turbine" apart from the mark shown in the drawing.
Particular description of goods.—Pneumatic Drills, Pneumatic Planers, Pneumatic Grinders, Pneumatic Valve-Grinders, and Pneumatic Sanding-Machines.
Claims use since February, 1920.

Ser. No. 133,291. (CLASS 29. BROOMS, BRUSHES, AND DUSTERS.) FELIX UHAY, Chicago, Ill. Filed June 4, 1920.

De Luxe

Particular description of goods.—Powder-Puffs.
Claims use since on or about Jan. 1, 1917.

Ser. No. 133,304. (CLASS 39. CLOTHING.) FOWNES BROTHERS & CO., London, England, and Gloversville, Amsterdam, and New York, N. Y., assignors to Fownes Brothers & Co., Incorporated, New York, N. Y., a Corporation of New York. Filed June 5, 1920.

"Doesilk"

Particular description of goods.—Fabric Gloves.
Claims use since Mar. 8, 1920.

Ser. No. 133,774. (CLASS 39. CLOTHING.) ABRAHAM FISCH, Los Angeles, Calif. Filed June 16, 1920.

Kowl-o-Robe

Particular description of goods.—Hooded Coats and Bath-Robes.
Claims use since May 20, 1920.

Ser. No. 133,939. (CLASS 17. TOBACCO PRODUCTS.) SCOTT TOBACCO COMPANY, Bowling Green, Ky. Filed June 19, 1920.

Consists of the symbol of a star, red in color, and the words "Red Star." The symbol of a star is disclaimed except when displayed as shown.
Particular description of goods.—Plug, Twist, and Smoking Tobacco.
Claims use since on or about Feb. 1, 1920.

Ser. No. 133,998. (CLASS 39. CLOTHING.) MAURICE C. HYMAN, Rochester, N. Y. Filed June 21, 1920.

"TINY TOTS"

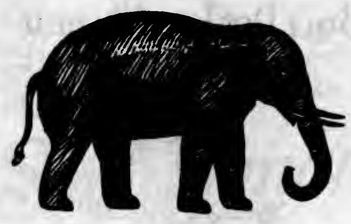
Particular description of goods.—Infants' and Children's Boots and Shoes of Leather, Rubber, Fabric, and Combinations.
Claims use since November, 1912.

Ser. No. 134,262. (CLASS 4. ABRASIVE, DETERGENT, AND POLISHING MATERIALS.) NICK NEOFITOS, Chicago, Ill. Filed June 26, 1920.

CLEANOLA

Particular description of goods.—Cleaning Fluid and Dry Cleaner for Cleaning Cloth and Leather Goods.
Claims use since June 30, 1919.

Ser. No. 134,308. (CLASS 23. CUTLERY, MACHINERY, AND TOOLS, AND PARTS THEREOF.) THE GOLDBERG PADDING MACHINE COMPANY, Cincinnati, Ohio. Filed June 28, 1920.



No claim being made to the words "World's Greatest" except in the connection shown in the drawing.
Particular description of goods.—Sewing-Machines.
Claims use since Jan. 2, 1920.

Ser. No. 135,806. (CLASS 4. ABRASIVE, DETERGENT, AND POLISHING MATERIALS. (NAAMLOOZE VENNOOTSCHAP OLIEFABRIEKEN INSULINDE, Amsterdam, Netherlands. Filed Aug. 7, 1920.

Particular description of goods.—Soaps.
Claims use since May 1, 1919.

Ser. No. 136,704. (CLASS 40. FANCY GOODS, FURNISHINGS, AND NOTIONS.) WILLIAM HALL & CO., LIMITED, Studley, England. Filed Sept. 1, 1920.

Particular description of goods.—Needles, Toilet-Pins, and Bodkins, Knitting-Pins and Crochet-Hooks.
Claims use since Dec. 8, 1882.

Ser. No. 137,809. (CLASS 39. CLOTHING.) ALFRED C. GAUNT, Methuen, Mass. Filed Oct. 1, 1920.

Travel-Tex

Particular description of goods.—Suits, Overcoats, Ulsters, Mackintoshes, Coats, Dresses, Cloaks, Wraps.
Claims use since Sept. 10, 1920.

Ser. No. 137,935. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) GLOBE GRAIN & MILLING COMPANY, Los Angeles, Calif. Filed Oct. 5, 1920.

RED MARK

Particular description of goods.—Poultry Food, Animal-Feeding Stuffs, Refined Vegetable Oils for Cooking and Salads, Hydrogenated Vegetable Oils for Shortening, Cornmeal, Graham Flour, Whole-Wheat Flour, Health-Bran, Wheat-Flakes, Pastry-Flour, Farina, Rolled Oats, Steel-Cut Oatmeal, Cracked Wheat, Hominy, Rye-Flour, Rye-Meal, and Pancake-Flour.
Claims use since 1914.

Ser. No. 138,314. (CLASS 13. HARDWARE AND PLUMBING AND STEAM-FITTING SUPPLIES.) THE BULL DOG LOCK WASHER CO., Baltimore, Md. Filed Oct. 15, 1920.

BULL DOG LOCK WASHER

"Never Lets Go the Bolt"

No claim being made to the use of the words "Lock Washer" and "Never Lets Go the Bolt" apart from the mark as shown.
Particular description of goods.—Lock-Washers.

147,052. (CLASS 33. GLASSWARE.) CORNING GLASS WORKS, Corning, N. Y. Filed Dec. 20, 1920. Serial No. 141,292.

The seal is printed in gold, and the body of the letters forming the word "Pyrex" in red.
Particular description of goods.—Glass.
Claims use since about Jan. 1, 1916.

147,053. (CLASS 16. PAINTS AND PAINTERS' MATERIALS.) DEVOE & RAYNOLDS CO. INC., New York, N. Y. Filed Dec. 11, 1920. Serial No. 140,931.

DEVOE
MOTTLETONE

Particular description of goods.—Paste and Ready-Mixed Paints and Wall-Finishes—Namely, Cold-Water Paints.
Claims use since December, 1919.

147,054. (CLASS 46. FOODS AND INGREDIENTS OF FOODS.) WILLIAM C. GARWOOD, Seattle, Wash. Filed Jan. 26, 1921. Serial No. 142,785.

Curiously Good

Particular description of goods.—Candy.
Claims use since Sept. 20, 1915.

147,055. (CLASS 45. BEVERAGES, NON-ALCOHOLIC.) HOOD RIVER APPLE VINEGAR CO., Hood River, Oreg. Filed Aug. 3, 1921. Serial No. 151,818.

HOOD RIVER

Particular description of goods.—Cider and Carbonated Beverages.
Claims use since November, 1916.

147,056. (CLASS 12. CONSTRUCTION MATERIALS.) THE HYDREX CORPORATION, New York, N. Y.; Rahway, N. J.; Chicago, Ill.; Washington, D. C., and various other places. Filed May 6, 1921. Serial No. 147,291.

THE MEMBRANE METHOD

Particular description of goods.—Certain Named Construction Materials.
Claims use since Mar. 15, 1906.

147,057. (CLASS 3. BAGGAGE, HORSE EQUIPMENTS, PORTFOLIOS, AND POCKETBOOKS.) P. M. KELLY, Dalhart, Tex. Filed Dec. 4, 1920. Serial No. 140,599.

KELLY BROS.

Particular description of goods.—Spurs and Bits.
Claims use since Jan. 1, 1912.

147,058. (CLASS 2. RECEPTACLES.) WILLIAM F. LUICK, Milwaukee, Wis. Filed Sept. 27, 1920. Serial No. 137,663.

TAG-BAK

Particular description of goods.—Shipping-Containers for Ice-Cream, Ices, and Frozen Custard.
Claims use since June 21, 1920.

147,059. (CLASS 2. RECEPTACLES.) NEWARK TORTOISE SHELL NOVELTY CO., Newark, N. J. Filed July 28, 1920. Serial No. 135,525.

LA PARISIENNE

Particular description of goods.—Hair-Receivers, Bottle-Holders, Salve-Jars, Pin-Boxes, and Pin-Trays.
Claims use since Jan. 1, 1920.

147,060. (CLASS 3. BAGGAGE, HORSE EQUIPMENTS, PORTFOLIOS, AND POCKETBOOKS.) THE PERKINS-CAMPBELL COMPANY, Cincinnati, Ohio. Filed Feb. 28, 1921. Serial No. 144,147.

Campbell

Particular description of goods.—Saddles, Collars, and Harness Parts.
Claims use since first part of January, 1916.

147,061. (CLASS 4. ABRASIVE, DETERGENT, AND POLISHING MATERIALS.) U. S. SPECIALTY MFG. CO., Somerville, Mass. Filed Jan. 31, 1921. Serial No. 143,018.

RE-NU

Particular description of goods.—Dry-Cleaning Preparation in the Form of Stick or Pencil for Leather and Fabric.
Claims use since March, 1912.

147,062. (CLASS 1. RAW OR PARTLY-PREPARED MATERIALS.) THE STEARNS & FOSTER COMPANY, Lockland, Ohio. Filed Aug. 4, 1921. Serial No. 151,387.

DAKOTA

Particular description of goods.—Cotton-Batting.
Claims use since Dec. 20, 1898.

147,063. (CLASS 1. RAW OR PARTLY-PREPARED MATERIALS.) THE STEARNS & FOSTER COMPANY, Lockland, Ohio. Filed Aug. 4, 1921. Serial No. 151,388.

LUZON

Particular description of goods.—Cotton-Batting.
Claims use since Feb. 23, 1900.

147,064. (CLASS 1. RAW OR PARTLY-PREPARED MATERIALS.) THE STEARNS & FOSTER COMPANY, Lockland, Ohio. Filed Aug. 4, 1921. Serial No. 151,409.

YUKON

Particular description of goods.—Cotton-Batting.
Claims use since Dec. 20, 1898.

147,065. (CLASS 45. BEVERAGES, NON-ALCOHOLIC.) THE TISCO COMPANY, Chicago, Ill. Filed Nov. 5, 1920. Serial No. 139,234.

EMERALD ISLE

Particular description of goods.—A Non-Alcoholic Beverage.
Claims use since 1915.

147,066. (CLASS 38. PRINTS AND PUBLICATIONS.) VANITY FAIR STUDIOS, INC., Philadelphia, Pa. Filed Apr. 20, 1920. Serial No. 131,414.

"Vanity Fair"

Consisting of the words "Vanity Fair."
Particular description of goods.—Photographs.
Claims use since Dec. 1, 1919.

147,067. (CLASS 4. ABRASIVE, DETERGENT, AND POLISHING MATERIALS.) WHITTEMORE BROTHERS CORPORATION, Cambridge, Mass. Filed Apr. 19, 1920 Serial No. 131,366.

Whittemore's

Particular description of goods.—Dressing and Cleaners for Articles Made of Leather and Fabric.
Claims use since Oct. 22, 1884.

DECISIONS

OF THE

COMMISSIONER OF PATENTS

AND OF

UNITED STATES COURTS IN PATENT CASES.

COMMISSIONER'S DECISIONS.

P. BEIERSDORF & Co. *v.* LEHN & FINK, INC.

Decided August 30, 1921.

1. TRADE-MARK—OPPOSITION—SPELLED-OUT INITIALS, (NOT MERELY A NAME.)

The mark "Pebeco," made up of the initials of opposer P. B. Co., *Held* that this word made from spelled-out initials is not merely the name of the opposer within the ruling of the case of *Simplex Electric Heating Co.* v. *Ramey Co.*

2. SAME—SAME—REREGISTRATION.

Where an applicant for reregistration obtained title to a seized trade-mark by purchase from the Alien Property Custodian, *Held* there is no authority for reregistration merely because there has been a change in ownership.

3. SAME—SAME—POINTS NOT RAISED BY NOTICE OF OPPOSITION MAY BE CONSIDERED.

Where the question of the right to reregister a mark because secured by assignment is not raised in the notice of opposition, *Held* that there is justification for passing upon this question.

APPEAL from Examiner of Interferences.

TRADE-MARK FOR TOOTH-PASTE.

Messrs. Briesen & Sohrenk for P. Beiersdorf & Co.

Messrs. Emery, Varney, Blair & Hoguet for Lehn & Fink, Inc.

FENNING, *Acting Commissioner:*

This is an appeal from the decision of the Examiner of Interferences dismissing an opposition brought by P. Beiersdorf & Co. against an application of Lehn & Fink for registration of "Pebeco" as a trade-mark for tooth paste, which the application says—

> has been heretofore registered by P. Beiersdorf & Co. of Hamburg, Germany, under date of April 2, 1907, No. 61,678, which said registration is now owned by the undersigned.

The notice of opposition sets up title to the trade mark and the registration in opposer and alleges that Lehn & Fink have been the agent of the opposer.

The answer alleges, among other things, that in March, 1919, the Alien Property Custodian, acting under the provisions of the Trading with the Enemy Act, seized the trade-mark and the business of opposer in the United States appurtenant to said trade-mark by an instrument duly recorded in the Patent Office which, under article 7, sub section c, of the Trading with the Enemy Act, has the same force and effect as a duly-executed assignment to the Alien Property Custodian. Thereafter in April, 1919, said trade mark and the business of opposer in the United States appurtenant thereto were sold by the Alien Property Custodian to applicant and an assignment in writing recorded in the Patent Office, wherefor the applicant became owner of the trade-mark and the business in the United States appurtenant thereto of the opposer. The case was set down on motion under equity rule 29 to test the sufficiency of these allegations in the answer.

For the purposes of this case opposer admits that the seizure was legal and the sale was properly made and consummated. It is urged, however, that applicant is not entitled to reregister the mark in its own name for the reason that such registration may injure the reputation of opposer. It is stated that opposer has registered the mark in practically every country that has a trade mark law; that opposer's business is international, and that visitors to the United States will be deceived into purchasing applicant's goods in the belief that they are purchasing the same goods as opposer sells under the mark in their home countries. This, and the other arguments depending thereon are not sufficient to support the opposition. In *Imperial Cotto Sales Co.* v. *The N. K. Fairbanks Co.*, (284 O. G., 961.) the court of appeals has indicated that the redress accorded in opposition proceedings rests fundamentally upon the right of a person to be protected in the reputation and good-will of his business. The assignment having been made, it would seem that the entire reputation and good-will of the business in the United States rests with applicant here, and we should not be concerned with fine spun theories of putative damage to opposer's business or good-will in other parts of the world. If such damage arises, it will be caused, not by the registration now of the trade-mark, but by the transfer of the trade-mark and the business in the United States.

It is suggested that the mark is made up of the initials of opposer thus: "P B Co" and consequently the mark should not be registered to applicant under the holding in *Simplex Electric Heating Co.* v. *The Ramey Company*, (243 O. G., 793; 1917, C. D., 197; 46 App. D. C., 400.) This seems to be sufficiently met by the suggestion that the word

made from spelled out initials is not the name of opposer and that applicant is here claiming the mark through a transfer of opposer's business.

Opposer argues that applicant has changed the composition of the tooth-paste and so has changed the goods from what the mark originally indicated to the detriment of the international reputation of "Pebeco," but this is not pleaded or proven, and so need not be considered.

These matters, however, become of little moment, as opposer urges that—

under the existing Beiersdorf United States registration and the assignment thereof by the Alien Property Custodian, Lehn & Fink are vested with every right that is afforded by the trade-mark law of the United States. There is not a single provision of that law the benefits of which would be denied to Lehn & Fink, assuming the assignment to be valid, merely because Lehn & Fink's title was acquired by assignment rather than founded on a registration taken out by Lehn & Fink

and further that—

there is no authority, however, which authorizes such re-registration merely as a matter of whim or desire or where no good or sufficient reasons are shown to justify the same.

Applicant points out that this issue is not raised by the notice of opposition. It would seem, however, justified by *in re Herbst* (1909, C. D., 333; 32 App. D. C., 565) and *Schierling* v. *Schulze Baking Co.*, (240 O. G., 642; 46 App. D. C., 50.) These cases seem to meet the contention of applicant that the rights of the public have nothing to do with opposition proceedings.

Ex parte Shinola Company (177 O. G., 524) is cited as authority for the reregistration of the trade-mark by the applicant. That case indicates that such reregistration may occur "where good and sufficient reasons are shown to justify the same." The reasoning there seems to be based on the theory that in order to obtain trade-mark registration in foreign countries, such reregistration was necessary. Applicant has not cited and I am unable to find any single country of which this is true, and, moreover, in the present case it seems clear that Beiersdorf has the mark already registered throughout the world and applicant's right is limited to the United States.

Applicant intimates an assignee of a trade-mark has the absolute right to reregister the same, notwithstanding the guarded statement in the Shinola case. Applicant in its brief, however, urges reasons for its reregistration. It is more convenient to prove title if a suit should be necessary if the mark is registered in its own name. This is too trivial to outweigh the corresponding inconvenience to the public of having two co-existing registrations for the same mark. Applicant urges its desire to file copies of its registration with the collectors of customs to exclude goods made by opposer or some other and bearing the trade-mark in question. It seems, however, that this can be accomplished by filing in the Treasury Department the existing registration, together with the transfer thereof. Applicant further alleges that it "does not know whether the 1907 registration is valid." It would seem, however, that applicant must be fairly satisfied of this fact, since the annual report of the Federal Trade Commission for the year ending June 30, 1920, indicates that applicant had paid a royalty of $800,000 a year and on the purchase of the mark, paid $1,000,000. Applicant might have applied for cancelation under section 13 of the statute.

I am unable, however, to find in the trade-mark statutes any authority for reregistering a trade-mark merely because there has been a change in ownership. Section 12 of the act of 1905 provides that the certificate shall remain in force for twenty years. Section 10 provides for the assignment of a registered mark. Section 12 provides for the renewal of a certificate of registration upon request of the registrant—

or transferees of record in the Patent Office, and such request may be made at any time *not more than six months* prior to the expiration of the period for which the certificates of registration were issued or renewed.

It seems clear from this that Congress intended in this act to provide for but a single registration of a trade-mark. Congress has provided for a definite procedure when the trade-mark is assigned or transferred, and it would seem that the Office has exhausted its authority under the statute when it follows the procedure laid down in the statute. Applicant has followed the statute in recording in the Patent Office a transfer of the mark, and by such act it has procured every right which the statute can give it. For this reason we must grant opposer's prayer that the application for registration be denied.

The Examiner of Interferences is reversed, the opposition is sustained, and the registration now asked is refused to applicant.

DECISIONS OF THE U. S. COURTS.

U. S. Circuit Court of Appeals—Third Circuit.

AKRON-OVERLAND TIRE CO. *v.* WILLYS-OVERLAND CO.

Decided June 13, 1921.

[273 Fed. Rep., 674.]

1. TRADE-MARKS AND TRADE NAMES AND UNFAIR COMPETITION—TIRE MANUFACTURER HAS BUSINESS SUFFICIENTLY RELATED TO AUTOMOBILE-MAKER TO ENTITLE THE LATTER TO PREVENT APPROPRIATION OF NAME.

A corporation engaged in the business of retreading tires for automobiles, though not in direct competition with a manufacturer of automobiles, is engaged in a business so connected with automobiles that the public in buying the stocks and securities, as well as the tires, of the tire company might be misled by the use by the tire company of a distinctive word of the automobile company's name, so that the automobile company can restrain the use of such word, especially where it was shown that third parties had confused the tire company with the automobile company.

2. TRADE-MARKS AND TRADE NAMES AND UNFAIR COMPETITION—CHOICE OF NAME SIMILAR TO EXISTING BUSINESS IS EVIDENCE OF BELIEF CONFUSION WOULD THEREBY RESULT.

When a corporation with a practically unlimited field of distinctive names to choose from chose for the name of its tires the word "Overland," which was then well known by the public in connection with a make of automobiles, when such word had no connection or association with the automobile trade except that which the maker had given it, that fact in and of itself is evidence of the corporation's belief that its business and that of the automobile manufacturer concerned a common field and that the adoption of the name was calculated to confuse the public mind and enable the corporation to draw to itself the good will established by automobile manufacturer.

APPEAL from the District Court of the United States for the District of Delaware; Hugh M. Morris, judge.

Suit by the Willys-Overland Company against the Akron-Overland Tire Company to restrain the use by defendant of the name "Overland" in the transaction of its business. From a decree granting a preliminary injunction (268 Fed., 151) defendant appeals. Affirmed.

Mr. John R. Nicholson (*Warren H. Small* of counsel) for the appellant.

Mr. Robert G. Thach and *Mr. Andrew C. Gray* for the appellee.

Before BUFFINGTON, WOOLLEY, and DAVIS, Circuit Judges.

BUFFINGTON, *Cir. J.:*

In this case, the court below, on hearing, being of opinion, as recited in its decree, "that the use of the word 'Overland' by the defendant in its name, in the transaction of its business and in the threatened sale of its stock and securities, is calculated to lead the public to believe that the goods, stocks, and securities of the defendant are the goods, stocks, and securities of the complainant, and that thereby the complainant is irreparably injured," and the complainant having given an adequate indemnity bond, issued a preliminary injunction enjoining the defendant from using the word "Overland" pending the further order of the court. The facts of the case and the reasons and adjudged cases in support of the court's action, are set forth in its opinion printed in 268 Fed., 151.

[1] A study of the record shows that in the grant of a preliminary injunction there was no abuse by the court of the discretionary power vested in it upon such a showing of facts and circumstances as is there disclosed. We note the earnest contention of defendant's counsel that the case was one where there could be no unfair competition on the part of the defendant, because the defendant was not in business competition where the parties were not in competition in the same kind of business. In view of this contention we deem it proper to say the matter has had our serious consideration, and we find no ground to convict the court below of error, either in its use of authorities or in other regards; for, while it may be conceded that the plaintiff company manufactures automobiles and the defendant does not, and while the plaintiff does not make or sell automobile-tires, and the defendant retreads and sells tires, and in exact terms the two do not compete in these particular things, yet the fact remains that the business of both is so connected with automobiles that the public, in buying the stocks, securities, and retread-tires of the defendant company, by the use of the word "Overland" in connection therewith, will, by such descriptive word, be led to believe it is buying property or articles owned or dealt in by the plaintiff or one of its subsidiary companies. That the plaintiffs had in the word "Overland" a good will of high reputation and great value in connection with automobiles cannot be gainsaid. That the defendants' use of the word "Overland," in connection with the sale of its retread-tires and its stocks and securities, would enable it to share in the plaintiff's good will and reputation, also cannot be gainsaid. That such use of the word "Overland" by the defendant would breed confusion and misunderstanding in the minds of the public is foreshadowed by what did happen in the way of third parties confusing and connecting the defendant and its acts with the plaintiff company, and even holding the plaintiff accountable for such acts. Indeed, it is manifest that under the facts of this case the maintenance by the plaintiff of the good will attributed to Overland business and products would, in the future, be determined, not alone by what the plaintiff did to uphold the standard of that good will, but by what the defendant might do by failure to uphold such reputation and maintain such good will.

[2] Moreover, with a practically unlimited field of distinctive names open to it for choice, when the defendant lately entered the automobile industry, the fact that it chose to take a name that had no connection or association with the automobile trade, except the good will and association which the plaintiff had given it, shows conclusively that the name was given to this new venture in the automobile field because of its established high regard in that industry, which had been given it by the plaintiff. We are not misled by suggestions that the name "Overland" had significance from the Overland Trail and affairs of 80 years ago. But we are impressed by the fact that at the present time, and for some years past, the word "Overland" has been closely associated in the public mind, with the plaintiff company's automobile business. Under such conditions the taking of the name Overland by the defendant, when it went into the automobile business, and its using that name in connection with its automobile business, in and of itself evidences the belief of the defendant that its business and the plaintiff's business concern a common field of business endeavor, and that the public would recognize, by the use of the word "Overland," that the business of both concerned the automobile business.

It will thus be seen that the business of both companies, because they both concerned some phase of automobile activity, were interrelated, and that since the operations of the plaintiff company in that field were known to, and described by, the public by the business or trade name of "Overland," it necessarily followed that, when the defendant company sought to also describe its

ventures by the trade name "Overland," it was calculated to confuse the public mind and enabled the defendant to draw to itself, and to draw from the plaintiff, the exclusive trade name and trade good will which the plaintiff, by a business course of years, had given to the word "Overland" in connection with the automobile industry. Such being the fact, it follows that both the English and American authorities justify the court below in its action, for in fact there was substantial and material competition between these parties.

Taking the case on the whole, we find no abuse of discretion on the part of the court below in the grant of its injunction.

ADJUDICATED PATENTS.

(U. S. D. C. Conn.) The Carnes patent, No. 760,102. claims 1 and 4, for mechanical artificial arm and hand, *Held* valid and infringed. *Carnes Artificial Limb Co.* v. *Dilworth Arm Co.*, 273 Fed. Rep., 838.

(U. S. D. C. N. J.) The Corby reissue patent, No. 11,751, for the making and shaping of dough, *Held* valid and infringed. *Weber* v. *Ward Baking Co.*, 273 Fed. Rep., 818.

(U. S. C. C. A. Pa.) The Jones reissue patent, No. 14,341, for incandescent-lamp socket, not infringed. *General Electric Co.* v. *Philadelphia Electric & Mfg. Co.*, 273 Fed. Rep., 897.

(U. S. C. C. A. Cal.) The Zidell patent, No. 54,809, for child's romper, *Held* not to disclose invention. *Faris* v. *Patsy Frok & Romper Co.*, 273 Fed. Rep., 900.

[Vol. 290. No. 4.]

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 6TH DAY OF SEPTEMBER, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Aber, Edgar, St. Joseph, Mich. Flue-scraper. No. 1,390,072; Sept. 6; v. 290; p. 104.
Adams, Thoms F., *et al.* (See Garrard, William B., assignor.)
Adams, Thomas W. (See Seymour, C. R., Hoch, and Adams.)
Adams, William, Hartselle, Ala. Plant-chopping machine. No. 1,389,570; Sept. 6; v. 290; p. 3.
Ahlmgren, Walborg, New York, N. Y. assignor of one-third to H. C. Karlson, Hasbrouck Heights, N. J., and one-third to C. A. Bursell, New York, N. Y. Toy carousel. No. 1,389,926; Sept. 6; v. 290; p. 74.
Akimoff, Nicholas W., Wynnewood, assignor to General Machinery Foundations Company, Philadelphia, Pa. Hinge connection. No. 1,389,728; Sept. 6; v. 290; p. 34.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 6TH DAY OF SEPTEMBER, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Abradant-supplying apparatus. W. G. Hastings. No. 1,390,128; Sept. 6; v. 290; p. 115.

Accretions, Removing. S. R. Garr and R. F. Barker. No. 1,389,751; Sept. 6; v. 290; p. 88.

Acids, Manufacture of naphthalene sulfonic. J. A. Ambler and H. D. Gibbs. No. 1,390,241; Sept. 6; v. 290; p. 136.

Acoustic diaphragm. W. H. Davis and F. E. Joss. No. 1,389,632; Sept. 6; v. 290; p. 14.

Aero-propeller efficiency-indicator. T. P. Horne. No. 1,389,830; Sept. 6; v. 290; p. 54.

Aeroplane-propeller. G. F. Welher. No. 1,389,609; Sept. 6; v. 290; p. 10.

Aeroplanes, Metal fitting for assembling longitudinals and uprights in. P. J. R. Postel-Vinay. No. 1,390,216; Sept. 6; v. 290; p. 132.

Agricultural implements, Power. G. C. Wooddell and H. C. Reeser. No. 1,389,612; Sept. 6; v. 290; p. 10.

Air and gas, Blower and exhauster for moving. C. M. Conder. No. 1,390,237; Sept. 6; v. 290; p. 135.

Airplane. R. M. Thompson. No. 1,389,797; Sept. 6; v. 290; p. 48.

Airplane-brake. C. V. Haynes. No. 1,389,757; Sept. 6; v. 290; p. 39.

Airscrew having adjustable blades. W. C. Russell. No. 1,389,991; Sept. 6; v. 290; p. 87.

Alloy of iron zirconium and silicon and the production thereof. N. Petinot. No. 1,389,695; Sept. 6; v. 290; p. 27.

Alloy of nickel and iron and the production thereof. N. Petinot and R. Turnbull. No. 1,389,696; Sept. 6; v. 290; p. 27.

Alphabet, Means for classifying biformed. G. Fabyan. No. 1,390,027; Sept. 6; v. 290; p. 94.

Animal-trap. L. Chute. No. 1,389,626; Sept. 6; v. 290; p. 13.

Animal-trap. J. R. Eastridge. No. 1,389,636; Sept. 6; v. 290; p. 15.

Antiskid device. I. J. Thompson. No. 1,389,607; Sept. 6; v. 290; p. 9.

Apron. H. W. Parker. No. 1,389,689; Sept. 6; v. 290; p. 26.

Arch-supporter. W. M. Ludwig. No. 1,389,767; Sept. 6; v. 290; p. 41.

Auger. R. W. Charlton. No. 1,389,578; Sept. 6; v. 290; p. 4.

Auto-shoe-expanding tool. C. A. Moore and D. K. Thornton. No. 1,389,837; Sept. 6; v. 290; p. 56.

Automobile accessory. E. M. Rosenbluth. No. 1,389,901; Sept. 6; v. 290; p. 69.

Automobile attachment. J. M. Sears. No. 1,389,847; Sept. 6; v. 290; p. 58.

Automobile attachment. M. Von Babo. No. 1,389,717; Sept. 6; v. 290; p. 32.

Automobile-cover. P. F. King. No. 1,390,187; Sept. 6; v. 290; p. 117.

Automobile gasolene-shut-off apparatus. A. C. Keppler. No. 1,389,876; Sept. 6; v. 290; p. 64.

Automobile-headlight. C. G. Worley. No. 1,389,726; Sept. 6; v. 290; p. 33.

Automobile-jack. V. V. Curtis. No. 1,390,090; Sept. 6; v. 290; p. 107.

Automobile-lock. F. O. Boswell. No. 1,389,933; Sept. 6; v. 290; p. 76.

Automobile-pump. J. G. Perrin. No. 1,389,782; Sept. 6; v. 290; p. 45.

Automobile-radiator. O. Froberg. No. 1,389,749; Sept. 6; v. 290; p. 38.

Automobile-signal. G. E. Davis. No. 1,390,094; Sept. 6; v. 290; p. 108.

Automobile-signal. G. Lockhart. No. 1,389,673; Sept. 6; v. 290; p. 23.

Automobile-signal. L. J. Miller and W. W. Christian. No. 1,390,150; Sept. 6; v. 290; p. 119.

Automobile steering control. D. A. Boswell. No. 1,389,620; Sept. 6; v. 290; p. 12.

Automobile-wheel rim. A. J. Kobanski. No. 1,390,141; Sept. 6; v. 290; p. 117.

Automobiles, Clutch control for. F. S. Maynard. No. 1,390,148; Sept. 6; v. 290; p. 119.

Automobiles, Combination seat and bed for. L. G. Taylor. No. 1,390,177; Sept. 6; v. 290; p. 124.

Automobiles, Control apparatus for transmissions and brakes of. C. B. and L. F. Day, and J. F. Baker. No. 1,389,816; Sept. 6; v. 290; p. 51.

Automobiles, Sash-lifting device for. O. W. Whitehead. No. 1,390,003; Sept. 6; v. 290; p. 89.

Automobiles, Tractor attachment for. J. D. Caldwell. No. 1,389,576; Sept. 6; v. 290; p. 4.

Axles, Lubricating device for railway-vehicle. E. Mooney. No. 1,389,965; Sept. 6; v. 290; p. 82.

Back and belly band holder. J. H. Forme. No. 1,390,115; Sept. 6; v. 290; p. 113.

Bacterial cultures, Receptacle for. M. J. Hollowood. No. 1,389,659; Sept. 6; v. 290; p. 20.

Badge and detachable watch-guard, Combined. L. E. Thomas. No. 1,389,711; Sept. 6; v. 290; p. 30.

Basket, Shipping. W. L. Pitts. No. 1,389,897; Sept. 6; v. 290; p. 69.

Bathtubs, Backrest for. M. Stern. No. 1,390,221; Sept. 6; v. 290; p. 132.

Batteries, Apparatus for charging storage. W. R. Hersh. No. 1,389,871; Sept. 6; v. 290; p. 63.

Batteries, Electrolyte for storage. W. Gardiner. No. 1,389,750; Sept. 6; v. 290; p. 38.

Battery: *See*—
Dry-cell electric battery.

Bearing. H. A. S. Howarth. No. 1,390,130; Sept. 6; v. 290; p. 115.

Bearing. H. A. S. Howarth. No. 1,390,131; Sept. 6; v. 290; p. 116.

Bearing for spreader-shafts. H. Synck. No. 1,389,606; Sept. 6; v. 290; p. 9.

Bearing, Shaft-hanger. H. R. Reynolds. (Reissue.) No. 15,187; Sept. 6; v. 290; p. 140.

Bed, Folding couch-. H. H. Megary. No. 1,390,248; Sept. 6; v. 290; p. 137.

Bed, Panel-. M. F. Bayer. No. 1,389,931; Sept. 6; v. 290; p. 75.

Bed-spring frame. M. F. Bayer. No. 1,389,930; Sept. 6; v. 290; p. 75.

Beet-topping apparatus. M. A. Smith. No. 1,389,708; Sept. 6; v. 290; p. 29.

Bell, Clock and call-. E. I. Halsted. No. 1,390,127; Sept. 6; v. 290; p. 115.

Belt or cord and machine and process for making the same, Endless. E. Rivett. No. 1,389,699; Sept. 6; v. 290; p. 27.

Belt tightener and lacer. C. S. Humbert. No. 1,389,760; Sept. 6; v. 290; p. 40.

Binder, Adjustable. A. H. De Voe. No. 1,390,195; Sept. 6; v. 290; p. 128.

Binder, Loose-leaf. J. T. Brumfield. No. 1,390,016; Sept. 6; v. 290; p. 92.

Biscuit and doughnut cutter. G. E. Kirkpatrick. No. 1,390,138; Sept. 6; v. 290; p. 117.

Board: *See*—
Scoop-board.

Boat. T. L. Fox. No. 1,389,865; Sept. 6; v. 290; p. 61.

Boats, Motor-propeller for. A. N. Thompson and A. P. Knauber. No. 1,389,712; Sept. 6; v. 290; p. 30.

Boiler-brace. R. J. McKay and F. R. Cooper. No. 1,389,889; Sept. 6; v. 290; p. 67.

Boiler-furnace. A. Spyer. No. 1,390,225; Sept. 6; v. 290; p. 133.

Bolt: *See*—
Drawbolt.

Bolt-machines, Feeding mechanism for. H. Thomas. No. 1,389,916; Sept. 6; v. 290; p. 72.

Book covering and binding machine. C. A. Juengst. No. 1,389,762; Sept. 6; v. 290; p. 40.

Book, Loose-leaf. T. E. Heeter. No. 1,389,658; Sept. 6; v. 290; p. 20.

Book, Record and reference. A. R. Towers. (Reissue.) No. 15,189; Sept. 6; v. 289; p. 140.

Book-support. A. Rodow. No. 1,389,700; Sept. 6; v. 290; p. 28.

Bookkeeping apparatus and the like. F. M. Holmes. No. 1,389,872; Sept. 6; v. 290; p. 63.

Bottle-capper. L. M. Rouse. No. 1,389,786; Sept. 6; v. 290; p. 46.

Box: *See*—
Gas-mantle box. Sound-box.

Box. J. B. Fox. No. 1,390,116; Sept. 6; v. 290; p. 113.

Box-gluing apparatus. O. A. Lucas. No. 1,390,052; Sept. 6; v. 290; p. 100.
Box-sealing machine. W. Peet. No. 1,390,059; Sept. 6; v. 290; p. 101.
Boxes and covers, Chart for selecting outlet-. H. G. Knoderer. No. 1,390,044; Sept. 6; v. 290; p. 98.
Brace: *See*—
Boiler-brace.
Braiding-machine. A. Littlefield. No. 1,389,672; Sept. 6; v. 290; p. 28.
Brake: *See*—
Airplane-brake. Electropneumatic brake.
Brake-levers, Manufacturing. W. A. Kern. No. 1,390,207; Sept. 6; v. 290; p. 130.
Brake mechanism. H. Lantz. No. 1,389,952; Sept. 6; v. 290; p. 79.
Breeding-crate. J. C. Schuls. No. 1,389,993; Sept. 6; v. 290; p. 87.
Brick, tile, &c., Material for and forming. L. Jones and C. Westlake, Jr. No. 1,390,038; Sept. 6; v. 290; p. 97.
Brush, Fountain-. O. James. No. 1,389,665; Sept. 6; v. 290; p. 21.
Brush, Fountain paint-. F. J. and A. H. Miller. No. 1,389,772; Sept. 6; v. 290; p. 42.
Brush, Radiator-. E. M. Martin. No. 1,389,957; Sept. 6; v. 290; p. 80.
Buckle, Apparel-. A. H. Kerngood. No. 1,389,948; Sept. 6; v. 290; p. 79.
Builders' planks from cement, Machine for cleaning. P. Sauset. No. 1,390,218; Sept. 6; v. 290; p. 132.
Bunk, Double-deck. A. Phippa. No. 1,389,697; Sept. 6; v. 290; p. 27.
Burner for heating-stoves. O. J. Rosselot. No. 1,389,990; Sept. 6; v. 290; p. 86.
Burner-support. S. Pearson. No. 1,389,841; Sept. 6; v. 290; p. 57.
Cable-repair device. R. N. Riblet. No. 1,389,785; Sept. 6; v. 290; p. 45.
Cages, lifts, and the like, Safety device for mine-. W. Griffin. No. 1,389,867; Sept. 6; v. 290; p. 62.
Calculating-machine. F. Trinks. No. 1,390,130; Sept. 6; v. 290; p. 125.
Calendar. A. J. McDade. No. 1,389,676; Sept. 6; v. 290; p. 23.
Calendar-pad and holder therefor. F. A. Hale. No. 1,389,754; Sept. 6; v. 290; p. 39.
Calf-weaner. F. Schmidt. No. 1,390,061; Sept. 6; v. 290; p. 102.
Calk-lock. E. C. Sadler. No. 1,390,165; Sept. 6; v. 290; p. 122.
Camera, Photographic. M. P. Sarfaty. No. 1,389,992; Sept. 6; v. 290; p. 87.
Cameras, Adjustable curtain for. J. E. Leonard. No. 1,390,246; Sept. 6; v. 290; p. 137.
Cameras, Film-moving mechanism for motion-picture. J. E. Leonard. No. 1,390,247; Sept. 6; v. 290; p. 137.
Cameras, Register for. S. L. Hagan. No. 1,389,827; Sept. 6; v. 290; p. 54.
Can-closing machine. L. C. Sharp. No. 1,389,704; Sept. 6; v. 290; p. 29.
Can-end-lining machine. C. W. Graham. No. 1,389,752; Sept. 6; v. 290; p. 38.
Can-ends to can-bodies, Hermetically attaching. D. P. Robinson. No. 1,389,900; Sept. 6; v. 290; p. 69.
Can heading and flanging machine. L. C. Sharp. No. 1,389,703; Sept. 6; v. 290; p. 28.
Candle-molding machine. J. Dillman. No. 1,390,257; Sept. 6; v. 290; p. 139.
Canning apparatus. E. W. B. Kugel. No. 1,390,142; Sept. 6; v. 290; p. 118.
Car-fender. W. B. Garrard. No. 1,389,943; Sept. 6; v. 290; p. 78.
Car for children, Adjustable. C. Bradway. No. 1,389,854; Sept. 6; v. 290; p. 59.
Car, Scooter-. J. Dittrick, Sr. No. 1,389,633; Sept. 6; v. 290; p. 15.
Car-ventilator. A. Steger. No. 1,389,788; Sept. 6; v. 290; p. 46.
Cars, Safety-signal for street-. H. P. Hoppe. No. 1,389,660; Sept. 6; v. 290; p. 21.
Cars, Side bearing for railway-. E. Posson. No. 1,389,698; Sept. 6; v. 290; p. 27.
Carbonaceous substance, Transporting. L. W. Bates. No. 1,390,230; Sept. 6; v. 290; p. 134.
Carbureter. S. Walker. No. 1,389,719; Sept. 6; v. 290; p. 32.
Card-exhibitor. M. Mather. No. 1,389,592; Sept. 6; v. 290; p. 6.
Card, Index-. L. A. Gale. No. 1,390,199; Sept. 6; v. 290; p. 128.
Card-sorting-machine attachment. C. D. Lake. No. 1,389,951; Sept. 6; v. 290; p. 79.
Carrier: *See*—
Tire-carrier.
Carton, Container and display-. W. M. and C. J. Doering. No. 1,390,196; Sept. 6; v. 290; p. 128.
Case: *See*—
Display-case. Sample-case.
Cash-drawer, Automatic. C. R. Randall. No. 1,389,981; Sept. 6; v. 290; p. 85.
Caster-cup, Adjustable. E. H. Berg. No. 1,389,572; Sept. 6; v. 290; p. 3.
Castings, Mold for plural. J. G. Webb. No. 1,389,722; Sept. 6; v. 290; p. 33.
Cellulosic solutions, Flow-controller for. F. G. Kraft. No. 1,389,834; Sept. 6; v. 290; p. 55.
Chair: *See*—
Convertible chair.
Chandelier, Electric-light. S. M. Israel. No. 1,389,881; Sept. 6; v. 290; p. 55.
Cheese and sterilizing the same. L. E. Carpenter and E. E. Eldredge. No. 1,389,577; Sept. 6; v. 290; p. 4.
Chocolate, &c., Process and apparatus for refining. W. C. Schöppner. No. 1,390,251; Sept. 6; v. 290; p. 138.
Chopper: *See*—
Corn and cotton chopper. Cotton-chopper.
Chuck. W. A. Barker. No. 1,389,731; Sept. 6; v. 290; p. 34.
Chuck. G. A. Olin. No. 1,389,974; Sept. 6; v. 290; p. 84.
Cigar-box-lid holder and display-ticket. C. S. Gunter. No. 1,390,125; Sept. 6; v. 290; p. 114.
Cigarette-holder. C. H. Plumer. No. 1,389,842; Sept. 6; v. 290; p. 57.
Cinematography, Color. F. R. Miller. No. 1,389,963; Sept. 6; v. 290; p. 82.
Circuit-closer for sheet-trips. C. R. Seymour, O. M. Hoch, and T. W. Adams. No. 1,389,968; Sept. 6; v. 290; p. 83.
Circuits, Desk-operator's. W. A. Rhodes. No. 1,389,596; Sept. 6; v. 290; p. 7.
Clamp. W. F. Conklin. No. 1,390,087; Sept. 6; v. 290; p. 107.
Clamp. B. E. Hilborn. No. 1,389,587; Sept. 6; v. 290; p. 5.
Cleaner: *See*—
Spark-plug cleaner.
Clip: *See*—
Display-clip.
Clock, Master-. J. W. Bryce. No. 1,390,018; Sept. 6; v. 290; p. 93.
Clock, watch, and the like timekeeping instrument. A. Jarred. No. 1,389,666; Sept. 6; v. 290; p. 21.
Clocks, Frame for electromagnetic. M. P. Favre-Bulle. No. 1,390,110; Sept. 6; v. 290; p. 112.
Clothes hanger and presser. M. G. McNeely. No. 1,390,054; Sept. 6; v. 290; p. 100.
Clothesline. M. H. McKinley. No. 1,389,681; Sept. 6; v. 290; p. 24.
Clothespins, Machine for making wire. J. Muck. No. 1,389,893; Sept. 6; v. 290; p. 68.
Clutch, Friction-. J. A. Bried. No. 1,389,855; Sept. 6; v. 290; p. 60.
Cocks, Wrench for stop and waste. E. C. Buehler. No. 1,389,736; Sept. 6; v. 290; p. 35.
Coffee and like infusions, Machine for making. P. T. Arduino. No. 1,390,008; Sept. 6; v. 290; p. 90.
Coffee-roasters, Cooling-receiver for. H. H. Moenkhaus. No. 1,389,964; Sept. 6; v. 290; p. 82.
Coin-counting machine. E. P. Donnellan. No. 1,389,634; Sept. 6; v. 290; p. 15.
Collapsible tubes, Retainer for the closure-caps of. D. Marinsky. No. 1,389,956; Sept. 6; v. 290; p. 80.
Collar-holder. W. J. McClellan. No. 1,389,675; Sept. 6; v. 290; p. 23.
Collar-holder. C. Silverman. No. 1,389,604; Sept. 6; v. 290; p. 9.
Colorimeter and the like. M. Mooney. No. 1,389,836; Sept. 6; v. 290; p. 56.
Comb and reed, Lease. T. K. Rea. No. 1,390,162; Sept. 6; v. 290; p. 121.
Commercial instrument. G. B. Stillwagon. No. 1,389,849; Sept. 6; v. 290; p. 58.
Concrete bodies, Mold-core for. F. Emmrich. No. 1,390,104; Sept. 6; v. 290; p. 110.
Concrete construction, Reinforced. F. D. Wolfe. No. 1,389,803; Sept. 6; v. 290; p. 49.
Concrete-molding form. I. E. Deal. No. 1,389,817; Sept. 6; v. 290; p. 52.
Concrete products, Molding of. W. R. Hume. No. 1,390,134; Sept. 6; v. 290; p. 116.
Concrete, Reinforced. E. Freyssinet. No. 1,389,942; Sept. 6; v. 290; p. 78.
Concrete-reinforcing metal unit for the walls, floors, and ceilings of buildings and for other concrete construction work, O. Allen. No. 1,390,073; Sept. 6; v. 290; p. 104.
Concrete walls, Form for. E. Troolin. No. 1,390,066; Sept. 6; v. 290; p. 103.
Cone-baking machine. W. E. Moore. No. 1,389,774; Sept. 6; v. 290; p. 43.
Container. P. Zaikind. No. 1,389,923; Sept. 6; p. 290; p. 74.
Convertible chair. L. E. Erbeau. No. 1,389,940; Sept. 6; v. 290; p. 77.
Cooker, Fireless. J. E. Chambers. No. 1,389,813; Sept. 6; v. 290; p. 51.
Cooking utensil. M. M. May. No. 1,389,770; Sept. 6; v. 290; p. 42.
Cooling chocolates, &c., Machine for. F. W. Leyland and E. P. Brock. No. 1,389,887; Sept. 6; v. 290; p. 66.
Coping and notching machine, Combination. H. B. Kraut. No. 1,389,878; Sept. 6; v. 290; p. 64.
Core, Collapsible. T. Midgley, Sr. No. 1,389,892; Sept. 6; v. 290; p. 67.
Corn and cotton chopper. J. C. Smith. No. 1,390,178; Sept. 6; v. 290; p. 124.
Corn-sheller. A. E. Gilman. No. 1,390,080; Sept. 6; v. 290; p. 95.

Corner-fastening. F. Kusterle. No. 1,389,950; Sept. 6; v. 290; p. 79.
Cotton-blocking machine. B. S. Ford. No. 1,390,114; Sept. 6; v. 290; p. 112.
Cotton-chopper. J. L. Doss. No. 1,389,100; Sept. 6; v. 290; p. 110.
Cotton-seed-meal press. J. R. McClung. No. 1,390,053; Sept. 6; v. 290; p. 100.
Coupling: *See*—
Impulse-coupling. Rod-coupling.
Coupling for rods. T. B. Stanley. No. 1,389,787; Sept. 6; v. 290; p. 46.
Coveralls. F. Baronio. No. 1,390,010; Sept. 6; v. 290; p. 91.
Crossing-signal. T. W. Varley and W. C. Nein. No. 1,390,068; Sept. 6; v. 290; p. 103.
Crusher-roll. C. G. Buchanan. No. 1,390,019; Sept. 6; v. 290; p. 93.
Cup: *See*—
Caster-cup. Oil-cup.
Grease-cup. Priming cup.
Current transformer, Constant-. L. Arnold. No. 1,390,074; Sept. 6; v. 290; p. 104.
Curtain-support. K. Forbes. No. 1,390,113; Sept. 6; v. 290; p. 112.
Cutter: *See*—

Turning and beading machine. P. R. Glass. No. 1,389,643; Sept. 6; v. 290; p. 17.
Twine-holder. W. and W. A. Crabtree. No. 1,389,863; Sept. 6; v. 290; p. 61.
Type-metal-slug-casting machine, Apparatus for cooling molds of. W. E. Borst and C. C. Gilleo. No. 1,389,573; Sept. 6; v. 290; p. 61.
Typewriter. C. Spiro. No. 1,389,911; Sept. 6; v. 290; p. 71.
Typewriting-machine. A. G. F. Kurowski. No. 1,389,949; Sept. 6; v. 290; p. 79.
Typewriting-machine. J. Waldheim. No. 1,389,718; Sept. 6; v. 290; p. 32.
Union-suit. C. A. Clements. No. 1,390,086; Sept. 6; v. 290; p. 107.
Universal joint. E. Noel. No. 1,389,970; Sept. 6; v. 290; p. 83.
Universal joint. E. Noel. No. 1,389,971; Sept. 6; v. 290; p. 83.
Universal joint. G. H. Thomas. No. 1,389,915; Sept. 6; v. 290; p. 72.
Urn, Beverage-. W. F. Clark. No. 1,389,628; Sept. 6; v. 290; p. 13
Valve. G. B. McCracken. No. 1,389,955; Sept. 6; v. 290; p. 80.
Valve, Auxiliary clearance-. W. Turnwald. No. 1,390,239; Sept. 6; v. 290; p. 136.
Valve-seats, Forming. W. E. Coakley. No. 1,390,022; Sept. 6; v. 290; p. 93.
Vault, Burial-. P. I. Frost. No. 1,390,121; Sept. 6; v. 290; p. 114.
Vehicle-body equalizing means. A. Kadow. No. 1,389,648; Sept. 6; v. 290; p. 18.
Vehicle-frames, Cushioning device and support for. L. E. Clawson. No. 1,390,021; Sept. 6; v. 290; p. 93.
Vehicle-jack. W. E. Burrows. No. 1,389,737; Sept. 6; v. 290; p. 36.
Vehicle, Motor-. S. Khalil. No. 1,389,764; Sept. 6; v. 290; p. 41.
Vehicle-rim. C. B. Keenum. No. 1,389,649; Sept. 6; v. 290; p. 18.
Vehicle-tank construction. A. A. Kramer. No. 1,390,045; Sept. 6; v. 290; p. 98.
Vehicle-top. A. H. Lichter. No. 1,389,671; Sept. 6; v. 290; p. 23.
Vehicle-wheel. J. L. Cohen. No. 1,389,629; Sept. 6; v. 290; p. 14.
Vehicle-wheel. J. L. Cohen. No. 1,389,938; Sept. 6; v. 290; p. 77.
Vehicle-wheel. S. J. Mardis. No. 1,389,891; Sept. 6; v. 290; p. 67.
Vehicle-wheel. F. B. Mulford. No. 1,389,778; Sept. 6; v. 290; p. 44.
Vehicle-wheel. O. Tromlitz. No. 1,389,798; Sept. 6; v. 290; p. 48.

Vehicles, Collapsible top-frame for. G. L. Smith. No. 1,390,219; Sept. 6; v. 290; p. 132.
Vehicles, Collapsible top-frame for. G. L. Smith. No. 1,390,220; Sept. 6; v. 290; p. 132.
Vehicles, Coupling device for. R. J. Neely. No. 1,389,840; Sept. 6; v. 290; p. 57.
Vehicles, Dynamo construction for motor-. J. Bijur. No. 1,390,077; Sept. 6; v. 290; p. 105.
Vehicles, Lift for motor-. J. H. Fangmann. No. 1,390,109; Sept. 6; v. 290; p. 111.
Vehicles, Propelling mechanism for. J. R. Broach. No. 1,389,735; Sept. 6; v. 290; p. 35.
Vehicles, Spring suspension of self-propelled. H. S. Neale. No. 1,389,839; Sept. 6; v. 290; p. 56.
Vending-machine. E. F. Bowen and E. J. Scott. No. 1,389,811; Sept. 6; v. 290; p. 50.
Vending-machine for grocery commodities and the like. W. J. Goudeau. No. 1,390,031; Sept. 6; v. 290; p. 95.
Ventilator: *See*—
Car-ventilator.
Ventilator. A. Pfau. No. 1,389,896; Sept. 6; v. 290; p. 68.
Vessels, Construction for raising sunken. P. Donaire. No. 1,390,097; Sept. 6; v. 290; p. 109.
Vibrator. E. O. Hatten. No. 1,389,586; Sept. 6; v. 290; p. 5.
Vise-post. J. F. Bixler and J. A. Long. No. 1,390,189; Sept. 6; v. 290; p. 127.
Vulcanizer. A. J. Savage. No. 1,389,599; Sept. 6; v. 290; p. 8.
Vulcanizing, Method of and apparatus for. J. C. Young. No. 1,390,005; Sept. 6; v. 290; p. 90.
Wall-switches and like objects, Self-luminous marker for. R. W. Erdle. No. 1,389,941; Sept. 6; v. 290; p. 77.
Washing device. A. H. Struve. No. 1,390,176; Sept. 6; v. 290; p. 124.
Washing-machine. G. S. Blakeslee. No. 1,389,853; Sept. 6; v. 290; p. 59.
Washing-machine. L. T. Price. No. 1,390,160; Sept. 6; v. 290; p. 121.
Washing-machine. F. E. Wolcott. No. 1,390,224; Sept. 6; v. 290; p. 133.
Waterproof gum. S. E. Brick. No. 1,389,575; Sept. 6; v. 290; p. 3.
Waterproofing composition and making same. A. de Cicilliani. No. 1,390,236; Sept. 6; v. 290; p. 135.
Weight-lifting device. E. E. Chapman. No. 1,389,814; Sept. 6; v. 290; p. 51.
Welding low-melting-point metals and alloys to high-melting-point metals. C. A. Laise. No. 1,390,243; Sept. 6; v. 290; p. 136.
Well. P. Weaver and H. C. Craig. No. 1,389,920; Sept. 6; v. 290; p. 73.
Well-drilling apparatus. E. C. Drake. No. 1,390,025; Sept. 6; v. 290; p. 94.
Wheel: *See*—
Disk wheel. Suspension-wheel.
Gear-wheel. Tractor-wheel.
Grinding-wheel. Vehicle-wheel.
Non-skid wheel.
Wheel. G. Baumann. No. 1,389,807; Sept. 6; v. 290; p. 49.
Wheel and resilient tire for road-vehicles. W. Alderson. No. 1,389,729; Sept. 6; v. 290; p. 34.
Wheel rim, Vehicle-. J. H. Cockrill. No. 1,389,937; Sept. 6; v. 290; p. 76.
Wheels, Demountable-rim lock for vehicle-. R. M. Baird. No. 1,390,186; Sept. 6; v. 290; p. 126.
Wheels, Resilient hub for. T. M. Wright. No. 1,390,226; Sept. 6; v. 290; p. 134.
Wind-guard. M. W. Carroll, Jr. No. 1,389,935; Sept. 6; v. 290; p. 76.
Window and door lock. M. Subber. No. 1,389,709; Sept. 6; v. 290; p. 30.
Window-frame and chute structure. W. H. Taylor. No. 1,390,178; Sept. 6; v. 290; p. 125.
Windows, Curtain-guard for. A. H. Reimann. No. 1,389,843; Sept. 6; v. 290; p. 57.
Wire connection, Ground-. C. J. Barrow. No. 1,389,929; Sept. 6; v. 290; p. 75.
Wire-drawing machinery, Continuous. M. Howarth. No. 1,390,132; Sept. 6; v. 290; p. 116.
Work-piece-feeding mechanism. E. V. and V. Swangren. No. 1,389,790; Sept. 6; v. 290; p. 46.
Wrecking-tool. A. Downey. No. 1,389,820; Sept. 6; v. 290; p. 52.
Wrench: *See*—

Emblem, badge, or similar article to be applied to ties, shirts, and similar articles of wearing-apparel. W. H. Moore, Jr. No. 58,928; Sept. 6; v. 290; p. 153.
Fabric, Brocade. J. H. Bunting. No. 58,876; Sept. 6; v. 290; p. 143.
Fabric, Textile. J. H. Bunting. Nos. 58,877–8; Sept. 6; v. 290; p. 143.
Fabric, Textile. A. Eisele. No. 58,897; Sept. 6; v. 290; p. 148.
Fabric, Textile. C. Katz. No. 58,913; Sept. 6; v. 290; p. 150.
Fabric used in upholstering and decorating. C. L. G. Bianchini. Nos. 58,870–3; Sept. 6; v. 290 p. 142.
Footrest. T. P. Schott. No. 58,946; Sept. 6; v. 290; p. 157.
Game-board. A. Oehmann. No. 58,937; Sept. 6; v. 290; p. 155.
Garment. F. Nesmith. No. 58,929; Sept. 6; v. 290; p. 153.
Gas-burner. H. E. Kerr and W. J. Barber. No. 58,914; Sept. 6; v. 290; p. 151.
Head and neck covering, Combined. S. Rosenberg. No. 58,944; Sept. 6; v. 290; p. 157.
Humidor for cigars. G. Teasdale. No. 58,955; Sept. 6; v. 290; p. 158.
Knitted cap. D. F. Byrnes. No. 58,879; Sept. 6; v. 290; p. 144.
Knitted cap. W. B. Tyrrell. No. 58,957; Sept. 6; v. 290; p. 159.
Lamp, Boudoir-. J. S. Apfel. Nos. 58,864–5; Sept. 6; v. 290; p. 141.
Lamp-globe. C. A. Campbell. No. 58,880; Sept. 6; v. 290; p. 144.
Lamp stand, Electric-. C. H. Elliott and A. Supansick. No. 58,898; Sept. 6; v. 290; p. 148.
Lens, Front of a signal. O. Kroehle. No. 58,916; Sept. 6; v. 290; p. 151.
Lighting-fixture-rosette. J. W. Schulze. No. 58,947; Sept. 6; v. 290; p. 157.
Lighting-fixture unit. H. Cohn. No. 58,884; Sept. 6; v. 290; p. 145.
Lighting-fixture unit. H. Cohn. No. 58,887; Sept. 6; v. 290; p. 146.
Lighting-fixture unit. H. Cohn. No. 58,889; Sept. 6; v. 290; p. 146.
Lighting-fixture unit. H. Cohn. No. 58,892; Sept. 6; v. 290; p. 147.
Lighting-fixture wall-plate. H. Cohn. No. 58,891; Sept. 6; v. 290; p. 147.
Lighting-fixture, Wall-plate of a bracket for a. H. Cohn. No. 58,890; Sept. 6; v. 290; p. 146.
Lighting-fixtures, Back-plate of a wall-bracket for. H. Cohn. No. 58,882; Sept. 6; v. 290; p. 144.
Lightning-fixtures, Back-plate of a wall-bracket for. H. Cohn. No. 58,886; Sept. 6; v. 290; p. 145.

Lighting-fixtures, Bracket-arm for. H. Cohn. No. 58,883; Sept. 6; v. 290; p. 145.
Lighting-fixtures, Combined wall-bracket and socket-cover for. H. Cohn. No. 58,885; Sept. 6; v. 290; p. 145.
Lighting-fixtures, Three-way plate for. H. Cohn. No. 58,888; Sept. 6; v. 290; p. 146.
Medicinal container. H. D. Sebring. No. 58,948; Sept. 6; v. 290; p. 157.
Motor-fan guard. A. C. Gilbert. No. 58,903; Sept. 6; v. 290; p. 149.
Paper doll. F. Benson. No. 58,868; Sept. 6; v. 290; p. 142.
Phonograph-cabinet. W. E. Meiding, Sr. No. 58,924; Sept. 6; v. 290; p. 153.
Phonograph-cabinet. C. T. Wittstein. Nos. 58,963–78; Sept. 6; v. 290; pp. 160–3.
Pincushion. M. J. Willmann. No. 58,962; Sept. 6; v. 290; p. 160.
Powder-box. J. W. Harrington. No. 58,905; Sept. 6; v. 290; p. 149.
Powder box, Talcum-. E. Hoffman. No. 58,906; Sept. 6; v. 290; p. 149.
Powder-container top. F. S. Hyatt. No. 58,909; Sept. 6; v. 290; p. 150.
Radiator-cap. O. E. Black. No. 58,874; Sept. 6; v. 290; p. 143.
Radiator-cap. B. H. Hummert. No. 58,908; Sept. 6; v. 290; p. 150.
Radiator-cap ornament. C. E. Elliott and O. O. Nichols. No. 58,899; Sept. 6; v. 290; p. 148.
Radiator for an automobile. A. O. Holtom and J. B. Crockett. No. 58,907; Sept. 6; v. 290; p. 149.
Reflectors. J. S. Massey. No. 58,923; Sept. 6; v. 290; p. 152.
Ring, bracelet, or the like. F. A. Wittstein. Nos. 58,981–2; Sept. 6; v. 290; p. 164.
Ring, Finger-. E. E. Bross. No. 58,875; Sept. 6; v. 290; p. 143.
Ring, Finger-. F. H. Wittstein. Nos. 58,979–80; Sept. 6; v. 290; p. 164.
Ring, Wedding-. C. L. Front. No. 58,956; Sept. 6; v. 290; p. 159.
Rompers. B. Gilbert. No. 58,902; Sept. 6; v. 290; p. 148.
Rubber mat. T. G. Richards. No. 58,941; Sept. 6; v. 290; p. 156.
Rubber matting. T. G. Richards. No. 58,942; Sept. 6; v. 290; p. 156.
Tray, Smoker's. G. M. Minton. No. 58,926; Sept. 6; v. 290; p. 153.
Spectacle-frame, Shell. T. Leytham. No. 58,920; Sept. 6; v. 290; p. 152.
Spoon and fork, Combined. J. Domingo y Cañellas. No. 58,881; Sept. 6; v. 290; p. 144.
Statue. E. J. Jewell. No. 58,911; Sept. 6; v. 290; p. 150.
Statuette. F. J. Geissler. No. 58,901; Sept. 6; v. 290; p. 148.
Statuette. A. Rigotty. No. 58,943; Sept. 6; v. 290 p. 156.
Storage battery, Electric. R. B. Owen. No. 58,938; Sept. 6; v. 290; p. 155.
Straw-weave as applied to a straw hat. J. Stebe. No. 58,950; Sept. 6; v. 290; p. 158.
Table. J. A. Swanson. No. 58,953; Sept. 6; v. 290; p. 158.
Table. U. Wilcox. No. 58,961; Sept. 6; v. 290; p. 159.
Temple-gage. W. A. Jackson. No. 58,910; Sept. 6; v. 290; p. 150.
Tiea, Form for bow-. S. R. Waddell. No. 58,958; Sept. 6; v. 290; p. 159.
Tire-patch. E. M. Steell. No. 58,951; Sept. 6; v. 290; p. 158.
Tire-tread. H. S. Yost. No. 58,984; Sept. 6; v. 290; p. 164.
Top, Spinning-. S. Asaturian. No. 58,866; Sept. 6; v. 290; p. 141.
Tray, Ash-. G. M. Minton. No. 58,925; Sept. 6; v. 290; p. 153.
Vanity-case. M. Berkowitz. No. 58,869; Sept. 6; v. 290; p. 142.
Vehicles, Raduis-rod for. L. C. Wendland. No. 58,959; Sept. 6; v. 290; p. 159.
Washing-machine casing. N. Lombard. No. 58,922; Sept. 6; v. 290; p. 152.
Watchcases, Crown and bow for. I. Koket. No. 58,915; Sept. 6; v. 290; p. 151.
Wig, Doll-. O. Tollender. No. 58,900; Sept. 6; v. 290; p. 148.

ALPHABETICAL LIST OF TRADE-MARKS REGISTERED.

Absorbent material to absorb gases. Barnebey-Cheney Engineering Company. No. 146,172; Sept. 6; v. 290; p. 197.

Fiber gaskets and packings, &c. Kronyte Manufacturing Corporation. No. 147,668; Sept. 6; v. 290; p. 186.
Fire brick and tile. Laclede-Christy Clay Products Company. No. 150,904; Sept. 6; v. 290; p. 195.
Flour, Mixed wheat and corn. Ismert-Hincke Milling Company. No. 143,866; Sept. 6; v. 290; p. 174.
Flour, Self-rising wheat-. Star Milling Company. No. 139,819; Sept. 6; v. 290; p. 170.
Flour, Wheat-. Wells Flour Milling Company. No. 145,296; Sept. 6; v. 290; p. 177.
Fly liquids. Komo Chemical Company. No. 138,860; Sept. 6; v. 290; p. 169.
Forgings, Steel drop-. Jefferson Forge Products Company. No. 148,334; Sept. 6; v. 290; p. 189.
Frozen confections and base for same. O. W. Bullard & F. C. Bullard. No. 145,874; Sept. 6; v. 290; p. 179.
Fruits, berries, Dried and fresh. Oregon Growers Co-operative Assn. No. 146,584; Sept. 6; v. 290; p. 180.
Fruits, Fresh citrus. Lake Region Packing Association. No. 146,834; Sept. 6; v. 290; p. 181.
Furniture and auto polish. A. M. Snyder. No. 149,654; Sept. 6; v. 290; p. 194.
Furniture-polish. L. I. Gordon. No. 127,867; Sept. 6; v. 290; p. 166.
Game-board, game-indicator, game-counter, &c. E. Bruder. No. 147,332; Sept. 6; v. 290; p. 184.
Game-board, game-indicator, game-counter, &c. E. Bruder. No. 147,703; Sept. 6; v. 290; p. 186.
Game-board, game-indicator, game-counter, &c. E. Bruder. No. 148,529; Sept. 6; v. 290; p. 190.
Game, Table. G. O. Woods. No. 138,610; Sept. 6; v. 290; p. 169.
Gas, coal, and oil. Kappler-Fox Foundry Co. No. 150,754; Sept. 6; v. 290; p. 195.
Ginger-ale, Bottled. C. H. Thom. No. 144,207; Sept. 6; v. 290; p. 175.
Glassware, Heat-resisting. Holcomb & Hoke Mfg. Co. No. 146,967; Sept. 6; v. 290; p. 183.
Greases, Transmission and like. Parker-Kiskadden Company. No. 149,202; Sept. 6; v. 290; p. 191.
Gums, rubber cement, Repair. Federal Rubber Company, The. No. 146,881; Sept. 6; v. 290; p. 182.
Gums, rubber cement, Repair. Federal Rubber Company, The. No. 146,888; Sept. 6; v. 290; p. 182.
Gums, rubber cement, Repair. Federal Rubber Company, The. No. 146,895; Sept. 6; v. 290; p. 182.
Hair-grower. S. E. Moses. No. 145,792; Sept. 6; v. 290; p. 178.
Hair-nets. National Trading Company. No. 139,588; Sept. 6; v. 290; p. 170.
Hair nets, Human-. East and West Trading Corporation. No. 149,692; Sept. 6; v. 290; p. 194.
Hair-receivers, bottle-holders, salve-jars, &c. Newark Tortoise Shell Novelty Co. No. 135,527; Sept. 6; v. 290; p. 168.
Hair-tonic and dandruff remedy. G. Martellotta. No. 148,395; Sept. 6; v. 290; p. 189.
Hair tonics and dressings. Melchior Supply Co. No. 139,041; Sept. 6; v. 290; p. 169.
Hammers and metal and wood-lathes, Power-. Little Giant Company. No. 147,436; Sept. 6; v. 290; p. 184.
Horseshoes and horseshoe-calks. Bryden Horse Shoe Co. No. 98,918; Sept. 6; v. 290; p. 165.
Horseshoes and horseshoe-calks. Neversslip Manf. Co. No. 98,908; Sept. 6; v. 290; p. 165.
Insecticide. Holmes Chemical Company, Inc. No. 148,277; Sept. 6; v. 290; p. 188.
Insecticides, germicides, and related products. Charles H. Auerbach and Roy P. Auerbach. No. 148,112; Sept. 6; v. 290; p. 188.
Knives, forks, scissors, razors, &c. Mappin & Webb. Nos. 130,424–5; Sept. 6; v. 290; p. 167.
Leather. American Hide and Leather Company. No. 146,860; Sept. 6; v. 290; p. 182.
Lenses, Automobile-lamp. Filmolens Sales Co. No. 150,894; Sept. 6; v. 290; p. 195.
Liniment. H. C. Storick. No. 146,596; Sept. 6; v. 290; p. 181.
Lumber. Houston Brothers. No. 145,565; Sept. 6; v. 290; p. 177.
Macaroni. Atlantic Macaroni Co. No. 145,053; Sept. 6; v. 290; p. 176.
Magazine, Biweekly. Sherwin Publishing Corporation. No. 147,530; Sept. 6; v. 290; p. 184.
Magazine, Monthly. California Citrograph Publishing Company. No. 149,631; Sept. 6; v. 290; p. 193.
Malt extract. Adam Scheidt Brewing Co. No. 143,787; Sept. 6; v. 290; p. 174.
Malt extract. Decatur Brewing Company. No. 147,415; Sept. 6; v. 290; p. 184.
Mattresses, beds, bed-springs. Southern Spring Bed Co. No. 139,233; Sept. 6; v. 290; p. 169.
Medicinal preparation. R. E. Reynolds. No. 147,311; Sept. 6; v. 290; p. 183.
Medicinal preparation. W. H. Richardson. No. 141,882; Sept. 6; v. 290; p. 171.
Medicinal tonic. B. J. Bruns. No. 148,788; Sept. 6; v. 290; p. 190.
Medicinal treatment of gonorrhea, blood medicine, &c. S. B. Arwood. No. 132,835; Sept. 6; v. 290; p. 167.
Medicinal yeast preparation. J. D. Anderson. No. 146,245; Sept. 6; v. 290; p. 180.
Metal castings. Ohio Steel Foundry Company. No. 146,731; Sept. 6; v. 290; p. 181.
Milk, &c., Malted. C. A. Owen. No. 143,512; Sept. 6; v. 290; p. 173.
Milk, buttermilk, ice-cream, &c. Nissley Creamery Company. No. 133,486; Sept. 6; v. 290; p. 167.
Milking-machines and milking-machine systems and parts thereof. Empire Cream Separator Company. No. 134,360; Sept. 6; v. 290; p. 168.
Mill-baskets, oil-cabinets, tool-chests, hose-reels, &c. Fairbanks Co. No. 142,208; Sept. 6; v. 290; p. 172.
Musical compositions, Printed. Shapiro, Bernstein & Co. No. 142,538; Sept. 6; v. 290; p. 173.
Nail-polish, mud massage, lemon cream, &c., Liquid. A. Gould. No. 146,909; Sept. 6; v. 290; p. 182.
Oil, Cooking-. J. Aspegren. No. 147,701; Sept. 6; v. 290; p. 186.
Oil, Flushing-. Standard Oil Company. Nos. 145,976–7; Sept. 6; v. 290; p. 179.
Oils, Alimentary. Minerva, Sociedad Anónima. No. 138,774; Sept. 6; v. 290; p. 169.
Oils, Lubricating-. Doublene Oil Co. No. 142,636; Sept. 6; v. 290; p. 173.

ALPHABETICAL LIST OF TRADE-MARK TITLES.

PUBLISHED FOR OPPOSITION.

[Act of Feb. 20, 1905, Sec. 6, as amended Mar. 2, 1907.]

Oils, Lubricating, &c. American Oil Company. No. 148,015; Sept. 6; v. 290; p. 187.
Onions, Fresh. C. M. Kopp Company. No. 145,069; Sept. 6; v. 290; p. 176.
Packing. L. Penboss. No. 139,473; Sept. 6; v. 290; p. 170.
Padding in the piece, Linen-duck. J. Manowitz & Sons. No. 149,715; Sept. 6; v. 290; p. 194.
Paint and waterproof coatings. E. R. Oden. No. 145,702; Sept. 6; v. 290; p. 178.
Paint enamel. McDougall-Butler Co. No. 149,412; Sept. 6; v. 290; p. 192.
Paints. W. F. Witman. No. 143,725; Sept. 6; v. 290; v. 174.
Paints and varnishes. Asahel Wheeler Company. No. 136,320; Sept. 6; v. 290; p. 168.
Paints and varnishes, &c. Renovite Corporation. No. 148,090; Sept. 6; v. 290; p. 188.
Paints, enamels, varnishes, and furniture-polish. National Paint Syndicate. No. 149,346; Sept. 6; v. 290; p. 192.
Paints, stains, varnishes, paint enamels, &c. California Paint Company. No. 146,109; Sept. 6; v. 290; p. 179.
Paints, varnishes, paint enamels, wood-stains, and fillers. C. Albert Kuehnle Co., Inc. No. 149,332; Sept. 6; v. 290; p. 192.
Painters' materials. John Dunn, Son & Co. No. 140,870; Sept. 6; v. 290; p. 171.
Paper bags. Crown Willamette Paper Company. No. 142,695; Sept. 6; v. 290; p. 173.
Paper bags. Crown Willamette Paper Company. Nos. 145,319–20; Sept. 6; v. 290; p. 177.
Paper bags. McFall Company. No. 142,687; Sept. 6; v. 290; p. 173.
Perfumes and facial creams, face-powder, cocoanut-oil shampoo, &c. M. Miller. No. 146,776; Sept. 6; v. 290; p. 181.
Perfumes, powders, rouge, &c. Bowman Drug Co. No. 146,108; Sept. 6; v. 290; p. 179.
Petroleum, asphalt oils, bengin, &c. Texas Company. No. 129,955; Sept. 6; v. 290; p. 166.
Phonograph-needlee. Masterphone Corporation of American. No. 147,834; Sept. 6; v. 290; p. 187.
Phonograph-needles. Nupoint Mfg. Co. No. 144,681; Sept. 6; v. 290; p. 176.
Phonograph-records. Opera Disc Company. No. 145,643; Sept. 6; v. 290; p. 178.
Phonographs. P. Seiditch. No. 143,713; Sept. 6; v. 290; p. 174.
Pianos, Player-. Gulbransen-Dickinson Company. No. 140,591; Sept. 6; v. 290; p. 170.
Plant food. Stim-U-Plant Tablet Co. No. 136,534; Sept. 6; v. 290; p. 168.
Polishing and cleaning compounds. Silica Products Co. No. 149,526; Sept. 6; v. 290; p. 193.
Potato chips. F. P. Gasser. No. 149,184; Sept. 6; v. 290; p. 191.
Preparation for exterminating vermin on the human body and hair. Homeaid Products Co. No. 148,071; Sept. 6; v. 290; p. 187.
Preparation for polishing finished surfaces. Du-Rite Products Co. No. 147,820; Sept. 6; v. 290; p. 187.
Preparation for treatment of warts. Homeaid Products Co. No. 148,072; Sept. 6; v. 290; p. 187.
Preparation for use in bleaching the skin. N. P. Stone. No. 146,848; Sept. 6; v. 290; p. 182.
Preparation used in the treatment of tuberculosis and a preparation for the eyes. F. P. Catania. No. 148,374; Sept. 6; v. 290; p. 189.
Publication, newspaper, magazine, or report. Daily and weekly. Allen E. Beals Corporation. No. 148,115; Sept. 6; v. 290; p. 188.
Radio apparatus. Adams-Morgan Company. No. 137,695; Sept. 6; v. 290; p. 169.
Romper-cloths, piece goods. Walton N. Moore Dry Goods Co. No. 143,873; Sept. 6; v. 290; p. 174.
Roofing, Prepared. National Asbestos Manufacturing Co. No. 145,579; Sept. 6; v. 290; p. 178.
Rubber belting. Goodyear Tire and Rubber Company. No. 116,463; Sept. 6; v. 290; p. 165.
Rubber, canvas, and leather belting. Gifford-Wood Company. Nos. 121,583–4; Sept. 6; v. 290; p. 165.
Salt, Block-. Butler-Magner Co. No. 148,423; Sept. 6; v. 290; p. 189.
Sanitary toothbrush-receptacles. B. R. Morrison. No. 145,840; Sept. 6; v. 290; p. 179.
Separators, Centrifugal. Empire Cream Separator Company. No. 134,359; Sept. 6; v. 290; p. 167.
Separators, Milk or cream. Aktiebolaget Eskilstuna Separator. No. 146,198; Sept. 6; v. 290; p. 180.
Sheeting, sheets, pillow-cases, Cotton. Miller & Hadley Company. No. 145,030; Sept. 6; v. 290; p. 176.
Shoe-polishes. Shu-Milk Products Corporation. No. 149,247; Sept. 6; v. 290; p. 192.
Silk and silk manufactures, Machinery used in preparation and treatment of. Scranton Silk Machine Company. No. 134,660; Sept. 6; v. 290; p. 168.
Silk piece goods. Bianchini Férier. Nos. 148,699–700; Sept. 6; v. 290; p. 190.
Silks in the piece. I. Sacks & Sons. No. 149,030; Sept. 6; v. 290; p. 191.
Silks in the piece, Broad. Schwarzenbach, Huber & Company. No. 148,351; Sept. 6; v. 290; p. 189.
Soap. Kolynos Company. No. 149,406; Sept. 6; v. 290; p. 192.
Soap, Laundry. Western Soap Company. No. 149,367; Sept. 6; v. 290; p. 192.
Soap, Skin-. Radior Co. Ltd. of London. No. 125,245; Sept. 6; v. 290; p. 166.
Soap, Toilet. International Drug Company. No. 149,185; Sept. 6; v. 290; p. 191.
Soap, Toilet and shaving. Nathan & Cie. Laboratories Cadum. No. 149,237; Sept. 6; v. 290; p. 191.
Soaps. Colgate & Company. Nos. 149,444–5; Sept. 6; v. 290; p. 193.
Solder. Great Western Smelting & Refining Company. No. 149,282; Sept. 6; v. 290; p. 192.
Soutache, shell-braids, Mercerized, &c. Corona Braid Works. No. 144,666; Sept. 6; v. 290; p. 175.
Steel. Firth Sterling Steel Company. No. 149,583; Sept. 6; v. 290; p. 193.
Steel billets, bars, forgings, and disks. Poldi Steel Corporation of America. Nos. 146,391–2; Sept. 6; v. 290; p. 180.
Steel, Rolled. The Superior Sheet Steel Company. No. 148,039; Sept. 6; v. 290; p. 187.
Swabbing compound for cannon. S. D. Benollel. No. 145,493; Sept. 6; v. 290; p. 177.
Syrup and molasses, Table-. Atlas Specialty Company. No. 134,231; Sept. 6; v. 290; p. 167.
Syrups, candies, nuts, &c., Food-. Saul Magnus & Henry G. Mosler. No. 136,989; Sept. 6; v. 290; p. 169.
Syrups for table purposes. Log Cabin Products Company. No. 147,672; Sept. 6; v. 290; p. 186.
Table-cloths and napkins. Brien Manufacturing Co. No. 135,404; Sept. 6; v. 290; p. 168.
Tablets, Medicated candy. Seven Oils Company. No. 129,574; Sept. 6; v. 290; p. 166.
Tablets, quinin sulfate, &c., Headache-. B. M. Johnson Manufacturing Co. No. 143,645; Sept. 6; v. 290; p. 173.
Talking-machines, phonographs, music-boxes. Sonora, Inc. No. 145,089; Sept. 6; v. 290; p. 176.
Tires, Lee Tire & Rubber Co. No. 142,446; Sept. 6; v. 290; p. 172.
Tires, Rubber. Doss Rubber & Tube Co. No. 134,241; Sept. 6; v. 290; p. 167.
Toe and heel protectors. L & W Toe and Heel Savers. 150,278; Sept. 6; v. 290; p. 194.
Toilet partitions. Hughes-Keenan Company. No. 146,077; Sept. 6; v. 290; p. 179.
Tomatoes, Fresh. Homestead Growers Assn. No. 139,275; Sept. 6; v. 290; p. 170.
Tonic for rheumatism. Clyde Collins Company Inc. No. 148,430; Sept. 6; v. 290; p. 189.
Tools, Pneumatic. Chicago Pneumatic Tool Company. No. 146,296; Sept. 6; v. 290; p. 180.
Tooth-paste. National Drug Stores Corp. No. 148,962; Sept. 6; v. 290; p. 191.
Toy chemical sets. American Drug and Chemical Co. No. 150,173; Sept. 6; v. 290; p. 194.
Toy coaster. Novelty Products Company. No. 144,198; Sept. 6; v. 290; p. 175.
Toy dog. International Toy Manufacturing Co. No. 145,109; Sept. 6; v. 290; p. 176.
Toy figures, Flat wood. Jonesees Manufacturing Co. No. 141,423; Sept. 6; v. 290; p. 171.
Traps, Animal-. W. A. Gibbs. No. 148,934; Sept. 6; v. 290; p. 191.
Trusses. L. A. Smith. No. 139,012; Sept. 6; v. 290; p. 169.
Turpentine substitute. The Atlantic Refining Company. No. 148,691; Sept. 6; v. 290; p. 190.
Varnish, varnish-remover, liquid drier, black lacquer, &c. Standard Varnish Works. No. 148,627; Sept. 6; v. 290; p. 190.
Vehicles, Name and license plates for motor-. Autobome Plate Company. No. 146,160; Sept. 6; v. 290; p. 179.
Voile in the piece, Cotton. Jacob S. Bernheimer & Bro. No. 148,113; Sept. 6; v. 290; p. 188.
Vulcanizing plants, Stationary. Scheffer & Rossum Co. No. 128,281; Sept. 6; v. 290; p. 166.
Wall-finish, Interior. Alinall Mfg. Co. No. 142,881; Sept. 6; v. 290; p. 172.
Waterproofed cotton duck and canvas. W. W. Stanley. No. 147,579; Sept. 6; v. 290; p. 185.
Window-regulators. Dura Mechanical Hardware Co. No. 145,675; Sept. 6; v. 290; p. 178.

CLASSIFICATION OF PATENTS

ISSUED SEPTEMBER 6, 1921.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 46: 1,390,060
2— 54: 1,389,689
59: 1,390,033
144: 1,389,664
1,389,922
1,390,010
1,390,086
1,390,135
149: 1,389,985

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 13TH DAY OF SEPTEMBER, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Aaltonen, Yrjo J., Tampere, Finland. Internal-combustion engine. No. 1,390,741; Sept. 13; v. 290; p. 329.
Abbott, Herbert E., and E. Enz, Oakville, Iowa. Throttle control for tractors. No. 1,390,854; Sept. 13; v. 290; p. 352.
Adams, Lawrence, Layton, Utah. Combined beet-harvester. No. 1,390,261; Sept. 13; v. 290; p. 233.
Adamson, James S. (See Montpetit, J. R., and Adamson.)
Aktiebolaget Svenska Kugghjulsfabriken. (See Wingqvist, Erik H., assignor.)
Albert, Ira C. (See Bittle, Harry, assignor.)
Album, Adolph Y. S., Chicago, Ill. Jeweler's tray. No. 1,390,855; Sept. 13; v. 290; p. 352.
Album, Adolph Y. S., Chicago, Ill. Hairpin. No. 1,390,856; Sept. 13; v. 290; p. 352.
Alfa-Laise Manufacturing Company. (See Sharp, Lee C., assignor.)
Allcut, Chester T., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Measuring device. No. 1,390,743; Sept. 13; v. 290; p. 330.
Allan, Hugh L., Ayr, Scotland. Oil-refining apparatus. No. 1,390,742; Sept. 13; v. 290; p. 329.
Allen, Charles H., and J. B. Anderson, Pittsburgh, Pa. Burner-cleaning device for blowtorches. No. 1,390,264; Sept. 13; v. 290; p. 233.
Allen, Charles H., and J. B. Anderson, Pittsburgh, Pa. Blowtorch. No. 1,390,265; Sept. 13; v. 290; p. 234.
Allen, Jessie A., *et al.* (See Huntley, Charles L., assignor.)
Allen, John D., Philadelphia, Pa. Compensating gearing for motor-vehicles. No. 1,390,420; Sept. 13; v. 290; p. 264.
Allen, Rufus R., Clarinda, Iowa. Quilting-frame. No. 1,390,857; Sept. 13; v. 290; p. 352.
Ambrose, Frank F., Los Angeles, Calif., assignor to Union Steam Pump Company, Battle Creek, Mich. Rotary pump. No. 1,390,744; Sept. 13; v. 290; p. 330.
American Bosch Magneto Corporation. (See Rosner, Adolph, assignor.)
American Instrument Company. (See Bennett, George, Sr., assignor.)
American Steel Foundries. (See Darby, Robert F., assignor.)
American Steel Foundries. (See Floyd, George G., assignor.)
American Steel Foundries. (See Lamont, John A., assignor.)
American Steel Foundries. (See Trowbridge, William S., assignor.)
American Telephone and Telegraph Company. (See Osborne, Harold S., assignor.)
American Telephone and Telegraph Company. (See Rhodes, William A., assignor.)
American Thermometer Company. (See Bolin, Charles D., assignor.)
Amerman, Ralph A., assignor to Scranton Glass Instrument Company, Scranton, Pa. Syringe-hydrometer. No. 1,390,858; Sept. 13; v. 290; p. 352.
Anderson, Bert, Granger, Tex. Gearing. No. 1,390,262; Sept. 13; v. 290; p. 233.
Anderson, James B. (See Allen, C. H., and Anderson.)
Anderson, James W., New York, N. Y. Manifolding device. No. 1,390,263; Sept. 13; v. 290; p. 233.
Anderson, Raymond M., assignor to G. M. Holley, Detroit, Mich. Carbureter. No. 1,390,477; Sept. 13; v. 290; p. 275.
Andrzejewski, Stanislaus B., Boston, Mass. Three-valve automobile gasolene-lock. No. 1,390,859; Sept. 13; v. 290; p. 353.
Araki, Kichijiro, Kagoshima, assignor of one-fourth to G. Nakamura, Kobe, Japan. Automatic productive-hen-selecting apparatus. No. 1,390,860; Sept. 13; v. 290; p. 353.
Armat, Thomas, Washington, D. C. Production of animated pictures. No. 1,390,861; Sept. 13; v. 290; p. 353.
Armes, Earl H., Julesburg, Colo. Air-cooling system. No. 1,390,862; Sept. 13; v. 290; p. 353.
Armistead, William E., La Grange, Ga. Apparatus for making ice. No. 1,390,863; Sept. 13; v. 290; p. 353.
Armstrong, Lavanda M., Peoria, Ill. Aircraft of the lighter-than-air type. No. 1,390,745; Sept. 13; v. 290; p. 330.
Armstrong, Lottie L., Washington, D. C. Bottle-holder. No. 1,390,266; Sept. 13; v. 290; p. 234.
Armstrong, Percy A. E., Loudonville, N. Y. Making cored tubular bodies. No. 1,390,746; Sept. 13; v. 290; p. 330.
Arnold Clarence F., assignor to H. F. Walliser Company, Philadelphia, Pa. Machine for making and applying tufts. No. 1,390,267; Sept. 13; v. 290; p. 234.
Arthur, James W. (See Arthur, John M., assignor.)
Arthur, John M., New Woodstock, N. Y., assignor of one-half to J. W. Arthur, Akron, Ohio. Rubber-shoe-vulcanizing machine. No. 1,390,478; Sept. 13; v. 290; p. 275.
Avery, Bruce W., Whiting, Ind. Exhaust-gas conveyer. No. 1,390,950; Sept. 13; v. 290; p. 372.
Babcock & Wilcox Company, The. (See Kerr, Howard J., assignor.)
Baker, Anna, assignor of one-half to E. Baker, Baltimore, Md. Bodkin. No. 1,390,864; Sept. 13; v. 290; p. 354.
Baker, Edva. (See Baker, Anna, assignor.)
Baker, Frank, Pimlico, London, England. Parachute. No. 1,390,598; Sept. 13; v. 290; p. 300.
Baker, Robert D., Detroit, Mich. Paving apparatus. No. 1,390,479; Sept. 13; v. 290; p. 276.
Balsillie, John G., Melbourne, Victoria, assignor to Flatlite Limited, Sydney, New South Wales, Australia. Reflector for use in light-projectors. No. 1,390,747; Sept. 13; v. 290; p. 330.
Bancroft, Wilder D., Ithaca, N. Y. Manufacture of carbon-black and other solid reaction products. No. 1,390,480; Sept. 13; v. 290; p. 276.
Bangle, Paul M., San Dimas, Calif. Seat. No. 1,390,865; Sept. 13; v. 290; p. 354.
Barac, Giovanni, Falls Creek, Pa. Tobacco-box. No. 1,390,866; Sept. 13; v. 290; p. 354.
Bardin, Victor, St.-Denis, France. Electrical connector for engine spark-plugs and other purposes. No. 1,390,481; Sept. 13; v. 290; p. 276.
Baroni, Mario. (See Luling, E., and Baroni.)
Barrett, Jacob O., assignor of one-half to W. W. Bruce, Asheville, N. C. Lifting-jack. No. 1,390,867; Sept. 13; v. 290; p. 354.
Barry, Joe E., Granville, N. D. Automobile-spring. No. 1,390,326; Sept. 13; v. 290; p. 246.
Bassett, Alvin J., assignor to Milwaukee Reliance Boiler Works, Milwaukee, Wis. Gas-producer. No. 1,390,868; Sept. 13; v. 290; p. 354.
Bassett, George B. (See Ritter, Edward A., assignor.)
Bassett, Henry P., Cynthiana, Ky. Acid-proof refractory composition. No. 1,390,327; Sept. 13; v. 290; p. 246.
Bassett, Harry P., Cynthiana, Ky. Basic refractory material. No. 1,390,328; Sept. 13; v. 290; p. 246.
Bassett, Harry P., Cynthiana, Ky. Treating waste dentration liquors. No. 1,390,329; Sept. 13; v. 290; p. 246.
Bassett, Robert S., Buffalo, N. Y. Water-meter. No. 1,390,664; Sept. 13; v. 290; p. 315.
Bates, John H., Chicago, Ill. Attachment for player-pianos. No. 1,390,421; Sept. 13; v. 290; p. 264.
Bauer, John, Detroit, Mich. Shoe-polishing device. No. 1,390,869; Sept. 13; v. 290; p. 355.
Baughman, David, Pierce, Fla. Building construction. No. 1,390,951; Sept. 13; v. 290; p. 372.
Baumgartner, Walter J., assignor to Duplex Engine Governor Company, Inc., Brooklyn, N. Y. Operating connection. No. 1,390,482; Sept. 13; v. 290; p. 276.
Baxter, Kenneth S., assignor to Sheet Steel Products Company, Michigan City, Ind. Cab-door. No. 1,390,483; Sept. 13; v. 290; p. 276.
Baxter, Philip H., Croydon, Iowa, assignor to Deere & Company, Moline, Ill. Check-head for planters. No. 1,390,748; Sept. 13; v. 290; p. 330.
Bayreuther, Adolphus E., New York, N. Y. Receptacle-closure device. No. 1,390,749; Sept. 13; v. 290; p. 331.
Beckett, William A., Kingsville, Ontario, Canada. Combined fruit washer and scalder. No. 1,390,268; Sept. 13; v. 290; p. 234.
Beers, Frederick, New Rochelle, and H. L. Powell, assignors to National Biscuit Company, New York, N. Y. Tray for carrying cakes, &c. No. 1,390,665; Sept. 13; v. 290; p. 315.
Belden, Edward H., assignor, by mesne assignments, to The Willys-Overland Company, Toledo, Ohio. Clutch. No. 1,390,330; Sept. 13; v. 290; p. 246.
Bell, Edgar W., New Wilson, Okla. Well-drill socket. No. 1,390,750; Sept. 13; v. 290; p. 331.
Bell, Raymond T., Chicago, Ill., assignor, by mesne assignments, to Jewett Phonograph Company. Lid-supporter. No. 1,390,751; Sept. 13; v. 290; p. 331.

Bell, William L., Oakland, Calif. Universal shaft. No. 1,390,484; Sept. 13; v. 290; p. 277.
Bell, William L., Oakland, Calif. Bolt. No. 1,390,485; Sept. 13; v. 290; p. 277.
Bemis, Thomas, Indianapolis, Ind. Carbureter. No. 1,390,752; Sept. 13; v. 290; p. 331.
Benner, Raymond C. (See French, H. F., and Benner.)
Bennett, George, Sr., assignor to American Instrument Company, Philadelphia, Pa. Hemoglobinometer. No. 1,390,422; Sept. 13; v. 290; p. 264.
Bennett, William H. (See Ferguson, J., and Bennett.)
Bensinger, Norman E., Chicago, Ill. Cue-tip. No. 1,390,331; Sept. 13; v. 290; p. 246.
Berg, Simon, assignor to Michigan Steel Tube Products Company, Detroit, Mich. Welding-tip. No. 1,390,423; Sept. 13; v. 290; p. 265.
Bergman, Frederick, assignor of one-third to A. B. Spach, Chicago, Ill. Sickle or knife. No. 1,390,753; Sept. 13; v. 290; p. 332.
Beth, Wilhelm F. L., Lübeck, Germany. Air-filter. No. 1,390,966; Sept. 13; v. 290; p. 375.
Bethincourt, Albert, New York, N. Y. Combined comb and brush. No. 1,390,332; Sept. 13; v. 290; p. 247.
Bethlehem Foundry & Machine Co. (See Dimler, Ernest H., assignor.)
Beyenberg, William C., Passaic, N. J. Waterproof composition. No. 1,390,424; Sept. 13; v. 290; p. 265.
Bickel, Walter W., and H. E. Brown, Des Moines, Iowa. Chimney-top. No. 1,390,269; Sept. 13; v. 290; p. 235.
Bigelow, Frank M., Jeannette, Pa. Molding-flask. No. 1,390,754; Sept. 13; v. 290; p. 332.
Binder, Russell T., Newark, N. J. Steering-wheel lock. No. 1,390,953; Sept. 13; v. 290; p. 372.
Binder, Russell T., Orange, assignor to Russell Sales Co., Essex county, N. J. Steering-wheel lock. No. 1,390,952; Sept. 13; v. 290; p. 372.
Bittle, Harry, West Alexandria, assignor of one-half to I. C. Albert, Lewisberg, Ohio. Manure-loading fork. No. 1,390,870; Sept. 13; v. 290; p. 355.
Black, George A., Franklin, Pa. Internal-combustion engine. No. 1,390,486; Sept. 13; v. 290; p. 277.
Black, Robert, and W. I. Francis, Evansville, Ind. Ball-bearing table for sawing-machines. No. 1,390,487; Sept. 13; v. 290; p. 277.
Black, William Z., and D. W. Butz, Kokomo, Ind. Wheel. No. 1,390,871; Sept. 13; v. 290; p. 355.
Blackburn, Wilmuth E., Summit, N. J. Game apparatus. No. 1,390,270; Sept. 13; v. 290; p. 235.
Blair, Maynard J., Winchester, Mass. Seam-ripping tool. No. 1,390,872; Sept. 13; v. 290; p. 355.
Blair, William, assignor to Rudge-Whitworth Limited Crow Lane, Coventry, England. Means for attaching vehicle-spoke covers. No. 1,390,425; Sept. 13; v. 290; p. 265.
Blair, William, assignor to Rudge-Whitworth Limited, Crow Lane, Coventry, England. Variable gear for motor-vehicles and the like. No. 1,390,426; Sept. 13; v. 290; p. 265.
Blanchard, William F., Denver, Colo. Price-card holding and displaying device for store-shelves. No. 1,390,427; Sept. 13; v. 290; p. 265.
Blest, Minot C., Bellevue, assignor to Pressed Steel Car Company, Pittsburgh, Pa. Door-operating mechanism. No. 1,390,333; Sept. 13; v. 290; p. 247.
Block & Reuter. (See Reuter, Henry C., assignor.)
Bolleau, Modeste, Suancourt-par-Morey, France. Adjustable wick-carrier. No. 1,390,873; Sept. 13; v. 290; p. 355.
Bolin, Charles D., assignor to American Thermometer Company, St. Louis, Mo. Thermometer. No. 1,390,666; Sept. 13; v. 290; p. 315.
Bonestell, Blanche, assignor to Huyler's, New York, N. Y. Candy-package. No. 1,390,667; Sept. 13; v. 290; p. 315.
Booth, John R., Jr. (See Kern, Peter, assignor.)
Booth, Levis M., Plainfield, N. J. Feeding device for dry chemicals. No. 1,390,271; Sept. 13; v. 290; p. 235.
Boulton, Percival R., Birmingham, England. Absorption apparatus for analyzing gases. No. 1,390,488; Sept. 13; v. 290; p. 278.
Bowen, David R., assignor to Farrel Foundry & Machine Company, Ansonia, Conn. Rubber-cracker. No. 1,390,599; Sept. 13; v. 290; p. 301.
Bowers, John P., *et al.* (See Hansen, William A., assignor.)
Bowlby, Frank R., Cottonwood Falls, Kans. Railway-rail joint. No. 1,390,489; Sept. 13; v. 290; p. 278.
Bracken, John W., Miami, Fla. Draft-coupling. No. 1,390,874; Sept. 13; v. 290; p. 356.
Brady, Meredith D., assignor to M. E. Stevings, Indiana, Pa. Push-rod. No. 1,390,272; Sept. 13; v. 290; p. 235.
Brenzinger, Julius, Fairfield, assignor to The Max Ams Machine Company, Bridgeport, Conn. Can-heading machine. No. 1,390,490; Sept. 13; v. 290; p. 278.
Brenzinger, Julius, Fairfield, Conn. Can-cover-lining machine. No. 1,390,491; Sept. 13; v. 290; p. 278.
Brewer, Johnson, Rice, Tex. Flour-sifter. No. 1,390,334; Sept. 13; v. 290; p. 247.
Britt, Charles J., Willington, S. C. Ground-engaging drive-wheel. No. 1,390,875; Sept. 13; v. 290; p. 356.
Brochu, Joseph E. (See Perrow, James S., assignor.)
Brock, Matthias, Boston, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation Paterson, N. J. Lasting-machine. No. 1,390,755; Sept. 13; v. 290; p. 332.
Brookby, Harry E., Evanston, Ill. Parallel-current calcining-kiln. No. 1,390,335; Sept. 13; v. 290; p. 247.
Brown, Halley E. (See Bickel, W. W., and Brown.)
Brown Instrument Company. (See Brown, R. P., and Wagner, assignors.)
Brown, Jacob E., assignor of one-half to W. F. Eichenhofer, Los Angeles, Calif. Reamer. No. 1,390,876; Sept. 13; v. 290; p. 356.
Brown, Richard P., and F. Wagner, assignors to The Brown Instrument Company, Philadelphia, Pa. Recording-gage. No. 1,390,273; Sept. 13; v. 290; p. 235.
Brown, William A., Lincoln, Me. Connector-link for chains. No. 1,390,877; Sept. 13; v. 290; p. 356.
Bruce, William W. (See Barrett, Jacob O., assignor.)
Bryant Electric Company, The. (See Goodridge, Gilbert W., assignor.)
Büchi, Albert, Klosters, Switzerland. Time-switch for photographic purposes. No. 1,390,336; Sept. 13; v. 290; p. 247.
Bucknam, Worthy C., Jersey City, N. J., assignor to Davis-Bournonville Company, New York, N. Y. Torch-adjuster arm. No. 1,390,600; Sept. 13; v. 290; p. 301.
Buffalo Automobile Spring Company. (See Slater, William E., assignor.)
Buhrman, Catherine M., Graceham, assignor of one-fourth to H. W. Stull, one-fourth to E. M. Stull, and one-fourth to E. B. Stull, Rocky Ridge, Md. Window-ventilator. No. 1,390,878; Sept. 13; v. 290; p. 356.
Bukove, Charles A., Ute Park, N. Mex. Valve-grinder. No. 1,390,879; Sept. 13; v. 290; p. 357.
Bunnell, Horry C., Westport, N. Y. Railway-tie brace. No. 1,390,756; Sept. 13; v. 290; p. 232.
Burnes, Edward A., St. Louis, Mo. Universal joint. No. 1,390,668; Sept. 13; v. 290; p. 315.
Burnham, George A., Saugus, assignor to S. B. Conduit, Jr., Brookline, Mass. Electric switch. No. 1,390,492; Sept. 13; v. 290; p. 278.
Burnham, George A., Saugus, assignor to S. B. Conduit, Jr., Boston, Mass. Electric switch. No. 1,390,493; Sept. 13; v. 290; p. 279.
Burrows, Robert J., Buchanan, Mich. Automobile-truck. No. 1,390,757; Sept. 13; v. 290; p. 332.
Burton, Harry W., Enid, Okla. Tractor. No. 1,390,880; Sept. 13; v. 290; p. 357.
Bussey, William H., Minneapolis, Minn. Planting-box. No. 1,390,337; Sept. 13; v. 290; p. 248.
Butz, Delbert W. (See Black, W. Z., and Butz.)
Byron, Orra E., assignor to Lee Trailer & Body Co., Chicago, Ill. Pole-trailer. No. 1,390,428; Sept. 13; v. 290; p. 265.
Cairncross, Andrew S., St. Paul, Minn. Icing-machine. No. 1,390,494; Sept. 13; v. 290; p. 279.
Caldwell, J. A., *et al.* (See Campbell, W. L., and Straughan, assignors.)
Caldwell, John C., Miami, Fla. Artificial bait. No. 1,390,601; Sept. 13; v. 290; p. 301.
Callahan, Michael J., New York, N. Y. Thermostatic control for dampers for unit ventilators. No. 1,390,758; Sept. 13; v. 290; p. 333.
Cameron, William, Chicago, Ill. Drier. No. 1,390,338; Sept. 13; v. 290; p. 248.
Campbell, George B., Canisteo, N. Y. Hide-coupler. No. 1,390,495; Sept. 13; v. 290; p. 279.
Campbell, William L., and A. E. Straughan, McKinney, assignors of forty-nine one-hundredths to A. J. Commous, S. Weisman, J. A. Caldwell, and E. H. Winton, Collin county, Tex. Parcel-carrier. No. 1,390,339; Sept. 13; v. 290; p. 248.
Cantor, Solomon, New York, N. Y. Broom-holder. No. 1,390,881; Sept. 13; v. 290; p. 357.
Cantor, Solomon, New York, N. Y. Broom. No. 1,390,882; Sept. 13; v. 290; p. 357.
Cape, Joseph S., Detroit, Mich. Electrode. No. 1,390,429; Sept. 13; v. 290; p. 266.
Carden, John V., Ascot, England. Automobile vehicle. No. 1,390,672; Sept. 13; v. 290; p. 316.

Lee, Albert P., assignor to Lee Trailer & Body Company, Chicago, Ill. Drawbar mechanism. No. 1,390,451; Sept. 13; v. 290; p. 270.

Lee, Henry N., Creston, Iowa. Automobile-lock. No. 1,390,913; Sept. 13; v. 290; p. 364.

Lee Trailer & Body Company. (See Lee, Albert P., assignor.)

Lee Trailer & Body Co. (See Byron, Orra E., assignor.)

Leece, Bennett M., assignor to The Leece-Neville Company, Cleveland, Ohio. Dynamo-electric-machine control. No. 1,390,452; Sept. 13; v. 290; p. 270.

Leece-Neville Company, The. (See Leece, Bennett M., assignor.)

Leet, Albert, Bixby, Okla. Display-rack. No. 1,390,969; Sept. 13; v. 290; p. 375.

Lefavor, Alfred, *et al.* (See Hansen, William A., assignor.)

Lefever, Charles F., assignor to Daisy Manufacturing Co., Plymouth, Mich. Air-gun. No. 1,390,569; Sept. 13; v. 290; p. 294.

Lewis, Thomas, and F. C. Scrimger, Pontiac, Mich. Indicator. No. 1,390,570; Sept. 13; v. 290; p. 294.

Library Bureau. (See Ohnstrand, Enoch, assignor.)

Liff, Madison M., Los Angeles, Calif. Pump. No. 1,390,453; Sept. 13; v. 290; p. 270.

Lihme, Christian B. (See Gerlach, O., and Lihme.)

Lindahl, Erick P., assignor to Icy-Hot Bottle Company, Cincinnati, Ohio. Method of and apparatus for manufacturing glassware. No. 1,390,626; Sept. 13; v. 290; p. 307.

Lindahl, Erick P., assignor to Icy-Hot Bottle Company, Cincinnati, Ohio. Chucking mechanism. No. 1,390,627; Sept. 13; v. 290; p. 307.

Lindsey, Harry W., Jr., assignor to The Willys-Overland Company, Toledo, Ohio. Spring suspension for vehicles. No. 1,390,863; Sept. 13; v. 290; p. 252.

Link Belt Company. (See Pratt, Howell D., assignor.) (Reissue.)

Lippmann, Julius D., assignor to E. Weinheim, New York, N. Y. Micrometer-adjuster for embossing-presses. No. 1,390,799; Sept. 13; v. 290; p. 341.

Litchfield, Isaac W., Newtonville, Mass. Water-excluding device for bathing-caps. No. 1,390,628; Sept. 13; v. 290; p. 308.

Little, Charles H., Chicago, Ill. Rail-joint. No. 1,390,914; Sept. 13; v. 290; p. 364.

Littleford, George, Fort Thomas, Ky. Feeding mechanism. No. 1,390,800; Sept. 13; v. 290; p. 341.

Lockwood, Nelson A., Ogden, Utah. Filter-press equipment. No. 1,390,631; Sept. 13; v. 290; p. 287.

Loffler, Edmund. (See de Lukacsevics, C., and Loffler.)

Loffler, Edmund. (See de Lukacsevics, Charles, assignor.)

London General Omnibus Company, The. (See Gage, Samuel, assignor.)

Long, Nancy K., *et al.*, executors. (See Keiper, Henry B.)

Longmesser, Paul C., assignor to William Mann Company, Philadelphia, Pa. Safety-check. No. 1,390,959; Sept. 13; v. 290; p. 374.

Loseky, Joseph, Cleveland, Ohio. Safe. No. 1,390,571; Sept. 13; v. 290; p. 295.

Loth, Julius A., Utrecht, Netherlands. Artificial limb and the like. No. 1,390,915; Sept. 13; v. 290; p. 365.

Lover, William E., Findlay, Ohio. Integral envelop and box. No. 1,390,718; Sept. 13; v. 290; p. 324.

Lowthrop, William M., Summertown, Tenn. Poultry-nest. No. 1,390,916; Sept. 13; v. 290; p. 365.

Lozano, Joaquin G., Madrid, Spain. Thermo-electrical apparatus for boiling and heating purposes. No. 1,390,719; Sept. 13; v. 290; p. 324.

Luce, Louis L., and L. Mattson, Aberdeen, Wash. Internal-combustion engine. No. 1,390,572; Sept. 13; v. 290; p. 295.

Ludeman, Oscar H., Hartford, Conn. Heat and low-water indicator. No. 1,390,532; Sept. 13; v. 290; p. 287.

Luling, Emilio, and M. Baroni, Milan, Italy. Beam, girder, or the like. No. 1,390,364; Sept. 13; v. 290; p. 253.

Lummis, Charles W., assignor to Morgan Construction Company, Worcester, Mass. Gas-producer-regulating mechanism. No. 1,390,454; Sept. 13; v. 290; p. 270.

Lusenberg, Edward A., San Antonio, Tex. Stand for rolled goods. No. 1,390,299; Sept. 13; v. 290; p. 240.

Lyndon, Lamar, assignor to Edison Storage Battery Company, West Orange, N. J. Electrode-plate for storage batteries. No. 1,390,629; Sept. 13; v. 290; p. 308.

Lyon, Frederick C., Sr., Horseheads, N. Y. Wrench. No. 1,390,917; Sept. 13; v. 290; p. 365.

Lyons, William A., Litchfield, Minn. Time-indicating device. No. 1,390,801; Sept. 13; v. 290; p. 341.

M-V All Weather Train Controller Company. (See Minnick, Alfred, assignor.)

McBride, Paul J., *et al.* (See Cushing, William H., assignor.)

McCollom, William J., Clifton, N. J. Ash-pan. No. 1,390,455; Sept. 13; v. 290; p. 271.

McCord, Harry C., Baltimore, Md. Folding crib. No. 1,390,630; Sept. 13; v. 290; p. 308.

McElligott, Harry A., Minneapolis, Minn. Calendar-fob. No. 1,390,300; Sept. 13; v. 290; p. 241.

McElroy, Karl P., assignor to Ferro Chemicals, Inc., Washington, D. C. Making ammonia. No. 1,390,533; Sept. 13; v. 290; p. 287.

McFarland, Daniel, San Francisco, Calif. Moldboard-anchor. No. 1,390,918; Sept. 13; v. 290; p. 365.

McKay, Peter M., London, England. Artificial hand. No. 1,390,802; Sept. 13; v. 290; p. 341.

McKesky, Walter W., Houston, Tex. Signal for vehicles. No. 1,390,573; Sept. 13; v. 290; p. 295.

McKiernan-Terry Drill Company. (See Riker, Malcolm D., assignor.)

McKinley, Charles W., assignor to The Willys-Overland Co., Toledo, Ohio. Spring suspension for vehicles. No. 1,390,365; Sept. 13; v. 290; p. 253.

McManis, John V., Dayton, and F. Koenigkramer; said Koenigkramer assignor to said McManis, Cincinnati, Ohio. Treatemnt-table. No. 1,390,301; Sept. 13; v. 290; p. 241.

Machine Products Company. (See Johns, George M., assignor.)

Mackenzie, Roderick J., Cambridge, assignor to Crocker Pen Company, Boston, Mass. Fountain-pen. No. 1,390,366; Sept. 13; v. 290; p. 253.

Maeda, Uichiro, Los Angeles, Calif. Skirt-templet. No. 1,390,534; Sept. 13; v. 290; p. 287.

Maier, Clarence H., New York, N. Y. Music-sheet-advertising device. No. 1,390,535; Sept. 13; v. 290; p. 288.

Malitch, Charles, Hamilton, Ohio. Rail-chair. No. 1,390,919; Sept. 13; v. 290; p. 365.

Mann, Pearly W., Minneapolis, Minn. Combination auto-truck and wagon dump. No. 1,390,368; Sept. 13; v. 290; p. 253.

Mann, William, Company. (See Longmesser, Paul C., assignor.)

Manning, Sanford E., West Columbia, Tex. Means for moving the drive-shafts of steam-engines from dead-centers. No. 1,390,536; Sept. 13; v. 290; p. 288.

Maranville, Harvey F., assignor to The Miller Rubber Company, Akron, Ohio. Mandrel. No. 1,390,302; Sept. 13; v. 290; p. 241.

Maranville, Harvey F., assignor to The Miller Rubber Company, Akron, Ohio. Air-bag for pneumatic-tire manufacture. No. 1,390,303; Sept. 13; v. 290; p. 241.

Margo, Arthur, Nantes, France. Furnace for burning factory refuse. No. 1,390,304; Sept. 13; v. 290; p. 241.

Marinsky, Davis, New York, assignor to D. Horowitz, Brooklyn, N. Y. Hair-curling device. No. 1,390,803; Sept. 13; v. 290; p. 432.

Markem Machine Company. (See Robbins, Charles F., assignor.)

Marks, Isidore, Boston, Mass. Horn-reed. No. 1,390,305; Sept. 13; v. 290; p. 241.

Marland Refining Company. (See Rial, Wirt D., assignor.)

Marshall, Charles H., assignor to Marshall Manufacturing Company, Omaha, Nebr. Cherry-pitting machine. No. 1,390,804; Sept. 13; v. 290; p. 342.

Marshall Manufacturing Company. (See Marshall, Charles H., assignor.)

Marye, Clifford P., Chicago, Ill., assignor to Marye Safety Nut Corporation. Making bolt-nuts. No. 1,390,631; Sept. 13; v. 290; p. 308.

Marye Safety Nut Corporation. (See Marye, Clifford P., assignor.)

Mason, Charles T., Sumter, S. C., assignor to Splitdorf Electrical Company, Newark, N. J. Ignition apparatus for internal-combustion engines. No. 1,390,574; Sept. 13; v. 290; p. 295.

Massey, John R., New Brunswick, N. J., assignor, by mesne assignments, to Vitrocell Company, Columbus, Ohio. Coating-machine. No. 1,390,367; Sept. 13; v. 290; p. 253.

Matthes, Samuel S., assignor to The Ohio Brass Company, Mansfield, Ohio. Trolley-wire clamp. No. 1,390,369; Sept. 13; v. 290; p. 254.

Mattson, Leroy. (See Luce, Louis L., assignor.)

Mauclaire, Louis, A. Garbarini, and G. Gautier, Paris, France. Electric-arc lamp with rotary arc. No. 1,390,456; Sept. 13; v. 290; p. 271.

Max Ams Machine Company, The. (See Brenzinger, Julus, assignor.)

Mayhew, Edward A., assignor to Union Metal Products Company, Chicago, Ill. Car-door fastener. No. 1,390,306; Sept. 13; v. 290; p. 242.

Measuregraph Company, The. (See Hosch, Greene C., assignor.)

Measuregraph Company, The. (See Hosch, Walter E., assignor.)

Measuregraph Company, The. (See Turner, Douglas, assignor.)

Measuregraph Company, The. (See Wheeler, John L., assignor.)

Mechano Gear Shift Company. (See Richardson, Bayard E., assignor.)

Mercer, Joseph H., *et al.* (See Cushing, William H., assignor.)

Mester, Robert H., Webster Groves, Mo. Protector for desks. No. 1,390,370; Sept. 13; v. 290; p. 254.

Metal Saw & Machine Co. (See Stowell, Byron F., assignor.)

Metzger, Myer, Chicago, Ill. Display and vending case. No. 1,390,632; Sept. 13; v. 290; p. 308.

Meyer, Albert J. (See Mott, A. C., Jr., and Meyer.)

Meyer, Carl, Toledo, Ohio. Wrench. No. 1,390,371; Sept. 13; v. 290; p. 254.

Michalesak, Joseph, Highland Beach, N. J. Animal-trap. No. 1,390,805; Sept. 13; v. 290; p. 342.

Michigan Steel Tube Products Company. (See Berg, Simon, assignor.)

Milhaupt, Edgar A., Appleton, Wis. Bumper-bracket. No. 1,390,633; Sept. 13; v. 290; p. 309.

Miller, Albert H., Miltona, Minn. Grain-separator. No. 1,390,806; Sept. 13; v. 290; p. 342.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 13TH DAY OF SEPTEMBER, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Abrading-machine. W. H. Smith. No. 1,390,828; Sept. 13; v. 290; p. 346.
Acid and extracts, Production of tannic. F. Langford. No. 1,390,796; Sept. 13; v. 290; p. 340.
Acid manufacture. P. W. Webster. No. 1,390,410; Sept. 13; v. 290; p. 262.
Adhesive cements, &c., Damper for moistening. H. B. and M. G. Rogers. No. 1,390,547; Sept. 13; v. 290; p. 290.
Aeroplane. M. Golein. No. 1,390,901; Sept. 13; v. 290; p. 362.
Aeroplane-wing. W. E. Knoell. No. 1,390,563; Sept. 13; v. 290; p. 293.
Air-cooling system. E. H. Armes. No. 1,390,862; Sept. 13; v. 290; p. 353.
Aircraft of the lighter-than-air type. L. M. Armstrong. No. 1,390,745; Sept. 13; v. 290; p. 330.
Aircraft, Steering device for. L. B. Sperry. No. 1,390,653; Sept. 13; v. 290; p. 312.
Ammonia, Making. K. P. McElroy. No. 1,390,533; Sept. 13; v. 290; p. 287.
Amusement device. S. Jacobs. No. 1,390,789; Sept. 13; v. 290; p. 339.
Animal-trap. J. Michalczak. No. 1,390,805; Sept. 13; v. 290; p. 342.
Antiseptic case and surgical knife, Combined. H. K. Powers. No. 1,390,720; Sept. 13; v. 290; p. 324.
Antiskidding device. T. V. Elliott. No. 1,390,893; Sept. 13; v. 290; p. 360.
Antislip rope and cable clamp. H. A. Stork. No. 1,390,654; Sept. 13; v. 290; p. 313.
Arch-support. A. Ruhl. No. 1,390,817; Sept. 13; v. 290; p. 345.
Arsenate of lead and making same, Suspended. C. H. Sakryd and H. M. Rosencrans. No. 1,390,647; Sept. 13; v. 290; p. 312.
Arsenate of lead and making same, Suspended. C. H. Sakryd and H. M. Rosencrans. No. 1,390,648; Sept. 13; v. 290; p. 312.
Ash-pan. W. J. McCollom. No. 1,390,455; Sept. 13; v. 290; p. 271.
Auto-license holder. P. J. Speicher. No. 1,390,732; Sept. 13; v. 290; p. 327.
Auto-light control. W. H. Stockton. No. 1,390,937; Sept. 13; v. 290; p. 369.
Automatic call system for hotels. A. H. Heyroth. No. 1,390,907; Sept. 13; v. 290; p. 363.
Automatic productive-hen-selecting apparatus. K. Arak. No. 1,390,860; Sept. 13; v. 290; p. 353.
Automobile attachment. C. M. Elermann. No. 1,390,433; Sept. 13; v. 290; p. 266.
Automobile clutch-stabilizer and control-silencer. J. W. Harbaugh. No. 1,390,954; Sept. 13; v. 290; p. 373.
Automobile gasolene-lock, Three-valve. S. B. Andrzejewski. No. 1,390,859; Sept. 13; v. 290; p. 363.
Automobile-hood. P. Kern. No. 1,390,295; Sept. 13; v. 290; p. 240.
Automobile-license light, Combination tail and. C. Ring. No. 1,390,927; Sept. 13; v. 290; p. 367.
Automobile-lock. H. N. Lee. No. 1,390,913; Sept. 13; v. 290; p. 364.
Automobile-radiator. G. L. Lake. No. 1,390,794; Sept. 13; v. 290; p. 340.
Automobile-spring. J. E. Barry. No. 1,390,326; Sept. 13; v. 290; p. 246.
Automobile-top. A. D. Hedges. No. 1,390,555; Sept. 13; v. 290; p. 292.
Automobile-top. A. D. Hedges. No. 1,390,556; Sept. 13; v. 290; p. 292.
Automobile-top. A. D. Hedges. No. 1,390,557; Sept. 13; v. 290; p. 292.
Automobile-top, Folding. A. D. Hedges. No. 1,390,554; Sept. 13; v. 290; p. 291.
Automobile-transportation support. W. A. Hansen. No. 1,390,530; Sept. 13; v. 290; p. 286.
Automobile vehicle. J. V. Carden. No. 1,390,672; Sept. 13; v. 290; p. 316.
Automobile vehicle, Rear-axle pulley-drive for. L. D. Sturm. No. 1,390,656; Sept. 12; v. 290; p. 313.
Automobile-wheels, Locking device for. A. M. Cummings. No. 1 390,674; Sept. 13; v. 290; p. 317.
Automobiles, Brake mechanism for. M. Moskowitz. No. 1,390,373; Sept. 13; v. 290; p. 254.
Automobiles, Bunker for. F. Gahm. No. 1,390,285; Sept. 13; v. 290; p. 238.
Automobiles, Luggage-carrier for. J. B. Rice. No. 1,390,387; Sept. 13; v. 290; p. 258.
Autotruck and wagon dump, Combination. P. W. Mann. No. 1,390,368; Sept. 13; v. 290; p. 253.
Awnings, Weather-shield for spring-shade. E. Gray. No. 1,390,527; Sept. 13; v. 290; p. 286.
Bait, Artificial. J. C. Caldwell. No. 1,390,601; Sept. 13; v. 290; p. 301.
Ball-marker. W. F. Reach. No. 1,390,926; Sept. 13; v. 290; p. 367.
Barrel-hoop machine. A. N. Eaton. No. 1,390,282; Sept. 13; v. 290; p. 237.
Bathtubs, Support for infants'. S. W. Jeffs. No. 1,390,444; Sept. 13; v. 290; p. 268.
Batteries and making, Separator for storage. D. F. Gould. No. 1,390,355; Sept. 13; v. 290; p. 251.
Batteries, Electroplate for storage. L. Lyndon. No. 1,390,629; Sept. 13; v. 290; p. 308.
Battery: *See*—
Electric battery. Galvanic battery.
Beam, girder, or the like. E. Luling and M. Baroni. No. 1,390,364; Sept. 13; v. 290; p. 253.
Bearing-lubricator. J. T. Janette. No. 1,390,443; Sept. 13; v. 290; p. 268.
Bearing, Suspension-. J. Parker. No. 1,390,582; Sept. 13; v. 290; p. 297.
Bearing, Thrust ball-. H. B. Keiper. No. 1,390,717; Sept. 13; v. 290; p. 324.
Bed-spring fabrics, Semi-automatic machine for forming. A. Rhenstrom. No. 1,390,814; Sept. 13; v. 290; p. 344.
Beet-topping device. G. R. and W. A. Hayes. No. 1,390,289; Sept. 13; v. 290; p. 239.
Beverages, Manufacturing cereal. R. S. Heuser. No. 1,390,711; Sept. 13; v. 290; p. 323.
Beverages, Preparing low-alcoholic. H. Heuser. No. 1,390,710; Sept. 13; v. 290; p. 323.
Bit, Roller-. T. Patin. (Reissue.) No. 15,194; Sept. 13; v. 290; p. 377.
Billet-charging apparatus. H. Tomlinson. No. 1,390,845; Sept. 13; v. 290; p. 350.
Blankets, quilts, &c., for baby-cribs, Fastener for. W. E Fleming. No. 1,390,608; Sept. 13; v. 290; p. 303.
Blowtorch. C. H. Allen and J. B. Anderson. No. 1,390,265; Sept. 13; v. 290; p. 234.
Blowtorches, Burner-cleaning device for. C. H. Allen and J. B. Anderson. No. 1,390,264; Sept. 13; v. 290; p. 233.
Bodkin. A. Baker. No. 1,390,864; Sept. 13; v. 290; p. 354.
Boiler: *See*—
Heating-boiler. Superheated-steam boiler.
Rotary boiler.
Bolt. W. L. Bell. No. 1,390,485; Sept. 13; v. 290; p. 277.
Book-holder. S. T. Thompson. No. 1,390,938; Sept. 13; v. 290; p. 369.
Bottle-closure. F. H. Silverthorne. No. 1,390,549; Sept. 13; v. 290; p. 290.
Bottle-holder. L. L. Armstrong. No. 1,390,266; Sept. 13; v. 290; p. 234.
Bottles and other containers, Closure for. T. C. Spelling. No. 1,390,832; Sept. 13; v. 290; p. 347.
Bottles and other containers, Closure for. T. C. Spelling. No. 1,390,833; Sept. 13; v. 290; p. 348.
Box: *See*—
Planting-box. Tobacco-box.
Box-corners by creasing, Apparatus for forming. B. A. Lange. No. 1,390,795; Sept. 13; v. 290; p. 340.
Brace: *See*—
Railway-tie brace.
Bracelet. C. G. King. No. 1,390,360; Sept. 13; v. 290; p. 252.
Bracelets, &c., Latch for. C. G. King. No. 1,390,361; Sept. 13; v. 290; p. 252.
Bracket: *See*—
Bumper-bracket. Wall-bracket.
Brake: *See*—
Fluid-pressure brake.
Brake apparatus, Load-. T. H. Thomas. No. 1,390,593; Sept. 13; v. 290; p. 299.
Brake-beam. C. F. Huntoon. No. 1,390,968; Sept. 13; v. 290; p. 375.
Brake shoe and head. C. I. Walker. No. 1,390,846; Sept. 13; v. 290; p. 350.

Broom. S. Cantor. No. 1,390,882; Sept. 13; v. 290; p. 357.

Broom-holder. S. Cantor. No. 1,390,881; Sept. 13; v. 290; p. 357.

Brooms and brushes, Bristle for. E. H. W. Von Niessen. No. 1,390,973; Sept. 13; v. 290; p. 376.

Buckle and wrist-strap. G. Christiansen. No. 1,390,761; Sept. 13; v. 290; p. 333.

Building construction. D. Baughman. No. 1,390,951; Sept. 13; v. 290; p. 372.

Building, Storage-. B. F. Mullaney. No. 1,390,635; Sept. 13; v. 290; p. 309.

Bumper-bracket. E. A. Milhaupt. No. 1,390,633; Sept. 13; v. 290; p. 309.

Bunk. R. Woolley. No. 1,390,852; Sept. 13; v. 290; p. 351.

Button, Flexible clasp-. C. M. Webb and T. Miller. No. 1,390,847; Sept. 13; v. 290; p. 350.

Calendar-fob. H. A. McElligott. No. 1,390,300; Sept. 13; v. 290; p. 241.

Cam-shaft and making the same. I. Yassenoff. No. 1,390,949; Sept. 13; v. 290; p. 372.

Cams, Device for testing inaccuracies in. S. Pichler. No. 1,390,540; Sept. 13; v. 290; p. 288.

Can-cover-lining machine. J. Brenzinger. No. 1,390,491; Sept. 13; v. 290; p. 278.

Can-heading machine. J. Brenzinger. No. 1,390,490; Sept. 13; v. 290; p. 278.

Canopy, Floral. E. M. Koehler. No. 1,390,566; Sept. 13; v. 290; p. 294.

Caps, Loading detonating-. T. Wennerström. No. 1,390,849; Sept. 13; v. 290; p. 351.

Caps, Water-excluding device for bathing-. I. W. Litchfield. No. 1,390,628; Sept. 13; v. 290; p. 308.

Car-control device. J. M. Dapron. No. 1,390,604; Sept. 13; v. 290; p. 302.

Car-control device, Safety. C. P. Cass. No. 1,390,602; Sept. 13; v. 290; p. 301.

Car-control device, Safety. T. H. Thomas. No. 1,390,595; Sept. 13; v. 290; p. 300.

Car-control equipment, Safety. C. C. Farmer. No. 1,390,606; Sept. 13; v. 290; p. 302.

Car-control equipment, Safety. T. H. Thomas. No. 1,390,594; Sept. 13; v. 290; p. 300.

Car-door fastener. E. A. Mayhew. No. 1,390,306; Sept. 13; v. 290; p. 242.

Carend, Corrugated sheet-metal. W. P. Murphy. (Reissue.) No. 15,193; Sept. 13; v. 290; p. 377.

Car, Railway-. J. B. Strauss. No. 1,390,396; Sept. 13; v. 290; p. 259.

Car-unloader. E. R. Sutton. No. 1,390,591; Sept. 13; v. 290; p. 299.

Carbon-black and other solid reaction products, Manufacture of. W. D. Bancroft. No. 1,390,480; Sept. 13; v. 290; p. 276.

Carbureter. R. M. Anderson. No. 1,390,477; Sept. 13; v. 290; p. 275.

Carbureter. T. Bemis. No. 1,390,752; Sept. 13; v. 290; p. 331.

Carbureter. W. A. Edwards. No. 1,390,681; Sept. 13; v. 290; p. 318.

Carbureter. J. W. Johnson. No. 1,390,790; Sept. 13; v. 290; p. 339.

Cards and games, Playing-. J. R. Silliman, Jr. No. 1,390,824; Sept. 13; v. 290; p. 346.

Carrier: *See*—
Cleaner-carrier.
Parcel-carrier.
Self-dumping bar-carrier.
Tire-carrier.
Wick-carrier.

Case: *See*—
Filing-case.

Casket-handle. E. R. Sargent. No. 1,390,461; Sept. 13; v. 290; p. 272.

Catalytic material, Regenerating. C. Ellis. No. 1,390,684; Sept. 13; v. 290; p. 319.

Catalyzer from oil, Removing. C. Ellis. No. 1,390,688; Sept. 13; v. 290; p. 319.

Catalyzers, Making. C. Ellis. No. 1,390,683; Sept. 13; v. 290; p. 319.

Catalyzers, Making. C. Ellis. No. 1,390,685; Sept. 13; v. 290; p. 319.

Cattle-mark. E. Delay. No. 1,390,342; Sept. 13; v. 290; p. 249.

Centering device. S. D. Hendershot. No. 1,390,906; Sept. 13; v. 290; p. 363.

Chain, Mud-. N. R. White. No. 1,390,411; Sept. 13; v. 290; p. 262.

Chain tightener, Skid-. E. L. Hill. No. 1,390,613; Sept. 13; v. 290; p. 304.

Chains, Connector-link for. W. A. Brown. No. 1,390,877; Sept. 13; v. 290; p. 356.

Chair: *See*—
Collapsible chair.
Rail-chair.

Chair or the like. S. Gage. No. 1,390,525; Sept. 13; v. 290; p. 285.

Check-protector. O. R. Jones. No. 1,390,620; Sept. 13; v. 290; p. 305.

Check, Safety-. P. C. Longmesser. No. 1,390,959; Sept. 13; v. 290; p. 374.

Chemicals, Feeding device for dry. L. M. Booth. No. 1,390,271; Sept. 13; v. 290; p. 235.

Cherry-pitting machine. C. H. Marshall. No. 1,390,804; Sept. 13; v. 290; p. 342.

Chimney-top. W. W. Bickel and H. E. Brown. No. 1,390,269; Sept. 13; v. 290; p. 235.

Chip-receptacle and producing same. E. S. Ensign. No. 1,390,517; Sept. 13; v. 290; p. 284.

Chuck. R. F. Runge and H. W. Jackson. No. 1,390,961; Sept. 13; v. 290; p. 374.

Chuck-pin. J. J. Harrington. No. 1,390,551; Sept. 13; v. 290; p. 291.

Chucking mechanism. E. P. Lindahl. No. 1,390,627; Sept. 13; v. 290; p. 307.

Churn and butter-worker. H. J. Smith. No. 1,390,466; Sept. 13; v. 290; p. 273.

Churn and butter-worker, Combined. R. B. Disbrow. No. 1,390,343; Sept. 13; v. 290; p. 249.

Circuits, Desk-operator's. W. A. Rhodes. No. 1,390,545; Sept. 13; v. 290; p. 290.

Clamp: *See*—
Hose-clamp.
Trolley-wire clamp.

Clasp: *See*—

Operating connection. W. J. Baumgartner. No. 1,390,482; Sept. 13; v. 290; p. 276.
Oxymercury nitrophenolate. J. F. Schamberg, G. W. Raiziss, and J. A. Kolmer. No. 1,390,972; Sept. 13; v. 290; p. 376.
Package. C. M. Herrington. No. 1,390,784; Sept. 13; v. 290; p. 338.
Package, Candy-. B. Bonestell. No. 1,390,667; Sept. 13; v. 290; p. 315.
Paddle-wheel. A. Fortier. No. 1,390,523; Sept. 13; v. 290; p. 285.
Paint and making same, Cold-water. W. E. Carson. No. 1,390,496; Sept. 13; v. 290; p. 279.
Pan: *See*—
Ash-pan.
Paper-filler and making the same. W. N. Kohlins. No. 1,390,297; Sept. 13; v. 290; p. 240.
Paper, Manufacture of moisture-proof crape. A. E. Currier. No. 1,390,276; Sept. 13; v. 290; p. 236.
Parachute. F. Baker. No. 1,390,598; Sept. 13; v. 290; p. 300.
Parcel-carrier. W. L. Campbell and A. E. Straughan. No. 1,390,339; Sept. 13; v. 290; p. 248.
Pasteurizing whey, Apparatus for. D. E. Norleen. No. 1,390,308; Sept. 13; v. 290; p. 242.
Paving apparatus. R. D. Baker. No. 1,390,479; Sept. 13; v. 290; p. 276.
Pen attachment, Lettering-. E. G. Henry. No. 1,390,290; Sept. 13; v. 290; p. 239.
Pen, Fountain-. R. J. Mackenzie. No. 1,390,366; Sept. 13; v. 290; p. 253.
Phonograph. G. Stupar. No. 1,290,655; Sept. 13; v. 290; p. 313.
Phonograph. J. Wahlberg. No. 1,390,404; Sept. 13; v. 290; p. 261.
Phonograph and picture-projector, Combined. A. Rasmussen, Jr. No. 1,390,640; Sept. 13; v. 290; p. 310.
Phonograph-reproducer. D. H. Wilson. No. 1,390,962; Sept. 13; v. 290; p. 374.

Phonograph-reproducer. D. H. Wilson. No. 1,390,963; Sept. 13; v. 290; p. 374.
Phonographs, Automatic stopping and starting device for. J. A. Eltutis. No. 1,390,662; Sept. 13; v. 290; p. 318.
Phonographic reproducer. A. Hoover. No. 1,390,558; Sept. 13; v. 290; p. 292.
Photographic purposes, Time-switch for. A. Büchi. No. 1,390,336; Sept. 13; v. 290; p. 247.
Piano action, Pneumatic player-. F. Dathan. No. 1,390,430; Sept. 13; v. 290; p. 266.
Piano-player. A. R. Gillham. No. 1,390,697. Sept. 13; v. 290; p. 320.
Pianos, Attachment for player-. J. H. Bates. No. 1,390,421; Sept. 13; v. 290; p. 264.
Picker: *See*—
Fruit-picker.
Picture apparatus, Motion-. W. A. Condon. No. 1,390,763; Sept. 13; v. 290; p. 334.
Pictures, Production of animated. T. Armat. No. 1,390,861; Sept. 13; v. 290; p. 353.
Pile-pulling rig. M. D. Riker. No. 1,390,643; Sept. 13; v. 290; p. 311.
Pin: *See*—
Chuck-pin.
Pipe: *See*—
Smoker's pipe.
Piston-ring. L. Nagy. No. 1,390,577; Sept. 13; v. 290; p. 296.
Plines, Frame for. J. Knowles. No. 1,390,565; Sept. 13; v. 290; p. 293.
Planter and fertiliser-distributer. G. D. Powell. No. 1,390,383; Sept. 13; v. 290; p. 257.
Planters, Check-head for. P. H. Baxter. No. 1,390,748; Sept. 13; v. 290; p. 330.
Planting-box. W. H. Bussey. No. 1,390,337; Sept. 13; v. 290; p. 248.
Plastic material. Key-base for. J. O. Fowler. No. 1,390,774; Sept. 13; v. 290; p. 336.
Plastic molding material, Preparing. O. Gerlach and C. B. Lihme. No. 1,390,435; Sept. 13; v. 290; p. 267.
Plate attachment, Name-. O. Nelson. No. 1,390,637; Sept. 13; v. 290; p. 309.
Plow. R. M. Iverson. No. 1,390,615; Sept. 13; v. 290; p. 304.
Plow, Tractor gang-. W. H. Nichols. No. 1,390,578; Sept. 13; v. 290; p. 296.
Pole-trailer. O. E. Byron. No. 1,390,428; Sept. 13; v. 290; p. 265.
Polishing or finishing composition. C. Ellis. No. 1,390,691; Sept. 13; v. 290; p. 320.
Polyphase currents into practically constant direct currents, Transformation of. O. M. Corbino. No. 1,390,504; Sept. 13; v. 290; p. 281.
Pool-cue-tip holder. A. F. Reinheimer. No. 1,390,722; Sept. 13; v. 290; p. 325.
Portable support. H. Mintz. No. 1,390,807; Sept. 13; v. 290; p. 342.
Potato-cutter. R. F. Wilson. No. 1,390,739; Sept. 13; v. 290; p. 329.
Powder, Propellent bulk smokeless. R. G. Woodbridge, Jr. No. 1,390,740; Sept. 13; v. 290; p. 329.
Power plant. L. I. Kelly. No. 1,390,562; Sept. 13; v. 290; p. 293.
Power plant, Steam-motive-. E. W. Swartwout. No. 1,390,399; Sept. 13; v. 290; p. 260.
Power-press. L. Sametz. No. 1,390,589; Sept. 13; v. 290; p. 298.
Power transmission. C. K. Nagy. No. 1,390,920; Sept. 13; v. 290; p. 366.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 20TH DAY OF SEPTEMBER, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Abramson, Samuel A., Newark, N. J. Window-frame. No. 1,391,602; Sept. 20; v. 290; p. 566.

Adams, Edward S. and W. H., Columbus, Ohio. Storage battery. No. 1,391,089; Sept. 20; v. 290; p. 416.

Adams, Walter H. (See Adams, Edward S. and W. H.)

Aichele, Albert, assignor to A. G. Brown Boverie & Cie., Baden, Switzerland. Magneto-ignition apparatus. No. 1,391,234; Sept. 20; v. 290; p. 492.

Allen, S. L., and Co. (See Mader, Joseph, assignor.)

Amberton, Richard, London, England. Electric controller. No. 1,391,522; Sept. 20; v. 290; p. 550.

American Automatic Train Control Corporation. (See Quarles, Charles H., assignor.)

American Automatic Train Control Corporation. (See Stephens, Charles Z., assignor.)

American Hominy Company. (See Atkinson, Frederick C., assignor.)

American Slicing Machine Company, The. (See Hood, E. K., and Wolff, assignors.)

American Steam Truck Company. (See Jacobsen, Ern C., assignor.)

American Telephone & Telegraph Company. (See Loynes, O. H., and Rose, assignors.)

American Telephone and Telegraph Company. (See Parker, Ralzemond D., assignor.)

Andersen, Albert, assignor to Automatic Electric Company, Chicago, Ill. Call-sending device. No. 1,391,442; Sept. 20; v. 290; p. 534.

Anderson, Albert J., Ashtabula, Ohio. Heat-deflector and draft-creating device. No. 1,391,291; Sept. 20; v. 290; p. 503.

Anderson, Hugh C., Detroit, Mich. Automobile-signal. No. 1,391,528; Sept. 20; v. 290; p. 551.

Anderson, William M., assignor to Ideal Products Company, Minneapolis, Minn. Price-card holder. No. 1,391,090; Sept. 20; v. 290; p. 462.

Andrews, William G. (See Mayer, G. K., Andrews, and Coldby.)

Anthony Company, The. (See Morse, Albert W., assignor.)

Appleby, Edmund G. (See Bentley, G. H., and Appleby.)

Appleton Wire Works. (See Weissenborn, Albert B., assignor.)

Arbuckle, Emery H., Cleveland, Ohio. Adjustable sink. No. 1,391,091; Sept. 20; v. 290; p. 416.

Arnesen, Charlotte, assignor of one-fifth to C. L. Oberg and I. A. Oberg, Portland, Oreg. Aeroplane. No. 1,391,443; Sept. 20; v. 290; p. 534.

Ashton, William J., Dallas, Tex. Motometer-anchor. No. 1,390,975; Sept. 20; v. 290; p. 439.

Atkinson, Frederick C., assignor to American Hominy Company, Indianapolis, Ind. Food product and making the same. No. 1,391,160; Sept. 20; v. 290; p. 477.

Atkinson, Frederick C., assignor to American Hominy Company, Indianapolis, Ind. Food product and preparing. No. 1,391,161; Sept. 20; v. 290; p. 477.

Atkocaitis, Juozapas, Chicago, Ill. Necktie-pressing board. No. 1,391,444; Sept. 20; v. 290; p. 534.

Atwater Kent Manufacturing Company. (See Kent, Arthur A., assignor.)

Automatic Electric Company. (See Andersen, Albert, assignor.)

Automatic Metal Products Company, The. (See Bradley, William H., assignor.)

Avery Company. (See Solomon, Edgar J., assignor.)

Axt, Joseph A., Amboy, Minn. Grain-board holder. No. 1,391,292; Sept. 20; v. 290; p. 503.

B. Z. B. Knitting Co. (See Burson, Wilson W., assignor.)

Bacon Bros. Company, The. (See Gillian, Herman A., assignor.)

Bacot, Byron L., McComb, Miss. Roofing-tile. No. 1,391,603; Sept. 20; v. 290; p. 566.

Baer, Richard, New York, N. Y. Permutation-lock. No. 1,391,357; Sept. 20; v. 290; p. 516.

Baer, Richard, New York, N. Y. Permutation-lock. No. 1,391,359; Sept. 20; v. 290; p. 517.

Baer, Richard, and H. Kopp, New York, N. Y. Locking device for motor-vehicles. No. 1,391,358; Sept. 20; v. 290; p. 517.

Baeumle, John, Milwaukee, Wis. Resilient traction-wheel. No. 1,391,445; Sept. 20; v. 290; p. 535.

Bailly, Armand, Paris, France. Pneumatic hammer. No. 1,391,162; Sept. 20; v. 290; p. 477.

Bake-Rite Oven Manufacturing Company. (See Lindsey, Ernest E., assignor.)

Baker, William E., Rock Island, Ill. Fluid-pressure engine. No. 1,391,446; Sept. 20; v. 290; p. 535.

Balough, Charles, assignor to The Hercules Motor Manufacturing Company, Canton, Ohio. Oil-sealing device. No. 1,391,293; Sept. 20; v. 290; p. 503.

Bamberger, L., & Company. (See Kaskell, Chester C., assignor.)

Banbury, Fernley H., Ansonia, assignor to Birmingham Iron Foundry, Derby, Conn. Machine for treating rubber and other heavy plastic material. No. 1,390,976; Sept. 20; v. 290; p. 439.

Bancroft, Frank H., assignor to P. Derby & Company, Gardner, Mass. Joint. No. 1,391,163; Sept. 20; v. 290; p. 477.

Barbarou, Marius J. B., Paris, France. Back axle for motor-cars. No. 1,391,294; Sept. 20; v. 290; p. 504.

Barkschat, Henry, Los Angeles, Calif. Machine for centrifugal formation of plastic bodies. No. 1,391,164; Sept. 20; v. 290; p. 477.

Barnum, Thomas E., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Motor-controller. No. 1,391,295; Sept. 20; v. 290; p. 504.

Baron, George, Montreal, Quebec, Canada. Bolt-lock. No. 1,391,447; Sept. 20; v. 290; p. 535.

Basile, Joseph, New York, assignor of one-half to Greenpoint Metallic Bed Company, Brooklyn, N. Y., and one-half to Joseph Turk Manufacturing Co., Bradley, Ill. Bedstead. No. 1,391,448; Sept. 20; v. 290; p. 535.

Baumgard, Frank H., Columbus, Ohio. Candy-sugaring machine. No. 1,391,604; Sept. 20; v. 290; p. 566.

Bayley & Sons. (See Bayley, Robert W., assignor.)

Bayley, Robert W., assignor to Bayley & Sons, Inc., Brooklyn, N. Y. Lighting unit. No. 1,391,235; Sept. 20; v. 290; p. 492.

Beach, Chester H., assignor to Wisconsin Electric Company, Racine, Wis. Electric grinder. No. 1,391,039; Sept. 20; v. 290; p. 452.

Beach, Chester H., Racine, Wis., assignor to Moore Electric Corporation, Chicago, Ill. Flexible-shaft guard. No. 1,391,092; Sept. 20; v. 290; p. 463.

Beach, Walter L., Flint, Mich. Automobile-signal-controlling device. No. 1,391,360; Sept. 20; v. 290; p. 517.

Beach, Walter L., Flint, Mich. Exhibitor for signals. No. 1,391,361; Sept. 20; v. 290; p. 517.

Behr, Henrietta, Philadelphia, Pa. Kitchen utensil. No. 1,390,977; Sept. 20; v. 290; p. 439.

Belais, David, and A. R. Bondy, New York, N. Y.; said Bondy assignor to said Belais. White gold. No. 1,391,449; Sept. 20; v. 290; p. 535.

Belden, Robert, Belden, Calif. Washing-machine. No. 1,391,605; Sept. 20; v. 290; p. 567.

Bender, John G., *et al.* (See Wilson, James M., assignor.)

Benjamin Electric Manufacturing Company. (See Benjamin, Reuben B., assignor.)

Benjamin, Reuben B., assignor to Benjamin Electric Manufacturing Company, Chicago, Ill. Electric iron. No. 1,391,296; Sept. 20; v. 290; p. 504.

Bentley, George H., and E. G. Appleby, Westminster, London, England. Apparatus for agitating the fuel in gas-generators. No. 1,391,236; Sept. 20; v. 290; p. 492.

Bequette, Richard J., *et al.* (See Gilthorpe, Stanley C., assignor.)

Berdon, Albert E., assignor to Dodge Brothers, Detroit, Mich. Oil-pan heater. No. 1,391,040; Sept. 20; v. 290; p. 452.

Berry, John S., Plainfield, N. J. Window structure. No. 1,391,237; Sept. 30; v. 290; p. 492.

Best, William N., Brooklyn, assignor of one-fourth to G. B. Phelps, New York, N. Y.; one-fourth to S. A. Meisser, Quincy, Ill., and one-fourth to M. S. Spies, Creston, Iowa. Child's vehicle. No. 1,391,165; Sept. 20; v. 290; p. 477.

Bethlehem Steel Company. (See Evans, Fred, assignor.)

Bethlehem Steel Company. (See Lachman, Maurice, assignor.)

Bevelle, Joseph C., and J. J. Smith, El Paso, Tex. Valve and valve-seat. No. 1,391,450; Sept. 20; v. 290; p. 535.

Bickel, Edward, Seattle, Wash. Knockdown chair. No. 1,391,362; Sept. 20; v. 290; p. 517.

Bickel, Joseph W., Chicago Heights, Ill. Meter. No. 1,391,093; Sept. 20; v. 290; p. 463.

Bidwell, William T., Atlanta, Ga. Heating generating plant. No. 1,391,451; Sept. 20; v. 290; p. 536.

Birmingham Iron Foundry. (See Banbury, Fernley H., assignor.)

Bissell, Carl H., assignor to Crouse-Hinds Company, Syracuse, N. Y. Cap for conduit outlet-boxes. No. 1,391,524; Sept. 20; v. 290; p. 551.
Blakeslee, Talbert W., Erie, Pa. Syringe. No. 1,391,606; Sept. 20; v. 290; p. 567.
Blood, Thomas G., Birmingham, England. Saucepan and like cooking and heating appliances. No. 1,391,525; Sept. 20; v. 290; p. 551.
Bondy, Alfred R. (See Belais, D., and Bondy.)
Boode, Axel. (See Nelson, N. S., and Boode.)
Boon, Henry G., Appleton, and C. A. Fourness, assignors to Kimberly-Clark Company, Neenah, Wis. Sizing-tester. No. 1,391,041; Sept. 20; v. 290; p. 452.
Booth, William W., Toledo, Ohio. Supplementary handle for tools. No. 1,391,452; Sept. 20; v. 290; p. 536.
Bourgeois, Victor L. J., assignor of one-half to J. N. Dubois, Montreal, Quebec, Canada. Loading and unloading apparatus for vehicles. No. 1,391,607; Sept. 20; v. 290; p. 567.
Boye Needle Mfg. Company, The. (See Carlson, Gustav A., assignor.)
Bozik, Lukas, Livingston, Ill. Furniture-caster. No. 1,391,363; Sept. 20; v. 290; p. 518.
Bowlsby, Bruce F., Brampton, N. D. Magazine-loader. No. 1,391,453; Sept. 20; v. 290; p. 536.
Brabant, John W., La Crosse, Wis. Mixing-machine. No. 1,391,454; Sept. 20; v. 290; p. 536.
Brach, Frank V., Chicago, Ill. Detachable cuff. No. 1,391,094; Sept. 20; v. 290; p. 463.
Bradley, Jessie C., Oakland, Calif. Auxiliary heating-plate. No. 1,391,166; Sept. 20; v. 290; p. 478.
Bradley, William H., assignor to The Automatic Metal Products Company, Springfield, Ohio. Metal-working machine. No. 1,390,978; Sept. 20; v. 290; p. 439.
Braunsdorf, William, New York, N. Y. Ticket-holder. No. 1,390,979; Sept. 20; v. 290; p. 439.
Brewer, Basil, Cleveland, Ohio. Paper-measuring attachment for printing-presses. No. 1,391,042; Sept. 20; v. 290; p. 453.
Bried, Julien A., Oakland, assignor of one-half to S. L. Rogers, San Francisco, Calif. Construction of pulley and friction-wheel lagging. No. 1,391,238; Sept. 20; v. 290; p. 493.
Bristol, John I. D. (See Curtis, H. K., and Hunter, assignors.)
Broad, William, Beaver Falls, assignor of three-fourths to H. E. McLain, Pittsburgh, Pa. Spark-intensifier. No. 1,391,239; Sept. 20; v. 290; p. 493.
Brommer, John F., New York, N. Y. Talking-machine. No. 1,391,455; Sept. 20; v. 290; p. 536.
Broschart, Jacob L., Trenton, Mo. Pipe-coupling. No. 1,391,456; Sept. 20; v. 290; p. 537.
Brosius, John G., Tulsa, Okla. Door and window construction. No. 1,391,608; Sept. 20; v. 290; p. 567.

Foster, James G. (See Stevens, Joseph B., assignor.)
Foster, Machine Company. (See McKean, John O., assignor.)
Foster, William B., assignor to Foster Brothers Manufacturing Company, Utica, N. Y. Bracket for angular-walled tubing. No. 1,391,103; Sept. 20; v. 290; p. 465.
Fotchuk, Theodor, Toronto, Ontario, Canada. Shoe-closure. No. 1,390,991; Sept. 20; v. 290; p. 442.
Fourness, Charles A. (See Boon, H. G., and Fourness.)
Frankel, Adolph, New York, N. Y. Snap-fastener. No. 1,391,250; Sept. 20; v. 290; p. 495.
Franzen, Harm, Phoenix, Ariz. Runner for sickle-bars. No. 1,391,181; Sept. 20; v. 290; p. 480.
Freeze, Elisha C., St. Louis, Mo. Radiator-hood. No. 1,391,468; Sept. 20; v. 290; p. 539.
French Battery & Carbon Co. (See Ruhoff, Otto E., assignor.)
Friese-Greene, William, assignor to Colour Photography Limited, London, England. Color photography. No. 1,391,310; Sept. 20; v. 290; p. 507.
Fritchle, Oliver P., Denver, Colo. Current-generating plant. No. 1,391,377; Sept. 20; v. 290; p. 520.
Frost, Clarence M., Attleboro, Mass. Aerated-water-supply device. No. 1,391,311; Sept. 20; v. 290; p. 507.
Frost, Clinton E., East Cleveland, assignor to The Cleveland Osborn Manufacturing Company, Cleveland, Ohio. Rotary brush. No. 1,391,051; Sept. 20; v. 290; p. 454.
Fryman, Harry, Grimsby, Lincoln, England. Signaling apparatus for vehicles. No. 1,391,623; Sept. 20; v. 290; p. 570.
Gale, Laburton A., Belmont, assignor to Library Bureau, Cambridge, Mass. Index-card. No. 1,391,182; Sept. 20; v. 290; p. 481.
Gardner, Sydney B., Benson, Minn. Trench-wall-supporting machine. No. 1,391,624; Sept. 20; v. 290; p. 570.
Garey, John E. (See Goyette, William E., assignor.)
Gaston, Alanson D., Washington, D. C. Combined nut and bolt lock. No. 1,391,378; Sept. 20; v. 290; p. 521.
Gebhardt, Edward J., Hoboken, N. J. Sled. No. 1,391,312; Sept. 20; v. 290; p. 508.
Geier, P. A., Company, The. (See Robertson, Frank E., assignor.)
Geiger, William A., Chicago, Ill., assignor to W. H. Miner, Chazy, N. Y. Reversibly-operable hand-brake. No. 1,391,052; Sept. 20; v. 290; p. 455.
Geisler, Alexander L., Bristol, R. I. Locking hook. No. 1,391,625; Sept. 20; v. 290; p. 570.
Geist Manufacturing Company. (See Wiederwax, Robert W., assignor.)
General Electric Company. (See Webster, Samuel T., assignor.)
Geoffrion, Victor, L'Assomption, Quebec, Canada. Filing-cabinet for plans. No. 1,391,313; Sept. 20; v. 290; p. 508.
George Ralph D., Kansas City, Mo. Transmission-gearing. No. 1,391,314; Sept. 20; v. 290; p. 508.
Getchell, Benjamin E., assignor to The Trumbull Electric Manufacturing Co., Plainville, Conn. Electromagnetic trip mechanism. No. 1,391,469; Sept. 20; v. 290; p. 539.
Gillian, Herman A., assignor to The Bacon Bros. Company, Toledo, Ohio. Material-handling. No. 1,391,183; Sept. 20; v. 290; p. 481.
Gilthorpe, Stanley C., assignor of one-third to B. J. Bequette and one-third to H. C. Leake, New Orleans, La. Drill-head for well-drilling apparatus. No. 1,391,626; Sept. 20; v. 290; p. 571.
Ginsburg, Michael I., Philadelphia, Pa. Slip-jaw wrench. No. 1,391,251; Sept. 20; v. 290; p. 495.
Glenn, Oscar, Butte, Mont. Safety device for mine-cages. No. 1,391,539; Sept. 20; v. 290; p. 554.
Globe Ticket Company. (See Fellows, James A., assignor.)
Godkevitch, Abraham H., New York, N. Y. Wooden shipping-case. No. 1,391,470; Sept. 20; v. 290; p. 539.
Gohlke, Max, Pankow, near Berlin, Germany. Ball-bearing. No. 1,391,379; Sept. 20; v. 290; p. 521.
Goldfinch, William H. (See Sinfield, E., and Goldfinch.)
Gomes, Joseph T., Goldfield, Nev. Spark-plug cleaner. No. 1,391,471; Sept. 20; v. 290; p. 539.
Goodrich, B. F., Company, The. (See Denmire, Harold A., assignor.)
Gordon, William E., Winnipeg, Manitoba, Canada. Spring winding or stressing mechanism for talking-machines. No. 1,391,315; Sept. 20; v. 290; p. 508.
Gorst, Clinton W., Black Earth, Wis. Cow-poke. No. 1,391,627; Sept. 20; v. 290; p. 571.
Gould, Joseph R., West Springfield, Mass. Fluid-actuated liquid-measuring pump. No. 1,391,104; Sept. 20; v. 290; p. 465.
Gourland Typewriter Corporation. (See Spiro, Charles, assignor.)
Goyette, William E., Philadelphia, Pa., assignor to J. E. Garey, Elmira Heights, N. Y. Yarn-cleaning device. No. 1,391,540; Sept. 20; v. 290; p. 554.
Grant, John A., Atlanta, Ga. Automobile-tire. No. 1,391,541; Sept. 20; v. 290; p. 554.
Grant, Lester E., Auburndale, Mass. Vehicle-lock. No. 1,391,105; Sept. 20; v. 290; p. 465.
Green, Samuel H., Lelant, and J. D. Opie, Hayle, England. Manufacture of malt extract. No. 1,391,159; Sept. 20; v. 290; p. 475.
Greenman, Morris. (See Sprinkle, L. H., and Greenman.)
Greenpoint Metallic Bed Company, *et al.* (See Basile, Joseph, assignor.)
Greiner, Anton F., Cleveland, assignor to The Cleveland Tractor Company, Euclid, Ohio. Steering-gear attachment. No. 1,391,053; Sept. 20; v. 290; p. 455.
Griesser, Wilhelm, Joplin, Mo., assignor to W. C. Griesser, Pittsburgh, Pa. Deep-sea construction. No. 1,391,380; Sept. 20; v. 290; p. 521.
Griesser, William C. (See Griesser, Wilhelm, assignor.)
Grigsby, Marion W., East Peoria, Ill. Vehicle-wheel rim. No. 1,391,472; Sept. 20; v. 290; p. 540.
Grip Nut Company. (See Chadwick, Arthur B., assignor.)
Grupe, William F., Hudson Heights, N. J., assignor to Endless Belt Corporation, Inc. Belt-guiding means. No. 1391118; Sept. 20; v. 290; p. 481.
Grupe, William F., Hudson Heights, N. J., assignor to Endless Belt Corporation, Inc. Self-adjusting tension means. No. 1,391,185; Sept. 20; v. 290; p. 481.
Gulbert, Francis W., Detroit, Mich. Internal-combustion engine. No. 1,391,106; Sept. 20; v. 290; p. 465.
Gulbransen, Axel G., assignor to Gulbransen-Dickinson Company, Chicago, Ill. Player-piano. No. 1,391,107; Sept. 20; v. 290; p. 466.
Gulbransen-Dickinson Company. (See Gulbransen, Axel G., assignor.)
Hadfield, Hugh R., Akron, Ohio. Construction of walls of preformed units. No. 1,391,316; Sept. 20; v. 290; p. 508.
Haesloop, George C. (See Rundell, Raymond R., assignor.)
Hahn, Harry A., Greenville, Ohio. Battery-plate-burning rack. No. 1,391,649; Sept. 20; v. 290; p. 575.
Haight, Harry V., Sherbrooke, Quebec, Canada, assignor to Ingersoll-Rand Company, Jersey City, N. J. Hammer-drill. No. 1,391,629; Sept. 20; v. 290; p. 571.
Haight, Harry V., Sherbrooke, Quebec, Canada, assignor to Ingersoll-Rand Company, Jersey City, N. J. Percussive tool. No. 1,391,628; Sept. 20; v. 290; p. 571.
Hales, Walter W., New York, and A. Hine, Cedarhurst, N. Y.; said Hine assignor to said Hales. Process and apparatus for improving combustion in explosive-engines. No. 1,391,630; Sept. 20; v. 290; p. 572.
Hall, Charles W., Wakefield, and F. E. Wheeler, Belmont, assignors to Henry F. Miller & Sons Piano Company, Boston, Mass. Bracket for grand-piano actions. No. 1,391,054; Sept. 20; v. 290; p. 455.
Hall, William H. (See Hinsdale, W. E., and Hall.)
Hamblet, Marcia C., Salem, Mass. Hand-protection device. No. 1,391,108; Sept. 20; v. 290; p. 466.
Hamel, Oscar C., Peabody, Mass. Gearing. No. 1,391,542; Sept. 20; v. 290; p. 554.
Hammersmith, Alfred F., Chicago, Ill. Extension electric-light fixture. No. 1,391,631; Sept. 20; v. 290; p. 572.
Hans, John, assignor of three-fourths to J. P. Haworth, London, England. Device for holding or gripping dish-cloths or the like. No. 1,391,632; Sept. 20; v. 290; p. 572.
Hansen, Charles C., assignor to Refrigerating Specialties Company, Chicago, Ill. Valve-stem packing. No. 1,391,317; Sept. 20; v. 290; p. 508.
Hanson, Clinton A. S., Barron, Wis. Multicylinder for cycle explosion-engines. No. 1,391,473; Sept. 20; v. 290; p. 540.

Hardy, Charles, *et al.* (See Service, William F., assignor.)
Harris, Andrew. (See Swires, James D., assignor.)
Harthan, John F. (See von Bichowsky, F., and Harthan.)
Hartwig, William J. (See Moore, William E., assignor.)
Haskins, Elbert O., Rutherford, N. J., assignor to Richmond Radiator Company. Sectional boiler. No. 1,391,381; Sept. 20; v. 290; p. 521.
Hatfield, W. D. (See Wells, Joseph C., Sr., assignor.)
Haubert, Leo, Muskogee, Okla. Power-delivering attachment for automobile trucks or tractors. No. 1,391,109; Sept. 20; v. 290; p. 466.
Hawkes, Robert L., St. Catharines, Ontario, Canada. Die-making machine. No. 1,391,055; Sept. 20; v. 290; p. 455.
Hawley, James L., Savannah, Ga., assignor of one-half to J. M. Hawley, Blythewood, S. C. Railway-journal-box jack. No. 1,391,382; Sept. 20; v. 290; p. 521.
Hawley, John M. (See Hawley, James L., assignor.)
Haworth, John P. (See Hans, John, assignor.)
Haselton, George, Portadown, Ireland. Screwed mechanism. No. 1,391,633; Sept. 20; v. 290; p. 572.
Heaney, Aaron R., Stillwater, Okla. Wrench. No. 1,391,110; Sept. 20; v. 290; p. 466.
Heath, Frederick, assignor to Heath Unit Tile Company, Tacoma, Wash. Hollow-wall construction. No. 1,391,318; Sept. 20; v. 290; p. 509.
Heath Unit Tile Company. (See Heath, Frederick, assignor.)
Heidrich, Herman C., *et al.* (See Wilson, James M., assignor.)
Hemphill, George E. (See Evans, E. J., and Hemphill.)
Hendricks, Harry J., Sterling Station, N. Y. Lubricating system. No. 1,391,634; Sept. 20; v. 290; p. 572.
Hennessy, Daniel E., Holyoke, Mass., assignor to Cowan Truck Company. Elevating-truck. No. 1,390,992; Sept. 20; v. 290; p. 442.
Henry, John W., New York, N. Y. Hair-cutter. No. 1,391,635; Sept. 20; v. 290; p. 573.
Heppel, Jean, Newark, N. J. Airship. No. 1,390,993; Sept. 20; v. 290; p. 442.
Hercules Motor Manufacturing Company, The. (See Balough, Charles, assignor.)
Herrbold, William J., Kalamazoo, Mich. Paper-stock-treating machine. No. 1,391,056; Sept. 20; v. 290; p. 455.
Hess, Harry, Sparks, Nev. Smoking-pipe. No. 1,391,474; Sept. 20; v. 290; p. 540.
Hill, Ferry F., assignor to M. W. Hill, Baltimore, Md. Brush and mop holder. No. 1,391,111; Sept. 20; v. 290; p. 466.
Hill, Malcolm W. (See Hill, Ferry F., assignor.)
Hill, Raymond T., Detroit, Mich. Nut-lock. No. 1,391,186; Sept. 20; v. 290; p. 481.
Hine, Arthur. (See Hales, W. W., and Hine.)
Hinsdale, Winfield E., assignor to Trenton Potteries Company, Trenton, N. J. Water-closet. No. 1,391,475; Sept. 20; v. 290; p. 540.
Hinsdale, Winfield E., Trenton, N. J. Water-closet. No. 1,391,476; Sept. 20; v. 290; p. 540.
Hinsdale, Winfield E., and W. H. Hall, Trenton, N. J. Water-closet. No. 1,391,477; Sept. 20; v. 290; p. 541.
Hinzman, Angela C., Chicago, Ill. Book-holder. No. 1,391,112; Sept. 20; v. 290; p. 467.
Hoecken, Karl, Berlin-Friedenau, Germany. Tens-carrying mechanism of computing-machines. No. 1,391,319; Sept. 20; v. 290; p. 509.
Holmes, Andrew J., Tacoma, Wash. Electric heater. No. 1,391,113; Sept. 20; v. 290; p. 467.

Williams, Lewis L., East Boston, Mass. Hair-tonic. No. 140,359; Sept. 20; v. 290; p. 600.
Williamson Candy Co., Chicago, Ill. Candy. No. 150,085; Sept. 20; v. 290; p. 628.
Winthrop Chemical Company, Inc., New York, N. Y. Antiseptic medical substance in powdered form. No. 136,217; Sept. 20; v. 290; p. 606.
Winton Company, The, Cleveland, Ohio. Automobiles, motor-trucks. No. 139,488; Sept. 20; v. 290; p. 609.
Ziegler, George Co., Milwaukee, Wis. Candles. No. 149,844; Sept. 20; v. 290; p. 627.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 20TH DAY OF SEPTEMBER, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Adding-machine. W. J. Pasinski. No. 1,391,072; Sept. 20; v. 290; p. 459.
Aeration-cell. G. C. Riser, Jr. No. 1,391,078; Sept. 20; v. 290; p. 460.
Aeroplane. C. Arnesen. No. 1,391,443; Sept. 20; v. 290; p. 534.
Agricultural implement. J. Mader. No. 1,391,264; Sept. 20; v. 290; p. 498.
Agricultural implement. S. Szucs. No. 1,391,023; Sept. 20; v. 290; p. 448.
Agricultural system. G. A. Case. No. 1,391,169; Sept. 20; v. 290; p. 478.
Air-brake apparatus. J. M. Readey. No. 1,391,404; Sept. 20; v. 290; p. 526.
Air control, Auxiliary. D. M. White. No. 1,391,032; Sept. 20; v. 290; p. 450.
Air-cooler. W. H. Stone. No. 1,391,592; Sept. 20; v. 290; p. 564.
Aircraft. N. Woyevodsky. No. 1,391,355; Sept. 20; v. 290; p. 516.
Airship. J. Heppel. No. 1,390,993; Sept. 20; v. 290; p. 442.
Alarm: *See*—
Lock-alarm. Tire-alarm.
Alkali salts of oxidized protalbinic acid and of oxidized lysalbinic acid as stable protective colloids for mercury compounds. M. E. Wolvekamp. No. 1,391,154; Sept. 20; v. 290; p. 475.
Alloy, High-carbon steel-iron. J. R. Speer. No. 1,391,215; Sept. 20; v. 290; p. 487.
Aluminum salts, Production of. C. A. Doremus. No. 1,391,172; Sept. 20; v. 290; p. 479.
Anchor, Motometer-. W. J. Ashton. No. 1,390,975; Sept. 20; v. 290; p. 439.
Animal and bird trap. W. Nawracaj and W. Jarosz. No. 1,391,489; Sept. 20; v. 290; p. 543.
Antiskid device. O. S. Pulliam. No. 1,391,342; Sept. 20; v. 290; p. 514.
Arch-support. W. N. Sechler. No. 1,391,584; Sept. 20; v. 290; p. 563.
Article of manufacture. G. Sykes. No. 1,391,428; Sept. 20; v. 290; p. 531.
Artist's color-box. C. N. Werntz. No. 1,391,028; Sept. 20; v. 290; p. 450.
Ash-separator. H. T. Emery. No. 1,391,178; Sept. 20; v. 290; p. 480.
Ash-sifter. G. H. Peters and R. E. Shoars. No. 1,391,073; Sept. 20; v. 290; p. 459.
Automatic releasing-coupling. E. J. Solomon. No. 1,391,422; Sept. 20; v. 290; p. 430.
Automatic switch. D. W. Carlson. No. 1,391,167; Sept. 20; v. 290; p. 478.
Automatic wrench. G. E. Roberts. No. 1,391,581; Sept. 20; v. 290; p. 562.
Automobile caution-signal. A. J. Jones. No. 1,391,120; Sept. 20; v. 290; p. 468.
Automobile-headlight. G. A. Wendt. No. 1,391,229; Sept. 20; v. 290; p. 490.
Automobile-lamp closures, Fastening for. E. A. Kuen. No. 1,391,327; Sept. 20; v. 290; p. 511.
Automobile-lock. C. Knapp. No. 1,391,390; Sept. 20; v. 290; p. 523.
Automobile-radiator. C. A. Marien. No. 1,391,485; Sept. 20; v. 290; p. 542.
Automobile-radiator. C. A. Marien. No. 1,391,486; Sept. 20; v. 290; p. 542.
Automobile-radiator. W. Phillips. No. 1,391,500; Sept. 20; v. 290; p. 545.
Automobile-radiator heater. U. V. O'Daniel. No. 1,391,270; Sept. 20; v. 290; p. 490.
Automobile-signal. H. C. Anderson. No. 1,391,523; Sept. 20; v. 290; p. 551.
Automobile-signal-controlling device. W. L. Beach. No. 1,391,360; Sept. 20; v. 290; p. 517.
Automobile trucks or tractors, Power-delivering attachment for. L. Haubert. No. 1,391,109; Sept. 20; v. 290; p. 466.
Automobiles, Curtain-support for. G. W. Scott. No. 1,391,417; Sept. 20; v. 290; p. 529.
Automobiles, Driving mechanism for. L. L. Custer. No. 1,391,098; Sept. 20; v. 290; p. 464.
Auto-signal. W. M. Howell. No. 1,391,383; Sept. 20; v. 290; p. 522.
Bail-ear and bail. J. F. Lamb. No. 1,391,257; Sept. 20; v. 290; p. 496.
Bait, Fish-decoy. G. W. Wheeler. No. 1,391,030; Sept. 20; v. 290; p. 450.
Bar: *See*—
Boring-bar.
Bar support, Adjustable detector-. C. A. Dunham. No. 1,390,989; Sept. 20; v. 290; p. 441.
Barrel or crate. G. A. Fevre and H. Hutchinson. No. 1,391,198; Sept. 20; v. 290; p. 484.
Battery: *See*—
Storage battery.
Battery jars, Apparatus for sealing storage-. T. A. Willard. No. 1,391,149; Sept. 20; v. 290; p. 474.
Battery-plate-burning rack. H. A. Hahn. No. 1,391,649; Sept. 20; v. 290; p. 575.
Batteries, Master cut-out for storage. J. M. Wilson. No. 1,391,232; Sept. 20; v. 290; p. 491.
Beads, Machine for making glass. W. F. Chase. No. 1,391,527; Sept. 20; v. 290; p. 551.
Bearing. R. J. Dearborn. No. 1,391,463; Sept. 20; v. 290; p. 538.
Bearing, Ball-. M. Gohlke. No. 1,391,379; Sept. 20; v. 290; p. 521.
Bearing rings, Gaging apparatus for thrust-. L. Rouanet. No. 1,391,509; Sept. 20; v. 290; p. 547.
Bedstead. J. Basile. No. 1,391,448; Sept. 20; v. 290; p. 535.
Belt, Abdominal. H. A. Mouln. No. 1,391,563; Sept. 20; v. 290; p. 558.
Belt-coupling. J. A. Turner. No. 1,391,285; Sept. 20; v. 290; p. 502.
Belt-guiding means. W. F. Grupe. No. 1,391,184; Sept. 20; v. 290; p. 481.
Belts, Device for fastening. F. W. Carlson. No. 1,391,168; Sept. 20; v. 290; p. 478.
Belting, Making. O. Czaran. No. 1,391,302; Sept. 20; v. 290; p. 506.
Beverage-making, material and producing same. G. K. Mayer, W. G. Andrews, and A. V. Coldby. No. 1,391,557; Sept. 20; v. 290; p. 557.
Binder, Loose-leaf. A. Rubin. No. 1,391,079; Sept. 20; v. 290; p. 460.
Bins, Telltale device for closed. W. O. Renkin. No. 1,391,504; Sept. 20; v. 290; p. 546.
Board: *See*—
Pressing-board.
Boiler: *See*—
Sectional boiler. Water-tube boiler.
Boilers with feed-water, Means for supplying steam-. S. O. A. Fiedler. No. 1,391,308; Sept. 20; v. 290; p. 507.
Bolt-lock. G. Baron. No. 1,391,447; Sept. 20; v. 290; p. 535.
Book-holder. A. C. Hinzman. No. 1,391,112; Sept. 20; v. 290; p. 467.
Books, Manufacture of. R. B. Matthews. No. 1,391,199; Sept. 20; v. 290; p. 484.
Boring-bar, Portable. W. F. Chellberg. No. 1,391,045; Sept. 20; v. 290; p. 453.
Bottle-cappers, Cap-feeder for. E. F. Edgecomb, Jr. No. 1,391,648; Sept. 20; v. 290; p. 575.
Bottle-capping machine. H. K. Curtis and L. T. Hunter. No. 1,391,647; Sept. 20; v. 290; p. 575.
Bottle carrier and support. O. Fitzsimmons. No. 1,391,537; Sept. 20; v. 290; p. 553.
Bow-necktie fastener. M. Ford. No. 1,391,102; Sept. 20; v. 290; p. 465.
Box: *See*—
Artist's color-box. Coin-box.
Box. E. Zeidler. No. 1,391,038; Sept. 20; v. 290; p. 452.
Box-car end. W. H. Miner. No. 1,391,066; Sept. 20; v. 290; p. 457.
Bracket: *See*—
Window-shade bracket.
Bracket. E. Parsons. No. 1,391,495; Sept. 20; v. 290; p. 544.
Brake: *See*—
Railway-brake.
Brake, Reversibly-operable hand-. W. A. Geiger. No. 1,391,052; Sept. 20; v. 290; p. 455.
Brush and mop holder. F. F. Hill. No. 1,391,111; Sept. 20; v. 290; p. 466.
Brush, Fountain-. P. A. Stephens. No. 1,391,282; Sept. 20; v. 290; p. 501.

Brush, Hair-. G. Ohanian. No. 1,391,207; Sept. 20; v. 290; p. 486.
Brush-holder. F. Sohnle. No. 1,391,017; Sept. 20; v. 290; p. 447.
Brush-holder. F. Sohnle. No. 1,391,018; Sept. 20; v. 290; p. 448.
Brush, Rotary. C. E. Frost. No. 1,391,051; Sept. 20; v. 290; p. 454.
Brushing or polishing apparatus. F. P. Tuttle. No. 1,391,221; Sept. 20; v. 290; p. 480.
Bumpers, Bracket for spring-bar. W. G. Cox. No. 1,391,373; Sept. 20; v. 290; p. 520.
Burner: *See*—
Gas-burner. Oil-burner.
Liquid-fuel burner.
Burner. H. A. Paquette. No. 1,391,494; Sept. 20; v. 290; p. 544.
Burner. E. H. Schwartz. No. 1,391,416; Sept. 20; v. 290; p. 529.
Burner-support. A. W. Morse. No. 1,391,338; Sept. 20; v. 290; p. 513.
Bushing. A. McMurtrie. No. 1,391,396; Sept. 20; v. 290; p. 525.
Buttermilk, Concentrated. I. S. Merrell. No. 1,391,642; Sept. 20; v. 290; p. 574.
Butter-wrapper. J. W. Low. No. 1,391,551; Sept. 20; v. 290; p. 556.
Button, Cuff-. C. L. Faulk. No. 1,391,620; Sept. 20; v. 290; p. 570.
Cabinet. H. R. Cornelison. No. 1,391,462; Sept. 20; v. 290; p. 538.
Cabinet, Combination-. J. Matlevich. No. 1,391,487; Sept. 20; v. 290; p. 543.
Cabinet follower, Fire-. A. N. Thomas. No. 1,391,595; Sept. 20; v. 290; p. 565.
Cabinet for plans, Filing-. V. Geoffrion. No. 1,391,313; Sept. 20; v. 290; p. 508.
Cabinet, Stationery-. W. H. Smythe. No. 1,391,082; Sept. 20; v. 290; p. 461.
Cages, Safety device for mine-. O. Glenn. No. 1,391,539; Sept. 20; v. 290; p. 554.
Calculating-machine. J. A. V. Turck. No. 1,391,220; Sept. 20; v. 290; p. 488.
Call-sending device. A. Andersen. No. 1,391,442; Sept. 20; v. 290; p. 534.
Can: *See*—
Vacuum-can.
Candy-sugaring machine. F. H. Baumgard. No. 1,391,604; Sept. 20; v. 290; p. 566.
Canning-machine. R. R. Erich. No. 1,391,307; Sept. 20; v. 290; p. 507.
Can-washing machine. W. H. Paulson. No. 1,391,141; Sept. 20; v. 290; p. 473.
Cap-closure. W. C. Foell. No. 1,391,538; Sept. 20; v. 290; p. 554.
Carbureter. J. J. Tracy and L. H. Morse. No. 1,391,025; Sept. 20; v. 290; p. 449.
Card holder, Price-. W. M. Anderson. No. 1,391,090; Sept. 20; v. 290; p. 462.
Card, Index-. L. A. Gale. No. 1,391,182; Sept. 20; v. 290; p. 481.
Car-door. G. Thompson. No. 1,391,520; Sept. 20; v. 290; p. 550.
Cars, Back axle for motor-. M. J. B. Barbarou. No. 1,391,294; Sept. 20; v. 290; p. 504.
Cars, Lifting and swinging support for railway motor-. J. E. Loeffler. No. 1,391,330; Sept. 20; v. 290; p. 511.
Carpet-sweepers. Switch-actuating device for electric. J. R. Vander Putten. No. 1,391,501; Sept. 20; v. 290; p. 546.
Case: *See*—
Music-case. Vanity-case.
Shipping-case.
Caster, Furniture-. L. Bozik. No. 1,391,363; Sept. 20; v. 290; p. 518.
Cellulose, Dissolving. I. Kitsee. No. 1,390,995; Sept. 20; v. 290; p. 443.
Centrifugal formation of plastic bodies, Machine for. H. Barkschat. No. 1,391,164; Sept. 20; v. 290; p. 477.
Chains, Insulating unit for electrical suspension-. L. E. T. Perrin. No. 1,391,576; Sept. 20; v. 290; p. 561.
Chair: *See*—
Knockdown chair.
Chair. L. Van Fleet. No. 1,391,222; Sept. 20; v. 290; p. 489.
Chairs for babies, Attachment for high. T. V. Finney. No. 1,391,249; Sept. 20; v. 290; p. 495.
Child's table. H. E. Richmond. No. 1,391,008; Sept. 20; v. 290; p. 446.
Chopper: *See*—
Cotton-chopper.
Chuck. G. H. Du Sell. No. 1,391,177; Sept. 20; v. 290; p. 480.
Chuck. G. Williamson. No. 1,391,440; Sept. 20; v. 290; p. 533.
Chuck. G. Williamson. No. 1,391,441; Sept. 20; v. 290; p. 534.
Chuck, Drill-. H. Casler. No. 1,391,299; Sept. 20; v. 290; p. 505.
Cigarette. N. Sulzberger. No. 1,391,427; Sept. 20; v. 290; p. 531.
Cigarette-holder. D. Palmer. No. 1,391,071; Sept. 20; v. 290; p. 458.
Cinematographic Color. D. F. Comstock. No. 1,390,983; Sept. 20; v. 290; p. 440.
Cinematographic multiplex projection, &c. W. B. Wescott. No. 1,391,029; Sept. 20; v. 290; p. 450.
Circuits, Repeater cord-. O. H. Loynes and A. F. Rose. No. 1,391,552; Sept. 20; v. 290; p. 556.
Clamp. F. L. H. Sims. No. 1,391,015; Sept. 29; v. 290; p. 447.
Clamping device. J. C. Nichols and E. Ryder. No. 1,391,401; Sept. 20; v. 290; p. 526.
Cleaner: *See*—
Spark-plug cleaner.
Closet: *See*—
Water-closet.
Cloth-measuring machines, Measuring-machine attachment for. D. Turner. No. 1,391,431; Sept. 20; v. 290; p. 532.
Clothespin. H. Stammer. No. 1,391,590; Sept. 20; v. 290; p. 564.
Clutch, Automatic safety-. R. C. Zanon. No. 1,391,601; Sept. 20; v. 290; p. 566.
Clutch-trip mechanism. W. H. Kappes. No. 1,391,190; Sept. 20; v. 290; p. 482.
Coating device. G. C. Snyder. No. 1,391,281; Sept. 20; v. 290; p. 501.
Cock or faucet. F. Schuler. No. 1,391,012; Sept. 20; v. 290; p. 446.
Coil structure, Induction-. A. A. Kent. No. 1,391,256; Sept. 20; v. 290; p. 496.
Coin-box. C. C. Kaskell. No. 1,391,063; Sept. 20; v. 290; p. 457.
Color-chart. C. E. Vautrain. No. 1,391,286; Sept. 20; v. 290; p. 502.
Combination-gage. E. Wulz. No. 1,391,233; Sept. 20; v. 290; p. 491.
Compasses, Drawing-. J. Horwood. No. 1,391,187; Sept. 20; v. 290; p. 482.
Compressing lock-nuts and the like, Machine for. A. B. Chadwick. No. 1,391,170; Sept. 20; v. 290; p. 478.
Computing-machines, Tens-carrying mechanism of. K. Hoecken. No. 1,391,319; Sept. 20; v. 290; p. 509.
Concrete-block mold. M. J. Killits. No. 1,391,638; Sept. 20; v. 290; p. 573.
Concrete blocks, Mold for. F. A. Roosa. No. 1,391,508; Sept. 20; v. 290; p. 547.
Concrete ceilings, Hanger for use in. H. H. Crawford. No. 1,390,985; Sept. 20; v. 290; p. 441.
Concrete manhole and sewer-inlet casing, Reinforced-. A. H. Meiners. No. 1,391,336; Sept. 20; v. 290; p. 513.
Conduit outlet-boxes, Cap for. C. H. Bissell. No. 1,391,524; Sept. 20; v. 290; p. 551.
Connecting device. E. H. Budrow. No. 1,390,980; Sept. 20; v. 290; p. 440.
Connector. H. A. Douglas. No. 1,391,303; Sept. 20; v. 290; p. 506.
Conveyer system, Overhead radial. F. Wohn. No. 1,391,598; Sept. 20; v. 290; p. 565.
Cooking vessels, Handle and shield for. J. V. Lafond. No. 1,391,125; Sept. 20; v. 290; p. 470.
Cooler: *See*—
Air-cooler. Water-cooler.
Corn-holder. A. G. Suderman. No. 1,391,283; Sept. 20; v. 290; p. 502.
Corsets, Front steels on. A. G. Lecoutre. No. 1,391,393; Sept. 20; v. 290; p. 524.
Cotton-choppers. B. P. Collier. No. 1,391,246; Sept. 20; v. 290; p. 494.
Coupling: *See*—
Automatic releasing-coupling. Belt-coupling.
Pipe-coupling.
Coupling. J. C. Wells, Sr. No. 1,391,597; Sept. 20; v. 290; p. 565.
Cover and ladle, Combined. E. L. Condon. No. 1,391,371; Sept. 20; v. 290; p. 519.
Crib and wardrobe, Combined. F. W. Musselman. No. 1,391,566; Sept. 20; v. 290; p. 559.
Cuff, Detachable. F. V. Brach. No. 1,391,094; Sept. 20; v. 290; p. 463.
Cuff, Shirt-. G. Newman. No. 1,391,205; Sept. 20; v. 290; p. 486.
Cultivator. L. E. Waterman. No. 1,391,027; Sept. 20; v. 290; p. 449.
Cup: *See*—
Oil-cup.
Current-generating plant. O. P. Fritchle. No. 1,391,377; Sept. 20; v. 290; p. 520.
Curtain-support. G. W. Scott. No. 1,391,418; Sept. 20; v. 290; p. 529.
Cushioned vehicle-wheel. J. E. Theband. No. 1,391,024; Sept. 20; v. 290; p. 449.
Cutter: *See*—
Hair-cutter. Seed-potato cutter.
Milling-cutter.
Deep-sea construction. W. Griesser. No. 1,391,380; Sept. 20; v. 290; p. 521.
Dental impression-tray. A. M. Epstein. No. 1,391,535; Sept. 20; v. 290; p. 553.
Die-making machine. R. L. Hawkes. No. 1,391,055; Sept. 20; v. 290; p. 455.
Dishcloths or the like, Device for holding or gripping. J. Hans. No. 1,391,632; Sept. 20; v. 290; p. 572.
Disconnecting-switch. E. H. Jacobs. No. 1,391,059; Sept. 20; v. 290; p. 456.
Disk-stacking device. W. E. Moore. No. 1,391,202; Sept. 20; v. 290; p. 485.
Display device. S. Sachs. No. 1,391,583; Sept. 20; v. 290; p. 562.

Display-panel. D. M. Tolton. No. 1,391,349; Sept. 20; v. 290; p. 515.
Door. F. J. Matchette. No. 1,391,133; Sept. 20; v. 290; p. 471.
Door and window construction. J. G. Brosius. No. 1,391,608; Sept. 20; v. 290; p. 567.
Door-lock. C. G. Palmer. No. 1,391,005; Sept. 20; v. 290; p. 445.
Doughnut-forming and cooking machine. W. F. Schaller. No. 1,391,212; Sept. 20; v. 290; p. 487.
Draft means. L. B. Doe. No. 1,391,101; Sept. 20; v. 290; p. 464.
Draft-regulator. H. V. Stevens. No. 1,391,348; Sept. 20; v. 290; p. 515.
Drafting appliance or equipment. R. J. Bustillo y Diego. No. 1,391,530; Sept. 20; v. 290; p. 552.
Drainage-tube. G. J. Degenhart. No. 1,391,464; Sept. 20; v. 290; p. 538.
Drawer-slide, Extension. E. Ohnstrand. No. 1,391,004; Sept. 20; v. 290; p. 444.
Drill: *See*—
Hammer-drill.
Drill-holder. A. Williams. No. 1,391,034; Sept. 20; v. 290; p. 451.
Drum, Kettle-. A. F. Wiedoeft. No. 1,391,437; Sept. 20; v. 290; p. 533.
Dry-cell material and manufacture. O. E. Ruhoff. No. 1,391,211; Sept. 20; v. 290; p. 487.
Drying material containing liquid, Apparatus for. G. Schjelderup. No. 1,391,510; Sept. 20; v. 290; p. 548.
Earth-pulverizing machine. H. Christensen. No. 1,391,614; Sept. 20; v. 290; p. 568.
Easel. M. Kazanjian. No. 1,391,479; Sept. 20; v. 290; p. 541.
Electric controller. R. Amberton. No. 1,391,522; Sept. 20; v. 290; p. 550.
Electric current, Indicating, recording, and controlling device actuated by an. J. E. Colas and E. L. M. Ragonot. No. 1,391,321; Sept. 20; v. 290; p. 510.
Electric fixture. F. L. Butler. No. 1,391,610; Sept. 20; v. 290; p. 567.
Electric fixture. F. L. Butler. No. 1,391,611; Sept. 20; v. 290; p. 568.
Electric fixture. F. L. Butler. No. 1,391,612; Sept. 20; v. 290; p. 568.
Electric grinder. C. H. Beach. No. 1,391,039; Sept. 20; v. 290; p. 452.
Electric heater. A. J. Holmes. No. 1,391,113; Sept. 20; v. 290; p. 467.
Electric indicator and alarm. J. B. Stevens. No. 1,391,591; Sept. 20; v. 290; p. 564.
Electric iron. R. B. Benjamin. No. 1,391,296; Sept. 20; v. 290; p. 504.
Electric-light fixture, Extension. A. F. Hammersmith. No. 1,391,631; Sept. 20; v. 290; p. 572.
Electric translator. F. M. Slough. No. 1,391,586; Sept. 20; v. 290; p. 563.
Electrical driving. H. Crochat. No. 1,391,529; Sept. 20; v. 290; p. 552.
Electrical transmission system. E. Meitner. No. 1,391,652; Sept. 20; v. 290; p. 576.
Electrodes in electrical precipitation apparatus, Means for supporting and insulating high-tension. H. V. Welch. No. 1,391,436; Sept. 20; v. 290; p. 533.
Electromagnetic trip mechanism. B. E. Getchell. No. 1,391,469; Sept. 20; v. 290; p. 539.
Elevator: *See*—
Grain-elevator.
Elevators, Safety-stop for. A. Oprisak and J. Prokopowicz. No. 1,391,575; Sept. 20; v. 290; p. 561.
Engine: *See*—
Fluid-pressure engine.
Internal-combustion engine.
Engine-starting system. C. F. Kettering and W. A. Chryst. No. 1,391,194; Sept. 20; v. 290; p. 483.
Engines, Cooling means for internal-combustion. J. D. Houston. No. 1,391,188; Sept. 20; v. 290; p. 482.
Engines, Multicylinder for cycle explosion-. C. A. S. Hanson. No. 1,391,473; Sept. 20; v. 290; p. 540.
Engines, Process and apparatus for improving combustion in explosive-. W. W. Hales and A. Hine. No. 1,391,630; Sept. 20; v. 290; p. 572.
Envelop, Safety-. G. Pachko. No. 1,391,493; Sept. 20; v. 290; p. 544.
Enzymic substance and making the same. J. and J., Jr., Takamine. No. 1,391,219; Sept. 20; v. 290; p. 488.
Excavating-machine. C. A. Doud. No. 1,391,532; Sept. 20; v. 290; p. 552.
Exhauster. H. S. Wheller. No. 1,391,645; Sept. 20; v. 290; p. 575.
Eye-testing chart. W. M. Updegrave. No. 1,391,084; Sept. 20; v. 290; p. 461.
Fabrics and yarns in rope for, Machinery for washing, saturating, and similarly treating textile. F. Roberts. No. 1,391,276; Sept. 20; v. 290; p. 500.
Fan. L. H. Sohn. No. 1,391,517; Sept. 20; v. 290; p. 549.
Fastener. J. D. Swires. No. 1,391,218; Sept. 20; v. 290; p. 488.
Feed-bag for horses. L. N. Sprinkle and M. Greenman. No. 1,391,022; Sept. 20; v. 290; p. 448.
File protector and sheath. A. T. Butler. No. 1,391,458; Sept. 20; v. 290; p. 537.
Film-reel. A. J. Connell. No. 1,391,372; Sept. 20; v. 290; p. 519.
Fire-alarm box and hydrant, Combined. E. E. Ferguson. 1,391,622; Sept. 20; v. 290; p. 570.
Firearm. J. D. Pedersen. No. 1,391,496; Sept. 20; v. 290; p. 544.

Locking hook. A. L. Geisler. No. 1,391,625; Sept. 20; v. 290; p. 570.
Lockout-relay. G. A. Burnham. No. 1,391,241; Sept. 20; v. 290; p. 493.
Lubricating system. H. J. Hendricks. No. 1,391,634; Sept. 20; v. 290; p. 572.
Magazine-loader. B. F. Bowlsby. No. 1,391,453; Sept. 20; v. 290; p. 536.
Magneto-ignition apparatus. A. Aichele. No. 1,391,234; Sept. 20; v. 290; p. 492.
Malt extract, Manufacture of. S. H. Green and J. D. Opie. No. 1,391,159; Sept. 20; v. 290; p. 476.
Mantles, Machine for making. P. Sinclair. No. 1,391,515; Sept. 20; v. 290; p. 549.
Mask. F. M. Dessart. No. 1,391,617; Sept. 20; v. 290; p. 569.
Mask for inhalation. W. J. Jandron. No. 1,391,060; Sept. 20; v. 290; p. 456.
Material-handling. H. A. Gillian. No. 1,391,183; Sept. 20; v. 290; p. 481.
Mattresses and springs, Display-rack for bed. O. R. Lindstaedt No. 1,391,484; Sept. 20; v. 290; p. 542.
Meat-cutting machine. W. T. Creed. No. 1,391,616; Sept. 20; v. 290; p. 569.
Meat-tenderer. C. O. Johnson. No. 1,391,119; Sept. 20; v. 290; p. 468.
Meat-transport. R. P. Lambert. No. 1,391,126; Sept. 20; v. 290; p. 470.
Metal tubes by the self-hooping process, Apparatus for the manufacture of. E. Schneider. No. 1,391,009; Sept. 20; v. 290; p. 446.
Metal tubes by the self-hooping process, Apparatus for the manufacture of. E. Schneider. No. 1,391,010; Sept. 20; v. 290; p. 446.
Metal wheel. M. Lachman. No. 1,391,064; Sept. 20; v. 290; p. 457.
Metal-working machine. W. H. Bradley. No. 1,390,978; Sept. 20; v. 290; p. 439.
Meter. J. W. Bickel. No. 1,391,093; Sept. 20; v. 290; p. 463.
Micrometer. W. T. and H. R. Slider. No. 1,391,016; Sept. 20; v. 290; p. 447.
Milking apparatus. L. Nixon. No. 1,391,573; Sept. 20; v. 290; p. 560.
Milling-cutter. E. A. Cowles. No. 1,391,097; Sept. 20; v. 290; p. 464.
Mixer. N. Williams. No. 1,391,439; Sept. 20; v. 290; p. 533.
Mixing-machine. J. W. Brabant. No. 1,391,454; Sept. 20; v. 290; p. 536.
Mixing-machine. J. W. Schwager. No. 1,391,013; Sept. 20; v. 290; p. 446.
Mold: *See*—
Concrete-block mold.

Mold-insert-feeding mechanism. L. C. Martin. No. 1,391,334; Sept. 20; v. 290; p. 512.
Molding composition. J. P. A. McCoy. (Reissue.) No. 15,199; Sept. 20; v. 290; p. 577.
Monkey-wrench. E. J. Evans and G. E. Hemphill. No. 1,391,179; Sept. 20; v. 290; p. 480.
Mop. J. McNaughton. No. 1,391,132; Sept. 20; v. 290; p. 471.
Mops, floor-cloths, and the like, Wringer for. S. W. Robbins. No. 1,391,408; Sept. 20; v. 290; p. 527.
Motor-control system, Regenerative. S. T. Webster. No. 1,391,289; Sept. 20; v. 290; p. 503.
Motor-controller. T. E. Barnum. No. 1,391,295; Sept. 20; v. 290; p. 504.
Mousetrap. T. E. Spencer. No. 1,391,589; Sept. 20; v. 290; p. 564.
Mowers, Guard-shoe for. A. Laurie. No. 1,391,128; Sept. 20; v. 290; p. 470.
Music-case. E. L. O'Donnell. No. 1,391,491; Sept. 20; v. 290; p. 543.
Musical instruments, Circuit-closer for. R. Conover and L. Hull. No. 1,390,984; Sept. 20; v. 290; p. 440.
Navigational instrument. R. A. Eldridge. No. 1,391,305; Sept. 20; v. 290; p. 506.
Necktie-support. W. R. Morson and E. B. Jarvis. No. 1,391,339; Sept. 20; v. 290; p. 513.
Needles, Method of and apparatus for manufacturing crochet-. G. A. Carlson. No. 1,391,365; Sept. 20; v. 290; p. 518.
Non-skid safety device. N. Runstetler. No. 1,391,413; Sept. 20; v. 290; p. 528.
Nut and bolt lock, Combined. A. D. Gaston. No. 1,391,378; Sept. 20; v. 290; p. 521.
Nut-lock. R. T. Hill. No. 1,391,186; Sept. 20; v. 290; p. 481.
Oil-burner. A. J. Knight. No. 1,391,481; Sept. 20; v. 290; p. 541.
Oil-burner. C. C. Lillibridge. No. 1,391,641; Sept. 20; v. 290; p. 574.
Oil-burner, Double. F. Cotera. No. 1,391,047; Sept. 20; v. 290; p. 454.
Oil-cup. S. I. Fekete. No. 1,391,466; Sept. 20; v. 290; p. 539.
Oil-cup. S. I. Fekete. No. 1,391,467; Sept. 20; v. 290; p. 539.
Oil-cup. R. H. Robinson. No. 1,391,643; Sept. 20; v. 290; p. 574.
Oil-pan heater. A. E. Berdon. No. 1,391,040; Sept. 20; v. 290; p. 452.
Oil-sealing device. C. Balough. No. 1,391,293; Sept. 20; v. 290; p. 503.
Oiler, Spring-. R. B. Somers and T. Olinger. No. 1,391,518; Sept. 20; v. 290; p. 549.
Oils, Cracking of hydrocarbon. J. Nelson. No. 1,391,568; Sept. 20; v. 290; p. 559.
Oils, Cracking of hydrocarbon. J. Nelson. No. 1,391,569; Sept. 20; v. 290; p. 560.
Ore-milling machine. J. J. Cranmer. No. 1,391,301; Sept. 20; v. 290; p. 505.
Ore-separator. J. J. Neville. No. 1,391,400; Sept. 20; v. 290; p. 525.
Oven, Baker's. O. Wundrack. No. 1,391,157; Sept. 20; v. 290; p. 476.
Oven, Baking-. E. E. Lindsey. No. 1,391,258; Sept. 20; v. 290; p. 497.
Oven, Sectional baking-. E. E. Lindsey. No. 1,391,259; Sept. 20; v. 290; p. 497.
Packages, Apparatus for producing. H. de Escobales. No. 1,391,174; Sept. 20; v. 290; p. 479.
Packaging articles, Method of and apparatus for. H. de Escobales. No. 1,391,173; Sept. 20; v. 290; p. 479.
Packing matches, Machinery for. N. L. Warner. No. 1,391,225; Sept. 20; v. 290; p. 490.
Pad: *See*—
Horseshoe-pad.
Paint measuring and filling machine. H. C. Miller. No. 1,391,488; Sept. 20; v. 290; p. 543.
Painting articles in bulk, Apparatus for automatically. J. E. Karl. No. 1,391,388; Sept. 20; v. 290; p. 523.
Pan: *See*—
Sinter-pan.
Paper-feeding means for size-tubes. A. L. Little and G. W. Verow. No. 1,390,997; Sept. 20; v. 290; p. 443.
Paper holder, Toilet-. J. F. Killian. No. 1,391,326; Sept. 20; v. 290; p. 511.
Paper, Means for feeding sheets of. S. Payne and E. Stott. No. 1,391,271; Sept. 20; v. 290; p. 499.
Paper remover, Steam wall-. A. W. Tucker. No. 1,391,350; Sept. 20; v. 290; p. 515.
Paper-stock-treating machine. W. J. Herrbold. No. 1,391,056; Sept. 20; v. 290; p. 455.
Pen, Fountain-. N. H. A. Nelson. No. 1,391,267; Sept. 20; v. 290; p. 499.
Pen, Fountain-. M. C. Taylor. No. 1,391,430; Sept. 20; v. 290; p. 532.
Pencil attachment. B. Lane. No. 1,391,127; Sept. 20; v. 290; p. 470.
Pencil, Finger-. H. Manuel. No. 1,391,556; Sept. 20; v. 290; p. 557.
Pencil, Lead-. A. Polak. No. 1,391,273; Sept. 20; v. 290; p. 500.
Percussive tool. H. V. Haight. No. 1,391,628; Sept. 20; v. 290; p. 571.
Perforating-machine. A. L. Day. No. 1,391,099; Sept. 20; v. 290; p. 464.
Permutation-lock. R. Baer. No. 1,391,357; Sept. 20; v. 290; p. 516.
Permutation-lock. R. Baer. No. 1,391,359; Sept. 20; v. 290; p. 517.
Phonograph. E. L. Holmes. No. 1,391,543; Sept. 20; v. 290; p. 554.
Phonograph-needle and resonator therefor. R. Steinert. No. 1,391,425; Sept. 20; v. 290; p. 531.
Phonographic record and table. B. J. Kiffe. No. 1,391,637; Sept. 20; v. 290; p. 573.
Photography, Color. W. Friese-Greene. No. 1,391,310; Sept. 20; v. 290; p. 507.
Photosensitive plates and the like, Holding means for. W. C. Huebner. No. 1,391,116; Sept. 20; v. 290; p. 468.
Piano actions, Bracket for grand-. C. W. Hall and F. E. Wheeler. No. 1,391,054; Sept. 20; v. 290; p. 455.
Piano, Player-. S. L. Fisher. No. 1,391,376; Sept. 20; v. 290; p. 520.
Piano, Player-. A. G. Gulbransen. No. 1,391,107; Sept. 20; v. 290; p. 466.
Picker-stick. H. W. Morgan and J. O. Whitener. No. 1,391,266; Sept. 20; v. 290; p. 498.
Picture apparatus, Motion-. N. Pemberton-Billing. No. 1,391,341; Sept. 20; v. 290; p. 514.
Pier construction. J. E. Snell. No. 1,391,516; Sept. 20; v. 290; p. 549.
Pile-driving apparatus. A. G. Rotinoff. No. 1,391,344; Sept. 20; v. 290; p. 514.
Pin-fastener. N. Kildahl. No. 1,391,480; Sept. 20; v. 290; p. 541.
Pins, Display-card for safety-. J. Waldes. No. 1,391,287; Sept. 20; v. 290; p. 502.
Pipe: *See*—
Smoking-pipe.
Pipe-coupling. J. L. Broschart. No. 1,391,456; Sept. 20; v. 290; p. 537.
Piston-ring. W. D. Mathews. No. 1,391,335; Sept. 20; v. 290; p. 512.
Piston-ring remover. A. L. Kleckley. No. 1,391,548; Sept. 20; v. 290; p. 556.
Plow. C. C. Sweeting. No. 1,391,593; Sept. 20; v. 290; p. 564.
Plow, Motor-. P. L. Champonnois. No. 1,391,366; Sept. 20; v. 290; p. 518.
Plow safety-hitch. A. B. Hulsebos and G. Den Besten. No. 1,391,058; Sept. 20; v. 290; p. 456.
Pneumatic wheel. J. W. Ricketts. No. 1,391,407; Sept. 20; v. 290; p. 527.
Poke, Cow-. C. W. Gorst. No. 1,391,627; Sept. 20; v. 290; p. 571.

Buttermilk, Dried. Buttermilk Sales Co. No. 149,577; Sept. 20; v. 290; p. 627.
Cakes. Ward Baking Company. No. 119,259; Sept. 20; v. 290; p. 603.
Candies. Mason, Au & Magenheimer Confectionery Manufacturing Company. Nos. 149,014–5; Sept. 20; v. 290; p. 625.
Candies. George Ziegler Co. No. 149,844; Sept. 20; v. 290; p. 627.
Candies, Chocolate. E. Greenfield's Sons. No. 150,065; Sept. 20; v. 290; p. 628.
Candy. Williamson Candy Co. No. 150,085; Sept. 20; v. 290; p. 628.
Candy and chocolate bars. Jacob Brothers. No. 149,755; Sept. 20; v. 290; p. 627.
Candy sticks. Gardiner-Lucas Co. Nos. 149,455–6; Sept. 20; v. 290; p. 627.
Canned goods, coffee, tea, &c. Sussman Wormser & Co. No. 138,613; Sept. 20; v. 290; p. 608.
Cartoons. R. J. Bieger. No. 148,915; Sept. 20; v. 290; p. 625.
Cement. Portland. Petoskey Portland Cement Co. No. 146,659; Sept. 20; v. 290; p. 617.
Chocolate, cocoa, &c. Chocolats fins Zurcher S. A. No. 140,165; Sept. 20; v. 290; p. 609.
Coal. F. O. Busbee. Nos. 147,325–6; Sept. 20; v. 290; p. 619.
Coal. Southern Coal & Coke Company. No. 128,026; Sept. 20; v. 290; p. 604.
Coal. Templeton Coal Company. No. 144,991; Sept. 20; v. 290; p. 614.
Coal, Blacksmith-. Mill and Mine Supply Co. No. 133,667; Sept. 20; v. 290; p. 606.
Coffee. General Coffee and Tea Company. No. 148,881; Sept. 20; v. 290; p. 624.
Coffee. Vinson Coffee Co. No. 149,531; Sept. 20; v. 290; p. 627.
Cotton piece goods. Hicks-Fuller Co. No. 151,160; Sept. 20; v. 290; p. 629.
Cotton piece goods, silks, ducks, &c. International Standard Exporting Corporation. No. 148,075; Sept. 20; v. 290; p. 622.
Crackers. Cheese-. Green and Green Company. No. 148,066; Sept. 20; v. 290; p. 622.
Crates, wood boxes, and cartons. Central Furniture Packing Company. No. 143,911; Sept. 20; v. 290; p. 611.
Cream and lotions, hair-tonics, &c., Toilet. Du Pont Young Corporation. No. 124,786; Sept. 20; v. 290; p. 603.
Cream, Facial. E. L. Petersen. No. 144,982; Sept. 20; v. 290; p. 614.
Curtains, draperies, blankets, &c., Lace. McDonald Bros. Co. No. 125,902; Sept. 20; v. 290; p. 604.
Deodorant and disinfectant. I. Ressler. No. 129,417; Sept. 20; v. 290; p. 605.
Dyes, Cloth-. Fairy Dye Company. No. 137,729; Sept. 20; v. 290; p. 608.
Egg-preservative. K. & G. Laboratories Co. No. 149,086; Sept. 20; v. 290; p. 626.
Emulsion for influenza, palliative for venereal diseases, &c. Dr. A. Flores. No. 128,345; Sept. 20; v. 290; p. 605.
Fabrics, Apparel. Marshall Field & Company. No. 141,366; Sept. 20; v. 290; p. 609.
Feed, Poultry. Security Mills & Feed Company. No. 148,171; Sept. 20; v. 290; p. 623.
Feeding and drinking receptacles, Poultry. B. & W. Mfg. Co. No. 149,209; Sept. 20; v. 290; p. 626.
Floor-coverings, linoleum, &c., Felt-base. W. A. W. Davis Corp. Nos. 138,674–5; Sept. 20; v. 290; p. 608.
Flour, Wheat-. American Finance & Commerce Company. No. 148,107; Sept. 20; v. 290; p. 622.
Flour, Wheat-. American Finance & Commerce Company. No. 148,110; Sept. 20; v. 290; p. 622.
Flour, Wheat-. Millers Milling Company. No. 147,444; Sept. 20; v. 290; p. 619.
Flour, Wheat-. Wallace Milling Company. No. 147,068; Sept. 20; v. 290; p. 618.
Fruit pectin, Concentrated. Pectin Sales Co. No. 149,354; Sept. 20; v. 290; p. 626.
Fuel, benzol, toluol, naphtha, Liquid. Coopers Creek Chemical Company. No. 127,716; Sept. 20; v. 290; p. 604.
Furniture, Household. Chamberlayne, Inc. No. 139,253; Sept. 20; v. 290; p. 608.
Garnetiac. Henry W. Peabody & Co. No. 141,844; Sept. 20; v. 290; p. 610.
Gasolene, naphtha, kerosene, &c. Marland Refining Company. No. 137,537; Sept. 20; v. 290; p. 607.
Grapes, Fresh. R. Krasnow & Sons. No. 150,017; Sept. 20; v. 290; p. 628.
Hair-grower. F. B. Stoner. No. 144,053; Sept. 20; v. 290; p. 612.
Hair-growers. Mrs. B. Parker. No. 136,528; Sept. 20; v. 290; p. 607.
Hair-nets. N. B. Cohen. No. 150,003; Sept. 20; v. 290; p. 628.
Hair-nets. Penn Rivet Corporation. No. 151,287; Sept. 20; v. 290; p. 629.
Hair-nets. Penn Rivet Corporation. No. 151,374; Sept. 20; v. 290; p. 629.
Hair-tonic. F. B. Weidler. No. 145,662; Sept. 20; v. 290; p. 615.
Hair-tonic. L. L. Williams. No. 140,359; Sept. 20; v. 290; p. 609.
Handbags, Ladies'. Warschauer & Roth. No. 148,782; Sept. 20; v. 290; p. 624.
Insecticides, deodorants, &c. Standard Chemical Works. No. 144,104; Sept. 20; v. 290; p. 612.
Lamps, Gas-. H. C. Abrams. No. 148,256; Sept. 20; v. 290; p. 623.
Lamps, lanterns, ventilators, &c. Scintilla. No. 136,045; Sept. 20; v. 290; p. 606.
Lawns in the piece. Lawrence Textile Co. Nos. 147,519–21; Sept. 20; v. 290; p. 620.
Laxative. Needham Products Company. No. 143,615; Sept. 20; v. 290; p. 611.
Leather, Sole and harness. Magnus Hessberg, Inc. No. 147,161; Sept. 20; v. 290; p. 618.
Liniment. Trust Estate of Adolph C. Meyer, Deceased. No. 144,548; Sept. 20; v. 290; p. 613.
Lip-sticks, nail-polish, and incense. Irvin-Smith Co. No. 131,333; Sept. 20; v. 290; p. 605.
Lozenges for throat diseases. J. Bengué. No. 133,079; Sept. 20; v. 290; p. 605.
Macaroni, spaghetti, egg-noodles. Macaroni Foods Corporation. No. 148,847; Sept. 20; v. 290; p. 624.
Mattresses. Capitol Bedding Company. No. 145,007; Sept. 20; v. 290; p. 614.
Mattresses, pillows, &c. T. A. Holtzclaw. No. 145,336; Sept. 20; v. 290; p. 614.
Medicinal preparation. V. Halper. No. 139,270; Sept. 20; v. 290; p. 608.
Medicinal preparation for pyorrhea, &c. Wm. W. Hoagland, D. D. S. No. 144,861; Sept. 20; v. 290; p. 613.
Medicinal preparation for rheumatism. M. Nelson. No. 143,570; Sept. 20; v. 290; p. 611.
Medicinal preparations for treatment of diseases of poultry and stimulate egg-laying. Vayeide Chemical Corporation. No. 147,486; Sept. 20; v. 290; p. 620.
Medicinal preparations in liquid form. Trust Estate of Adolph C. Meyer, Deceased. No. 144,165; Sept. 20; v. 290; p. 612.
Medicinal preparations in liquid form. Trust Estate of Adolph C. Meyer, Deceased. No. 144,240; Sept. 20; v. 290; p. 612.
Medicinal preparations in liquid form. Trust Estate of Adolph C. Meyer, Deceased. No. 144,345; Sept. 20; v. 290; p. 612.
Medicinal preparations in liquid form. Trust Estate of Adolph C. Meyer, Deceased. No. 144,400; Sept. 20; v. 290; p. 613.
Medicinal preparations in liquid form. Trust Estate of Adolph C. Meyer, Deceased. No. 144,482; Sept. 20; v. 290; p. 631.
Medicine for asthma. M. Rutkay. No. 146,270; Sept. 20; v. 290; p. 616.
Medicines and pharmaceutical preparations. Boericke & Runyon Co. No. 137,564; Sept. 20; v. 290; p. 607.
Milk, buttermilk, cream, butter. City Creamery Co. No. 142,331; Sept. 20; v. 290; p. 610.
Milk, cream, butter, eggs, &c. H. P. Hood & Sons. No. 136,296; Sept. 20; v. 290; p. 606.
Oil, Mineral. Standard Oil Company. No. 148,563; Sept. 20; v. 290; p. 624.
Oils and greases, Lubricating. American Oil Corporation. Nos. 150,584–5; Sept. 20; v. 290; p. 628.
Oils, Burning-. Texas Company. No. 135,460; Sept. 20; v. 290; p. 606.
Oils, Lubricating-. F. A. Marsh. No. 146,493; Sept. 20; v. 290; p. 67.
Oily emulsion of argenti nitras. Dr. F. Garal. No. 147,421; Sept. 20; v. 290; p. 619.
Ointment for sunburn, tan, &c. S. Magland. No. 147,633; Sept. 20; v. 290; p. 620.
Paints, varnishes, &c., Liquid. Carpenter-Morton Company. No. 142,007; Sept. 20; v. 290; p. 610.
Paper bags, egg-cartons, merchandise-envelops. Continental Paper & Bag Mills. No. 148,480; Sept. 20; v. 290; p. 624.
Paper drinking-cups. American Paper Goods Co. No. 143,848; Sept. 20; v. 290; p. 611.
Patching adhesive outfits, gasket and rubber cements. R. M. Hollingshead Co. No. 149,135; Sept. 20; v. 290; p. 626.
Pavements and paving materials. Warren Brothers Company. No. 151,602; Sept. 20; v. 290; p. 629.
Perfumes. Colgate & Company. No. 149,062; Sept. 20; v. 290; p. 625.

PUBLISHED FOR OPPOSITION.

[Act of Feb. 20, 1905, Sec. 6, as amended Mar. 2, 1907.]

Perfumes. Colgate & Company. No. 149,064; Sept. 20; v. 290; p. 625.
Perfumes. Colgate & Company. Nos. 149,067–8; Sept. 20; v. 290; p. 626.
Petroleum products. Standard Oil Company of New York. No. 150,776; Sept. 20; v. 290; p. 628.
Poultry, eggs, and baby-chicks, Live. American Poultry Farms. No. 145,304; Sept. 20; v. 290; p. 614.
Powder and cream, toilet water, &c., Complexion. De Pree Chemical Company. No. 117,647; Sept. 20; v. 290; p. 603.

Preparation for the removal of superfluous hair. N. Parker. No. 134,974; Sept. 20; v. 290; p. 606.
Preparation used in the treatment of rheumatism. J. W. Sewell. No. 147,360; Sept. 20; v. 290; p. 619.
Publication. Doyle-Kidd D. G. Co. No. 136,585; Sept. 20; v. 290; p. 607.
Radiator compound. Navajo Laboratories, Inc. No. 146,461; Sept. 20; v. 290; p. 617.
Ribbons, Silk and velvet. W. E. Dodd. No. 127,998; Sept. 20; v. 290; p. 604.
Roof-coating. Fireproof Products Co. No. 144,715; Sept. 20; v. 290; p. 613.
Rubber patches. Cord Interwoven Patch Co. No. 145,614; Sept. 20; v. 290; p. 615.
Salve, Antiseptic healing-. M. Walinder. No. 131,681; Sept. 20; v. 290; p. 605.
Salve or ointment. Gibson-Snow Co. No. 142,882; Sept. 20; v. 290; p. 611.
Salves for skin eruptions and sores. W. J. Ferrara. No. 125,615; Sept. 20; v. 290; p. 604.
Shampoo, brilliantine, &c., Cocoanut-oil. E. D. Robinson. No. 145,797; Sept. 20; v. 290; p. 615.
Sheets and pillow-cases. Marshall Field & Company. No. 140,288; Sept. 20; v. 290; p. 609.
Shingles, roofing-paper, &c. Noll-Welty Lumber Company. No. 125,010; Sept. 20; v. 290; p. 603.
Shipping-containers. Ashtabula Corrugated Box Co. No 146,513; Sept. 20; v. 290; p. 617.
Shipping-containers. Decy Iceless Express Container Co. No. 145,998; Sept. 20; v. 290; p. 616.
Shock-absorbers for motor-vehicles. H. L. G. Manufacturing Company. No. 129,928; Sept. 20; v. 290; p. 605.
Shotguns, pistols, rifles, &c. Auto-Ordnance Corporation. No. 150,951; Sept. 20; v. 290; p. 628.
Silk, Tie-twist. Jordan Marsh Company. No. 151,010; Sept. 20; v. 290; p. 628.
Silos. Gebrüder Bühler. No. 148,114; Sept. 20; v. 290; p. 623.
Soap, Laundry. A. A. Meeth. No. 148,447; Sept. 20; v. 290; p. 623.
Soaps, Toilet. F. G. Burke. No. 149,674; Sept. 20; v. 290; p. 627.
Stock gestation compound. H. H. Cullinan. No. 144,222; Sept. 20; v. 290; p. 612.
Stoves, gas hot-plates, stovepipe. Thompson-Diggs Company. No. 148,181; Sept. 20; v. 290; p. 623.
Tablet, Laxative. L. W. Jenkins. No. 143,440; Sept. 20; v. 290; p. 611.
Tablets, Laxative. A. Arend Drug Co. No. 146,287; Sept. 20; v. 290; p. 616.
Tablets, Laxative aspirin. Butler & Cosgrave. No. 144,845; Sept. 20; v. 290; p. 613.
Thread, Sewing-. Holland Mfg. Co. Nos. 148,798–9; Sept. 20; v. 290; p. 624.
Tire casings, Rubber-. Gillette Rubber Co. No. 146,484; Sept. 20; v. 290; p. 617.
Tires, Coating for automobile-. L. Ingraham. No. 142,215; Sept. 20; v. 290; p. 610.
Tires, inner tubes, &c., Vehicle-. Ashland Tire and Rubber Company. No. 143,907; Sept. 20; v. 290; p. 611.
Tonic. W. M. Payne. No. 147,259; Sept. 20; v. 290; p. 618.
Tonic, General. W. F. Rhyne. No. 134,090; Sept. 20; v. 290; p. 606.
Tonic, Medicinal. D. & D. Remedy Company. No. 149,128; Sept. 20; v. 290; p. 626.
Tonic, Medicinal. Mere Miczulene. Nos. 147,973–4; Sept. 20; v. 290; pp. 621–2.
Tooth-paste. A. B. Brill. No. 147,228; Sept. 20; v. 290; p. 618.
Tooth-wash. F. W. Ames. No. 145,930; Sept. 20; v. 290; p. 615.
Trees, Material for filling cavities in. A. F. W. Vick. No. 133,235; Sept. 20; v. 290; p. 605.
Tulles, muslins, crepes, &c. "Dynamo" Tulle Importing Company. No. 147,554; Sept. 20; v. 290; p. 620.
Water-heaters, Gas. Bastian-Morley Co. No. 151,933; Sept. 20; v. 290; p. 629.
Waterproof fabrics. Fred S. Bennett, Inc. No. 137,656; Sept. 20; v. 290; p. 607.
Waterproofing liquid. Statite Waterproofing Products Co. No. 149,359; Sept. 20; v. 290; p. 626.
Wheel-rims, brake-shoes, &c., Demountable. Lightning Sales Corporation. No. 147,729; Sept. 20; v. 290; p. 621.
Wine, Ferrated bitter. B. R. Kozlowski. No. 141,784; Sept. 20; v. 290; p. 609.
Woolen and cotton piece goods. Millbrook Woolen Mills. No. 141,955; Sept. 20; v. 290; p. 610.
Yarns and threads. American Cellulose & Chemical Manufacturing Company. No. 148,912; Sept. 20; v. 290; p. 624.
Yarns and threads, Silk and artificial-silk. American Cellulose & Chemical Manufacturing Company. No. 148,859; Sept. 20; v. 290; p. 624.
Zinc oxid. Loraine Zinc Company. No. 148,029; Sept. 20; v. 290; p. 622.

CLASSIFICATION OF PATENTS

ISSUED SEPTEMBER 20, 1921.

NOTE.—First number=class, second number=subclass, third number=patent number.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 27TH DAY OF SEPTEMBER, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Adams, Philip, North Bay, Ontario, Canada. Railway safety-signal. No. 1,391,815; Sept. 27; v. 290; p. 682.
Adams, Reed, Detroit, Mich. Printing-press. No. 1,391,711; Sept. 27; v. 290; p. 662.
Albergoli, Bernardo, Las Rosas, Argentina. Separable chair. No. 1,392,242; Sept. 27; v. 290; p. 769.
Allen, Annie, administratrix. (See Koenig, William J.)
Allen, Charles J., Moorestown, N. J., assignor to S. L. Allen & Co., Inc. Tractor. No. 1,391,929; Sept. 27; v. 290; p. 705.
Allen, S. L., & Co. (See Allen, Charles J., assignor.)
Ambrose, Davis, Louisville, Ky. Rail-chair. No. 1,391,658; Sept. 27; v. 290; p. 651.
American Cotton Oil Company, The. (See Phillips, Cecil O., assignor.)
American Hardware Corporation. (See Hurd, Norman B., assignor.)
American Laundry Machinery Company. (See Dreher, Albert J., assignor.)
American Telephone and Telegraph Company. (See Harden, William H., assignor.)
American Telephone and Telegraph Company. (See Kuhn, George W., assignor.)
American Whaley Engine Company. (See Whaley, William B. S., assignor.)
Andreesen, Herman P., Chicago, Ill. Tank-car. No. 1,391,668; Sept. 27; v. 290; p. 652.
Anderson, Gustaf, Atlin, British Columbia, Canada. Saw-fitting tool. No. 1,392,261; Sept. 27; v. 290; p. 773.
Arcadia Trailer Corporation. (See Collier, Joseph W., assignor.)
Archibald, Nevin A., Concord, N. C. Swing. No. 1,391,874; Sept. 27; v. 290; p. 694.
Ardo, Joseph, Newhall, W. Va. Resilient wheel. No. 1,391,660; Sept. 27; v. 290; p. 651.
Arend, John, Mankato, Minn. Piston-ring. No. 1,391,816; Sept. 27; v. 290; p. 682.
Arlin, Karl. (See Maki, O., and Arlin.)
Armstrong, Charlie R., Hawarden, Iowa. Bolt for loaded grain-cars. No. 1,391,661; Sept. 27; v. 290; p. 651.
Atherton, Er., Maquoketa, Iowa. Rewinding apparatus for gas-machine motors. No. 1,391,817; Sept. 27; v. 290; p. 682.
Atherton, Reginald I., North Finchley, England. Portable cinematograph-projector. No. 1,391,990; Sept. 27; v. 290; p. 719.
Atwood, Harry C., Ardmore, Okla. Hand-nutcracker. No. 1,391,751; Sept. 27; v. 290; p. 669.
Autosales Corporation. (See Grover, Albert D., assignor.)
Augustine, Charles, Hermann, Mo. Machine for marking vamps of shoes. No. 1,391,752; Sept. 27; v. 290; p. 670.
Augustyn, Andro, East Derby, Conn. Combination-lock. No. 1,391,662; Sept. 27; v. 290; p. 651.
Babbitt, W. Edmands, Portsmouth, N. H., assignor of two-fifths to R. W. Foster, Boston, Mass. Resilient wheel. No. 1,392,262; Sept. 27; v. 290; p. 773.
Babbis, Harry A., Philadelphia, Pa. Liquid coating composition. No. 1,392,040; Sept. 27; v. 290; p. 729.
Baier, L., Stanley, Portland, Oreg. Safety head-gear. No. 1,391,753; Sept. 27; v. 290; p. 670.
Bair, Dean L., Portland, Oreg. Washing-machine. No. 1,391,754; Sept. 27; v. 290; p. 670.
Ball & Ball Carbureter Company. (See Ball, Frank H., assignor.)
Ball & Ball Carbureter Company. (See Ball, Frank H. and F. O., assignors.)
Ball, Frank H, assignor to Ball & Ball Carbureter Company, Detroit, Mich. Carbureter. No. 1,391,930; Sept. 27; v. 290; p. 706.
Ball, Frank H. and F. O., assignors to Ball & Ball Carbureter Company, Detroit, Mich. Carbureter-control mechanism. No. 1,391,931; Sept. 27; v. 290; p. 706.
Ball, Frederick O. (See Ball, Frank H. and F. O.)
Baratta, Angelo, *et al.* (See Barchiesi, Aurelio, assignor.)
Barbers Electric Specialty Company, The. (See Coffman, Samuel M., assignor.)
Barchiesi, Aurelio, assignor of two-fifths to A. Baratta, Jersey City, N. J., and one-fifth to G. Squarcialupi, New York, N. Y. Automatic valve-closer. No. 1,391,818; Sept. 27; v. 290; p. 618.
Bassick Company, The. (See Cummins, Norman W., assignor.)
Baugats, Frederic G., Paris, France. Abdominal belt. No. 1,392,101; Sept. 27; v. 290; p. 740.
Baumann, Joseph G., Philadelphia, Pa., assignor to A. C. Layman, Wilmington, Del. Safety-hook for glazing-machines. No. 1,392,041; Sept. 27; v. 290; p. 729.
Beck, Sigmond F., Westville, assignor of one-half to G. A. Hill, New Haven, Conn. Abrasive-feeding mechanism for grinding and polishing machines. No. 1,391,875; Sept. 27; v. 290; p. 694.
Becker, Dean B., Fort Atkinson, Wis. Bleaching, dyeing, washing, and soaping cylinder for knitting-mills, dye-houses, bleacheries, and laundries. No. 1,391,712; Sept. 27; v. 290; p. 662.
Beckwith, Harry H., Brookline, Mass., and E. E. Cox, Dover, N. H.; said Cox assignor to said Beckwith. Shoe-stiffener. No. 1,391,932; Sept. 27; v. 290; p. 706.
Belcsynski, Jan. (See Niegnalski, J., and Belenynski.)
Bell, Arthur, Ridgefield Park, N. J. Box-finishing machine. No. 1,392,102; Sept. 27; v. 290; p. 741.
Bell, Chester C., Galesburg, Ill. Gun. No. 1,391,991; Sept. 27; v. 290; p. 719.
Bell, Lorenzo W., assignor of one-fourth to H. O. Keltner and one-fourth to R. Keltner, Carrollton, Mo. Display apparatus for stock. No. 1,391,933; Sept. 27; v. 290; p. 706.
Belloney, Alexander M., U. S. Army. Truck. No. 1,392,103; Sept. 27; v. 290; p. 741.
Bellows, Thomas H., Walla Walla, Wash. Car-replacer. No. 1,391,819; Sept. 27; v. 290; p. 683.
Bentley, John B., Jamestown, N. Y. Bobbin-shuttle. No. 1,392,042; Sept. 27; v. 290; p. 729.
Berg, Anton, Rolla, Mo. Railway-crossing signal. No. 1,392,104; Sept. 27; v. 290; p. 741.
Bergesen, John, Sr., assignor of one-half to J. Bergesen, Brooklyn, N. Y. Boiler-tube brush. No. 1,392,105; Sept. 27; v. 290; p. 741.
Bergesen, Junius. (See Bergesen, J., Sr., assignor.)
Bergfield, William, New York, N. Y. Removable cover for umbrellas. No. 1,392,106; Sept. 27; v. 290; p. 741.
Bergius, Friedrich, Essen-Ruhr, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc. Hydrogenating carbon compounds under high pressure and elevated temperature. No. 1,391,664; Sept. 27; v. 290; p. 652.
Berry, George W., Kane, Pa. Tilting mechanism for dumping-bodies. No. 1,392,107; Sept. 27; v. 290; p. 742.
Bethlehem Shipbuilding Corporation. (See Frear, Hugo P., assignor.)
Bibby, James, London, England. Power-transmission coupling. No. 1,391,713; Sept. 27; v. 290; p. 662.
Billings, Fred W., Millwood, Wash. Auxiliary protector. No. 1,391,665; Sept. 27; v. 290; p. 652.
Bilterman, John A., Albia, Iowa. Expansible screw. No. 1,392,108; Sept. 27; v. 290; p. 742.
Bissell, Nelson C., Modesto, Calif. Composition for waterproofing cloth. No. 1,391,934; Sept. 27; v. 290; p. 707.
Bisset, David L., Montreal, Quebec, Canada. Chuck. No. 1,392,109; Sept. 27; v. 290; p. 742.
Blake, Thomas B., assignor of one-half to J. R. Vance, Demopolis, Ala. Foot-measure. No. 1,391,714; Sept. 27; v. 290; p. 662.
Blascheck, Joseph, Westcliff-on-Sea, assignor to Blascheck Patents Limited, London, England. Collapsible hut and other collapsible structure. No. 1,392,110; Sept. 27; v. 290; p. 742.
Blascheck Patents Limited. (See Blascheck, J., assignor.)
Blossom, Alden, Newton Square, Pa. Device for regulating temperature. No. 1,391,935; Sept. 27; v. 290; p. 707.
Boenning, William M., Manitowoc, Wis., assignor to A. J. Gerrard, Chicago, Ill. Portable wire-tying machine. No. 1,391,820; Sept. 27; v. 290; p. 683.
Bonham, Guy L., Hartford, Conn. Car-mover. No. 1,391,715; Sept. 27; v. 290; p. 662.
Booth, Harold S., and G. G. Marshall, Cleveland, Ohio. Recovering an element capable of forming a haloid from ores, minerals, &c., containing the same. No. 1,392,048; Sept. 27; v. 290; p. 729.
Booth, Harold S., and G. G. Marshall, Cleveland, Ohio. Recovering an element capable of forming a haloid from ores, minerals, &c., containing the same. No. 1,392,044; Sept. 27; v. 290; p. 729.
Booth, Harold S., and G. G. Marshall, Cleveland, Ohio. Recovering beryllium from ores, minerals, &c., containing the same. No. 1,392,045; Sept. 27; v. 290; p. 730.
Booth, Harold S., Ithaca, N. Y., and G. G. Marshall, Cleveland, Ohio. Recovering beryllium from ores, minerals, and other materials. No. 1,392,046; Sept. 27; v. 290; p. 730.

Booth, Lionel B., Northwood, England. Apparatus for determining angular elevation or depression of distant objects. No. 1,392,263; Sept. 27; v. 290; p. 773.
Bosch, Carl, O. Schmidt, and A. Mittasch, Ludwigshafen-on-the-Rhine, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc. Catalyst and making same. No. 1,391,666; Sept. 27; v. 290; p. 652.
Bosky, Sadie, Brooklyn, N. Y. Brassière. No. 1,391,936; Sept. 27; v. 290; p. 707.
Bossolt, Charles L., assignor of one-half to J. C. Bossolt, Erie, Pa. Direction-indicator for motor-vehicles. No. 1,391,937; Sept. 27; v. 290; p. 707.
Bossolt, John C. (See Bossolt, C. L., assignor.)
Boston, John, assignor, by mesne assignments, to Thomas Carter & Sons, Inc., Newark, N. J. Strip-guide for sewing-machines. No. 1,391,876; Sept. 27; v. 290; p. 695.
Bourque, David, assignor to G. W. J. Murphy Company, Amesbury, Mass. Window construction. No. 1,392,243; Sept. 27; v. 290; p. 769.
Boysen, August, Houston, Tex. Serving-table. No. 1,391,755; Sept. 27; v. 290; p. 670.
Brasher, Philip, New York, N. Y. Protecting objects from wave action. No. 1,391,992; Sept. 27; v. 290; p. 719.
Breitung, Edward N., New York, N. Y. Antiskidding device for vehicle-wheels. No. 1,391,667; Sept. 27; v. 290; p. 652.
British Westinghouse Electric and Manufacturing Company. (See Muratori, Alfredo, assignor.)
Bronnert, Emile, Mülhouse, Alsace-Lorraine, France. Production of high-percentage sulfite cellulose. No. 1,392,047; Sept. 27; v. 290; p. 730.
Brookins, Andrew J., Chicago, Ill. Ramp-rail installation. No. 1,392,111; Sept. 27; v. 290; p. 742.
Brown, Hugh C., Philadelphia, Pa. Valve and grinding mechanism therefor. No. 1,392,112; Sept. 27; v. 290; p. 743.
Brownlee, Wilson A., Quathiaski Cove, British Columbia, Canada. Overhead-track suspension means and load-carriage. No. 1,391,993; Sept. 27; v. 290; p. 719.
Brush, Alanson P., Detroit, Mich. Universal joint. No. 1,391,756; Sept. 27; v. 290; p. 670.
Bryan, William C. (See Swalm, W. E., and Bryan.)
Bryant Electric Company. (See Thomas, George B., assignor.)
Buc, Hyym E., Roselle, assignor to Standard Oil Company, Bayonne, N. J. Production of pentachloracetone. No. 1,391,757; Sept. 27; v. 290; p. 670.
Buc, Hyym E., Roselle, assignor to Standard Oil Company, Bayonne, N. J. Chlorination. No. 1,391,758; Sept. 27; v. 290; p. 671.
Burket, Henry W. (See Gregory, G. T., and Burket.)
Butera, Joseph and G. Sorce, San Jose, Calif. Signaling device. No. 1,392,048; Sept. 27; v. 290; p. 730.
Calhoon, Roland F., assignor of one-half to M. W. Langford, Kansas City, Kans. Dancing toy. No. 1,391,994; Sept. 27; v. 290; p. 720.
Calthrop's, E. R., Aerial Patents Limited. (See Schoelar, Percy W., assignor.)
Cambridge Mechanical Toy Company, The. (See Hartleb, R. C., and Levey, assignors.)
Campbell, Sterling H., St. Louis, Mo. Brake-rod jaw. No. 1,391,716; Sept. 27; v. 290; p. 663.
Carlin, William M., Indianapolis, Ind. Piston. No. 1,391,938; Sept. 27; v. 290; p. 707.
Carr, Glenn D., Cambridge, Nebr. Bean-harvester. No. 1,392,113; Sept. 27; v. 290; p. 743.
Carson, Benjamin T., Rensselaer, N. Y. Tool-holder. No. 1,392,269; Sept. 27; v. 290; p. 774.
Carter, Kenneth W., San Antonio, Tex. Highway for grade-crossings. No. 1,391,995; Sept. 27; v. 290; p. 720.
Carter, Thomas, & Sons. (See Boston, John, assignor.)
Casein Manufacturing Company, The. (See Dunham, Andrew A., assignor.)
Caswell, Herbert M., Kingman, Ariz. Wheelbarrow-handle. No. 1,392,114; Sept. 27; v. 290; p. 743.
Cases, Victor L., Neuilly-sur-Seine, France. Ash-pit for gas-producers mounted on automobiles. No. 1,391,877; Sept. 27; v. 290; p. 696.
Champion Ignition Company. (See Vessey, R. B., and Schmidt, assignors.)
Chaney, Lee F., Springfield, Ohio, assignor to The Chaney Manufacturing Company. Scaling thermometer-tubes and the like. No. 1,391,878; Sept. 27; v. 290; p. 695.
Chaney Manufacturing Company, The. (See Chaney, Lee F., assignor.)
Chase Companies, Inc., The. (See Recker, Adolph C., assignor.)
Chemical Foundation, The. (See Bergius, Friedrich, assignor.)
Chemical Foundation, The. (See Bosch C. Schmidt, and Mittasch, assignors.)
Chemical Foundation, The. (See Herafeld, Alexander, assignor.)
Chemical Foundation, The. (See Priem, Friedrich P., assignor.)
Chemical Foundation, The. (See Tambach, Rudolf, assignor.)
Chemical Foundation, The. (See Wever, Fritz, assignor.)
Chemical Foundation, The. (See Zimmer, Carl L. V., assignor.)
Cheney, Herbert W., Milwaukee, Wis. Metering-motor. No. 1,392,115; Sept. 27; v. 290; p. 743.
Cherington, George T., Waukegan, Ill. Frame for phonograph-motors. No. 1,391,717; Sept. 27; v. 290; p. 663.
Chester, Oliver W. J., Glenmaggie, Gippsland, Victoria, Australia. Strap-holder, belt-fastener, and the like. No. 1,391,879; Sept. 27; v. 290; p. 695.
Chopin, Marcel, assignor to himself and La Societa Anonyme des Grands Moulins de Vilgrain, Nancy, France. Automatic indicator of the proportion of moisture. No. 1,392,116; Sept. 27; v. 290; p. 743.
Christian, John, Cleveland, Ohio. Shoe-lace tip. No. 1,392,270; Sept. 27; v. 290; p. 774.
Clark, Le Grand L., New York, N. Y., assignor of one-half to The Sheridan Iron Works and one-half to T. W. & C. B. Sheridan Company. Detector-controlled gluing mechanism. No. 1,392,117; Sept. 27; v. 290; p. 744.
Clarkson, Charles H., Worcester, Mass. Household drying-rack. No. 1,391,718; Sept. 27; v. 290; p. 663.
Clay, Harry E. (See Simpson, J., and Clay.)
Clipless Paper Fastener Company. (See Hawkins, J. C., assignor.)
Cloetens, Georges, Brussels, Belgium. Mandolin attachment for pianos. No. 1,392,248; Sept. 27; v. 290; p. 270.
Cloetens, Georges, Brussels, assignor of one-third to G. Laloux, Liege, and one-third to L. Van Der Heyden a Hauseur, Brussels, Belgium. Harmonic damper for pianos. No. 1,392,244; Sept. 27; v. 290; p. 769.
Cloetens, Georges, Brussels, assignor of one-third to G. Laloux, Liege, and one-third to L. Van Der Heyden a Hauseur, Brussels, Belgium. Stringed musical instrument. No. 1,392,245; Sept. 27; v. 290; p. 769.
Cloetens, Georges, Brussels, assignor of one-third to G. Laloux, Liege, and one-third to L. Van Der Heyden a Hauseur, Brussels, Belgium. Stringed musical instrument. No. 1,392,246; Sept. 27; v. 290; p. 770.
Cloetens, Georges, Brussels, assignor of one-third to G. Laloux, Liege, and one-third to L. Van Der Heyden a Hauseur, Brussels, Belgium. Pianissimo device of the curtain type. No. 1,392,247; Sept. 27; v. 290; p. 770.
Coffman, Samuel M., Kansas City, Mo., assignor to The Barbers Electric Specialty Company. Vibratory massaging device. No. 1,391,759; Sept. 27; v. 290; p. 671.
Collier, Joseph W., assignor to Arcadia Trailer Corporation, Newark, N. J. Vehicle-train and vehicle. No. 1,391,760; Sept. 27; v. 290; p. 671.
Collier, Lester E. (See Starr, N. S., and Collier.)
Collins, Charles W., Seattle, Wash. Ventilating appliance for clothes-drying machines. No. 1,391,939; Sept. 27; v. 290; p. 707.

McDannold, Alexander, Hallandale, Fla. Electric switch. No. 1,391,782; Sept. 27; v. 290; p. 675.

McDermott, Henry, Iron River, assignor to McDermott Mechanical Company, Iron Mountain, Mich. Shoveling-machine. No. 1,392,069; Sept. 27; v. 290; p. 734.

McDermott Mechanical Company. (See McDermott, Henry, assignor.)

McDermott, William R., and C. E. Showalter, Seattle, Wash. Folding brush. No. 1,391,783; Sept. 27; v. 290; p. 675.

McFarland, J. Norris. (See Letsch, Frederick W., assignor.)

McGuire, Albert W., Carmel, Me. Grab-hook. No. 1,391,746; Sept. 27; v. 290; p. 668.

McKean, John O., assignor to Foster Machine Company, Westfield, Mass. Cop-cone. No. 1,391,961; Sept. 27; v. 290; p. 712.

MacArthur, Duncan A., Ottawa, Ontario, Canada, assignor to The Goodyear Tire & Rubber Company of Canada Limited, Toronto, Ontario, Canada. Belt or strap. No. 1,392,256; Sept. 27; v. 290; p. 772.

Magielda, John. (See Sarockin, F., and Magielda.)

Mahan, George H., Kansas City, Mo. Oil-burner. No. 1,392,187; Sept. 27; v. 290; p. 758.

Maiers, John, Philadelphia, Pa. Angle-joint. No. 1,392,070; Sept. 27; v. 290; p. 734.

Maki, Otto and K. Arlin, Palmer, Mass. Switch-operator. No. 1,392,188; Sept. 27; v. 290; p. 758.

Makie, Hayato, New York, N. Y. Comb cleaner and disinfector. No. 1,392,189; Sept. 27; v. 290; p. 758.

Malouf, Beshara I., Salt Lake City, Utah. Windshield-cleaner. No. 1,392,190; Sept. 27; v. 290; p. 758.

Maltman, William H., and T. R. McCoy, Stockton, Calif. Collapsible form. No. 1,391,747; Sept. 27; v. 290; p. 669.

Mangel, Wallie C., Fairfax, Minn. Trailer connection. No. 1,391,962; Sept. 27; v. 290; p. 712.

Mann, William J. N., London, England. Locking device for use with road-vericles. No. 1,391,687; Sept. 27; v. 290; p. 656.

Manning Maxwell and Moore, Inc. (See Williston, Belvin T., assignor.)

Maranville, Harvey F., Akron, Ohio. Heating appliance. No. 1,392,071; Sept. 27; v. 290; p. 734.

Markiewicz, Antoni, Detroit, Mich. Figure wheeled toy. No. 1,391,843; Sept. 27; v. 290; p. 688.

Marshall, George G. (See Booth, H. S., and Marshall.)

Marshall, Thomas C., Mount Savage, assignor to Kelly-Springfield Tire Company, Cumberland, Md. Molding-core. No. 1,392,072; Sept. 27; v. 290; p. 735.

Marsico, Gerard R., assignor to Puriton Manufacturing Corporation, Brooklyn, N. Y. Horn-shell and bracket. No. 1,391,688; Sept. 27; v. 290; p. 656.

Martello, Carl. (See Cravelene, T., and Martello.)

Martin, Edgar D., assignor of one-half to R. E. Schmidt, Chicago, Ill. System of integrally-cast reinforced concrete pitched-roof construction for buildings. No. 1,392,280; Sept. 27; v. 290; p. 776.

Martin, Joseph, Brooklyn, N. Y. Sweatband-protector. No. 1,391,902; Sept. 27; v. 290; p. 700.

Maruda, Mark S., Chicago, Ill. Device for heating and cooling mattresses. No. 1,392,268; Sept. 27; v. 290; p. 774.

Mathy, Maurice, Liege, Belgium. Coke-oven. No. 1,392,257; Sept. 27; v. 290; p. 772.

Mattman, Emil, Wilkinsburg, Pa., assignor to Westinghouse Electric and Manufacturing Company. End bell. No. 1,392,073; Sept. 27; v. 290; p. 735.

Mayberry, Edward L., Los Angeles, Calif. System of arch-rib floor construction. No. 1,391,748; Sept. 27; v. 290; p. 669.

Mayer, Rudolph A., Pecan Island, La. Cane-harvesting machine. No. 1,392,258; Sept. 27; v. 290; p. 772.

Maynard, Charles E., Northampton, assignor to The Fisk Rubber Company, Chicopee Falls, Mass. Beveling and sealing clamp. No. 1,391,784; Sept. 27; v. 290; p. 675.

Mecky, A., Company. (See Ledig, Richard G., assignor.)

Menon, Vadakkath R., Singapore, Straits Settlements, Combined writing-desk and cabinet. No. 1,392,191; Sept. 27; v. 290; p. 758.

Mercury Manufacturing Company. (See Kline, Lawrence J., assignor.)

Midwest Engine Company. (See Schleyer, Victor, assignor.)

Miles, William T. (See Dicken, Isham S., assignor.)

Miller, Edgar T., Greensburg, Pa. Steering and coupling device for plows. No. 1,391,963; Sept. 27; v. 290; p. 712.

Miller, George L., assignor to The Gilliam Manufacturing Company, Canton, Ohio. Roller-bearing. No. 1,392,019; Sept. 27; v. 290; p. 725.

Miller, George W., Mansfield, Mo. Pipe-cutter. No. 1,392,192; Sept. 27; v. 290; p. 759.

Mills, Chester B., East McKeesport, Pa., assignor to Westinghouse Electric and Manufacturing Company. Short-circuiting and brush-lifting device for dynamo-electric machines. No. 1,392,193; Sept. 27; v. 290; p. 759.

Mills, Herbert S. (See Sandell, Henry K., assignor.)

Mills, James F., Ulvalda, Ga. Automobile-lock. No. 1,392,194; Sept. 27; v. 290; p. 759.

Minney, Arthur W., Stockton, Calif. Wrench. No. 1,391,749; Sept. 27; v. 290; p. 669.

Mints, Harry, Mattapan, Mass., Headrest for hammocks. No. 1,391,964; Sept. 27; v. 290; p. 713.

Missogenis, Georges, Edgewater, N. J., assignor, by mesne assignments, to P. Guimes, Palisade, N. J. Foldable cot. No. 1,392,195; Sept. 27; v. 290; p. 759.

Mitchell Alex Motor Plow Company, The. (See Mitchell, Alexander, assignor.)

Mitchell, Alexander, Pueblo, Colo., assignor to The Alex Mitchell Motor Plow Company. Plow-lifting mechanism. No. 1,392,196; Sept. 27; v. 290; p. 760.

Mittasch, Alwin. (See Bosch, C., Schmidt, and Mittasch.)

Mojonnier Bros. Co. (See Mojonnier, Julius J., assignor.)

Mojonnier, Julius J., Oak Park, assignor to Mojonnier Bros., Co., Chicago, Ill. Testing Milk and Milk Products. No. 1,391,965; Sept. 27; v. 290; p. 713.

Moller, Edward M., Jersey City, N. J. Electric-circuit breaker. No. 1,391,966; Sept. 27; v. 290; p. 713.

Montgomery, Robert C., Brooklyn, assignor to Knox Hat Company, Incorporated, New York, N. Y. Straw hat. No. 1,391,750; Sept. 27; v. 290; p. 669.

Moore, James C., Smyrna, N. Y. Electrician's joist-boring tool. No. 1,391,844; Sept. 27; v. 290; p. 688.

Moore, Joseph. (See Dumas, William H., assignor.)

Morsitta, Mathew M., Princeton, Ind. Piston-ring. No. 1,391,845; Sept. 27; v. 290; p. 688.

Morgan, Howard W., North Tarrytown, N. Y., assignor to The Dorr Company. Sewage treatment. No. 1,392,197; Sept. 27; v. 290; p. 760.

Morse, Waldo G., Yonkers, N. Y. Composition of matter. No. 1,392,074; Sept. 27; v. 290; p. 735.

Morton, James, Dentonhill, Carlisle, England. Manufacture of tapestry or printed carpets, rugs, table-covers, and the like. No. 1,391,785; Sept. 27; v. 290; p. 675.

Moses, William B., Brookline, Mass. Electrical apparatus. No. 1,391,967; Sept. 27; v. 290; p. 713.

Moss, Charles M., Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company. Protective apparatus for dynamo-electric machines. No. 1,392,198; Sept. 27; v. 290; p. 760.

Muratori, Alfredo, Rome, Italy, assignor to The British Westinghouse Electric and Manufacturing Company, Limited. Electrical measuring instrument. No. 1,392,199; Sept. 27; v. 290; p. 760.

Murphy, G. W. J., Company. (See Bourque, David, assignor.)

Nakoney, John A., Marysville, Mich. Book-holder. No. 1,392,200; Sept. 27; v. 290; p. 760.

Nash, William, Denver, Colo. Tractor. No. 1,391,689; Sept. 27; v. 290; p. 657.

National Carbon Company. (See Haselett, C. W., and Holt, assignors.)

Navarro, Julio S., Habana, Cuba. Trolley-wheel for electric street-cars. No. 1,391,903; Sept. 27; v. 290; p. 700.

Neale, Charles C., Minneapolis, Minn., assignor to Globe Machinery & Supply Company, Des Moines, Iowa. Automatic lock mechanism for dumping-scales. No. 1,392,075; Sept. 27; v. 290; p. 735.

Nearon, Arle D., Muncie, Ind. Composite boot and shoe sole. No. 1,392,201; Sept. 27; v. 290; p. 761.

Nechville, Wencil. Cedar Rapids, Iowa. Flue-cleaner. No. 1,392,202; Sept. 27; v. 290; p. 761.

Nelson, Herman C. (See Engstrom, O. L., and Nelson.)

Nelson, Olof, Belmont, Mass. Adjustable boring-tool. No. 1,392,203; Sept. 27; v. 290; p. 761.

Nelson, Wesley D., Chicago, Ill. Drum. No. 1,391,786; Sept. 27; v. 290; p. 676.

Newbury, Frank D., Pittsburgh, and H. D. James, Edgewood Park, Pa., assignors to Westinghouse Electric & Manufacturing Company. Excitation for synchronous-booster rotary converters. No. 1,392,076; Sept. 27; v. 290; p. 735.

Nichols, Edgar B., assignor to The Pfaudler Company, Rochester, N. Y. Outlet for jacketed vessels. No. 1,392,204; Sept. 27; v. 290; p. 761.

Nienaber, Louis F., St. Paul, Minn., assignor to Lambert Tire & Rubber Co., Incorporated, Akron, Ohio. Fastening cushion-tires to rims. No. 1,391,846; Sept. 27; v. 290; p. 689.

Niesnalski, Joseph, and J. Relczynski, Detroit, Mich. Retort-cleaning machine. No. 1,392,020; Sept. 27; v. 290; p. 725.

Nix, J. M. (See Fletcher, Theodore, assignor.)

Norling, Reinhold A., Aurora, assignor to Independent Pneumatic Tool Company, Chicago, Ill. Connecting-rod. No. 1,391,847; Sept. 27; v. 290; p. 689.

Norton, Oscar C., Roodhouse, Ill. Sight-feed device. No. 1,392,205; Sept. 27; v. 290; p. 761.

Nymon, Wigo G., Fargo, N. D. Automobile-actuated pump. No. 1,391,968; Sept. 27; v. 290; p. 713.

Oakes, Lucian R., Tipton, Ind. Grain-sprouter. No. 1,392,021; Sept. 27; v. 290; p. 725.

Oberst, Frank, Glendale, N. Y., assignor to Sonora Phonograph Corporation. Automatic stop. No. 1,392,077; Sept. 27; v. 290; p. 735.

O'Donnell, Thomas, Ironwood, Mich. Cluster lamp-socket. No. 1,391,904; Sept. 27; v. 290; p. 700.

Olson, Erik, Great Falls, Mont. Stake. No. 1,392,206; Sept. 27; v. 290; p. 761.

Orner, Elmo P., St. Louis, Mo. Device for straightening sheet metal. No. 1,391,787; Sept. 27; v. 290; p. 676.

Orr, Alexander; Choma, Northern Rhodesia, South Africa. Tires of road and like vehicles. No. 1,391,905; Sept. 27; v. 290; p. 700.

Orr, Robert J., Brooklyn, N. Y. Writing-machine. No. 1,391,788; Sept. 27; v. 290; p. 676.

Ott, Harvey N., assignor to Spencer Lens Company, Buffalo, N. Y. Projection apparatus. No. 1,392,207; Sept. 27; v. 290; p. 762.

Ouillett, Charles E., Lowell, Mass. Elevator. No. 1,392,078; Sept. 27; v. 290; p. 736.

Overbury, Frederick C., Hillsdale, N. J., and C. E. Rahr, Brookline, assignors to The Flintkote Company, Boston, Mass. Asphalt-package and making the same. No. 1,391,969; Sept. 27; v. 290; p. 714.

Overman, Charles S., Detroit, Mich. Bearing-dressing device. No. 1,392,208; Sept. 27; v. 290; p. 762.

Owen, Frederick, Detroit, Mich. Washing-machine. No. 1,391,848; Sept. 27; v. 290; p. 689.

Packard Motor Car Company. (See Hunt, Ormond E., assignor.)

Packard Motor Car Company. (See Stanbrough, Duncan G., assignor.)

Page, Alfred C. (See Poble, Walter B., assignor.)

Pajewski, Stephen, Natrona, Pa. Nut-lock. No. 1,392,209; Sept. 27; v. 290; p. 762.

Parent, Raymond C., Chicago, Ill. Soldering-iron. (Reissue.) No. 15,202; Sept. 27; v. 290; p. 778.

Parker, John W., Detroit, Mich. High-speed spindle. No. 1,392,210; Sept. 27; v. 290; p. 762.

Parmenter, William A., assignor to C. S. Pierce Company, Brockton, Mass. Machine for making pickers. No. 1,392,259; Sept. 27; v. 290; p. 773.

Parsons, Charles A., and J. Rosen, Newcastle-upon-Tyne, England; said Rosen assignor to said Parsons. Dynamo-electric machine. No. 1,392,022; Sept. 27; v. 290; p. 726.

Pate, Samuel G. (See Donkel, Lloyd H., assignor.)

Paul, James M., assignor of one-half to J. J. Keller, Los Angeles, Calif. Spark-plug intensifier. No. 1,392,023; Sept. 27; v. 290; p. 726.

Payne, Harry H., assignor of two-thirds to J. White, Birmingham, England. Drop-down gun and rifle. No. 1,392,024; Sept. 27; v. 290; p. 726.

Payucheck, Jacob, Chester, Pa. Adjustable wrench for milling-machines. No. 1,392,025; Sept. 27; v. 290; p. 726.

Peck, Charles L., New York, N. Y., assignor to The Dorr Company. Sewage treatment. No. 1,392,211; Sept. 27; v. 290; p. 762.

Peck, Charles L., New York, N. Y., assignor to The Dorr Company. Treatment of sewage. No. 1,392,212; Sept. 27; v. 290; p. 762.

Peck, Charles L., New York, N. Y., assignor to The Dorr Company. Treatment of Sewage. No. 1,392,213; Sept. 27; v. 290; p. 763.

Peck, Charles L., New York, N. Y., assignor to The Dorr Company. Apparatus for treating sewage. No. 1,392,214; Sept. 27; v. 290; p. 763.

Pelamorgue, Henri C., Grand Montrouge, France, assignor of one-half to M. B. Connelly, Philadelphia, Pa. Gage. No. 1,392,215; Sept. 27; v. 290; p. 763.

Penfield, William W., assignor to W. W. Penfield, Inc., Stamford, Conn. Snap-fastener. No. 1,392,281; Sept. 27; v. 290; p. 777.

Penfield, William W., Inc. (See Penfield, William W., assignor.)

Perkins, Oren, Fayette, Mo. Piston-grinding machine. No. 1,391,849; Sept. 27; v. 290; p. 689.

Peskind, Samuel, Cleveland, Ohio. Apparatus for vaporising fuel-oils and the like. No. 1,391,789; Sept. 27; v. 290; p. 676.

Pfaff, William A. E., Kansas City, Mo. Ointment-applicator. No. 1,391,850; Sept. 27; v. 290; p. 689.

Pfaudler Company, The. (See Nichols, Edgar B., assignor.)

Phillips & Clark Stove Company. (See Weiss, Albert T., assignor.)

Phillips, Cecil O., assignor to The American Cotton Oil Company, New York, N. Y. Apparatus for molding soap. No. 1,391,970; Sept. 27; v. 290; p. 714.

Phillips, Cecil O., assignor to The American Cotton Oil Company, New York, N. Y. Apparatus for molding soap. No. 1,391,971; Sept. 27; v. 290; p. 714.

Phillips, Cecil O., assignor to The American Cotton Oil Company, New York, N. Y. Method and apparatus for molding soap. No. 1,391,972; Sept. 27; v. 290; p. 714.

Phillips, Cecil O., assignor to American Cotton Oil Company, New York, N. Y. Apparatus for molding soap. No. 1,391,973; Sept. 27; v. 290; p. 714.

Phillips, Cecil O., assignor to The American Cotton Oil Company, New York, N. Y. Apparatus for molding and cooling soap. No. 1,391,974; Sept. 27; v. 290; p. 715.

Phillips, Cecil O., assignor to The American Cotton Oil Company, New York, N. Y. Method for molding and cooling soap. No. 1,391,975; Sept. 27; v. 290; p. 715.

Pierce, C. S., Company. (See Parmenter, William A., assignor.)

Piersen Manufacturing Company, The. (See Cushman, Everett B., assignor.)

Piersen Manufacturing Company, The. (See Schank, Harry E, assignor.)

Pilliod, Charles J., assignor to D. Searles, trustee, Toledo, Ohio. Furnace - door - operating mechanism. No. 1,391,690; Sept. 27; v. 290; p. 657.

Pirwitz, Paul, Marshfield, Wis. Attachment for cantaliver-springs. No. 1,391,851; Sept. 27; v. 290; p. 690.

Pitoni, Guido, Rochester, N. Y. Moving and sounding toy. No. 1,392,216; Sept. 27; v. 290; p. 763.

Plein, Jacob, Plainview, Minn. Loading device. No. 1,391,852; Sept. 27; v. 290; p. 690.

Pohle, Walter B., Lynn, assignor of one-half to A. C. Page, Wollaston, Mass. Spark-plug. No. 1,391,691; Sept. 27; v. 290; p. 657.

Polytes, Nicholas E. (See Rogers, G., and Polytes.)

Ponton, Henri R., Paris, France. Photographic shutter. No. 1,391,790; Sept. 27; v. 290; p. 676.

Rutherford, Nealon D., Lansing, Mich., assignor to United Engine Company. Milking-machine. No. 1,391,980; Sept. 27; v. 290; p. 716.

Rutherford, Norman F., East Falmouth, Mass. Suspension apparatus. No. 1,391,794; Sept. 27; v. 290; p. 677.

Sachse, Paul C., St. Louis, Mo. Water-heater. No. 1,391,695; Sept. 27; v. 290; p. 658.

Safford, Louis A., St. Louis, Mo. Piston-ring. No. 1,391,795; Sept. 27; v. 290; p. 677.

Sandell, Henry K., assignor to H. S. Mills, Chicago, Ill. Wireless transmitting system. No. 1,391,855; Sept. 27; v. 290; p. 691.

Sandell, John F., Chicago, Ill. Internal-combustion engine. No. 1,391,981; Sept. 27; v. 290; p. 716.

Sarockin, Thomas and J. Magielda, Crockett, Calif. Charcoal drier and cleaner. No. 1,392,225; Sept. 27; v. 290; p. 765.

Saunders, Addison T. (See Saunders, George H., assignor.)

Saunders, George H., Akron, Ohio, assignor of one-half to A. T. Saunders, Chicopee, Mass. Cereal and making the same. No. 1,391,696; Sept. 27; v. 290; p. 658.

Schaerer, Otto, Basel, Switzerland. Gear-slotting machine. No. 1,392,226; Sept. 27; v. 290; p. 765.

Schaffer, Friedrich, Leobersdorf, near Vienna, Austria. Making railway disk wheels. No. 1,391,907; Sept. 27; v. 290; p. 700.

Schank, Harry E., assignor to The Piersen Manufacturing Company, Topeka, Kans. Engine - mounting. No. 1,391,697; Sept. 27; v. 290; p. 658.

Scheele, Walter T., Hackensack, N. J., assignor to the Government of the United States, represented by the Secretary of the Navy. Protective mixture for high explosives. No. 1,391,796; Sept. 27; v. 290; p. 678.

Schleyer, Victor, Anderson, assignor to Midwest Engine Company, Indianapolis, Ind. Deep-well-pump-lubrication system. No. 1,392,227; Sept. 27; v. 290; p. 766.

Schleyer, Victor, Anderson, assignor to Midwest Engine Company, Indianapolis, Ind. Self-maintaining lubricating system for deep-well pumps. No. 1,392,228; Sept. 27; v. 290; p. 766.

Schmidt, Albert. (See Vessey, R. B., and Schmidt.)

Schmitt, Alloys P., Buffalo, N. Y. Support for tire-casings, &c. No. 1,391,857; Sept. 27; v. 290; p. 691.

Schmidt, Frank J., assignor to A. Stein & Company, Chicago, Ill. Stamping device. No. 1,391,856; Sept. 27; v. 290; p. 691.

Schmidt, Otto. (See Bosch, C., Schmidt, and Mittasch.)

Schmidt, Richard E. (See Martin, Edgar D., assignor.)

Schneider & Cie. (See Schneider, Eugéne, assignor.)

Schneider, Eugéne, assignor to Schneider & Cie., Paris, France. Steam-turbine. No. 1,391,698; Sept. 27; v. 290; p. 659.

Schoch, Eugene P., Austin, Tex. Producing barium chlorate. No. 1,391,858; Sept. 27; v. 290; p. 691.

Scholiar, Percy W., assignor to E. R. Calthrop's Aerial Patents Limited, London, England. Retaining and releasing device for ropes, cordage, and the like. No. 1,392,260; Sept. 27; v. 290; p. 773.

Schreiber, George I., Newark, N. J. Photographic-film-supporting frame. No. 1,391,982; Sept. 27; v. 290; p. 717.

Schroeder, William, Brooklyn, N. Y., assignor to Karry-Lode Industrial Truck Company. Industrial truck. No. 1,391,699; Sept. 27; v. 290; p. 659.

Schubert, Julius J., St. Paul, Minn. Storm-sash hanger. No. 1,391,700; Sept. 27; v. 290; p. 659.

Schulze, Arthur, Berlin, Germany. Process and device for producing gullioches and the like. No. 1,391,859; Sept. 27; v. 290; p. 691.

Schuster, Karl R., Brooklyn, N. Y. Scaffold-bracket. No. 1,391,983; Sept. 27; v. 290; p. 717.

Scott, Walter V. (See Sprague, Sidney, assignor.)

Scrabic, Carl, Urbana, Ohio. Sound-box mounting. No. 1,391,797; Sept. 27; v. 290; p. 678.

Searles, Daniel, trustee. (See Pilliod, Charles J., assignor.)

Searcy, C. M. (See Gates, John W., assignor.)

Segler, Albert H., Chicago, Ill. Chuck. No. 1,391,908; Sept. 27; v. 290; p. 701.

Seib, George A., assignor to Remington Typewriter Company, Ilion, N. Y. Typewriting-machine. No. 1,391,798; Sept. 27; v. 290; p. 678.

Seifert, Martin W., Murray, Utah. Sleigh-brake. No. 1,392,229; Sept. 27; v. 290; p. 766.

Shade, Howard M., Conemaugh, Pa. Track-sander. No. 1,392,230; Sept. 27; v. 290; p. 766.

Shaw-Walker Company. (See Davis, Elmer W., assignor.)

Sherwood, William, Detroit, Mich. Water-inlet valve for flushing-tanks. No. 1,391,860; Sept. 27; v. 290; p. 692.

Shelton, William G., New York, N. Y. Automatic stop for talking-machines. No. 1,392,081; Sept. 27; v. 290; p. 736.

Shelton, William G., New York, N. Y. Universal reproducer. No. 1,392,082; Sept. 27; v. 290; p. 737.

Sherbino, Jerome F., Mountain Lakes, N. J. Timer for internal-combustion engines. No. 1,391,984; Sept. 27; v. 290; p. 717.

Sheridan Iron Works, The, *et al.* (See Clark, Le Grand L., assignor.)

Sheridan, T. W. & C. B., Company, *et al.* (See Clark, Le Grand L., assignor.)

Sherwood, William E., Canastota, N. Y. Hand-sled. No. 1,392,083; Sept. 27; v. 290; p. 737.

Shields, M. A., *et al.* (See Turner, Joseph D., assignor.)

Shimada, Masao, Kahului, Hawaii. Tire-deflator. No. 1,392,231; Sept. 27; v. 290; p. 767.

Showalter, Charles S. (See McDermott, W. R., and Showalter.)

Silno, Gaetano E., Pittsburg, Calif. Spring-tire. No. 1,391,985; Sept. 27; v. 290; p. 718.

Sikowski, Frank, Mount Carmel, Pa. Saw-set. No. 1,391,910; Sept. 27; v. 290; p. 701.

Simon, Ernest J., Guantanamo, Cuba. Ground-detector. No. 1,391,911; Sept. 27; v. 290; p. 701.

Simpson, James, and H. E. Clay, McKeesport, Pa. Apparatus for handling and forming pipe-skelp. No. 1,391,912; Sept. 27; v. 290; p. 702.

Sliter, Egbert J. (See Gamble, R., and Sliter.)

Slocomb, George W., Los Angeles, Calif. Pump. No. 1,391,799; Sept. 27; v. 290; p. 678.

Smith, Edward W., Philadelphia, Pa. Secondary or storage battery. No. 1,392,232; Sept. 27; v. 290; p. 767.

Smith, Floyd, San Diego, Calif. Water-bomb. No. 1,391,800; Sept. 27; v. 290; p. 678.

Smith, Kirk D., Wendell, N. H. Educational appliance. No. 1,391,986; Sept. 27; v. 290; p. 718.

Smith, Lewis M., Pocatello, Idaho. Device for attaching signs to glass. No. 1,391,861; Sept. 27; v. 290; p. 692.

Smith, Marvin W., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Field-control system for synchronous booster rotary converters. No. 1,392,084; Sept. 27; v. 290; p. 737.

Smith, Maurice W., Lyndhurst, Hoddesdon, England. Quick-release bench-vise. No. 1,391,913; Sept. 27; v. 290; p. 702.

Smith, Raymond A., Philadelphia, Pa. Safety device for delivery of milk and other articles. No. 1,391,801; Sept. 27; v. 290; p. 679.

Smith Signal Corporation. (See Ware, Orington A., assignor.)

Societe Anonyme John Cockerill. (See Gendarme, Toussaint, assignor.)

Soderstrom, Oscar V. (See Stone, Reuben, assignor.)

Solar Metal Products Company. (See Gogay, Henry R., assignor.)

Sonora Phonograph Corporation. (See Herzog, John, assignor.)

Sonora Phonograph Corporation. (See Oberst, Frank, assignor.)

Sonora Phonograph Corporation. (See Wolff, Joseph, assignor.)

Sonsthagen, Asbjorn, Essex, England. Chocolate and like coating machine. No. 1,391,914; Sept. 27; v. 290; p. 702.

Sorce, Gaetano. (See Butera, J., and Sorce.)

Spangler, Charles M., Emporium, Pa. Boiler-flue tool. No. 1,391,862; Sept. 27; v. 290; p. 692.

Spencer Lens Co. (See Ott, Harvey N., assignor.)

Spengler, Henry R., Denver, Colo. Pressure-cooker. No. 1,391,863; Sept. 27; v. 290; p. 692.

Sprague, Sidney, assignor of one-half to W. V. Scott, Ossining, N. Y. Toothbrush. No. 1,392,285; Sept. 27; v. 290; p. 778.

Squarcialupi, Giovanni, *et al.* (See Barchiesi, Aurelio, assignor.)

Stafford, Benjamin E. D., and E. I. Dodds, assignors to Flannery Bolt Company, Pittsburgh, Pa. Staybolt structure. No. 1,392,235; Sept. 27; v. 290; p. 767.

Stafford, Benjamin E. D., and E. I. Dodds, assignors to Flannery Bolt Company, Pittsburgh, Pa. Staybolt structure. No. 1,392,236; Sept. 27; v. 290; p. 768.

Stanbrough, Duncan G., assignor to Packard Motor Car Company, Detroit, Mich. Motor-vehicle. No. 1,391,864; Sept. 27; v. 290; p. 692.

Standard Oil Company. (See Buc, Hyym E., assignor.)

Stanfa, Joseph I., Erie, Pa. Lamp-bracket for automobile direction indicators. No. 1,391,802; Sept. 27; v. 290; p. 679.

Stanley, Buell, Washington, D. C. Signal device for motor-vehicles. No. 1,391,803; Sept. 27; v. 290; p. 679.

Stano, John, Livingston, Ill. Automobile direction-indicator and wheel-angle gage. No. 1,391,701; Sept. 27; v. 290; p. 659.

Stanton, Frederick W., Chicago, Ill. Syringe. No. 1,392,085; Sept. 27; v. 290; p. 737.

Starmer, Mary, Newport News, Va. Garment-supporter. No. 1,392,237; Sept. 27; v. 290; p. 768.

Starr, Norman S., and L. E. Collier, Moweaqua, Ill.; said Collier assignor to said Starr. Protective device. No. 1,391,915; Sept. 27; v. 290; p. 702.

Steen, Buford J., Goose Creek, Tex. Pipe-gripping device. No. 1,391,804; Sept. 27; v. 290; p. 679.

Stein, A., & Company. (See Schmidt, Frank J., assignor.)

Stevenson, Archie B. and L. L., Sonoma, Calif. Incubator-tray. No. 1,391,865; Sept. 27; v. 290; p. 693.

Stevenson, Lewis L. (See Stevenson, Archie B. and L. L.)

Stevenson, Robert M., Victoria, British Columbia, Canada. Bull-hook. No. 1,392,026; Sept. 27; v. 290; p. 726.

Stewart, Charles C., Stoddard, Ark. Wrench. No. 1,392,238; Sept. 27; v. 290; p. 768.

Stewart, James G., Dundee, Scotland. Means for producing magnifications of minute movements. No. 1,392,239; Sept. 27; v. 290; p. 768.

Stewart-Warner Speedometer Corporation. (See Risinger, Frank V., assignor.)

Stoffers, Henry, Newark, N. J. Making piston-rings. No. 1,392,027; Sept. 27; v. 290; p. 727.

Stone, Reuben, assignor of one-half to O. V. Soderstrom, Ogema, Wis. Lawn-mower sharpener. No. 1,391,702; Sept. 27; v. 290; p. 660.

Stone, Walter R., Inman, S. C. Evener-gear attachment for cotton-pickers. No. 1,391,866; Sept. 27; v. 290; p. 693.

Storer, Norman W., Pittsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Means for reducing commutator-flashing. No. 1,392,086; Sept. 27; v. 290; p. 737.

Storer, Norman W., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Means for suppressing flash-overs in rotary-converter systems. No. 1,392,087; Sept. 27; v. 290; p. 738.

Storer, Norman W., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Means for reducing commutator-flashing in rotary converters. No. 1,392,088; Sept. 27; v. 290; p. 738.

Straka, John, assignor of one-half to J. R. Lewis, Chicago, Ill. Fountain-pen. No. 1,392,089; Sept. 27; v. 290; p. 738.

Strickler, John C., San Francisco, Calif. Can-soldering machine. No. 1,391,867; Sept. 27; v. 290; p. 693.

Strohbach, Erich, Vienna, Austria. Film-fire extinguisher. No. 1,392,233; Sept. 27; v. 290; p. 767.

Sturtevant Mill Company. (See Sturtevant, Thomas J., assignor.)

Sturtevant, Thomas J., Wellesley, assignor to Sturtevant Mill Company, Boston, Mass. Elevator. No. 1,391,703; Sept. 27; v. 290; p. 660.

Sturtevant, Thomas J., Wellesley, assignor to Sturtevant Mill Company, Boston, Mass. Elevator. No. 1,391,704; Sept. 27; v. 290; p. 660.

Subers, Lawrence A., Lakewood, Ohio. Machine for the continuous vulcanization of bands or belts. No. 1,391,805; Sept. 27; v. 290; p. 679.

Swain, Joseph G., assignor to The Firestone Steel Products Company, Akron, Ohio. Demountable-rim construction. No. 1,391,806; Sept. 27; v. 290; p. 680.

Swaim, William E., and W. C. Bryan, Los Angeles, Calif. Image producing or recording apparatus. No. 1,391,807; Sept. 27; v. 290; p. 680.

Sweet, Oliver T., St. Louis, Mo. Combination switch and distributing-panel. No. 1,391,916; Sept. 27; v. 290; p. 703.

Szarvasy, Emerich, Budapest, Hungary. Manufacture of carbon electrodes or of pure retort-carbon. No. 1,392,266; Sept. 27; v. 290; p. 774.

Szarvasy, Emerich, Budapest, Hungary: Manufacture of carbon electrodes. No. 1,392,267; Sept. 27; v. 290; p. 774.

Tambach, Rudolf, Ludwigshafen-on-the-Rhine, Germany, assignor, by mesne assignments, to The Chemical Foundation, Inc. Producing tannic acid compound of the digitalisglycosids. No. 1,391,705; Sept. 27; v. 290; p. 660.

Tamini, Mario, Milan, Italy. Rotary pump. No. 1,392,090; Sept. 27; v. 290; p. 738.

Teichtner, Carl, Leipsig, Germany. Permanent calendar. No. 1,391,917; Sept. 27; v. 290; p. 703.

Textile Engineering Company. (See Hale, Joshua B., assignor.)

Thacker, Aaron H. (See Grizzle, R. M., and Thacker.)

Thomas, George B., assignor to The Bryant Electric Company, Bridgeport, Conn. Electric fitting. No. 1,392,091; Sept. 27; v. 290; p. 738.

Thompson, Livingston A., Waukesha, Wis. Candy and producing. No. 1,391,918; Sept. 27; v. 290; p. 703.

Thompson, Livingston A., Waukesha, Wis. Massage apparatus. No. 1,391,919; Sept. 27; v. 290; p. 703.

Thompson, L. E., Island City, Oreg. Automobile-water-bag holder. No. 1,392,092; Sept. 27; v. 290; p. 739.

Thompson, Roy L., Bend, Oreg. Door - catch. No. 1,391,920; Sept. 27; v. 290; p. 703.

Thurston, Arthur L. (See Kirkham, C. B., and Thurston.)

Tillert, Edward, Racine, Wis. Key attachment. No. 1,391,921; Sept. 27; v. 290; p. 704.

Tirrill, Allen A., Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company. Pivotal mounting. No. 1,392,234; Sept. 27; v. 290; p. 767.

Titus, Odeon H., Jamesville, N. Y. Smoke-purifying attachment for fuel-burning heaters. No. 1,392,093; Sept. 27; v. 290; p. 739.

Toler, William E., Pawnee, Okla. Attachment for grain-separators. No. 1,392,094; Sept. 27; v. 290; p. 739.

Topham, Laurence E., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Driving and stopping mechanism. No. 1,391,922; Sept. 27; v. 290; p. 704.

Topoosian, Leon M., Springfield, Mass. Locking device for incandescent lamps. No. 1,391,868; Sept. 27; v. 290; p. 693.

Torbet, Mayson W., Jackson, Mich., assignor to Vibration Specialty Company, Philadelphia, Pa. Machine for determining the static and dynamic unbalance of rotating bodies. No. 1,392,028; Sept. 27; v. 290; p. 727.
Truck, Tractor, and Manufacturing Company. (See Jacobs, I. M., and Cramer, assignors.)
Tryhook, Thomas, Hamtramck, Mich. Combination sash balance and lock. No. 1,391,869; Sept. 27; v. 290; p. 693.
Tudhope, Hugh R. (See La Fay, Arthur J., assignor.)
Turk Gesellschaft m. b. H. (See Priem, Friedrich P., assignor.)
Turner, Joseph D., assignor of one-fourth to M. A. Shields and one-fourth to M. C. Giles, Huntsville, Ala. Fan for textile-mills. No. 1,392,029; Sept. 27; v. 290; p. 727.
Underwood, Ernest E., assignor to Eastman Kodak Company, Rochester, N. Y. Exposure-indicator. No. 1,391,870; Sept. 27; v. 290; p. 693.
United Engine Company. (See Rutherford, Nenlon D., assignor.)
United Shoe Machinery Corporation. (See Roberts, William T. B., assignor.)
United Shoe Machinery Corporation. (See Topham, Laurence C., assignor.)
Valinski, Stanley, Homestead, Pa. Man-catching tank. No. 1,392,095; Sept. 27; v. 290; p. 739.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 27TH DAY OF SEPTEMBER, 1921.

NOTE.—Arranged in accordance with the first significant character or word of the name. (In accordance with city and telephone directory practice.)

Acid compound of the digitaliseglycosids, Producing tannic. R. Tambach. No. 1,391,705; Sept. 27; v. 290; p. 660.

Airplane landing-gear. G. H. Curtiss. No. 1,392,272; Sept. 27; v. 290; p. 775.

Airplane landing-gear. C. B. Kirkham and A. L. Thurston. No. 1,392,277; Sept. 27; v. 290; p. 776.

Airplanes, Stream-line wiring for. G. H. Curtiss. No. 1,392,271; Sept. 27; v. 290; p. 774.

Alarm apparatus. A. H. Jörgensen. No. 1,391,684; Sept. 27; v. 290; p. 656.

Angle-joint. J. Maiers. No. 1,392,070; Sept. 27; v. 290; p. 734.

Angular elevation or depression of distant objects, Apparatus for determining. L. J. Booth. No. 1,392,263; Sept. 27; v. 290; p. 773.

Antenna-shortening device. W. Dubilier. No. 1,391,673; Sept. 27; v. 290; p. 653.

Antiskidding device for vehicle-wheels. E. N. Breitung. No. 1,391,667; Sept. 27; v. 290; p. 652.

Area wing, Variable. H. D. Fowler. No. 1,392,005; Sept. 27; v. 290; p. 722.

Asphalt-package and making the same. F. C. Overbury and C. E. Rahr. No. 1,391,969; Sept. 27; v. 290; p. 714.

Automatically-controlled self-lowering jack. J. C. Kopf. No. 1,392,066; Sept. 27; v. 290; p. 733.

Automobile-actuated pump. W. G. Nymon. No. 1,391,968; Sept. 27; v. 290; p. 713.

Automobile box or body, Extensible. P. L. Hedberg. No. 1,392,011; Sept. 27; v. 290; p. 723.

Automobile direction-indicator and wheel-angle gage. J. Stano. No. 1,391,701; Sept. 27; v. 290; p. 659.

Automobile direction-indicators, Lamp-bracket for. J. I. Stanfa. No. 1,391,862; Sept. 27; v. 290; p. 679.

Automobile direction-signal. W. S. Harris, W. Cronau, and F. I. Jackson. No. 1,391,954; Sept. 27; v. 290; p. 710.

Automobile direction-signal. C. F. Lynn. No. 1,391,686; Sept. 27; v. 290; p. 656.

Automobile-lock. E. W. Hessel. No. 1,392,158; Sept. 27; v. 290; p. 752.

Automobile-lock. J. F. Mills. No. 1,392,194; Sept. 27; v. 290; p. 759.

Automobile-motors and other oil-engines, Air and fuel heater for. J. N. Wood and F. Roewekamp. No. 1,391,709; Sept. 27; v. 290; p. 661.

Automobile-water-bag holder. L. E. Thompson. No. 1,392,092; Sept. 27; v. 290; p. 739.

Automobiles, Ash-pit for gas-producers mounted on. V. L. Cazes. No. 1,391,877; Sept. 27; v. 290; p. 695.

Automobiles, Signaling device for. W. L. Hewes. No. 1,391,830; Sept. 27; v. 290; p. 685.

Auxiliary protector. F. W. Billings. No. 1,391,665; Sept. 27; v. 290; p. 652.

Axle boxes, Dust-guard for car-. A. Currie. No. 1,391,998; Sept. 27; v. 290; p. 721.

Bait manufacture, Fish-. H. S. Dills. No. 1,391,670; Sept. 27; v. 290; p. 653.

Balls, Racking-frame for pool-. J. H. McCool. No. 1,391,901; Sept. 27; v. 290; p. 699.

Bands or belts, Machine for the continuous vulcanization of. L. A. Subers. No. 1,391,805; Sept. 27; v. 290; p. 679.

Barium chlorate, Producing. E. P. Schoch. No. 1,391,858; Sept. 27; v. 290; p. 691.

Barrel, Collapsible. W. H. McCrery. No. 1,391,900; Sept. 27; v. 290; p. 699.

Bath-spray. J. J. Donovan. No. 1,391,766; Sept. 27; v. 290; p. 672.

Bearing-dressing device. C. S. Overman. No. 1,392,208; Sept. 27; v. 290; p. 762.

Bearing, Roller-. G. L. Miller. No. 1,392,019; Sept. 27; v. 290; p. 725.

Bed, Folding. J. Johnsyn. No. 1,392,169; Sept. 27; v. 290; p. 754.

Bell, End. E. Mattman. No. 1,392,073; Sept. 27; v. 290; p. 735.

Belt, Abdominal. F. G. Baugatz. No. 1,392,101; Sept. 27; v. 290; p. 740.

Belt-lacing tool. I. M. Jacobs and W. Cramer. No. 1,391,736; Sept. 27; v. 290; p. 667.

Belt or strap. D. A. MacArthur. No. 1,392,256; Sept. 27; v. 290; p. 772.

Beveling and sealing clamp. C. E. Maynard. No. 1,391,784; Sept. 27; v. 290; p. 675.

Binder and economizer, Carbon. J. A. White. No. 1,391,872; Sept. 27; v. 290; p. 694.

Binder, Loose-leaf. E. L. Krag. No. 1,391,780; Sept. 27; v. 290; p. 674.

Blade-holder. R. L. Lightfoot. No. 1,391,842; Sept. 27; v. 290; p. 688.

Blowtorch. F. E. Gerstenberger. No. 1,391,774; Sept. 27; v. 290; p. 673.

Boat hull, Flying-. H. Kleckler. No. 1,392,279; Sept. 27; v. 290; p. 776.

Boat, Unsinkable. S. Ponzio. No. 1,392,217; Sept. 27; v. 290; p. 763.

Boiler-feeding injector. B. T. Williston. No. 1,392,098; Sept. 27; v. 290; p. 740.

Bomb, Water-. F. Smith. No. 1,391,800; Sept. 27; v. 290; p. 678.

Book-holder. J. A. Nakoney. No. 1,392,200; Sept. 27; v. 290; p. 760.

Boot and shoe sole, Composite. A. D. Nearon. No. 1,392,201; Sept. 27; v. 290; p. 761.

Boring-tool, Adjustable. O. Nelson. No. 1,392,203; Sept. 27; v. 290; p. 761.

Boring tool, Electrician's joist-. J. C. Moore. No. 1,391,844; Sept. 27; v. 290; p. 688.

Bowl, Nut-. L. and H. Farber. No. 1,392,134; Sept. 27; v. 290; p. 747.

Box: *See*—
Outlet-box.

Box-finishing machine. A. Bell. No. 1,392,102; Sept. 27; v. 290; p. 741.

Box-making machine. H. A. Denmire. No. 1,391,669; Sept. 27; v. 290; p. 653.

Bracket: *See*—
Scaffold-bracket.

Braiding-machine carrier. J. B. Hale. No. 1,391,682; Sept. 27; v. 290; p. 655.

Brake: *See*—
Sleigh-brake.

Brake-bands, Device for lining and relining. M. B. Harrison. No. 1,391,894; Sept. 27; v. 290; p. 698.

Brake-rod jaw. S. H. Campbell. No. 1,391,716; Sept. 27; v. 290; p. 663.

Braking device, Electromagnetic. C. A. M. Weber. No. 1,392,032; Sept. 27; v. 290; p. 727.

Brassière. S. Bosky. No. 1,391,936; Sept. 27; v. 290; p. 707.

Brush. J. Dworniczak. No. 1,391,882; Sept. 27; v. 290; p. 696.

Brush, Boiler-tube. J. Bergesen, Sr. No. 1,392,105; Sept. 27; v. 290; p. 741.

Brush, Folding. W. R. McDermott and C. E. Showalter. No. 1,391,783; Sept. 27; v. 290; p. 675.

Buckle. J. H. and F. P. Kintzele. No. 1,392,064; Sept. 27; v. 290; p. 733.

Buffing-machine. J. Keller. No. 1,392,172; Sept. 27; v. 290; p. 754.

Building construction. J. Hundley. No. 1,391,897; Sept. 27; v. 290; p. 699.

Buildings, System of integrally-cast reinforced-concrete pitched-roof construction for. E. D. Martin. No. 1,392,280; Sept. 27; v. 290; p. 776.

Bulk-cargo carrier. H. P. Frear. No. 1,391,946; Sept. 27; v. 290; p. 709.

Bull-hook. R. M. Stevenson. No. 1,392,026; Sept. 27; v. 290; p. 726.

Bumper, Vertical collision-. P. V. Elliott. No. 1,392,001; Sept. 27; v. 290; p. 721.

Bumpers, Automatic fuel-supply-regulating means for hydrocarbon-. J. H. Holland. No. 1,391,956; Sept. 27; v. 290; p. 711.

Burner: *See*—
Liquid-fuel burner. Oil-burner.

Burners, Valve-operating mechanism for vapor-. O. E. Quinton. No. 1,391,976; Sept. 27; v. 290; p. 715.

Bushing-remover. H. Konopaska. No. 1,391,837; Sept. 27; v. 290; p. 687.

Cabinet, Filing-. J. Herzog. No. 1,392,055; Sept. 27; v. 290; p. 731.

Calendar, Permanent. C. Teichtner. No. 1,391,917; Sept. 27; v. 290; p. 703.

Camera-support, Portable. S. R. Gray. No. 1,392,144; Sept. 27; v. 290; p. 749.

Candles, night-lights, and such like articles, Apparatus for manufacturing and packing. E. Walls. No. 1,392,286; Sept. 27; v. 290; p. 778.

Candy and producing. L. A. Thompson. No. 1,391,918; Sept. 27; v. 290; p. 703.

Canned foods, Treating. O. H. Hansen. No. 1,391,953; Sept. 27; v. 290; p. 710.
Cantaliver-springs, Attachment for. P. Pirwitz. No. 1,391,851; Sept. 27; v. 290; p. 690.
Carburcter. F. H. Ball. No. 1,391,930; Sept. 27; v. 290; p. 706.
Carbureter. J. V. Giesler. No. 1,392,141; Sept. 27; v. 290; p. 748.
Carbureter, Auxiliary. P. J. Lynch. No. 1,391,890; Sept. 27; v. 290; p. 699.
Carbureter-control mechanism. F. H. and F. O. Ball. No. 1,391,931; Sept. 27; v. 290; p. 706.
Carbureters, Vacuum feeding device for. F. V. Risinger. No. 1,391,793; Sept. 27; v. 290; p. 677.
Car-mover. G. L. Bonham. No. 1,391,715; Sept. 27; v. 290; p. 662.
Car-replacer. T. H. Bellows. No. 1,391,819; Sept. 27; v. 290; p. 683.
Car, Tank-. H. P. Andresen. No. 1,391,663; Sept. 27; v. 290; p. 662.
Cars, Automatic coupling for mine-. G. T. Gregory and H. W. Burket. No. 1,392,145; Sept. 27; v. 290; p. 749.
Cars, Bolt for loaded grain-. C. R. Armstrong. No. 1,391,661; Sept. 27; v. 290; p. 651.
Cars, Brake mechanism for railway-. J. Relf. No. 1,391,977; Sept. 27; v. 290; p. 715.
Cars, Trolley-wheel for electric street-. J. S. Navarro. No. 1,391,903; Sept. 27; v. 290; p. 700.
Carpet, rugs, table-covers, &c., Manufacture of tapestry or printed. J. Morton. No. 1,391,785; Sept. 27; v. 290; p. 675.
Carrier: *See*—
Braiding-machine carrier. Bulk-cargo carrier.
Castings, Producing hollow. A. H. Emery. No. 1,391,675; Sept. 27; v. 290; p. 654.
Catalyst and making same. C. Bosch, O. Schmidt, and A. Mittasch. No. 1,391,666; Sept. 27; v. 290; p. 652.
Cereal and making the same. G. H. Saunders. No. 1,391,696; Sept. 27; v. 290; p. 658.
Chain-hook. B. J. Long. No. 1,392,184; Sept. 27; v. 290; p. 757.
Chain-tightener. P. M. Quint. No. 1,392,221; Sept. 27; v. 290; p. 764.
Chair: *See*—

Duck-decoys, Counterbalance for. G. W. Klock. No. 1,392,065; Sept. 27; v. 290; p. 733.
Dumping-bodies, Tilting mechanism for. G. W. Berry. No. 1,392,107; Sept. 27; v. 290; p. 742.
Duplicating-machine. N. B. Hurd. No. 1,391,776; Sept. 27; v. 290; p. 674.
Dust and dirt can. C. J. Pugh. No. 1,391,692; Sept. 27; v. 290; p. 657.

Educational appliance. K. D. Smith. No. 1,391,986; Sept. 27; v. 290; p. 718.
Electric fitting. G. B. Thomas. No. 1,392,091; Sept. 27; v. 290; p. 738.
Electric fixtures, Making installation-loops for. A. C. Recker. No. 1,391,792; Sept. 27; v. 290; p. 677.
Electric furnaces and the like, Control for. E. F. Collins. No. 1,391,986; Sept. 27; v. 290; p. 720.
Electric heater. R. G. Ledig. No. 1,391,960; Sept. 27; v. 290; p. 712.
Electric lug. E. V. Ford. No. 1,392,136; Sept. 27; v. 290; p. 747.
Electric machine, Dynamo-. C. A. Parsons and J. Rosen. No. 1,392,022; Sept. 27; v. 290; p. 726.
Electric machine, Dynamo-. J. L. M. Yardley. No. 1,392,039; Sept. 27; v. 290; p. 729.
Electric machines, Protective apparatus for dynamo-. C. M. Moss. No. 1,392,198; Sept. 27; v. 290; p. 760.
Electric machines, Short-circuiting and brush-lifting device for dynamo-. C. B. Mills. No. 1,392,193; Sept. 27; v. 290; p. 759.
Electric switch. E. V. Hartford. No. 1,391,955; Sept. 27; v. 290; p. 711.
Electric switch. A. McDannold. No. 1,391,782; Sept. 27; v. 290; p. 675.
Electric terminal. R. B. Vessey and A. Schmidt. No. 1,391,810; Sept. 27; v. 290; p. 680.
Electrical apparatus. W. B. Moses. No. 1,391,967; Sept. 27; v. 290; p. 713.
Electrical condenser. W. Dubilier. No. 1,391,672; Sept. 27; v. 290; p. 653.
Electrical distribution, System of. J. K. Delano. No. 1,392,252; Sept. 27; v. 290; p. 771.
Electrical measuring instrument. A. Muratori. No. 1,392,199; Sept. 27; v. 290; p. 760.
Electrodes, Manufacture of carbon. E. Szarvasy. No. 1,392,267; Sept. 27; v. 290; p. 774.
Electrodes or of pure retort-carbon, Manufacture of carbon. E. Szarvasy. No. 1,392,266; Sept. 27; v. 290; p. 774.
Elevator. C. E. Ouillett. No 1,392,078; Sept. 27; v. 290; p. 736.
Elevator. T. J. Sturtevant. No. 1,391,703; Sept. 27; v. 290; p. 660.
Elevator. T. J. Sturtevant. No. 1,391,704; Sept. 27; v. 290; p. 660.
Explosives, Protective mixture for high. W. T. Scheele. No. 1,391,796; Sept. 27; v. 290; p. 678.
Exposure-indicator. E. E. Underwood. No. 1,391,870; Sept. 27; v. 290; p. 693.
Embroidery-frame. V. Daniel. No. 1,392,123; Sept. 27; v. 290; p. 745.
Engine: *See*—
Internal-combustion engine.
Engine manifold, Explosive-. L. E. Johnson. No. 1,392,108; Sept. 27; v. 290; p. 754.
Engine-mounting. H. E. Schank. No. 1,391,697; Sept. 27; v. 290; p. 658.
Engines, Lubricating device for internal-combustion. D. C. Heister. No. 1,391,734; Sept. 27; v. 290; p. 666.
Engines, Lubricating system for internal-combustion. E. P. du Pont. No. 1,391,722; Sept. 27; v. 290; p. 664.
Engines, Mechanism for starting gas-. T. Gendarme. No. 1,392,139; Sept. 27; v. 290; p. 748.
Engines, Reversing-gear for internal-combustion. J. F. Van Tuyl. No. 1,391,706; Sept. 27; v. 290; p. 660.
Engines, Safety device for. W. R. Eichenser. No. 1,391,724; Sept. 27; v. 290; p. 664.
Engines, Timer for internal-combustion. J. F. Sherbino. No. 1,391,984; Sept. 27; v. 290; p. 717.
Fabric: *See*—
Cotton fabric.
Fabrics, Machine for making layer. F. Wever No. 1,392,287; Sept. 27; v. 290; p. 778.
Faucet, Duplex. J. T. Johnson. No. 1,392,107; Sept. 27; v. 290; p. 753.
Feed device, Sight-. O. C. Norton. No. 1,392,205; Sept. 27; v. 290; p. 761.
Feeder, Hog-. F. Fouts. No. 1,392,004; Sept. 27; v. 290; p. 722.
Fender. J. A. Ringle. No. 1,392,223; Sept. 27; v. 290; p. 765.
Finishing-machine for roads and the like. H. E. Hilts. No. 1,392,161; Sept. 20; v. 290; p. 752.
Fire extinguisher, Film-. E. Strohbach. No. 1,392,233; Sept. 27; v. 290; p. 767.
Fire doors, Thermo control for. C. E. Engle. No. 1,392,002; Sept. 27; v. 290; p. 721.
Fish-eggs, Prepared. R. Gamble and E. G. Slifer. No. 1,392,253; Sept. 27; v. 290; p. 771.
Flashlight. R. L. Hunter. No. 1,392,105; Sept. 27; v. 290; p. 753.
Floor construction, System of arch-rib. E. L. Mayberry. No. 1,391,748; Sept. 27; v. 290; p. 669.
Flue-cleaner. W. Nechville. No. 1,392,202; Sept. 27; v. 290; p. 761.
Flying-machines, Apparatus for landing. H. Gernsback. No. 1,392,140; Sept. 27; v. 290; p. 748.
Flytrap, Sanitary. A. B. Heller. No. 7,392,156; Sept. 27; v. 290; p. 751.
Foldable toilet-chair, Child's. W. C. Rathjen. No. 1,391,791; Sept. 27; v. 290; p. 677.
Foot-measure. T. B. Blake. No. 1,391,714; Sept. 27; v. 290; p. 662.
Form, Collapsible. W. H. Maltman and T. R. McCoy. No. 1,391,747; Sept. 27; v. 290; p. 669.
Fouling and composition therefor, Preventing. J. A. Lillie. No. 1,392,068; Sept. 27; v. 290; p. 734.
Frame: *See*—
Embroidery-frame.
Photographic-film-supporting frame.
Front-axle radius-rod. G. S. King. No. 1,392,175; Sept. 27; v. 290; p. 755.
Fuel-burning heaters, Smoke-purifying attachment for. O. H. Titus. No. 1,392,093; Sept. 27; v. 290; p. 739.
Fuel-burning method and furnace. W. C. Drake. No. 1,391,767; Sept. 27; v. 290; p. 672.
Fuel-distributer. N. M. Lower. No. 1,391,744; Sept. 27; v. 290; p. 668.
Furnace: *See*—
Plastic-material furnace.
Furnace-door-operating mechanism. C. J. Pilliod. No. 1,391,690; Sept. 27; v. 290; p. 657.
Furnaces, Stoker for. G. C. Illingworth. No. 1,392,063; Sept. 27; v. 290; p. 733.
Fuselage. C. B. Kirkham and A. L. Thurston. No. 1,392,278; Sept. 27; v. 290; p. 776.

Nailing-machines, Clamping attachment for. R. C. Rasmussen. No. 1,392,222; Sept. 27; v. 290; p. 764.
Net, Landing-. F. R. Lewis. No. 1,391,841; Sept. 27; v. 290; p. 688.
Nipple, Lubricant-. N. W. Cummins. No. 1,391,942; Sept. 27; v. 290; p. 708.
Non-skid attachment for motor-vehicle wheels. B. M. Roof. No. 1,391,694; Sept. 27; v. 290; p. 658.
Nutcracker, Hand-. H. C. Atwood. No. 1,391,751; Sept. 27; v. 290; p. 669.
Nut-lock. S. Pajewski. No. 1,392,209; Sept. 27; v. 290; p. 762.
Nutriment-containing albumen and producing it. A. Hersfeld. No. 1,391,683; Sept. 27; v. 290; p. 655.
Oil-burner. G. H. Mahan. No. 1,392,187; Sept. 27; v. 290; p. 758.
Oils and the like, Apparatus for vaporizing fuel-. S. Peskind. No. 1,391,789; Sept. 27; v. 290; p. 676.
Ointment-applicator. W. A. E. Pfaff. No. 1,391,850; Sept. 27; v. 290; p. 689.
Ores, minerals, &c., containing the same, Recovering an element capable of forming a haloid from. H. S. Booth and G. G. Marshall. No. 1,392,043; Sept. 27; v. 290; p. 729.
Ores, minerals, &c., containing the same, Recovering an element capable of forming a haloid from. H. S. Booth and G. G. Marshall. No. 1,392,044; Sept. 27; v. 290; p. 729.
Ores, minerals, &c., containing the same, Recovering beryllium from. H. S. Booth and G. G. Marshall. No. 1,392,045; Sept. 27; v. 290; p. 730.
Ores, minerals, and other materials, Recovering beryllium from. H. S. Booth and G. G. Marshall. No. 1,392,046; Sept. 27; v. 290; p. 730.
Outlet-box. W. H. Wood. No. 1,392,038; Sept 27; v. 290; p. 729.
Oven and warming closet. A. E. England. No. 1,392,129; Sept. 27; v. 290; p. 746.
Oven, Baking-. H. E. Kerr. No. 1,391,835; Sept. 27; v. 290; p. 686.
Oven, Coke-. M. Mathy. No. 1,392,257; Sept. 27; v. 290; p. 772.
Packing-rings, Combined follower and expander for. L. H. Donkel. No. 1,392,124; Sept. 27; v. 290; p. 745.
Paper-pulp, &c., Device for leading away and distributing fiber strips in manufacturing rovings from. F. P. Priem. No. 1,392,283; Sept. 27; v. 290; p. 777.
Paper-pulp, Machine for producing rovings from. F. P. Priem. No. 1,392,282; Sept. 27; v. 290; p. 777.
Paper strips, Machine for producing narrow. F. P. Priem. No. 1,392,218; Sept. 27; v. 290; p. 764.
Paste, Sealing-. F. E. Key. No. 1,391,738; Sept. 27; v. 290; p. 667.
Pen, Fountain-. J. Strake. No. 1,392,089; Sept. 27; v. 290; p. 738.
Pentachloracetone, Production of. H. E. Buc. No. 1,391,757; Sept. 27; v. 290; p. 670.
Phonograph-motors, Frame for. G. T. Cherington. No. 1,391,717; Sept. 27; v. 290; p. 663.

Phonograph-needle. T. Fletcher. No. 1,391,884; Sept. 27; v. 290; p. 696.
Photographic-film-supporting frame. G. I. Schreiber. No. 1,391,982; Sept. 27; v. 290; p. 717.
Photographic shutter. H. E. Penton. No. 1,391,790; Sept. 27; v. 290; p. 676.
Pianissimo device of the curtain type. G. Cloetens. No. 1,392,247; Sept. 27; v. 290; p. 770.
Pianos, Harmonic damper for. G. Cloetens. No. 1,392,244; Sept. 27; v. 290; p. 769.
Pickers, Machine for making. W. A. Parmenter. No. 1,392,259; Sept. 27; v. 290; p. 773.
Picker-stick-cushioning means. T. P. Haydock. No. 1,392,154; Sept. 27; v. 290; p. 751.
Pipe-cutter. G. W. Miller. No. 1,392,192; Sept. 27; v. 290; p. 759.
Pipe-gripping device. B. J. Steen. No. 1,391,804; Sept. 27; v. 290; p. 679.
Pipe-skelp, Apparatus for handling and forming. J. Simpson and H. E. Clay. No. 1,391,912; Sept. 27; v. 290; p. 702.
Piston. W. M. Carlin. No. 1,391,938; Sept. 27; v. 290; p. 707.
Piston-packing. N. S. Williams. No. 1,392,035; Sept. 27; v. 290; p. 728.
Piston-ring. J. Arend. No. 1,391,816; Sept. 27; v. 290; p. 682.
Piston-ring. M. M. Moratta. No. 1,391,845; Sept. 27; v. 290; p. 688.
Piston-ring. L. A. Safford. No. 1,391,795; Sept. 27; v. 290; p. 677.
Piston-rings, Making. H. Stoffers. No. 1,392,027; Sept. 27; v. 290; p. 727.
Pivotal mounting. A. A. Tirrill. No. 1,392,234; Sept. 27; v. 290; p. 767.
Plastic-material furnace. C. G. Lacy. No. 1,392,181; Sept. 27; v. 290; p. 756.
Plow. J. Fairfield. No. 1,392,183; Sept. 27; v. 290; p. 747.
Plow-lifting mechanism. A. Mitchell. No. 1,392,196; Sept. 27; v. 290; p. 760.
Plows, Steering and coupling device for. E. T. Miller. No. 1,391,983; Sept. 27; v. 290; p. 712.
Pool-table. J. H. McCool. No. 1,391,909; Sept. 27; v. 290; p. 701.
Power-transmission coupling. J. Bibby. No. 1,391,713; Sept. 27; v. 290; p. 662.
Power-transmitting apparatus. L. Essner. No. 1,392,131; Sept. 27; v. 290; p. 747.
Press: *See*—
Cheese-press. Printing-press.
Presses, Combined clutch-operating gear and brake mechanism for revolution-stamping. E. Vick. No. 1,391,923; Sept. 27; v. 290; p. 704.
Pressing-machines, Safety device for. A. J. Dreher. No. 1,392,051; Sept. 27; v. 290; p. 730.
Printing, Machine for producing raised. S. Lipaius. No. 1,391,743; Sept. 27; v. 290; p. 668.
Printing-press. R. Adams. No. 1,391,711; Sept. 27; v. 290; p. 662.
Printing-presses, Sheet-supporting device for. E. P. Jennings. No. 1,392,062; Sept. 27; v. 290; p. 733.
Projection apparatus. H. N. Ott. No. 1,392,207; Sept. 27; v. 290; p. 762.
Protective device. N. S. Starr and L. E. Collier. No. 1,391,915; Sept. 27; v. 290; p. 702.
Pump. G. W. Slocomb. No. 1,391,799; Sept. 27; v. 290; p. 678.
Pump. J. A. Whiting. No. 1,391,873; Sept. 27; v. 290; p. 694.
Pump-lubrication system, Deep-well-. V. Schleyer. No. 1,392,227; Sept. 27; v. 290; p. 766.
Pump-operating apparatus. D. Rohen. No. 1,392,224; Sept. 27; v. 290; p. 765.
Pump, Rotary. M. Tamini. No. 1,392,090; Sept. 27; v. 290; p. 738.
Pumps, Self-maintaining lubricating system for deep-well. V. Schleyer. No. 1,392,228; Sept. 27; v. 290; p. 766.
Punch, Hand-. E. C. Green. No. 1,391,890; Sept. 27; v. 290; p. 697.
Rack: *See*—
Household drying-rack.
Radiator construction, Tubular-. S. Volk. No. 1,391,871; Sept. 27; v. 290; p. 694.
Rail-chair. D. Ambrose. No. 1,391,658; Sept. 27; v. 290; p. 651.
Rail-clamp. F. Waschek. No. 1,392,030; Sept. 27; v. 290; p. 727.
Railway-brake indicator. B. Haskell. No. 1,391,895; Sept. 20; v. 290; p. 698.
Railway-crossing signal. A. Berg. No. 1,392,104; Sept. 27; v. 290; p. 741.
Railway safety-signal. P. Adams. No. 1,391,815; Sept. 27; v. 290; p. 682.
Railway-vehicles, Bogie for. H. Liechty and J. Werz. No. 1,391,742; Sept. 27; v. 290; p. 668.
Rain-shield. J. Warshawsky. No. 1,391,925; Sept. 27; v. 290; p. 704.
Ramp-rail installation. A. J. Brookins. No. 1,392,111; Sept. 27; v. 290; p. 742.
Rat or animal trap. J. Fritsch. No. 1,392,008; Sept. 27; v. 290; p. 723.
Razor-blade holder. J. P. Cruise. No. 1,392,122; Sept. 27; v. 290; p. 745.
Reading, Chart for use in teaching the art of. G. E. Jones. No. 1,392,014; Sept. 27; v. 290; p. 724.
Relay. E. E. De Camp. No. 1,392,251; Sept. 27; v. 290; p. 771.
Relay. F. L. Dodgson. No. 1,391,944; Sept. 27; v. 290; p. 708.
Resilient wheel. J. Ardo. No. 1,391,660; Sept. 27; v. 290; p. 651.
Resilient wheel. W. E. Babbitt. No. 1,392,262; Sept. 27; v. 290; p. 773.
Resilient wheel. T. C. Forbes. No. 1,391,729; Sept. 27; v. 290; p. 665.
Retort-cleaning machine. J. Niesnalski and J. Belcsynski. No. 1,392,020; Sept. 27; v. 290; p. 725.
Rim construction, Demountable-. J. G. Swain. No. 1,391,806; Sept. 27; v. 290; p. 680.
Rim, Demountable. T. G. Gerdine. No. 1,392,009; Sept. 27; v. 290; p. 723.
Ring: *See*—
Piston-ring. Spinning-ring.
Ring-spinning and doubling frames, Antiballooning and the like device for. F. Fielding and T. Potter, Jr. No. 1,391,883; Sept. 27; v. 290; p. 696.
Road-clearer. S. Immer. No. 1,392,166; Sept. 27; v. 290; p. 753.
Rock-drill, Pneumatic. C. R. Welch. No. 1,391,708; Sept. 27; v. 290; p. 661.
Rod: *See*—
Connecting-rod. Front-axle radius-rod.
Roof-truss. N. J. Wagner. No. 1,392,096; Sept. 27; v. 290; p. 739.
Ropes, cordage, &c., Retaining and releasing device for. P. W. Scholiar. No. 1,392,260; Sept. 27; v. 290; p. 773.
Rubber composition and making the same. N. Walch. No. 1,392,240; Sept. 27; v. 290; p. 768.
Sadiron. J. W. Gates. No. 1,391,888; Sept. 27; v. 290; p. 697.
Salt, &c., Steam system for manufacturing. C. L. Weil. No. 1,391,811; Sept. 27; v. 290; p. 681.
Sash balance and lock, Combination. T. Tryhook. No. 1,391,869; Sept. 27; v. 290; p. 693.
Saw. L. Dragon. No. 1,392,050; Sept. 27; v. 290; p. 730.
Saw-fitting tool. G. Anderson. No. 1,392,261; Sept. 27; v. 290; p. 773.
Saw-set. F. Sikowski. No. 1,391,910; Sept. 27; v. 290; p. 701.
Scaffold-bracket. K. R. Schuster. No. 1,391,983; Sept. 27; v. 290; p. 717.
Scaffold, Roofing-. S. Hawkins. No. 1,392,153; Sept. 27; v. 290; p. 751.
Scales, Automatic lock mechanism for dumping-. C. C. Neale. No. 1,392,075; Sept. 27; v. 290; p. 735.
Screw, Expansible. J. A. Bilterman. No. 1,392,108; Sept. 27; v. 290; p. 742.
Secondary or storage battery. E. W. Smith. No. 1,392,232; Sept. 27; v. 290; p. 767.
Separable chair. B. Albergoli. No. 1,392,242; Sept. 27; v. 290; p. 769.
Separators, Apparatus for fitting inserts in. C. W. Hazelett and F. A. Holt. No. 1,392,155; Sept. 27; v. 290; p. 751.
Serving-table. A. Boysen. No. 1,391,755; Sept. 27; v. 290; p. 670.
Sewage, Apparatus for treating. C. L. Peck. No. 1,392,214; Sept. 27; v. 290; p. 763.
Sewage treatment. H. W. Morgan. No. 1,392,197; Sept. 27; v. 290; p. 760.
Sewage treatment. C. L. Peck. No. 1,392,211; Sept. 27; v. 290; p. 762.
Sewage treatment. C. L. Peck. No. 1,392,212; Sept. 27; v. 290; p. 762.
Sewage treatment. C. L. Peck. No. 1,392,213; Sept. 27; v. 290; p. 763.
Sewing-machine. W. T. B. Roberts. No. 1,391,978; Sept. 27; v. 290; p. 716.
Sewing-machine attachment. D. Kwon. No. 1,392,180; Sept. 27; v. 290; p. 756.
Sewing-machines, Strip-guide for. J. Boston. No. 1,391,876; Sept. 27; v. 290; p. 695.
Sharpener for cutting instruments. C. C. Dickinson. No. 1,391,763; Sept. 27; v. 290; p. 671.
Sharpener, Lawn-mower. R. Stone. No. 1,391,702; Sept. 27; v. 290; p. 660.
Shears. O. A. Goetze. No. 1,391,827; Sept. 27; v. 290; p. 684.
Sheet metal, Device for straightening. E. P. Orner. No. 1,391,787; Sept. 27; v. 290; p. 676.
Sheet-supporting device. E. P. Jennings. No. 1,392,061; Sept. 27; v. 290; p. 732.
Sheet-turner. W. A. Lucke. No. 1,392,185; Sept. 27; v. 290; p. 757.
Shim. P. E. Fritz. No. 1,391,886; Sept. 27; v. 290; p. 696.
Shock-absorber. P. F. Halferty. No. 1,392,150; Sept. 27; v. 290; p. 750.
Shoe-lace tip. J. Christian. No. 1,392,270; Sept. 27; v. 290; p. 774.
Shoe, Sporting-. D. J. Golden. No. 1,392,142; Sept. 27; v. 290; p. 749.
Shoe-stiffener. H. H. Beckwith and E. E. Cox. No. 1,391,932; Sept. 27; v. 290; p. 706.
Shoes, Machine for marking vamps of. C. Augustine. No. 1,391,752; Sept. 27; v. 290; p. 670.
Shoveling-machine. H. McDermott. No. 1,392,069; Sept. 27; v. 290; p. 734.

Shovel, Power-. C. S. Johnson. No. 1,391,737; Sept. 27; v. 290; p. 667.
Shuttle, Bobbin-. J. B. Bentley. No. 1,392,042; Sept. 27; v. 290; p. 729.
Signal: *See*—
Automobile direction-signal.
Railway-crossing signal.
Railway safety-signal.
Signal system, Block-. F. Grunig. No. 1,392,254; Sept. 27; v. 290; p. 771.
Signaling device. J. Butera and G. Sorce. No. 1,392,048; Sept. 27; v. 290; p. 730.
Sled, Hand-. W. E. Sherwood. No. 1,392,083; Sept. 27; v. 290; p. 737.
Sleigh-brake. M. W. Seifert. No. 1,392,229; Sept. 27; v. 290; p. 766.
Snap-fastener. W. W. Penfield. No. 1,392,281; Sept. 27; v. 290; p. 777.
Snow-melting apparatus. B. Goldman. No. 1,391,889; Sept. 27; v. 290; p. 697.
Snowplow. W. A. Everitt. No. 1,392,132; Sept. 27; v. 290; p. 747.
Soap, Apparatus for molding. C. O. Phillips. No. 1,391,970; Sept. 27; v. 290; p. 714.
Soap, Apparatus for molding. C. O. Phillips. No. 1,391,971; Sept. 27; v. 290; p. 714.
Soap, Method and apparatus for molding. C. O. Phillips. No. 1,391,972; Sept. 27; v. 290; p. 714.
Soap, Apparatus for molding. C. O. Phillips. No. 1,391,973; Sept. 27; v. 290; p. 714.
Soap, Apparatus for molding and cooling. C. O. Phillips. No. 1,391,974; Sept. 27; v. 290; p. 715.
Soap, Method for molding and cooling. C. O. Phillips. No. 1,391,975; Sept. 27; v. 290; p. 715.
Socket-wrench. F. Foss. No. 1,391,677; Sept. 27; v. 290; p. 654.
Socket-wrench. M. Quint. No. 1,392,220; Sept. 27; v. 290; p. 764.
Soldering-iron. R. C. Parent. (Reissue.) No. 15,202; Sept. 27; v. 290; p. 778.
Soldering machine, Can-. J. C. Strickler. No. 1,391,867; Sept. 27; v. 290; p. 693.
Sound-box mounting. C. Scrabic. No. 1,391,797; Sept. 27; v. 290; p. 678.
Sound-signals, Receiving device for subaqueous. W. Hahnemann and H. Hecht. No. 1,391,681; Sept. 27; v. 290; p. 655.
Spark-plug. W. B. Pohle. No. 1,391,691; Sept. 27; v. 290; p. 657.
Spark-plug intensifier. J. M. Paul. No. 1,392,023; Sept. 27; v. 290; p. 726.
Spectacle-holder. V. E. Duncanson. No. 1,391,674; Sept. 27; v. 290; p. 654.
Speed spindle, High-. J. W. Parker. No. 1,392,210; Sept. 27; v. 290; p. 762.
Spinning-ring. J. K. Lanning. No. 1,392,067; Sept. 27; v. 290; p. 734.
Spline-carrying-machine element. A. J. Fisher. No. 1,391,728; Sept. 27; v. 290; p. 665.
Spring-wheel. M. Kosteckl. No. 1,391,740; Sept. 27; v. 290; p. 667.
Stage illusions, Apparatus for producing. G. Rogees and N. E. Polytes. No. 1,391,854; Sept. 27; v. 290; p. 690.
Stake. E. Olson. No. 1,392,206; Sept. 27; v. 290; p. 761.
Stamping device. F. J. Schmidt. No. 1,391,856; Sept. 27; v. 290; p. 691.
Static and dynamic unbalance of rotating bodies, Machine for determining the. M. W. Torbet. No. 1,392,028; Sept. 27; v. 290; p. 727.
Staybolt structure. B. E. D. Stafford and E. I. Dodds. No. 1,392,235; Sept. 27; v. 290; p. 767.
Staybolt structure. B. E. D. Stafford and E. I. Dodds. No. 1,392,236; Sept. 27; v. 290; p. 768.
Steam-condensing plants, Automatic control of. H. Fothergill. No. 1,392,003; Sept. 27; v. 290; p. 722.
Steering-posts, Lock for. J. E. Lynch and J. W. Woodward. No. 1,392,186; Sept. 27; v. 290; p. 757.
Stone, Converting limestone into a compressible artificial. C. L. V. Zimmer. No. 1,391,710; Sept. 27; v. 290; p. 661.
Stop, Automatic. F. Oberst. No. 1,392,077; Sept. 27; v. 290; p. 735.
Storm-sash hanger. J. J. Schubert. No. 1,391,700; Sept. 27; v. 290; p. 659.
Stove-leg connection. A. T. Weiss. No. 1,392,033; Sept. 27; v. 290; p. 728.
Stove or range. F. Kessler, Sr. No. 1,391,778; Sept. 27; v. 290; p. 674.
Strainer. W. Dixon. No. 1,392,000; Sept. 27; v. 290; p. 721.
Strap-holder, belt-fastener, &c. O. W. J. Chester. No. 1,391,879; Sept. 27; v. 290; p. 695.
Sulfite cellulose, Production of high-percentage. E. Bronnert. No. 1,392,047; Sept. 27; v. 290; p. 730.

Feed, Poultry. Josey Miller Co. No. 147,002; Sept. 27; v. 290; p. 805.

Flavoring-matter. A. Finkenstein. No. 146,986; Sept. 27; v. 290; p. 804.

Flour, Wheat-. Sparks Milling Company. No. 147,037; Sept. 27; v. 290; p. 806.

Food ingredient to be mixed with flour. Campbell Baking Company. No. 146,962; Sept. 27; v. 290; p. 803.

Foods, Certain. Twitchell-Champlin Company. No. 147,040; Sept. 27; v. 290; p. 806.

Fruits, Fresh deciduous. Lloyd Garretson Co. No. 146,988; Sept. 27; v. 290; p. 804.

Gargle and nasal spray. San Antonio Drug Co. No. 147,028; Sept. 27; v. 290; p. 805.

Germicidal preparation, Certain. Scalp Germicide Company. No. 147,031; Sept. 27; v. 290; p. 805.

Glass. Corning Glass Works. No. 147,052; Sept. 27; v. 290; p. 808.

Grapefruit paste. J. Haritopol. No. 146,995; Sept. 27; v. 290; p. 804.

Gum, Chewing-. India Company. No. 147,001; Sept. 27; v. 290; p. 805.

Hair-receivers, bottle-holders, salve-jars, &c. Newark Tortoise Shell Novelty Co. No. 147,059; Sept. 27; v. 290; p. 808.

Hair-tonic. C. L. Riley. No. 147,020; Sept. 27; v. 290; p. 805.

Hair-tonic and a preparation to straighten obstinate hair. Mrs. A. Batts. No. 146,950; Sept. 27; v. 290; p. 803.

Ice-cream, ices, and frozen custard, Shipping-containers for. W. F. Luick. No. 147,058; Sept. 27; v. 290; p. 808.

Insecticide. N. H. Brown. No. 146,958; Sept. 27; v. 290; p. 803.

Insecticide. Heyers & Vanriper. No. 146,997; Sept. 27; v. 290; p. 804.

Leather and fabric articles, Dressing and cleaners for. Whittemore Brothers. No. 147,067; Sept. 27; v. 290; p. 809.

Liniment, Certain. Weightman Chemical Company. No. 147,042; Sept. 27; v. 290; p. 806.

Medicinal and toilet preparations. J. J. Moore. No. 147,014; Sept. 27; v. 290; p. 805.

Medicinal preparation. Calco Chemical Company. No. 146,961; Sept. 27; v. 290; p. 803.

Medicinal preparation. Hall & Ruckel. No. 146,992; Sept. 27; v. 290; p. 804.

Medicinal preparation, Certain. San Antonio Drug Co. No. 147,029; Sept. 27; v. 290; p. 805.

Medicinal preparation for treatment of infantile troubles. Dr. M. F. Groves Son & Co. No. 146,991; Sept. 27; v. 290; p. 804.

Medicinal preparations, Certain. A. A. Pearson. No. 147,017; Sept. 27; v. 290; p. 805.

Medicine for constipation, fever, &c. Dusco Co. No. 146,984; Sept. 27; v. 290; p. 804.

Medicine for the blood. W. F. Severa Co. No. 147,034; Sept. 27; v. 290; p. 806.

Medicine for the kidneys and bladder. Mrs. K. G. Ellis. No. 146,985; Sept. 27; v. 290; p. 804.

Oil, Castor-. Spencer Kellogg & Sons. No. 147,004; Sept. 27; v. 290; p. 805.

Oil, Fulling and scouring. U. S. Oil & Supply Co. No. 147,016; Sept. 27; v. 290; p. 805.

Oils, Cooking-. Capitol Refining Co. No. 146,963; Sept. 27; v. 290; p. 803.

Oils, Salad-. Capitol Refining Co. No. 146,964; Sept. 27; v. 290; p. 803.

Oils with or without resin, Dechlorinated. H. A. Gardner. No. 146,987; Sept. 27; v. 290; p. 804.

Ointment. Mother's Remedies Company. No. 147,015; Sept. 27; v. 290; p. 805.

Paints, Cold-water. Devoe & Raynolds Co. No. 147,053; Sept. 27; v. 290; p. 808.

Paprika, Spanish. V. Rodriguez. No. 147,023; Sept. 27; v. 290; p. 805.

Perfumes and face-powders. K. M. Boorman. No. 146,955; Sept. 27; v. 290; p. 803.

Perfumes, toilet waters, face-powders, &c. F. J. de S. Coty. No. 146,974; Sept. 27; v. 290; p. 804.

Perfumes, toilet waters, and brilliantine. F. J. de S. Coty. Nos. 146,975-9; Sept. 27; v. 290; p. 804.

Perfumes, toilet waters, &c. F. J. de S. Coty. Nos. 146,980-1; Sept. 27; v. 290; p. 804.

Petroleum fuels, Liquid for intensifying, &c. A. W. Almquist. No. 146,940; Sept. 27; v. 290; p. 803.

Pharmaceutical and toilet preparations. H. G. Bitter. No. 146,953; Sept. 27; v. 290; p. 803.

Photographs. Vanity Fair Studios Inc. No. 147,066; Sept. 27; v. 290; p. 809.

Pills, Laxative. C. E. Cessna. No. 146,965; Sept. 27; v. 290; p. 803.

Poultry, Live. M. C. Peters Mill Co. No. 147,013; Sept. 27; v. 290; p. 805.

Popcorn and nut confectionery. S. R. Mercer. No. 147,011; Sept. 27; v. 290; p. 805.

Powders and creams, face-powder compacts, and perfumes, Face. J. J. Rodriguez. No. 147,022; Sept. 27; v. 290; p. 805.

Powders, facial cream, &c., Talcum and face. Lady Christabel Company. No. 147,007; Sept. 27; v. 290; p. 805.

Preparation for removing rust. Rusticide Company. No. 147,024; Sept. 27; v. 290; p. 805.

Preparation for treatment of tired feet, rheumatism, and nervous pains. Riveroll & Guzman Company. No. 147,021; Sept. 27; v. 290; p. 805.

Preparation for use in treatment of stomach troubles. Hall & Ruckel. No. 146,993; Sept. 27; v. 290; p. 804.

Preparation of an oily nature for treating textile fabrics. E. F. Houghton & Co. No. 146,998; Sept. 27; v. 290; p. 804.

Remedy for constipation. S. Drain, M. D. No. 146,983; Sept. 27; v. 290; p. 804.

Rope, cord, and twine. American Manufacturing Company. Nos. 146,941-3; Sept. 27; v. 290; p. 803.

Rouge. F. R. Arnold & Co. No. 146,945; Sept. 27; v. 290; p. 803.

Saddles, collars, and harness parts. Perkins-Campbell Company. No. 147,060; Sept. 27; v. 290; p. 808.

Salve, Corn-. D. Thall. No. 147,039; Sept. 27; v. 290; p. 806.

Sears, Roebuck and Company, Chicago, Ill. Candles. No. 147,031; Sept. 27; v. 290; p. 806.
Spurs and bits. P. M. Kelly. No. 147,057; Sept. 27; v. 290; p. 808.
Sugar, Corn-. Corn Products Refining Co. No. 146,973; Sept. 27; v. 290; p. 804.
Tents, awnings, paulins, &c. Clifton Mfg. Company. Nos. 147,045–51; Sept. 27; v. 290; p. 807.
Toilet and pharmaceutical preparations, Certain. Sanitol Chemical Laboratory Co. No. 147,030; Sept. 27; v. 290; p. 805.
Toilet preparations, Certain. L. B. Kerlin. No. 147,005; Sept. 27; v. 290; p. 805.
Toilet waters, perfumes, &c. A. Salikof. No. 147,025; Sept. 27; v. 290; p. 805.
Tonic, Certain. Clyde Collins Company. No. 146,968; Sept. 27; v. 290; p. 803.
Tonic, General. W. B. Bond & Co. No. 146,954; Sept. 27; v. 290; p. 803.
Tonic, General. W. F. Kuhlbach. No. 147,006; Sept. 27; v. 290; p. 805.
Tonic, General. D. Maddaloni. No. 147,009; Sept. 27; v. 290; p. 805.
Tonic, General. W. S. Pickering. No. 147,010; Sept. 27; v. 290; p. 805.
Tonic, General. Scranton Distributing and Manufacturing Company. No. 147,032; Sept. 27; v. 290; p. 806.
Tonic, General. Strantza Company. No. 147,038; Sept. 27; v. 290; p. 806.
Tonic, Medicinal food. Mazomul Company. No. 147,010; Sept. 27; v. 290; p. 805.
Tooth-paste. Kaffir Chemical Laboratories. No. 147,003; Sept. 27; v. 290; p. 805.
Twines. J. E. Barbour Company. No. 146,948; Sept. 27; v. 290; p. 803.
Water. Coe & Hill. No. 140,969; Sept. 27; v. 290; p. 804.

ALPHABETICAL LIST OF TRADE-MARK TITLES.

PUBLISHED FOR OPPOSITION.

[Act of Feb. 20, 1905, Sec. 6, as amended Mar. 2, 1907.]

Acid concentrators. Chemical Construction Company. No. 111,376; Sept. 27; v. 290; p. 779.
Beverage, Non alcoholic malt-. O. E. Maurer. No. 145,470; Sept. 27; v. 290; p. 787.
Boots and shoes. Converse Rubber Shoe Company. No. 143,807; Sept. 27; v. 290; p. 785.
Boots and shoes, Infants' and children's. M. C. Hyman. No. 133,968; Sept. 27; v. 290; p. 781.
Boots and shoes, Leather. Hamilton Brown Shoe Co. No. 140,332; Sept. 27; v. 290; p. 783.
Boots and shoes, Leather. Somervell Brothers Limited. No. 142,035; Sept. 27; v. 290; p. 784.
Boots, shoes, and slippers. United States Rubber Company. No. 144,651; Sept. 27; v. 290; p. 786.
Bottle, can, biscuit-tin, &c., washers, dish-washers, milk-bottle fillers, &c. Rice & Adams Corporation. No. 149,148; Sept. 27; v. 290; p. 797.
Boxes, Collapsible cardboard hat-. Hoague-Sprague Corp. No. 150,448; Sept. 27; v. 290; p. 800.
Braces, breast-drills, hammers, hatchets, &c., Ratchet and non-ratchet. Vaughan & Bushnell Manufacturing Company. No. 148,099; Sept. 27; v. 290; p. 794.
Brassières. G. M. Polx, Inc. No. 147,045; Sept. 27; v. 290; p. 791.
Brassières and corsets. A. Zwiebelson. No. 143,228; Sept. 27; v. 290; p. 785.
Butter, eggs, ice-cream, &c. Henningsen Produce Co. No. 145,400; Sept. 27; v. 290; p. 787.
Cake. Ward Baking Company. No. 145,663; Sept. 27; v. 290; p. 788.
Calendars. T. P. Dolan. No. 150,803; Sept. 27; v. 290; p. 801.
Candy. Heit Miller Lau Co. No. 145,018; Sept. 27; v. 290; p. 787.
Cans, Metal. Sheet Metal Specialty Company. No. 151,065; Sept. 27; v. 290; p. 801.
Cartoons, Series of. Fontaine Fox. Nos. 150,605–9; Sept. 27; v. 290; p. 800.
Casserole-holders. Josephine M. Dillmeier Company. No. 146,254; Sept. 27; v. 290; p. 789.
Casters. Bassick Company. No. 150,001; Sept. 27; v. 290; p. 799.
Castings and forgings, Iron and steel. Rockford Malleable Iron Works. No. 148,761; Sept. 27; v. 290; p. 796.
Chocolates and candies. Novin Candy Co. No. 147,253; Sept. 27; v. 290; p. 791.
Cigarettes. Axton-Fisher Tobacco Company. No. 141,344; Sept. 27; v. 290; p. 784.
Cleaning compound for wood, metal, &c., Liquid-. Sanitation and Supply Company. No. 149,872; Sept. 27; v. 290; p. 799.
Cleaning fluid and dry cleaner for cloth and leather. N. Nrofitos. No. 134,262; Sept. 27; v. 290; p. 781.
Coats and bathrobes, Hooded. A. Fisch. No. 133,774; Sept. 27; v. 290; p. 780.
Coffee. Direct Coffee Mills. No. 147,417; Sept. 27; v. 290; p. 792.
Complexion-meal, nail-polish, antiseptic oil, brilliantine, &c. G. S. Kolar Laboratories. No. 146,565; Sept. 27; v. 290; p. 790.
Cotton, Mercerized mending-. Dexter Yarn Company. No. 145,674; Sept. 27; v. 290; p. 788.
Cotton piece goods. Burton Bros. & Co. No. 151,607; Sept. 27; v. 290; p. 802.
Cotton piece goods. Claflins Incorporated. No. 151,710; Sept. 27; v. 290; p. 802.
Cotton piece goods. Lang Bros. No. 146,833; Sept. 27; v. 290; p. 790.
Cotton piece goods, White. California Cotton Mills Company. No. 150,513; Sept. 27; v. 290; p. 800.
Crates, Bottle-. York Milk Machinery Company. No. 149,667; Sept. 27; v. 290; p. 798.
Crates for fruits and vegetables. A. Bennett & Co. No. 151,255; Sept. 27; v. 290; p. 801.
Cream, Face-. G. S. Johnson. No. 140,040; Sept. 27; v. 290; p. 783.
Dress-shields. S. Bakal & Son. No. 140,773; Sept. 27; v. 290; p. 784.
Dish-scraper. J. S. Lewis. No. 144,467; Sept. 27; v. 290; p. 785.
Dresses and rompers, Children's. Simple Simon Manufacturing Company. No. 145,654; Sept. 27; v. 290; p. 788.
Dresses and skirts. Domestic Products Co. No. 146,699; Sept. 27; v. 290; p. 790.
Drills, planers, grinders, &c., Pneumatic. Turbine Air Tool Company. No. 132,897; Sept. 27; v. 290; p. 780.
Dyes. White Tar Company. No. 149,159; Sept. 27; v. 290; p. 798.
Engines, Internal-combustion. San Antonio Machine & Supply Company. No. 148,243; Sept. 27; v. 290; p. 795.
Engines, Piston pins and valves of internal-combustion. G. Harris. No. 147,546; Sept. 27; v. 290; p. 793.
Envelopes, file-folders, and file-pockets, Both filing and mailing. J. W. Fitzgerald. No. 142,363; Sept. 27; v. 290; p. 784.
Extract of malt sugar used for food purposes, Concentrated. H. B. Fagan. No. 145,015; Sept. 27; v. 290; p. 786.

Wheat-flour. E. C. Hawkins. No. 138,560; Sept. 27; v. 290; p. 782.
Wool and serge goods in the piece. Julius D. Booth & Son. No. 149,734; Sept. 27; v. 290; p. 798.

CLASSIFICATION OF PATENTS

ISSUED SEPTEMBER 27, 1921.

NOTE.—First number—class, second number—subclass, third number—patent number.

242— 43: 1,391,961
244— 2: 1,392,140
1,392,272
1,392,277
1,392,279
12: 1,392,005
30: 1,392,278
31: 1,392,271
245— 8.5: 1,392,165
246— 4: 1,392,254
49: 1,392,111
200: 1,391,815
202: 1,391,941
294: 1,392,104
323: 1,392,188
247— 21: 1,392,038
248— 20: 1,391,688
30: 1,391,697

248— 39: 1,391,861
43: 1,392,144
250— 17: 1,391,855
27: 1,391,671
41: 1,391,672
1,391,673
251— 64: 1,391,987
109: 1,392,167
253— 3: 1,392,210
69: 1,391,698
179: 1,391,799
188: 1,392,090
199: 1,392,227
1,392,228
254— 4: 1,391,773
33: 1,391,979
78: 1,392,221
83: 1,392,079

254— 103: 1,392,066
121: 1,391,822
131: 1,391,715
255— 42: 1,391,708
257— 24: 1,392,003
29: 1,391,989
128: 1,391,871
133: 1,391,745
238: 1,391,663
240: 1,392,003
241: 1,391,709
259— 85: 1,391,848
99: 1,392,273
261— 41: 1,391,930
62: 1,392,036
63: 1,391,931
124: 1,391,899
265— 71: 1,392,075

267— 8: 1,392,150
41: 1,391,851
66: 1,392,175
268— 4: 1,392,243
9: 1,391,685
274— 23: 1,391,797
28: 1,392,082
38: 1,391,884
279— 56: 1,392,109
114: 1,391,908
280— 22: 1,392,083
33.1: 1,391,864
33.4: 1,391,760
1,391,962
52: 1,392,114
80: 1,391,779
96.1: 1,391,692
103: 1,392,118

280— 114: 1,392,103
147: 1,392,206
282— 22: 1,391,872
283— 46: 1,392,014
284— 9: 1,392,121
287— 52: 1,391,866
1,391,727
1,391,728
82: 1,392,136
290— 35: 1,391,679
37: 1,391,967
291— 5: 1,392,230
292— 96: 1,391,920
175: 1,391,812
293— 55: 1,392,001
294— 51: 1,391,814
296— 26: 1,392,011
95: 1,391,665

296— 97: 1,391,915
141: 1,392,274
1,392,275
298— 22: 1,392,107
299— 25: 1,391,766
301— 6: 1,392,164
19: 1,391,806
23: 1,392,009
94: 1,391,905
302— 61: 1,391,744
304— 23: 1,392,153
33: 1,391,983
305— 13: 1,392,10
